"The larger question is whether or not any personal liability is imposed upon the defendants under it. The agreement shows upon its face that the plaintiff was to operate on behalf of the company that was then in process of incorporation, and which was to have the same name as that of the partnership with the addition of the word 'Limited.' It is in the form of a letter signed in the partnership name per Cavanaugh, and addressed to the plaintiff, which begins as follows: 'Pursuant to our conversation and verbal agreement . . . you will operate on behalf of the Edmonton Lumber Exchange, Limited, in the City of Winnipeg, etc.' The only thing in the document that seems to impart any personal liability on the part of the firm is that in which it says, 'We agree to pay you 50c. per thousand feet on all lumber sold . . . ;' but this is counteracted by the concluding sentence, which says, 'in connection with the other commodities such as shingles, posts, etc., that your commission on same will be one half of the net profit received on same by the company.'"

"It is said for the plaintiff that the defendants could not, by their contract, bind a non existent company, and the company could not, upon coming into existence, adopt the contract thus made for it, and the defendants therefore made themselves personally liable for the plaintiff's commissions for which he could not in law hold the company."

Implied Contract at Least

"In such case as this, the plaintiff, if pressing his claim against the company for commissions earned after its incorporation, would not be bound to prove an express contract on the part of the company to pay for the services. The mere fact of the services being performed by him and accepted by it would raise an implied contract on its part to pay him what those services were worth, so that if the contract now sued upon had never been entered into, I should say that simply by the rendering and acceptance of his services he could have held the company liable on a *quantum meruit*, and in all probability the basis of compensation fixed by the contract would have been accepted in determining what those services were worth."

"If, in this case, the plaintiff's right to recover from the company depended solely upon the contract made with him by the defendants, there would be a great deal of force in the contention that, as that contract never was and could not be made legally binding upon the company, liability for the plaintiff's claim must rest upon these defendants. But when the company's liability in no sense depended upon this contract, I cannot see how this principle can be invoked against these defendants. For the commissions earned before the incorporation, I think the defendants are liable, but they are more than paid for by the $50 payment made by them. For the commissions earned after the incorporation, I am unable to hold them liable."

PROBATE OF VERBAL WILL

For the first time in the province of Quebec, and possibly for the first time in Canada, the Superior Court on October 14 sanctioned the probate of a verbal will. Mr. Justice Surveyor, however, by written order thereon, stated that it was not to stand as a precedent. The petitioner was George Hamilton, who asked the court to grant proof of the last will and testament of his son, 2nd Lieut. Douglass Reginald Hamilton, as contained in the following words uttered by the young soldier on the eve of his departure for the war in November, 1917: "If I am killed or die on active service, I leave everything to you, father." He was killed on January 23, 1918.

OWNERSHIP OF PROPERTY BURNED

The Alliance Assurance Company is appealing in the Quebec Court of Appeal from a lower court judgment condemning it to pay $7,500 on a policy of fire insurance to James F. McLean. The policy was issued in respect to a building belonging to McLean at Cowansville, Que. The property was destroyed by fire and appellants ask for reversal of the judgment on the ground that it was in error in holding that respondent was owner of the insured building. It was urged that, as the building was under construction at the time of the fire, it remained the property of the contractor until completion. To find that respondent had an insurable interest in the building would be, it was argued, in violation of article 2571 of the Civil Code and statutory condition 10a of the policy.

BANK NOTES REDEEMED AT DISCOUNT

A. G. H[illegible], accountant, of Toronto, is suing the Royal Bank for $[illegible].121. In November last the plaintiff made two deposits amounting to $[illegible]100, and made up in part of Royal Bank notes, with the defendants in Toronto, and later was notified by the bank that they were debiting his accounts with $[illegible].121, exchange on Royal Bank bills he had deposited. The bills, he alleges, were stamped "Trinidad," and as a result of being charged up with the exchange he avers that he had to make a further deposit of $[illegible].125 to meet obligations he had incurred. He now sues for the amount of the exchange debited to his account. The defendants aver that the bills were stamped "Payable at Port of Spain, Trinidad," where they have a branch, and where they would have been accepted at par. At the time the plaintiff made his deposit in Toronto the exchange was against Trinidad, but by an error the bills were taken at par. Later, they claim the plaintiff agreed to pay the exchange. H[illegible] alleges that on other occasions the bank had accepted similar bills from him at par, and by so doing had barred any rights to claim exchange.

News of Industrial Development in Canada

Port Arthur Shipbuilding Company to Manufacture Pulp and Paper Machinery—Norwegians Investigating British Columbia Timber Resources—Capital may be Forthcoming from that Country for Investment on the Coast—Holland Co-Operative Society Canvassing Canadian Market for Flour and Foodstuffs

BECAUSE of the great growth of the pulp and paper industry at the head of the great lakes, the Port Arthur Shipbuilding Co. will undertake the manufacture of pulp and paper machinery. All classes of grinders, wet-machines, chippers, digestors and heavy paper-making machines will be manufactured. The following statement was made in Port Arthur, Ont., by P. G. Chace, vice-president of the company, in regard to the new policy:—

"In view of the pulp and paper business making such favorable progress at the head of the lakes, and with the resources in the way of wood behind this production, we believe that the time is now opportune to enter into the manufacture of pulp and paper-making machinery. In arriving at this decision, we have been prompted and guided by some of the most successful leaders in the pulp and paper industry, and through their assistance we were able to secure the services of probably the best known and ablest engineers and designers in North America.

"The acreage, floor space in our shops and facilities in the way of equipment, as contained in our plant, are most favorable for the manufacture of the heavy and complicated types of machinery and equipment necessary for the successful manufacture of pulp and paper. In addition to our present foundry facilities, which include the casting of iron and brass, we have now under consideration and hope soon to start the installation of an electric steel furnace of ample capacity to not only supply our own needs, but the requirements of the surrounding country as well. With the opportunity at hand, and the amount of business already assured us, our organization will be increased six hundred to a thousand men within a year's time. The type of labor required for this work is of the highest skilled class.

"A similar instance of just such a condition as ours is recalled by reference to one of the largest shipbuilding companies on the Atlantic coast, located in the United States, who, a number of years ago, decided to enter into the manufacture of pulp and paper machinery as a side issue to their enormous shipbuilding program, and this company to-day is probably the best known and largest manufacturer of high-grade paper machinery in the world. The organization required on that work has doubled that required for the shipbuilding industry in their plant within a few short years.

"Our shipbuilding program, we are very glad to report, has received a new impetus through the just recently securing of another new contract similar to the last type which was started on account as a stock proposition, but which was sold recently to a well-known operator. While the price at which this boat was sold is low, the work will serve to keep our men employed. With the contracts now under way—namely, the 3,000-tone two deck salt water type vessel for the Department of Marine and Fisheries, which will be ready for launching within a few weeks' time, and the [illegible],000 ton single deck lake and ocean type vessel, the keel of which will be laid shortly, we are assured of steady work for fully another year. In addition, certain negotiations now under way have reached a favorable stage on new contracts, and we hope to be able to announce the signing of same in the near future."

Looking for British Columbia Timber

H. T. Bell, a Norwegian, prominent in the lumber industry of his native land, while in Victoria recently, made the statement that Europe is looking to British Columbia to supply its timber needs, especially for big timber, and that owing to the prevailing scarcity of the latter class of timber over there and the high prices now prevailing [illegible] of the tremendous demand necessitated by the [illegible] there will be ample capital available for developing the virgin timber resources of British Columbia.

Europe is hungry for lumber, Mr. Bull stated. The Norwegian supply of big stuff is either exhausted, or what is left is held by certain interests, so that lumbermen there have to look elsewhere for their supply. Russia at present is quite out of the question as a source of supply, and even were the present political conditions there settled, most of the forest areas are not accessible. Chile, Mr. Bull said, is making a strong bid to interest European lumber interests in her lumber resources, the chief of which are in Southern Chile, but the timber there is not equal to that grown in British Columbia.

If the plans of Mr. Bull and his associates prove productive of results there will be extensive development work carried on, and, undoubtedly, he stated, more Norwegian capital will be forthcoming. In view of the prevailing high prices in Europe—prices that will, he believes, be maintained for some years to come—it is possible to manufacture here and ship to Europe on a profitable basis.

Fort William By-Law Ratified

An agreement between the Fort William Pulp and Paper Co. and the city of Fort William, Ont., has been ratified by ratepayers. In addition, two other by-laws, one for extending the street railway to the mill site and the other for building a road, have also been ratified. Particulars of the company's operations were given in these columns some time ago. The company expects to have its plant in operation by January, 1922.

By acquiring further timber limits in the Ottawa Valley, the Riordon Co., Ltd., has rounded out its holdings in that region. The limits purchased cover 1,100 square miles, and are situated tributary to the Quinze River, Northern Quebec, adjacent to the limits already owned by the company. Purchase of the property, which was formerly owned by M. J. O'Brien, includes a valuable undeveloped water power on the Quinze River, capable of development to over 100.000 horse-power.

Holland Interested in Canada

Representing the Netherlands Co-operative Society, G. A. J. Mirrer, director of that organization, is at present visiting the principal centres of this continent, including Montreal, Toronto, Chicago, Minneapolis, Kansas and others. Mr. Mirrer's present visit has been undertaken with a view of canvassing the markets of Canada and the United States as a prospective purchaser of flour and foodstuffs in America, for distribution through their co-operative stores to the members of the co-operative organization, who embrace with the Rotterdam group, with which Mr. Mirrer is more directly associated, about five hundred societies distributed throughout the little kingdom, with sales approximating sixteen million guilders, or approximately seven million dollars a year.

While Mr. Mirrer is not inclined to confine his hopes of being able to do [illegible] in Canada, within specific limitations, owing to the disarrangements discernible in the prevalent rates of exchange, and the debatable range of prices which the war has given rise to in the essential commodities of life, he [illegible], while in Montreal recently, that he was not [illegible] of being able to do some business here [illegible] of his [illegible] in the country. His main [illegible] is to endeavor to establish direct business relations with the [illegible] on this side of the water, to facilitate the work of these co-operative organizations in the purchase of wheat and flour and other foodstuff supplies.

FARMERS'

FIRE & HAIL INSURANCE COMPANY

FIRE, HAIL AND AUTOMOBILE INSURANCE

Head Office, CALGARY. Saskatchewan Office REGINA

M. P. JOHNSTON, Managing Director

As indicating the extent to which the co-operative movement has developed in Holland, Mr. Mirrer said that they had over 300 co-operative bakeries located all over the country, and that the society was engaged in the operation of factories for the manufacture of wooden shoes, clothing, soap and other articles. The clothing factory was established this year for the especial purpose of combatting the exorbitant prices engendered by the war, and was operating with every augury of success.

Domestic Canadian Reindeer

The plan to increase Canada's food supplies by the domestication of reindeer and musk ox in the Far North, which was first broached to a gathering of parliamentarians by Vilhyalmur Stefansson, the session before last, promises soon to be given a trial. Hon. Arthur Meighen, who was minister of the interior at the time, brought about the appointment of a commission to inquire into the feasibility of the explorer's proposal, and it made a favorable report. Dr. J. G. Rutherford, of the Railway Board, was the chairman of the commission, and Stefansson and J. B. Harkin, of the Dominion Parks Branch, were its other members.

That the plan has now reached the stage where its commercial feasibility is about to be given a test is indicated by the incorporation of the Hudson's Bay Reindeer Company, Ltd., with headquarters at Winnipeg, and a capitalization of $200,000. The company proposes to acquire domestic or wild reindeer, musk ox and herbivorous animals of all kinds, and to transplant them to grazing areas in the north, for which a lease has already been secured.

Demand for Farm Implements

A spirited demand for farm implements in Europe has caused the Massey-Harris Co., Ltd., Toronto, to engage about 500 additional men during the past few weeks, and the company is working hard on these orders from overseas. The company has just completed the purchase of five more acres of land adjoining the Weston plant.

Through the efforts of the Chamber of Commerce the Canadian Fulton Motors Company will locate a plant at St. Catharines, Ont. The Marathon Company's factory has been purchased and will be enlarged to suit the requirements of the motor company. About 1,000 persons will be employed, it is stated, and the company will build its own motor bodies there.

The Compton Co., of Providence, R.I., has notified the town of Cowansville, Que., that it is definitely decided that they will locate a branch of their manufacturing firm in this town. An agreement has been reached whereby they agree to locate and establish a plant on a plot of ground of some twelve acres.

Langslow, Ltd., of Cobourg, Ont., recently incorporated and associated with the Langslow Fowler Co., of Rochester, N.Y., expect to have their plant in operation by December or January next. School and household furniture will be manufactured, and the factory, power plant and drying kilns to be utilized in the carrying on of the new industry are nearly completed and are in the process of equipment. The initial capital investment in the plant and equipment is $175,000, to be further supplemented next spring. The company anticipates doing a Dominion wide trade and will, as soon as it is physically able, undertake to secure export business.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended October 16th:—

Kerr Lake Mine, 61,1[illegible]; McKinley Darragh, [illegible]; Hudson Bay, 62,716; Mining Corporation of Canada, [illegible]; Nipissing Mine Co., [illegible]; total, [illegible]. The total since January 1st is 21,[illegible], or [illegible] tons.

LIFE INSURANCE SERVICE

THE ultimate success of a Life Insurance Company depends largely upon what its policyholders think of the service they receive. The Continental Life has long since passed this test and earned a high reputation for paying claims promptly. 1920 will likely prove the best year in the Company's history. Write for booklet. **"Our Best Advertisers."** For Managerial positions in Ontario apply with references, stating experience, etc., to **S. S. WEAVER, Eastern Superintendent, at Head Office**

1870 —— OUR GOLDEN JUBILEE —— 1920

One Hundred Per Cent. Increase in Five Years

The Mutual Life of Canada is celebrating its jubilee year by rounding the two hundred million dollar mark having doubled the amount of assurances in force since the year 1915. This 100% increase in five years is without doubt due to the unsullied record for fair, liberal and equitable dealing with its policyholders and in the second place to the increasing popularity of the mutual principle in life insurance. The mutual is becoming generally recognized as the most economical, the most democratic and the most equitable system of life insurance. The greatest and most powerful life insurance organizations in the world are mutual and the Mutual of Canada, organized on that basis, is meeting with a similar success. The assets of the Mutual are a source of satisfaction amounting at present to approximately $40,000,000, guaranteeing every contract and providing a substantial surplus.

BE A MUTUALIST!

The Mutual Life Assurance Co. of Canada
Waterloo Ontario

An Anchor of Security

is found in Life Insurance. It means safety of principal—certainty of return—the surest of all investments.

These are generalities. Come down to personal application by seeing what Life Insurance can do for you. Obtain rates, and dependable advice. Do so now, while the subject is in mind.

You will find the Great-West Policies well worth investigation. The rates are low—the profits high.

Full particulars for the asking, and there will be no undue solicitation to insure. State age.

Humboldt's Financial Position to be Investigated—South Vancouver in Satisfactory Condition, According to Commissioner Gillespie—Kitchener and Kingston Assessment Increased—Victoria Fox Sale not up to Expectations, Although Better than Last Year

A PUBLIC enquiry will be held at Humboldt, Sask., on October 28th by the Local Government Board as to the financial condition of the town. The bondholders, who are scattered through different parts of Canada and the United States, recently held a meeting in Toronto and decided to send representatives to the enquiry. The petition of the bondholders states that the town has failed to retire its debentures, or debenture coupons, which became due and were presented for payment, and failed to make payment of outstanding amounts for capital expenditure. A statement on the town's financial affairs, as at December 31st last, shows debentures outstanding of $442,585, and debenture interest unpaid $52,597. In addition, there were bills payable to the bank amounting to $50,168. As against these immediate liabilities of slightly over $100,000, the town had available in cash on hand and in the bank $28,593.

According to Hon. George Langley, minister of municipal affairs for Saskatchewan, the financial condition of the town has been seriously affected by the fact that, although a railway town, the railway itself has not been taxable. Should the Dominion government, as holder of the majority of the stock of the Canadian Northern Railway, waive its right to immunity from taxation, the town would in a very short time be on easy street.

It is said that the town is in a position to meet its obligations in full and still continue satisfactorily. This fact remains to be seen at the enquiry.

Montreal, Que.—A large increase in salaries for the public works department is shown in the 1921 budget. For 1920 the figure was $1,379,593, while for 1921 the figure is $1,937,567.

Kitchener, Ont.—Assessment valuation for 1921 is placed at nearly $18,000,000 by the city assessor, as compared with $11,807,202 last year. It is also pointed out that the assessment valuation in 1910 was $6,780,321.

Kingston, Ont.—The value of assessable property in the city, according to City Assessor Moore, is $15,299,782 for 1921, an increase of $1,914,527 over last year, or 15 per cent. The property exempted totals $5,005,030, or $126,[illegible]80 more than last year.

Hamilton, Ont.—According to Geo. H. Gooderham, chairman of the Toronto and Hamilton Highway Commission, Toronto, Hamilton and Etobicoke are the only municipalities which have paid their share of the cost of the highway. There is still a substantial amount of unpaid apportionments and, as the commission is in need of the money, action will be taken immediately to secure payment.

Ontario.—Writs for $36,104 against the town of Mimico, $21,189 against the Port Credit Corporation, and $19,25[illegible] against Toronto Township have been issued by the Toronto and Hamilton Highway Commission. The amounts are the shares of the cost of building the highway, alleged to be due from the three municipalities.

Victoria, B.C.—At the conclusion of the city's fox sale last week the total revenue received was stated to be $[illegible]. One hundred and seventy-four lots were disposed of by the city out of approximately 400 offered, the majority going at the straight upset price without competitive bidding. The average price paid per lot was more than $150.

At the fox sale in May and June of last year the total revenue was $41,258, one hundred and forty-eight parcels being sold. Although this year's sale was more successful than last year's, civic officials were expecting better results than these were.

Brantford, Ont.—According to a statement of the Brantford Municipal Railway Commission gross receipts of the street railway amounted to $120,419 and gross expenditures $98,307, leaving a gross gain of $28,112. After deducting therefrom interest on bonds and debentures, and making provision for sinking fund, the net gain for the eight months was $2,584. From the net gain are deducted $1,666 for depreciation and $800 for injuries and damages, leaving a small surplus of $117. The depreciation is for pavement, and not on rolling stock. The rate of operating expense has gone up from 73.32 per cent. in 1919 to 79 per cent. this year.

Hamilton, Ont.—When the war broke out the city inaugurated a soldier insurance scheme insuring the lives of all the soldiers of the city who went to the war. For some time risks were held by two large American insurance companies, but the cost of maintaining this scheme was found to be a serious drain on the city as enlistment grew with the progress of the war, and as a final result a civic insurance fund was created, under the management of the soldiers' benefit fund commission. The duties of this commission are nearing conclusion, and the total cost of the scheme to the city has amounted to approximately $700,000.

Sault Ste. Marie, Ont.—Assessment in the city, according to F. E. Crawford, assessment commissioner, who has just completed the figures for 1921, amounts to $16,000,000, an increase of $1,000,000. Mr. Crawford said: "For a number of years the building assessment in this city has been very low, and it was the policy of the assessors to assess the land for full value and the buildings for about 50 per cent. of their value.

"A general increase of 20 per cent., approximately, has been made on the assessment of all buildings in the city. This was necessary, as the total assessment on buildings appeared too low in the government statements as compared with other cities and was affecting to some extent the city's credit in the selling of debentures, etc. The net result of this higher rate will mean an increase of about $1,000,000, and if the city's expenditures for 1921 are about the same as 1920, there should be a corresponding decrease in the tax rate; that is, the tax rate for the ensuing year should not be over 35 or 36 mills."

Verdun, Que.—An increase in taxation from $1.45 per $100 of assessment to $1.67, which is provided in the 1921 budget, has been rejected by the council. Some of the members think it too high while others consider it too low. There is a special realty tax, providing for old annual deficits, of $[illegible] so that the rate would be $2.21½.

The estimates of receipts for the year are $555,535, to provide for an estimated expenditure of $534,620. The receipts are mostly made up of realty taxes, general and special, on a valuation of $15,000,000 of property, and $65,000 of water taxes and $45,000 for electric light charges. The statement of expenses submitted shows that $231,500 and $[illegible],142 is required by the finance department, and the various other departments require the balance, works, police and fire, waterworks, $[illegible], practically equal to estimated receipts, and $62,100 for the electric light plant, or about $17,000 more than the estimated receipts.

[illegible] year [illegible] there will be a small deficit, a satisfactory state of things, explained Mayor Leclair, when compared with the large deficits of the past few years, and due to the fact that the council last year had had the moral courage to impose the special taxes. Interest on the bonds [illegible] $[illegible] and because most of them are payable in New York there is an additional $11,420 wanted for exchange charges.

South Vancouver, B.C.—A letter from F. J. Gillespie, commissioner, to The Monetary Times reveals very satisfac-

tory financial conditions in the municipality. Mr. Gillespie says:—

"The total receipts from our tax sale, including redemptions and sale of lots from the time we began to advertise until we closed, amounted to $170,000. Since the tax sale of 1919, some 790 lots, amounting to $110,000, have been redeemed. This is an encouraging feature, and goes to show that the people are anxious to retain their property.

"The total amount of current taxes paid up to the end of September amounts to approximately $666,000, or 75 per cent. The amount received on account of arrears, including the tax sale, was $274,000, or a total for the year to date, that is, to the end of September, of $940,000. Collections on all accounts to the end of September amounted to $1,163,878, as against $677,151 for the same time in 1918. In 1919 there was a tremendous amount paid in on account of arrears and not so much current taxes as this year, but the total for that year was $1,166,007 (for nine months).

"On the whole, things are very encouraging in South Vancouver, and no money for the running of the municipality has been borrowed for eighteen months, and a few days since I paid $67,370 on our indebtedness to the bank, which indebtedness was created in 1918 and the beginning of 1919 for the purpose of consolidating the floating debts of the municipality. I also bought £10,000 sterling debentures, issued by the municipality in 1911 and payable in fifty years. I secured those on a discount of 7½ per cent., so that the indebtedness of the municipality has been reduced during the past couple of months by approximately $117,000."

Government and Municipal Bond Market

Ontario Treasury Bills Placed—Halton County Gets Good Price—American Bond Market is Strong—Winnipeg Will Borrow Half Million for Housing—Alberta Savings Certificates Outstanding Over Two and a Quarter Millions

THE sale of $3,000,000 of province of Ontario six-months treasury notes to Æmilius Jarvis and Co. and the Home Bank, reported below, was the chief feature of the bond market this week. Halton county sold an issue of debentures at a price on a basis of about 6.53 per cent., which is considered good. Earlier in the month Lincoln county paid about 6.75 per cent. for its money. The price received by Niagara Falls, which was on a basis of about 6.77 per cent., indicated no change in previous market tendencies this month for Ontario municipals of that kind.

The American bond market continues to be strong and active. Liberty bonds advanced slightly, while the general list of government and municipal bonds showed a gain.

Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Kane S.D., Man. . .	22,000	6½	20-instal.	Oct 23
British Columbia .	1,000,000	6	3-years	Oct 25
Kentville, N.S.	$ 30,300	6	25 years	Oct 25
Brockville, Ont. ..	37,500	6	10 instal.	Oct 29
Thorold, Ont. . .	20,000	6	10 years	Oct 30
Powassan, Ont.	8,000	6½	20 instal	Nov 1
Watford, Ont. . .	52,000	5½	30 instal.	Nov 1

Corona S.D., Man.—Tenders will be received until October 28th, 1920, for the purchase of $2,500 7 per cent. 20 instalment debentures. J. M. Dybeck, secretary-treasurer Pine Ridge, Man.

Kane S.D., Man.—Tenders will be received until October 23rd, 1920, for the purchase of $22,000 6½ per cent. debentures; $1,000 of principal and interest payable each year until 1939 and $3,000 and interest payable 1940. J. C. Wilkin, secretary-treasurer, Kane.

Watford, Ont.—Tenders will be received until 2.00 p.m. on November 1st, 1920, for the purchase of $52,000 5½ per cent. 30 instalment debentures, the proceeds of which [illegible] will be used for installing a water works system. W. S. Fuller, village clerk.

British Columbia.—The province is asking for tenders until noon, October 25th, 1920, for the purchase of $1,000,000 6 per cent. 3-year bonds, payable in New York and Canada. The proceeds of the loan will be used to provide funds for loans to returned soldiers under the Industrial Act.

Debenture Notes

Westfield S.D., Man.—On November 17th [illegible] of $1,000 by way of debenture [illegible]

Kemptville, Ont.—A by-law will shortly be submitted to voters, authorizing the raising of $25,000 for the building of a new hydro distribution system.

Winnipeg, Man.—The city council will borrow $500,000 from the provincial government for the housing scheme. Approximately 6¼ per cent. interest will have to be paid by the city for the loan, while prospective builders will have to pay the city 7 per cent. when borrowing from the city.

Windsor, Ont.—Favoring the increase in capital expenditure account to allow extensions of the street railway system in Windsor and adjacent municipalities, the Ontario Power Commission will ask authority to sell another block of debentures. When the necessary action has been taken by the government the municipalities may then submit the plan to the people.

Ottawa, Ont.—The city is now considering the purchase of the Ottawa Electric Railway. According to the company, a valuation of $5,200,000 has been placed on the system, but the city will investigate the correctness of this report. If it is possible to make a thorough investigation before January 1st, a by-law will in all probability be submitted to the ratepayers for the borrowing of the necessary money to take over the system.

Drumheller, Alta.—The town is protesting against the action of the Provincial Board of Public Utilities Commission in deferring approval of the debentures issue which the town wished to make. The amount of the issue asked for was $75,000 with which a new pumping plant and an extension to the sewerage system were to be installed. The board declined to approve the proposed loan, and now the town authorities come back with a statement that the fire protection and sewerage are absolutely necessary, and that the town can quite well afford them, since its assessment stands at $600,000, with only $20,000 of indebtedness. It is claimed that the serious losses in the recent fire were the result of not having sufficient pressure in the water mains, and that this would have been provided if the desired improvements to the service had not been held up by the board.

London, Ont.—Money for payment on houses already [illegible] by the London Housing Commission and for [illegible] will in future be raised by the city through [illegible] market instead of borrowing from the [illegible] or Dominion governments. The commission is now [illegible]. The commission has already spent [illegible] $200,000 of debentures, which will [illegible] of the city for housing purposes [illegible] from the province, but in future [illegible] merely stand as a guarantor of the bonds [illegible] of housing appropriations. It is

6.30%
Until October 1st, 1940

Markets may come and markets may go, but purchasers of Province of Saskatchewan 6% Gold Bonds to-day at 96.62 and interest are assured of 6.30% for twenty years.

These bonds afford an excellent opportunity to dispense with the necessity for frequent reinvestment. They also guard against any changes in the money market that may occur in years to come.

[illegible] is [illegible] as pointed out by City Clerk Baker, that the [illegible] issued by the city will bear interest at 6 [illegible] per cent., while the money secured under the 1919 [illegible] interest at the rate of 5 per cent. Another [illegible] of work is predicted for 1921, bringing the city's [illegible] in housing work to the $1,000,000 mark.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from October 2nd to 9th, 1920:

Schools.—Perdue, $1,500 8 per cent 20-years annuity. 15-years 8 per cent. annuity: Hsuiatyn, $4,500; Gramland, $5,800. 10-years 8 per cent. annuity: Rhyl, $1,000; Bay Island, $1,500; Churchill, $1,200. 10 years 8 per cent. instalments: Columbia, $3,000; Gibson Creek, $2,000.

Rural Telephones.—15-years 8 per cent. annuity. Viscount, $11,500; Eddy, $1,200; Arabella, $26,100; Winton Park, $1,200; S.W. Moosomin, $24,500; Montrose, $16,000; Adanac, $3,000; Martin, $1,300; Aldenbury, $2,450; North Springside, $8,500; Willowmoor, $1,500.

Village.—Borden, $2,000 8 per cent 10-years instalment, for electric light.

The following villages will also borrow: Hubbard, $740 for street grading and $260 for sidewalks, 8 per cent. 10-instalments; Imperial, $2,000 for streets, 8 per cent. 10 instalments; Kelfield, $2,500 for various works, 8 per cent. 10-instalments; Heward, $800 for rink, 8 per cent. 10-instalments; Canwood, $2,500 for street grading and sidewalks, 8 per cent. 10-instalments; Meota, $5,000 for well-drilling, 8 per cent. 10-instalments; Mossbank, $2,000 for fire protection, 8 per cent. 10-instalments; Quinton, $2,000 for well drilling, 8 per cent. 10 instalments.

Fertile Valley R.M., $5,070 for municipal office and vault in the village of Conquest 7 per cent. 10-instalments.

Bond Sales

Hamilton Township, Ont.—The township has sold $7,500 10-year school debentures. It is stated that these are the first securities ever issued by the municipality.

Halton County, Ont.—C. H. Burgess and Co. have purchased $35,000 6 per cent. 20-instalment debentures at a price of 95.26, which is on a basis of about 6.53 per cent.

Alberta.—The province is asking for tenders for a bond issue of $1,000,000 ten-year 6 per cent., bids to be received up to November 1st. The money is required for telephone construction. The bonds will be payable in New York and Canada.

Winnipeg, Man.—About $[illegible],000 of the hydro-electric bonds have been disposed of to date. A canvass of the city and district is being arranged, and then it is expected that there will be better results. A better demand from the rural districts is expected in the future.

Alberta.—The amount of the province's saving certificates sold and outstanding at September 30th, 1920, according to a statement by the deputy provincial treasurer to [illegible], was $2,240,580. Total sales of the 6 per cent. domestic issue of bonds are now about $400,000.

County of Renfrew, Ont.—Tenders will be received until November 12, 1920, for the purchase of $150,000 6 per cent. 20-instalment debentures, the proceeds of which will be used for good roads in the county. Securities are dated September 27, 1920, and are payable commencing September 27, 1921.—R. J. Roney, county clerk, Pembroke, Ont.

Penticton, B.C.—The demand for the [illegible] 000 6 per cent. water debentures has not been as successful as was expected. R. C. Bracewell, municipal clerk, in a letter to [illegible], states that further efforts for disposing of the debentures are being withheld until crop returns are in sight, when it is expected there will be a better demand. The initial offering was made at 90 to [illegible] per cent.

Ontario.—Some temporary financing was arranged by the province this week when the Hon. Peter Smith, provincial treasurer, privately disposed of $1,000,000 6 per cent. treasury bills, maturing in six months, to [illegible] and Co., Ltd., and the Home Bank of Canada. These treasury bills are payable in Toronto and Montreal, are in denominations of $5,000 and $10,000, and are being offered at par.

This latest loan brings the total borrowings of the province up to $[illegible],800,000 so far this year, or approximately 63 per cent. of the total provincial borrowings for the whole of 1919 or about 34 per cent. of the total provincial borrowings this year.

Niagara Falls, Ont.—Wood, Gundy and Co. have purchased $[illegible]3,000 6 per cent. 20 instalment debentures at a price of 93.91, which is on a basis of about 6.77 per cent. Tenders received were as follows:

Wood, Gundy and Co.	93.91
A. E. Ames and Co.	93.39
C. H. Burgess and Co	93.36
R. C. Matthews and Co.	93.30
A. Jarvis and Co.	93.07

Saskatchewan.—The following is a list of debentures reported sold from September 27 to October 2, 1920:—

School Districts.—Sunny Brae, $1,000 8 per cent. 10-years, W. M. Patterson, Preeceville; Murphy Creek, $5,300 8 per cent. 10 years, Waterman-Waterbury Mfg.; Salvador, $2,500 8 per cent. 10-years, H. J. Birkett and Co.; Nicklet, $3,500 8 per cent. 10-years, Monarch Life Assurance Co.; Younghill, $500 8 per cent. 5 years J. R. Parken, Bulyea.

Rural Telephones.—15 years annuity, 8 per cent.: $4,400, R. O. Berwick and Co., Regina; Earl Grey, $12,000, W. L. McKinnon and Co.; South Maryfield, $12,000, various purchasers; Lenora Lake, $8,150, Monarch Life; Echo, $6,200, R. O. Berwick and Co.; Kent, $600, town of Davidson, Sask., sinking fund.

Village.—Summerbury, $2,500 6 per cent. 10-years, James Crozer, Summerbury.

In addition to the above, H. J. Birkett and Co., report that they have purchased the following debentures:—$25,000 8 per cent. 20 instalments, of Semans S.D.; $6,500 7 per cent. 10 instalments, of Elldridge Hill S.D.; $3,500 8 per cent. 10-instalments, of East Bend S.D.

BOND DEALERS NOW STOCK EXCHANGE MEMBERS

Four Toronto bond houses, which recently purchased seats on the local stock exchange, are now represented on that institution as a result of elections held this week.

W. E. Wilder will be floor member for Wood, Gundy and Co., R. A. Daly for R. A. Daly and Co., A. G. Mackenzie for W. A. Mackenzie and Co., and A. C. Turner for Turner, Spragge and Co.

Charles B. Cronyn, of the stock brokerage house of C. B. Cronyn and Co., Jordan Street, Toronto, who has held a seat for some time on the local exchange, has also been elected a member.

Canadian Stock Prices Continue to Move Irregularly—Paper Issues Bearish—Howard Smith to Issue New Common to Shareholders on Basis of One to Three—Offering of London Hotel Bonds Being Made

WHILE there was slightly more activity on the New York stock market during the week ended October 20, and prices tended to become a little stronger, the irregularity of the past few weeks was still in evidence. Deflation in the United States still continues in an orderly manner, and while this movement is in progress it is only natural that the stock market should remain unsettled. It is pointed out by a prominent New York stock broker that the credit situation is far from being in a position to stand speculative activities in the stock. While call money is comparatively easy, ruling around 6 and 7 per cent., this must not be taken to indicate that the tight money period is over, as it is a surface condition only and one which could be upset by any substantial expansion in stock trading.

Canadian stocks also moved irregularly, with prices chiefly downward, and at the close, on October 20, very few issues were above the level set at the beginning of the week. Closing prices, however, in a large number of cases, were not the lowest for the week. Interest was centred chiefly on Atlantic Sugar, in view of the prevailing conditions in the sugar industry, and the weakness of that issue had an unsettling influence on the market. The bullish sentiment in regard to papers seems to have disappeared, and the movement of those issues was very much in line with the general trend of the market. A report from New York that pulp and paper prices there had declined, was reflected in the prices of securities here. Importations of newsprint from Sweden and Germany to the United States are said to be arriving in substantial volume, with the prices of the European market under those for domestic or Canadian grades. The probability of paper exports from Sweden or Germany assuming considerable proportions for a long time to come, however, is regarded in Montreal as decidedly remote. With the shortage of coal so acute in both countries, and with present disturbances in that line likely to further enhance the already greatly increased price, European competition is not taken as a serious factor in the situation.

Ford Motor stock, which was recently listed on the Toronto exchange, gave a remarkable exhibition of strength, rising as high as 380.

London Hotel Bonds

Brent, Noxon and Co., Toronto, are offering $600,000 first mortgage 7 per cent., sinking fund gold bonds, of the Benson Hines London Hotel Co., Ltd., London, Ont., at par and accrued interest. These bonds are dated October 1, 1920, and are redeemable $120,000 at the rate of $30,000 a year, from October 1, 1926, to October 1, 1939, inclusive, and the balance of $180,000 on October 1, 1940. They are callable at the company's option upon nine weeks' notice, at any time on or after October 1, 1925, at par and accrued interest, in denominations of $250, $500 and $1,000, and may be registered as to principal. Interest is payable half-yearly at the Bank of Montreal, London, Ont.

The capitalization of the Benson-Hines London Hotel Co., Ltd., is as follows: Common stock, $500,000; first mortgage 7 per cent., sinking fund gold bonds, due 1940 (present issue), $600,000; second mortgage 7 per cent., gold bonds, due 1940, $400,000. The issue of first mortgage bonds is secured by a deed of trust and mortgage, constituting a first closed mortgage on the lands and buildings, which, it is estimated, will cost one million dollars.

Howard Smith New Common

Directors of the Howard Smith Paper Mills, Ltd., at a meeting held in Montreal, on October 19, approved of the issue of $1,000,000 new common stock. It is planned to issue shares to shareholders at par, carrying rights on the basis of one to three.

The present capitalization of the company is $2,500,000 of paid-up common and $1,500,000 of paid-up preferred. The preferred is an 8 per cent., cumulative issue, ranking up to 10 per cent., equally with the common stock, after 8 per cent., on the common stock is paid. In addition there are $800,000 6 per cent., 15-year first mortgage sinking fund gold bonds outstanding.

Directors have also approved statements which will be issued to shareholders outlining the progress of the business. A nine months' balance sheet and profit and loss account is being prepared and will show earnings in the nine months to September 30 at around $1,200,000, as compared with $430,000 in the full twelve months last year, when earnings of the common stock then outstanding were about 35 per cent.

The following companies, operating under Dominion charters, have been authorized to increase their capitalization:

London Hosiery Mills, Ltd., London, Ont., from $60,000 to $160,000, by the issue of 2,000 shares of $100 each.

Becker Co. of America, Ltd., Halifax, N.S., manufacturers of wood pulp, from $100,000 to $650,000, by the issue of 5,500 shares of $100 each.

Montreal Lumber Co., Ltd., from $100,000 to $250,000, by the issue of 1,500 shares of $100 each.

Dominion Flax, Ltd., from $50,000 to $100,000, by the issue of 500 shares of $100 each.

Frontier Lumber Co., Ltd., from $50,000 to $100,000, by the issue of 500 shares of $100 each.

Ditchburn Pleasure Boats, Ltd., incorporated under the laws of Ontario, with head office at Gravenhurst, has been authorized to change its name to the Ditchburn Boats, Ltd., and to increase its capital stock from $100,000 to $150,000, by the creation of 500 new preference shares of $100 each.

EDUCATION'S VALUE TO INSURANCE MEN

J. B. McKechnie Emphasizes Importance at Toronto Insurance Institute Meeting—Employees Have Not Responded to Efforts

IN his inaugural address as president of the Toronto Insurance Institute, at the opening meeting held on October 21, J. B. McKechnie, general manager of the Manufacturers' Life, dwelt on the educational work of the institute, and expressed his regret that their plans in this direction had failed in the past. Mr. McKechnie returned a few weeks ago from a trip across the Pacific to Hawaii, Honolulu, Japan, China, Straits Settlements and other countries, where his company is doing business and where it plans to extend its work. There is a good field in the east, he pointed out, as the British and American companies are not very active, and the standing of the local companies is, generally speaking, not high. The Insurance Institute has arranged its regular program for the year, the addresses covering life, fire and casualty insurance. In addition to Mr. McKechnie's address, C. H. Mitchell, Dean of the Faculty of Applied Science of Toronto University, also spoke at the meeting.

Mr. McKechnie pointed out that the Institute had now completed twenty-one years of work, during all of which regular meetings had been held, and one of the primary objects, the diffusion of insurance knowledge, had thus been attained. Dealing with the training and education of employees, he said:—

"The business of insurance is a peculiar one. The merchant receives from his customer a sum of money for which he gives an article worth approximately what is paid for it. The bond dealer delivers to his client a bond which is supposed to be worth approximately what it is sold for, and the value of which on the average will not vary much from its original price. You deposit money with a bank and in return receive its guarantee to repay this amount, increased possibly with interest. An insurance company, however, will receive say $100, for which it may undertake to pay $10,000 on the happening of a certain event.

Technical Knowledge Necessary

"It is this divergence between what the company receives and what it becomes liable to pay to the assured that not only makes the business of insurance so interesting, but which also requires wise judgment and technical knowledge, if the companies are to be soundly administered.

"Then again, more and more do we hear of certain undertakings being referred to as 'public service corporations.' Whether the various branches of insurance come under this heading or not, most of us like to feel that our companies will be administered in such a manner that our policyholders will be given their insurance protection in the most efficient manner possible and at the lowest cost compatible with safety and a widespread diffusion of the benefits of insurance. To do this our companies must have efficient organizations, both in the field and in the head office, and this is impossible unless the individuals in these organizations have a sound theoretical as well as practical knowledge of their business.

"I do not wish to be understood as thinking that technical education is everything in the insurance business. There are outstanding examples, not only in insurance, but in other branches of human activity, where men, thoroughly trained theoretically, have lacked the judgment and practical business capacity for success. Again th[illegible] organizations of our companies [illegible] retical knowledge of the business, [illegible] they possessed the quality of [illegible] tions, to my mind, however, pr[illegible] have failed in spite of their kn[illegible] succeeded in spite of their lac[illegible] the companies more and more [illegible] knowledge of the business is [illegible] th[illegible] he be employed in the head [illegible] the field."

FINANCIAL CENTRES OF SASKATCHEWAN

Regina and Moose Jaw Have Growing Business in the South—Crops Not Up to Early Estimates and Business is Duller

(Staff Correspondence.)

Moose Jaw, Sask., October 20, 1920.

BUSINESS conditions in Regina this fall are fairly good. This capital city of the greatest wheat-growing province in Canada is year by year assuming greater importance as a commercial and financial centre. Many of the important houses of eastern and western Canada have large branch warehouses in Regina, and the mail order business of the R. Simpson and Co. and the T. Eaton Co., located there, have assumed large proportions.

Many of the important life insurance companies, trust companies, also loan and mortgage companies, have their headquarters for Saskatchewan in Regina, such as the Canada Life, who have a very modern, up-to-date office building there, the Huron and Erie Mortgage Corporation, and a number of others who have larger or smaller branch offices. In addition, Regina is the head office of the Saskatchewan Life Insurance Co., the Saskatchewan General Trust Co., and the Saskatchewan Mortgage and Trust Corporation, as well as several other financial institutions. A new bank is in course of organization at Regina, to be known as the Great West Bank of Canada, so that as a financial centre Regina is making headway.

The final result of this year's crop around Regina is only fair, and not as good as was first anticipated. In well-informed circles, instead of a one-hundred-and-forty-million-bushel crop in Saskatchewan, it will not go much over one hundred million bushels. Collections are rather slow at this date with loan and mortgage companies, but should show a big improvement in the next few weeks. There is a good demand for money, and the companies, including the Saskatchewan Farm Loan Board, are putting out considerable amounts in new loans.

In the Moose Jaw district the crops have been rather better than in some other parts of Saskatchewan. A fine open fall is being experienced, and thrashing is generally completed. Moose Jaw is making progress and is an important milling and distributing centre. It has one of the best agricultural areas around it of any point in the west. The C.P.R. are building a modern, up-to-date depot at Moose Jaw which, when completed, will give splendid facilities to this growing and important railway centre. Many of the leading bankers and other prominent financial men of Canada have made trips through the west this fall, and in discussing the outlook with other western business men they express the hope that what these men have seen and heard will be the means of their gaining a larger conception of the financial needs of western Canada, and the need for developing our wonderful natural resources. It is confidently expected that there will be a large influx of immigration into the west during the coming year.

DIVIDEND NOTICE

CANADA CEMENT COMPANY, LIMITED

PREFERENCE SHAREHOLDERS

DIVIDEND No. 13.

Notice is hereby given that a dividend [illegible] for the three months ending September 30th, 1920, being at the rate of 7[illegible] per annum on the paid-up Preference Stock of the Company, has been declared, and that the same will be paid on the 1[illegible]th day of November next to Preference Shareholders of record at the close of business October 31st, 1920.

H. L. DOBLE, Secretary.

Ogilvie Flour Mills' Profits Lower—Position is Stronger, However—Cockshutt Plow Company Has Favorable Year — Lower Earnings for Russell Motor Company as a Result of Readjustment

London Street Railway.—The city council of London has passed a resolution that the Ontario Railway Municipal Board be requested to discontinue payments on the company's bond redemption on the ground that it is not an operating expense.

Suggestions were made that bond redemption should be defaulted in the interests of increased wages for the men or for the purpose of improving the service for the benefit of car riders, but neither of these proposals were attached to the request as it will go to the Railway Board.

Ogilvie Flour Mills Co., Ltd.—Net profits of the company, in line with other milling companies, were lower in the year ended August 31, 1920, being $959,065, as compared with $1,632,516 in 1919, and $1,955,414 in 1918. After allowing for preferred dividends of $140,000, unchanged, and common dividends of $550,000, compared with $675,000 in 1919, there remained a balance of $269,065, which, added to the balance brought forward from 1919, left a surplus of $1,513,582. The surplus in the previous year was $2,148,108, but as $903,592 was carried to contingent account, the balance carried forward was $1,244,516.

The balance sheet shows an improvement in the working capital, the figures for the past three years being as follows:—

	1920.	1919.	1918.
Assets	$9,841,853	$10,345,042	$10,618,364
Liabilities	2,273,240	2,966,036	3,953,865
Working capital	$7,568,613	$ 7,379,006	$ 6,664,499

Other principal changes are:—

	1920.	1919.	1918.
Inventories	$ 435,101	$ 638,269	$ 1,462,916
Investments	6,552,978	5,780,568	6,575,149
Pension fund	190,049	253,501	173,252
Accounts payable	1,877,990	2,445,786	3,433,613
Accrued charges	597,250	520,250	520,250
Pension fund	433,972	350,687	253,644
Contingent account	2,500,000	2,500,000	1,596,107

Discussing the results of the year's operations in a brief address to the shareholders, W. A. Black, vice-president and managing director of the company, stated that the milling business during the period covered by the statement had been far from satisfactory. The control of wheat and its products had been vested in the Wheat Board and during a considerable portion of the year the prices fixed by that body had resulted in a positive loss to the mills. Fortunately, he stated, the interests of the Ogilvie company were not confined to flour mills alone and satisfactory profits in other branches of the enterprise's activities had been made. Mr. Black stated that while wheat control had ceased in Canada it was still in force in the Old Country, but he expressed the hope that with the advent of spring the restrictions will cease there also and permit of the resumption of normal conditions between the millers and their oversea customers.

Cockshutt Plow Co., Ltd.—A favorable year's operations are shown in the report of the company for the year ended June 30, 1920, net profits increasing to $660,921 from [illegible]71,586 in 1919. Dividends amounting to 7½ per cent. on preferred shares were paid, as against 4 per cent. in the previous period. Earnings on preferred were at the rate of [illegible] per cent., as compared with 8.84 in 1919. President H. Cockshutt, in his report, announces that there has been a large and well sustained demand for the company's product during the year, and an even greater volume of business could have been done if the company had been in a position to accept all the orders offered to it.

"This was prevented," says Mr. Cockshutt, "not only by the difficulty in obtaining labor and material, particularly the latter, but by the insufficiency of the company's plant to meet a greater demand upon its capacity. In order to deal with the situation the directors decided that considerable additions should be made to the plant at Brantford, and the buildings are now well advanced. The continued growth of our business, combined with the very high prices now prevailing for the principal raw materials used by the company, will require a greater amount of money than has been needed in the past for the purpose of carrying the necessary raw materials and goods manufactured and in process. The same situation exists in the company's subsidiary and allied companies.

"The subsidiary companies, Adams Waggon Co. and Brantford Carriage Co., have had a very successful year, working to capacity, and showing substantial betterment. The Adams Waggon Co. has not been able to cope with the business offered it, and, consequently, has been forced to consider increased facilities. This company was offered the Petrolea Waggon Company's plant at Petrolea, fully equipped with modern machinery, and it has secured it under lease, with an option to buy. This plant is now operating, and as soon as a full supply of material can be secured will be worked to its capacity.

"While the balance sheet shows a substantial reduction in loans as at June 30, the company has, since that date, increased its indebtedness, and may require to borrow still further in order to meet the increased cost of doing business, both for itself and for its subsidiaries. The banking position in Canada, as elsewhere, tends to restriction rather than to expansion of credits, and the company must, therefore, consider that it may have to provide out of its own resources a part of the increased funds required. It has, in addition, to provide from current revenue for the capital expenditure on extensions of its own plant. The directors believe, therefore, that earnings should be retained to such an extent as is necessary to enable the company's plant to be operated to full capacity, and advantages taken of the present opportunities for increasing business."

Principal changes in the balance sheet are shown as follows:—

	1920.	1919.
Inventory	$2,388,377	$2,844,446
Accounts receivable	4,888,598	4,603,841
Accounts payable	766,172	598,650
Victory bonds	95,000	. . .
Balance forward	575,434	399,377
Current assets	7,451,461	4,671,324
Current liabilities	962,558	1,271,655
Working capital	6,488,903	3,399,669
Loans	124,924	594,767

Russell Motor Car Co., Ltd.—Net profits of the company for the year ended July 31, 1920, amounted to $339,453, as compared with [illegible] in the previous year. This indicates earnings of [illegible] per cent. on preferred stock, as compared with [illegible] per cent. the previous year and [illegible] per cent. on common stock, as compared with [illegible].

The decline in profits is due to the readjustment which the company has been undergoing. During the year final adjustments were made by the company in respect to their war-time contracts. Operations of the company are now represented by its stock holdings in the following companies: Russell Motor Car Co., Inc., Buffalo, N.Y., Willys-Overland, Ltd., Toronto, Canada Cycle and Motor Co., Ltd., Weston,

WE OFFER:

$600,000

THE BENSON-HINES LONDON HOTEL COMPANY, LIMITED

LONDON, ONTARIO

FIRST MORTGAGE 7% Sinking Fund Gold Bonds, dated 1st October, 1920. Redeemable $420,000 at the rate of $30,000 a year, from the 1st October 1926, to the 1st October, 1939, inclusive, and the balance of $180,000 on the 1st October, 1940

Callable at the Company's option, upon nine weeks' notice, at any time on or after 1st October, 1925, at par and accrued interest.

Interest payable half yearly on the 1st days of April and October.

Principal and interest payable at the Bank of Montreal, London, Ont.

The Bonds will be in denominations of $250, $500 and $1,000 each, and may be registered as to principal.

TRUSTEES, REGISTRARS AND TRANSFER AGENTS.

The London and Western Trusts Company, Limited,
London, Ontario.

CAPITALIZATION.

Common Stock	$ 500,000
First Mortgage 7% Sinking Fund Gold Bonds, due 1940	600,000
Second Mortgage 7% Sinking Fund Gold Bonds, due 1940	400,000

SECURITY.

This issue of First Mortgage Bonds is secured by a Deed of Trust and Mortgage, constituting a first closed mortgage on the lands and buildings, which, it is estimated will cost one million dollars

EARNINGS.

The annual net earnings are estimated at $140,000, being over three times the interest on the first mortgage issue, twice the interest on the first and second mortgage issues, or sufficient to pay interest on first and second mortgage issues and 14% on the Common Stock

REDEMPTION.

The First Mortgage provides for the liquidation of the half-yearly interest by means of monthly payments to the Trustees. In addition, provision is made similarly for a sinking fund of $2,500 per month, beginning, 1st October, 1925, to meet the yearly payments of $30,000, for redeeming principal during the years 1926-39, and also from 1st January, 1922, to 1st October, 1925, of a further payment of $1,000 per month, to form a reserve fund for redemption purposes. This reserve fund is to be used by the Trustees, as far as possible, in redeeming bonds by purchase at less than par and accrued interest This plan enables a constant check being maintained on both the hotel management and earnings.

SUBSCRIPTIONS.

Subscriptions will be subject to our approval, and must be made on the approved form, all cheques to be made payable to the London & Western Trusts Co., Limited. The right is reserved to accept all or any portion of any subscription, and if only a portion is accepted, the deposit will be applied on the succeeding payments As the bonds carry interest from 1st October, 1920, interest will accrue at the rate of 7% from that date, and interest at the like rate will be charged on deferred payments

LEGALITY.

All legal details have been passed upon by Malone, Malone & Long, Toronto, and Ivey, Elliott & Ivey, London

TERMS

Price: Par and accrued interest. Payable 20% on application
40% 1st December, 1920, and 40% 2nd of March, 1921

The statemets contained in this circular are not guaranteed, but are based on information we believe to be reliable.

and the Machine and Stamping Co., Ltd. (now to be known as the Russell Gear and Machine Co., Ltd., Toronto.

The Russell Motor Car Co., Inc., Buffalo, has completed and adjusted its contracts with the United States, with the exception of one contract for anti-aircraft gunmounts for the Navy Department. "The assets of this company," says the report, "are mainly represented by the ownership of $[illegible],000 of Canadian Victory bonds." The Canada Cycle and Motor Co., Ltd., closed a successful year's business on December 31 last, and on September 1 of this year paid a dividend of 7 per cent. on its capital stock. "The business during this current year promises to be the largest experienced in the bicycle trade in many years." The Russell Gear and Machine Co., formerly known as the Machine and Stamping Co., Ltd., has taken over the machine equipment of the Russell Motor Car Co., Ltd., with a view to carrying on a general machine business. The capital stock was increased to $1,000,000, all of which, except qualifying shares, is held by the Russell Motor Car Co. This subsidiary makes motor car parts, bicycle chains, spark plugs and gramophone motors.

In regard to the Willys Overland, Ltd., the report makes the following comment:—

"This company has completed the conversion of its plant from airplane engine work to automobile work, and during the first six months of the calendar year enjoyed an active demand for its product. Since July 1st it, in common with other motor companies, has experienced a contraction of sales, and its operations are being carried on at the present time on a reduced basis. It is expected, however, that there will be a renewed demand after the first of the year, when returns from the crops have had time to get into general circulation. Willys Overland, Ltd., is manufacturing the Overland light four car, which has made a reputation for economy in gasoline consumption and easy riding qualities."

The balance sheet for the year shows the following principal changes:—

	1920.	1919.
Accounts receivable	$ 17,691	$ 116,645
Investments in other companies	5,115,993	4,218,819
Canadian war bonds	.	556,079
Australian war bonds	21,700	.
Total assets	5,239,409	5,311,551
Bankers' advances	500,000	184,229
Accounts payable	116,025	1,079,717
Dividends declared and unpaid	35,000	77,000
Plant, investment, and insurance reserves	1,018,814	846,401

Dividend payments during the year were unchanged, being $84,000 on preferred and $56,000 on common.

Carriage Factories, Ltd.—A deficit of $36,845 is shown in the report for the year ended July 31, 1920, as compared with a loss of $88,926 for the same period last year. Gross profits for the year were $302,636, to which is added the sum of $32,860 under the item "sundry revenue," giving a total of $335,496. Against this is charged $15[illegible],188 under the heading "administrative and selling expense," which brings the earnings down to $178,007. Further charges of $214,8[illegible] are set against this sum, which results in the net loss carried to current surplus of $36,845. The amount of $214,8[illegible] charged against the earnings, after the deduction of operating expenses, is made up of the following items: Bond interest, $[illegible], bank interest and charges, $51,[illegible], bad debts reserve, $11,102, and reserve for inventory, $11[illegible],081.

Total assets amount to $[illegible], compared with $[illegible],970 last year. Of the $904,5[illegible] [illegible] under the heading of inventories, which is somewhat under the same item in last year's report, which stood at $9[illegible] [illegible] to the town of Orillia of $2[illegible] [illegible] liability was $27[illegible]. Bank loans and overdraft [illegible] $70[illegible] [illegible] $100,000 of borrowings.

RECENT FIRES

Canadian Cereal Mills, $500,000—Business Section of Wadena, Sask., $300,000—Pigeon River Lumber Mills, $100,000—Flax at Belle River, Ont., $50,000

Belle River, Ont.—October 19—Fifty thousand dollar worth of flax was destroyed by fire.

Brockville, Ont.—October 15—Barns of Peter Dowdal township of Drummond, were destroyed by fire. The loss $4,000, with $850 insurance.

Downsview, Ont.—October 19—Fire, believed to hav been caused by an overheated bearing in a thresher, di $15,000 damage to the barn of T. Russell's pure-bred stoc farm.

Tillsonburg, Ont.—October 14—Oatmeal plant of th Canadian Cereal Mills was destroyed by fire. The loss, whicl will amount to $500,000, was partly covered by insurance.

Vancouver, B.C.—October 12—Plant of the Nationa Biscuit Co. at 1706 First Avenue West was damaged by fire The loss is estimated at $4,000.

Victoria, B.C.—October 10—Retail premises of O'Connell and Co. was damaged by fire. The loss is $20,000.

Wadena, Sask.—October 19—Business section of this town was destroyed by fire. The loss is estimated at $300,000

Windsor, Ont.—October 13—Universal Garage was damaged by fire. The cause of the fire is not known.

Woodstock, Ont.—October 16—Barn belonging to Be Dickson, Holbrook, was damaged to the extent of $7,000.

ADDITIONAL INFORMATION CONCERNING FIRES

London, Ont.—September 19—Overall plant of Everybody's Overall Co. was damaged, the fire being caused by spontaneous combustion. The loss is $7,500, with insurance of $6,000 in the Merchants, Gore District and Provincial Fire Insurance Companies.

Ingersoll, Ont.—September 18—The apple evaporator of O. E. Robinson and Co. was damaged by fire with a loss of $6,000. There was $3,000 insurance in the following companies: Norwich Union, Nationale Fire, and London Accident and Guarantee.

Manitoba.—The fire chief states during the month of August there were 170 fires, with a loss of $163,378. There were 30 farm buildings destroyed and 37 fires occurred in private dwellings. The careless use of matches is responsible for 77 fires, and 14 fires were occasioned by careless smokers.

Sherbrooke, Que.—October 2—Barns, stables and sheds of [illegible] and J. H. [illegible] were destroyed by fire. The cause of the fire is unknown. The total loss on buildings and contents was $2[illegible],[illegible]00, with $9,500 insurance in the Sherbrooke and Stanstead Mutual Insurance Co.

Vancouver, B.C.—The fire chief's report for the month of September shows that there were 52 fires. The total loss was $[illegible],[illegible]07, of which $[illegible]7,197 was covered by insurance. The following were the causes of fires: Bush fires 6, carelessness [illegible] 1, children playing with matches 1, chimney fires 3, defective stove 1, electrical origin 6, incendiarism [illegible], sparks 2, spontaneous combustion 1.

Is Our Foreign Trade Increasing?

Trade Link With United States Has Strengthened Since 1914, While Empire Connection Has Weakened — Growth of Canadian Exports Has Exceeded Increase in Prices — Latest Figures Show Falling Off in Exports to Europe, but Increase in Canadian Purchases There

By STATISTICIAN

IS the foreign trade of Canada increasing? The trade returns give a very satisfactory answer; they indicate general progress, showing that, in commerce, Canada is well represented on the seven seas. The term "foreign trade," it may be observed, includes trade done with the British Empire generally, as well as with foreign states proper.

The best way of sizing up the situation is to compare the trade figures for the fiscal year 1913-14, which ended four months before the outbreak of war, with those for the year ending March 31 last, these being representative of the old and new conditions in the commercial life of the Dominion. Incidentally, they best illustrate the new commercial spirit in Canada; the old, which was content pretty much with the home market and a fairly good outlet in the United Kingdom; the new, which while holding the market at home as securely as ever, recognizes that its real trade field is the world.

Great Increase in Exports

The story as told in a nutshell by the returns for trade years ending March 31 is as follows:—

1913-14	
Total exports	$ 455,437,224
Imports	618,457,144
Total foreign trade	$1,073,894,368
Total foreign trade per capita	$ 143.00
1919-20	
Total exports	$1,286,658,709
Imports	1,064,516,169
Total foreign trade	$2,351,174,778
Total foreign trade per capita	$ 273.00

It is to be noted that in 1919-20 the total exports were not only 182 per cent. greater than they were in 1913-14; but were valued at $113,000,000 more than the total imports and exports during the latter year. Allowance should, of course, be made for the rise in prices; but increase in the value of exports to the extent of 182 per cent. far exceeds the rise in prices.

Trade By Countries

Comparing the returns by important groups, the trade during the foregoing two years was made up as follows:—

Imports	1913-14	1919-20
From United Kingdom	$ 132,070,392	$ 126,269,274
From other portions of British Empire	22,456,410	47,901,537
From United States	395,565,328	801,702,720
From other countries	68,365,014	88,642,638

Total exports	1913-14	1919-20
To United Kingdom	$ 222,322,292	$ 495,961,867
To other portions of British Empire	23,709,829	73,653,809
To United States	176,948,299	510,128,368
To other countries	32,456,804	206,914,665

Trade Has Broadened

Evidence of the expanding nature of our foreign trade is to be seen in the fact that trade is conducted with a larger number of countries and on a much larger scale generally than in 1913-14. An increase in exports and imports merely with the United Kingdom and the United States would not of itself denote advance as a world trader. Indeed, it might be an evidence of greater dependence upon these countries than in the pre-war days. The broader the base of the country's trade and the larger the number of other states it trades with, the more substantial is its foreign commerce likely to be; and in this respect Canada has made positive progress.

Take exports. In 1913-14 Canada was dependent on the United Kingdom for a market for nearly one-half of her exports; to be definite, that country took 49 per cent. of them. John Bull and Uncle Sam between them took 88 per cent. of all that Canada sold abroad. This was a rather unhealthy condition, for it made the country too dependent on these two markets. But last year the United Kingdom took but 38.6 per cent. and a ready demand was found for a trade which, in point of value, was twice as large as that in 1913-14. Countries, other than the United Kingdom and the United States, which took a little over 12.3 per cent. of Canada's exports in 1913-14, took 22 per cent. last year. For every dollar's worth that we sold to these other countries in 1913-14, now we sell six. This is a decided gain; it means not only a much more diversified demand, but better trading conditions generally.

Imports from United States

In the matter of imports not as satisfactory progress can be reported, the Dominion being more dependent than ever on one source of supply, the United States. In 1913-14, 63.9 per cent. of all the imports came from that country; but in 1919-20, the percentage had risen to 75.2 per cent. This gain has been made at the expense of other countries. For example, in 1913-14, no less than 21.3 per cent. of the imports were drawn from the United Kingdom; last year the percentage was but 11.9. In 1913-14, countries other than the United Kingdom and the United States sent us 11.8 per cent. of the total imports; last year they sent but 12.8 per cent.

Of our commercial neighbors the United States has gained most from the increased external trade of Canada during the last six years. In 1913-14, 53.2 of our total trade was with the republic; in 1919-20 the percentage was 55.4. In 1913-14, one-third of our total trade was with the United Kingdom; last year the percentage had dropped to 26.5. Our trade with all other countries was but 13.7 per cent. in 1913-14; last year it was 18.1.

Decline in Empire Trade

The percentage of Canada's trade with the British empire generally is not as large as it was before the war. In 1913-14 it was equal to 37 per cent.; in 1919-20 it was but 32 per cent. While the percentage of trade with the mother country has fallen, that with the other portions of the empire has risen. In this interchange of commodities between the various British possessions Canada has gained heavily and while last year the value of imports into this country from the empire generally was only $18,000,000 more than in 1913-14, the value of exports to these possessions rose from $251,000,000 to $568,000,000. Trade with the East Indies is growing; but that with Australia and New Zealand has, during the last year, fallen off, this being doubtless due partly to the circumstance that the United Kingdom is now again supplying that market with some commodities that Canada temporarily supplied during the war. Nearer home, gains are reported notably with Newfoundland, the total volume of trade with the old colony having trebled in value within seven years, while gains have been made in trade with the West Indies and British possessions in Central and South America.

Preferential Tariffs

It is rather difficult to estimate the value to Canada during the last seven years of the several preferential trade arrangements between it and other portions of the Empire. Not until later will it be known what effect the preference granted by the United Kingdom to certain products from British dominions has had on Canadian exports. Nor can it be said positively that the trade agreement with certain of the British West Indies and British Guiana has imparted a strong impetus to reciprocal trade. It is true that between 1913, the year the agreement became effective, and March 31st last, the total trade between Canada and these possessions had increased two and one-half times, from $13,381,961 to $33,924,982. But, on the other hand, the total trade with all other islands in the West Indies increased over five times. During this period exports to these British possessions increased three and one-half times, from $1,552,668 to $1[illegible],007,991 while those to all other islands in the group increased over four times, or from $2,2[illegible]6,843 to $9,207,961. Imports from these British possessions increased two and one-half times, from $8,829,000 to $1[illegible],808,000; while those from all other islands in the West Indies increased six times, or from $1,859,162 to $28,137,197. However the preferential arrangement undoubtedly has arrested the serious decline in trade between Canada and these British possessions, which had set in. Assuredly the British preference has benefitted the British exporter in the Canadian market.

Europe a Big Buyer

Europe, including the United Kingdom, is Canada's best group customer, having purchased last year, commodities to the value of $67[illegible],[illegible]10,289, as compared with $2[illegible] in 1913-14. The total trade with Europe is also about double what it was in the latter year, imports, however, standing at $152,[illegible],000, being about $10,000,000 less. The granting of large credits to Belgium, Roumania and Greece undoubtedly kept the exports [illegible] higher during last year than they otherwise would have been. At the same time it may be asked, where would the export trade of both the United Kingdom and the United States be today were it not for the huge credits they have extended?

Trade With Orient

At [illegible] that trade with the Orient is not increasing more rapidly. It is undoubtedly true that Canada has not made the most of her opportunities in that quarter; but probably few realize the importance of the gain that has been made during the last six years. As far as percentages go, the total trade with Asia shows a larger increase than with any other continent, being now three and one-half times as large as it was in 1913-14. The imports have grown from $5,138,901 to $26,598,860 and the exports from $12,901,980 to $37,906,825. Japan is at present Canada's best customer, having taken $7,889,000 of commodities last year; but China is rapidly overtaking her. Since 1914, the value of exports to the latter country has increased 14 fold; to Japan it has increased five fold. British India now buys goods to twelve times the value she did in 1913-14; while in the case of the Straits Settlements the increase has been seven fold. The whole of Asia bought $26,598,860 worth last year, as compared with $5,138,901 in 1913-14; while it exported to Canada commodities to the value of $37,906,000, as compared with $12,901,980. This increase has come without a dollar of government credits. Nor has this trade had the benefit of extensive Canadian banking connections, as has been the case in certain other foreign countries. Had it not been for the collapse of the Kolchak government the resumption of commercial relations with Siberia would have added millions to the total of sales, for Canada was assured of her share.

South America

Since 1914, the value of Canada's exports to all South American countries has increased nearly five times, which is proof that the Canadian exporter is pushing sales in that quarter. During the last few years he has had the benefit of a rapidly growing and far-reaching Canadian banking connection which, beginning in the West Indies, rims the Carribean Sea, and reaches far down the east coast of the southern continent. In 1913-14 the value of the total trade with these countries was $14,053,658; in 1919-20 it was $33,680,628. In the former year the exports were $3,854,125; last year they were $14,600,604; while the value of the imports went from $10,199,533 to $19,080,024. The heaviest buyer is the Argentine, followed by British Guiana and Brazil, the others being far behind. Peru exported last year to this country products to the value of $5,072,408, or one-third more than any other South American state, but bought only $274,185 worth. The Argentine is the second largest exporter to this country, followed by Brazil. While Canadian banking connections make the way of the trader in these parts easier, the language and lack of knowledge of conditions are handicaps. It is also probable that these countries have been used to larger credits than most Canadian firms feel warranted in extending.

Australia, New Zealand and Africa

Trade with Oceania has more than doubled in value since 1913-14, but, save in the case of New Zealand, the gain is not now being generally held. The value of the total trade seven years ago was $11,165,565; last year it was $2[illegible],219,579. The value of New Zealand's purchases was four times what they were then; those of Australia showing a gain of two and one-half times. Imports from New Zealand [illegible] of $192,000 during the interval. The recent decline in exports to Australia will doubtless be accentuated by the new Australian tariff, which contains quite an amount of protection.

The value of the total trade with Africa is over two and one-half times what it was in 1913-14, the figures being $11,59[illegible] and $[illegible]. It is a good example of the growth of exports, these having gone from $1,072,152 to $1[illegible]. British South Africa took [illegible] per cent. of these, or $[illegible] worth, and next came British West Africa, $1,[illegible]. The latter is a fast growing trade, the value of the exports from this quarter six years ago having been only $[illegible]. The possibilities of the areas on this continent [illegible] a fine opportunity for Canada. Outside of British South and West Africa, the [illegible] $1,[illegible]00,000 worth from the Dominion last year. The value of the imports from the continent was $[illegible]

Mexican Trade

Unsettled political conditions in Mexico have kept down trade with that country, still it has doubled during the interval under consideration, having gone from $1,522,473 to $3,063,666. The value of the imports is over six times that of the exports, being $2,648,915, as compared with $414,751. The reason is obvious for until settled conditions are established firms have no desire to take chances on payment for goods. Trade with Central American countries has increased from $509,413 to $1,320,324, the value of imports having more than quadrupled.

Developments This Year

Since the beginning of the present calender year there has been a marked decline in exports to Europe, especially to the United Kingdom. On the other hand, imports from Europe, especially the United Kingdom, have increased very rapidly. Imports from the United States have continued to grow, as have exports thereto, the latter, however, at a much slower rate than the former. The following comparative figures show the situation as disclosed by the trade returns for the first four months of the present fiscal year, that is to the end of July, as compared with those for the same months in 1919

First, as to total exports: Those to the United Kingdom during this period were valued at $96,263,533, an increase of $69,933,000 over the same period in 1919; to the British Empire outside the United Kingdom $25,851,636, an increase of $8,810,000; total British Empire, $122,116,169, a decrease of $78,744,243; to the United States $165,410,768, an increase of $28,650,000; to foreign countries outside the United States, $64,068,235, an increase of $25,214,000.

Imports from the United Kingdom, $89,738,308, an increase of $66,925,900; from the British Empire, outside of the United Kingdom, $21,595,800, an increase of $7,985,584; total British Empire, $111,334,100; an increase of $74,911,550; from the United States, $308,522,000, an increase of $125,218,436; from foreign countries outside the United States, $54,656,200, an increase of $39,855,500.

Board of Commerce Activities Are Postponed

Members Resign and Staff Disbanded—Board Remains in Existence, However, Awaiting Privy Council Decision — Wheat and Sugar Control Worry Government — Loans to Soldier Settlers Increase — License System to be Adopted for Collection of Luxury and Sales Taxes

(Special to *The Monetary Times.*)

Ottawa, October 28, 1920.

AFTER a short but spectacular career the Board of Commerce has now passed out of all, except nominal, existence. Last Friday the premier announced that the three members had tendered their resignations and that no appointments would be made to the positions. Premier Meighen's statement does not occasion much surprise in the capital, as it was felt here that the resignations of the members of the board were certain to be handed in, following the cabinet's reversal of the board's order with regard to the maximum price of 21 cents per pound for sugar. The three commissioners who have now resigned are Captain William White, who was formerly secretary of the board, and who was appointed a commissioner on the resignations of the original commissioners; F. A. Acland, deputy minister of labor; and Major G. A. Dillon, purchasing agent for the department of justice. The formal announcement of Captain White's appointment as chief commissioner of the board of commerce is gazetted in the "Canada Gazette."

The appointment of the three members was stated to be a temporary measure, following the resignations of Judge H. A. Robson, of Winnipeg, the first chairman; W. F. O'Connor, K.C., and James Murdock, Labor representative of the board. Mr. Murdock's letter of resignation, written to Premier Borden, was the subject of much discussion just prior to the ending of the last session of parliament.

Await Privy Council Decision

The right of the board to issue orders, placing certain restraints on export of Canadian products, was challenged in connection with the export of pulp and paper. In regard to this the prime minister's statement says: "The jurisdiction of the board will shortly come before the judicial committee of the privy council for final determination. The Dominion government has been pressing to have the case heard with the least possible delay, but as the provinces have a right to be heard, it has not yet been possible to have the exact date of the hearing decided on. When a decision is given as to the extent of the federal authority in relation to the Board of Commerce Act, it will be for the government to consider what should then be done."

In the meantime there are several important matters pending before the board, matters which must now be shelved indefinitely—and probably never again dealt with. There is first and foremost the question of an alleged combine on the part of the Dominion and Canadian Canners. The board has not yet decided whether this alleged combine is illegal under the Act. A hearing to establish its status was set for August. Difficulty in securing a chartered accountant is alleged as the reason for delay in prosecuting this inquiry. Now the hearing must be postponed. Then there is the inquiry into the textile industries, an interim report on which was made. The final report may never be forthcoming.

Soldier Settlement Activities

Nearly $1,500,000 represents the increase in the amount of loans to soldier settlers made by the Soldier Settlement Board in the month of September. The total of loans approved to October 2 was $78,285,752, and the number of settlers' loans 19,526. Loans were for the following purposes: To purchase land, $42,631,096; to remove encumbrances, $2,169,466; for permanent improvements, $8,991,015; for stock and equipment, $24,594,175. The number qualified by the board for the privileges of the act is 41,161, out of applications numbering 56,974. The number of grants of free Dominion lands to soldier settlers is 7,987. The total area represented by these soldier grants exceeds 1,900,000 acres.

The settlers who have received loans are distributed among the provinces as follows: Prince Edward Island, 291; Nova Scotia, 392; New Brunswick, 491; Quebec, 454; Ontario, 1,374; Manitoba, 3,235; Saskatchewan, 4,765; Alberta, 5,625; British Columbia, 2,991.

Want Higher Ocean Freight Rate

Confirmation of the report from St. John, N.B., that the Royal Mail Steam Packet Line, which gives a service between Canadian ports and the West Indies, is applying to the government for increased freight rates because it is losing money, has been secured from Sir George Foster, minister of trade and commerce. Sir George said:—

"The fact that the Canadian government merchant marine has placed vessels on the different routes connecting with the West Indies, which to some extent interferes with the freight earnings of the R.M.S.P.C., especially on the northbound passage during the slackness of the sugar season, and the fact that the freight rates of this company have been controlled by the government, and the company has not been free, therefore, to take advantage of the greatly increased rates during the war and since, and also owing to the great increase in the price of coal, as well as ship commodities, the company has made application for an increase in freight rates, which is now being considered by the department of trade and commerce, as also by the St. John and Halifax boards of trade."

Thirty-five cargo vessels already have been completed and are flying the ensign of the Canadian government merchant marine in the seven seas. The shipbuilding programme of the government contemplates the construction of sixty-three vessels in all, with an aggregate tonnage of 376,725, and at a total cost of $72,332,940. The completed vessels are now being operated in conjunction with the Canadian National Railways.

Arrangements now are being made with the liquidator of the Dominion Shipbuilding Co., of Toronto, for the completion of the two 3,500-ton ships which that corporation had under contract; about three-quarters of the work had been completed when the firm went into liquidation. The department of marine will either undertake to complete the work itself or have it done through the liquidator.

Canadian Trade Commission Done

Another government body to go out of existence at the end of the present week is the Canadian Trade Commission, of which F. H. Wilkie is head. The commission, which had offices both in Canada and Great Britain, has been gradually restricting its activities ever since the retirement from the overseas end of Lloyd Harris and since war-time licensing of exports and imports went out of fashion.

Will Explain Luxury and Sales Taxes

In view of the uncertainty among business men regarding the collection of the new Dominion taxes, G. W. Taylor, assistant deputy minister of customs and inland revenue, has gone to the maritime provinces to explain them. He will visit Quebec and Montreal on his return. Hon. R. W. Wigmore, the minister of the department, had intended making the trip himself, but was prevented from doing so by pressure of business; he may a little later visit the western cities, accompanied by R. R. Farrow, deputy minister, and by Mr. Taylor.

A statement issued on Tuesday by Sir Henry Drayton, minister of finance, shows income tax returns by occupation, for 1919, on incomes of 1918. The figures are as follows:

Occupation	No. of tax payers.	of whole amount.	Amount assessed.	[illegible]
Agriculturalists	6,1[illegible]	6.5	$ 102,970	[illegible]
Legal	1,699	1.7	[illegible]50,376	1.9
Medical	[illegible]	[illegible]	[illegible]	[illegible]
Engineers	986	1.0	[illegible]	[illegible]
All other—				
Professions	[illegible]	[illegible]	[illegible]	[illegible]

All others	[illegible]	[illegible]	[illegible]	[illegible]
Corporations	[illegible]	[illegible]	[illegible]	[illegible]
Totals	[illegible]	100.0	$18,[illegible]	[illegible]

Wheat and Sugar Control

Control of wheat and sugar, two commodities which have suffered heavy price declines during the past few weeks, are now under daily discussion in government circles. Strong pressure has been brought to bear from the west to have the government guarantee a wheat price, but it is feared that a heavy loss might be incurred if such a guarantee were to be made. The marketing of wheat and the price obtained is of such great importance to this country that the question is being considered from every angle, however.

During the past few days, however, the wheat question has been eclipsed by public interest in sugar. On October 13 the Board of Commerce issued an order fixing the retail price of granulated sugar at not more than 21 cents per pound, plus freight, and prohibited imports of refined sugar. This order virtually maintained the price in the face of a falling market and was met with loud protests. After a hearing of the case on October 20 the government suspended the order.

Marine Fisheries

Canada, Newfoundland and the United States are to appoint three members each on an international committee on marine fishery investigations under an agreement reached at an informal conference held last month in Ottawa. The conference resulted from the correspondence extending over a number of months between representatives of the three countries on the marine fisheries of the Atlantic and Pacific coasts. The international committee, in the view of the conference, should determine what measure of international co-operation is desirable in the study of fisheries, what general investigations should be undertaken, consider definite problems that may be awaiting study, submit recommendations to their respective governments, and co-ordinate and co-relate the results of the work. The conference also recommended that the international committee establish contact with the permanent international council for the exploration of the sea.

Merchants Require Licenses

Under the revised system of collecting the luxury taxes in Canada, which comes into effect on November 1, every merchant will be under license. The plans for inaugurating the new system are well advanced and the special stamps will be available for all merchants by the last day of this month. The method to be followed, it is explained, will give the Inland Revenue Department a complete check on all transactions, and the collection by means of stamps will make the operation of the act much more simple.

Every merchant is to be supplied with a special machine for cancelling the stamps by perforation, and merchants will be charged a nominal license fee of $2. They will not, however, be required to pay anything for the perforating machine. Supplies of the stamps will be available at all banks and also at the various local customs offices, so that it will not be necessary for merchants to stock up for long periods in advance.

While the statement has not been made officially that such action is contemplated, it is pointed out that in the case of merchants who persist in ignoring or evading the law regarding the collection of luxury tax on goods sold by them, it will be within the power of the department under the new regulations to refuse to renew the licenses of such merchants, and they would thus be unable to continue in business.

Ruling on Coal

The Board of Commerce, in a judgment on complaints that unduly high prices have been charged by the coal dealers of Guelph for domestic sizes of anthracite coal, finds that the consumers of Guelph on the whole have been more than fairly treated by their dealers, and during the present crisis they are doing all that possibly can be done to secure sufficient supplies to meet all wants at the best possible prices. "The position," says the Board, "is unenviable for the reason [illegible] are [illegible] it is almost impossible to get coal at any price, and if they pay the outrageous figures asked, they are looked upon as profiteers. There is profiteering in most of the coal received, but not by the local dealers. Where this is [illegible] is quite plain when it is noted that premiums of [illegible] to seven dollars per ton are demanded [illegible] at the mine." In two instances, however, the [illegible] ordered refunds.

THE EMBARGO AN INEFFECTIVE REMEDY

AGAINST a world-wide depression of the security market the Canadian government has opposed a voluntary embargo upon the importation of securities. Having borrowed immense sums abroad in the past, we now attempt to stem the return wave by retaining all accumulating capital here. Profit has proved a more effective factor than patriotism, however, and the request of the finance minister, made last February, has not been lived up to. The members of the Bond Dealers' Association, of the Montreal and Toronto Stock Exchanges, of the Canadian Bankers' Association and of the Dominion Mortgage and Investments Association have on the whole observed it, but there are numerous other channels through which Canadian securities held abroad have found their way back to this country.

What are the special circumstances which have caused this extraordinary action on the part of the government? Apart from the general purpose of maintaining the security market in Canada, the government had in mind especially the price of Victory bonds. Now, Sir Henry Drayton, finance minister, urges that the embargo should be retained until the movement of the wheat crop is financed. The price of Victory bonds was not maintained, and just to what degree the embargo will enable the banks to finance grain shipments cannot be estimated. Meanwhile the business of importing securities goes on actively—outside the circle of membership in the above-mentioned association. What support the restrictions do accord to the security market makes the business all the more easy and profitable. If the finance minister wished to help the small brokers to work up a business, he chose an effective method of doing so. Sir Henry intimates that they may be blacklisted, and that the voluntary restrictions may take the form of law at the next session. As for a blacklist, he must see that it would be an excellent advertisement for the dealers in cheap securities, and the minister is a keen enough financier to see that legislation forbidding the repurchase of securities would immensely damage the reputation of this country in the financial centres of the world.

Financial opinion is almost in accord that the government has made a serious mistake. It is one thing to conform to the request, and another to agree to the principle. Canada cannot shut herself off from the rest of the world at this time of financial stress by such a futile embargo, and any stricter one would be injurious if not intolerable. The financial situation is too intricate to be remedied by a partial measure of this kind. The embargo has failed in its effect and is injurious in its working.

AN EPIDEMIC OF LOTTERY BONDS

IN times of financial stress it is a common thing for governments and municipalities to resort to bond issues redeemable by annual drawings, with special prizes for those who are lucky enough to hold one of the first bonds to be drawn. Several issues of this kind have been made recently, and some of them are being widely offered on this side, where the rate of exchange affords a special inducement for their purchase.

The plan has been used for large French issues, and it is used also in connection with a small sale of twenty-five year eight per cent. sinking fund gold bonds of the City of Christiania, Norway. Christiania will provide about $200,000 a year and will buy on the open market any bonds which are offered up to $110. If any of this money is left at the end of five years, it will be used to buy bonds at $110, those bought to be selected by lot. During the next five years Christiania will supply about $200,000 a year, and bonds will be bought at $110 and interest, the bond bought being selected by lot. In the next fifteen years bonds will be redeemed in this way at $107½. Christiania will, of course, supply each year enough additional money to provide for the premium. Several Swiss cities are looking for money in New York. The city of Zurich bonds for $6,000,000 twenty-five year eight per cent. bonds are being offered this week, and Berne and Geneva are both negotiating with New York bankers. Two Dutch bankers and the government of Holland are also in the New York market at the present time.

UNITED STATES WAR RISK INSURANCE

STATE insurance is knocking at the door of Canada and the Canadian provinces. A few regard it as opportunity. Insurance men themselves are skeptical, and where a public opinion has been expressed they have taken a stand in opposition. Apart from workmen's compensation acts administered by most of the provinces, and two or three special classes of insurance written by the Dominion government, state insurance has not been tried in Canada. In other countries, however, including some of the British colonies, it has a strong foothold, and the United States government has just carried on the greatest operation ever attempted in the insurance field. This was the insurance on the troops engaged in the great war.

A summary of the activities of the United States Bureau of War Risk Insurance up to August 31, 1920, has just been published, and though the figures do not show the success of the operations, they at least indicate its extent. The principal figures are as follows:—

1. The Marine and Seamen's Insurance Division has done a total business of	$2,390,074,385
With premiums collected amounting to	47,585,072
On 33,395 policies, resulting in paid claims of	29,830,746
And a surplus over expenses and refunds of approximately	17,500,000
2. The Allotment and Allowance Division has approved 2,098,149 claims for allotment and allowance involving payments	
For allotments amounting to	$ 290,019,861
For allowance amounting to	267,961,875
With a total expenditure of	557,981,737
And payments for the month of August, 1920 alone, to the amount of	
Allotments	766,657
Allowances	1,010,695
3. The Insurance Division wrote, during the war and to date, 1,640,049 War Risk Term Insurance policies covering insurance to the amount of	$40,331,640,000
The gross premium remittances from all sources approximating	346,987,730
130,017 claims for War Risk Term Insurance allowed on account of death are represented by insurance to the amount of ..	[illegible],154,911,[illegible]
While 3,385 claims for War Risk Term Insurance allowed on account of permanent and total disability involve insurance to the amount of	29,5[illegible]10
During the month of August, 1920 alone, the total disbursements on War Risk Term Insurance claims amounted to	7,320,607

THE COLLEGE MAN IN INDUSTRY

UNIVERSITY training aimed at a business career is a new feature of Canadian education. It is only within the past ten or fifteen years that our universities have framed courses with that object in view. Isolated cases were of course to be found in which a more liberal education contributed to success in commerce, but the results achieved by such graduates were in the main due to the development of qualities other than the knowledge of language, literature and law. Now almost all our colleges have courses in economics and finance, the results justify the establishment of such courses, and evidence on a larger scale is noted across the border, where advanced business training has promoted the graduates to leading positions in commercial and financial affairs.

Business Methods for October quotes some opinions from business leaders who have had university education. The handicap during the early years is admitted, but it is overcome later on. S. B. Chadsey, manager of the Massey-Harris works at Brantford, Ont., says:—

"When I first started in business it seemed to me that my university course was a positive disadvantage. I found that I was placed in the category of theorists, and that workmen of long experience were suspicious and inclined to resent a little the presence of anyone who had college training. This prejudice is bound to exist and can only be overcome by the steady reliable work of the graduate himself. In many businesses the handicap extends somewhat beyond the relationship with the workmen. It extends also to the management in those concerns where the management has been drawn from uneducated men. There is less of the feeling abroad to-day than there was when I began, partly because of the advertising that the whole question of education has been receiving and partly because of the advent of more progressive men in the management of many concerns."

Geo. C. Mackenzie, president and general manager of the Electric Steel and Metals Company, Ltd., Welland, Ont., is a graduate of Queen's University. He states that his university training has most assuredly been of value to him in business because it has given him an opportunity of knowing and making friends of many educated men; it broadened his viewpoint of life and taught him the value of reading and of making an effort to understand and appreciate the opinions of other men. He advises Canadian manufacturers to send their sons to the university, whether they intend ultimately to go into business or to enter a professional career. As to the most suitable studies, he would consider history, political economy and also a modern business course such as has been recently included in the curriculum of some Canadian universities. These are, of course, the foundations only of the superstructure which must be built to meet the future requirements of the student.

The towns and cities of Canada have for the past forty years imposed a tariff upon an unwilling country. The rural districts are now securing retribution by carrying prohibition in the face of city opposition.

* * * * *

A recent convention of the National Association of Purchasing Agents, held in Chicago, had to be protected by police because the policy of buying nothing except essentials was discussed. The price reduction movement is evidently as unpopular as price increases.

Ontario's fish should be sold to regulate living costs rather than at the market price, says J. Jenkins, manager of the London civic market. It is complaints such as this which make the success of the government in business so difficult.

*

J. P. Bell, general manager of the Bank of Hamilton, names the increase in savings bank deposits as evidence of Canadian thrift. Sir Henry Drayton says we are too extravagant and need to save more and spend less. The government's "produce and save" campaign has fallen flat, and there is no doubt whatever that the past four years' extravagance has been unprecedented in this country.

*

Canadian business with Brazil should as far as possible be diverted from the New York route to the direct route, "to the benefit of Canadian shipping and merchants." Now that a government merchant marine has been established to assist the country's foreign trade, is it to be the duty of [illegible] to the merchant marine?

*

D. B. Hanna's action in proclaiming that any employee of the Canadian National Railways who runs for political office will be instantly dismissed, suggests that the management has not yet been taken out of politics; and labor's [illegible] to criticize the policy of the [illegible] the same view.

PERSONAL NOTES

L. GOLDMAN, president and managing director of the North American Life Assurance Company, has been elected to the directorate of the Consumers' Gas Company, Toronto. W. Mulock, a member of the legal firm of Mulock, Milliken, Clark and Redman, Toronto, has also been elected to the directorate of the Gas company. The Consumers' Gas Company, in its financial statement shown in detail elsewhere in this issue, has been able to report better results for the year just closed, due to the increases in rates which were granted. Arrangements are also being made to introduce new capital into the business in order to keep pace with the growing needs of the city of Toronto. Operating expenses have risen rapidly during the past two years, and last year earnings were not sufficient to meet dividend requirements. This year there was a surplus after paying dividends.

R. A. DALY, of R. A. Daly and Company, Toronto investment bankers, whose company recently purchased a seat on the Toronto Stock Exchange, has been elected to represent his house on the floor of the exchange. Mr. Daly was born at Napanee, Ont., and was educated at Napanee Collegiate and the Toronto University. In 1906 he graduated from the latter institution as a B.A., and entered the service of the Crown Bank. For one year he served with that institution, and then he joined the Bank of Nova Scotia. From 1908 to 1911 he held positions in Toronto and New York, and in 1911 was appointed in charge of the bank's investment department at the head office, Toronto. He inaugurated his present business in August, 1916.

M. P. LANGSTAFF, actuary of the Dominion Life Assurance Company, Waterloo, has resigned to become assistant manager and actuary of the newly formed Ontario Equitable Life and Accident Assurance Company, Waterloo.

HON. HSU UN YUEN, president of the North China Banking Corporation, arrived in Victoria, B.C., recently on his way to New York, to negotiate for the balance of a $20,000,000 loan against tobacco and wine revenue between the government of China and the Pacific Development Company, which was arranged last year. Only $5,000,000 has been advanced up to the present and the Chinese government is anxious to receive the rest.

MAJOR E. L. MCCOLL has been appointed Canadian trade commissioner to Brazil. Trade between Canada and Brazil goes largely through the United States, and it is the object of Major McColl to get that trade carried out direct. "Several millions' worth of business goes via New York annually," he said, "and it is my object to adjust this so that Canadian shipping and merchants may get the benefit."

H. G. FORMAN, hitherto assistant treasurer of the Canadian Northern Railway, Toronto, has been appointed treasurer of that system. His jurisdiction will also include the Grand Trunk Pacific. As a result of Mr. Forman's appointment, the following changes will take place: F. J. Fuller is appointed assistant treasurer in charge of local treasurers and paymasters. His office will be at Toronto. T. J. Macabe is to be assistant treasurer with supervision over the registrar and transfer departments, with office at Toronto. Mr. Macabe was formerly registrar and transfer officer. C. H. Hickie is appointed assistant treasurer in charge of Grand Trunk Pacific Railway and Canadian Government Merchant Marine Limited, general accounts, with office at Toronto. D. R. Gunn succeeds T. J. Macabe as registrar and transfer officer with office at Toronto. T. H. Best is made assistant to the treasurer at Toronto in charge of general accounts, etc. S. J. Potter remains local treasurer at Toronto.

OBITUARIES

C. W. ANDERSON, one of the oldest residents of Oakville, Ont., died there on October 22, in his eighty-third year. For many years he was a member of the town council and also represented the municipality on the county council. With his son, Mr. Anderson conducted a private bank in the town, with a branch at Palmerston, but fifteen years ago the business was sold.

F. H. WHITTON, general manager of the Steel Company of Canada, died at Hamilton, Ont., on October 24, after a serious operation. Mr. Whitton was born in Northamptonshire, England, 61 years ago and spent his early youth in that country. He attended college at Cambridge, but when 18 years of age came to Canada and entered the employ of the Grand Trunk Railway at Montreal. He later removed to the United States, but returned to Canada to assume the management of the Ontario Tack Company, which position he held till 1907. When the Steel Company of Canada was formed Mr. Whitton was appointed assistant general manager and in 1916 became general manager.

THE EXCHANGE RATE
V.—What Controls It?

THE previous numbers of this series explained that the foreign dollar is not money but a commodity, and that the inconvenience of settling international debts in gold has led to the use of Bills of Exchange. We now come to the effect of the Trade Balance on the exchange value of the dollar.

If we bought from the United States goods to exactly the same value as those we sold to them, broadly speaking, there would be no exchange problem between us, since the amount of Bills of Exchange offered for sale in each country would just cover the requirements of those wanting to pay debts in the other.

At present, however, we are buying from the United States far more than they are from us. In consequence many Bills of Exchange, representing Canadian dollars, are being offered in the money markets of the United States by American vendors and few bids are being made for them. The holders, to dispose of them, lower the price until they become a tempting bargain. The Canadian dollars are therefore at a discount in the United States.

On the other hand, only comparatively few United States dollar Bills of Exchange, created by the sale of Canadian goods, are being offered in Canada and there are many bidders who want to buy them to pay their debts in the United States. In consequence the competition is keen, the price rises and United States dollars are at a premium here.

We will deal next week in No. VI. with the effect on the exchange rate of one result of war financing, namely the Inflation of the Currency.

THE CANADIAN BANK OF COMMERCE

Capital Paid Up - $15,000,000.
Reserve Fund - $15,000,000.

This series, when completed, will be published in pamphlet form. If you desire a copy, write to our Head Office, Toronto.

APPREHENSION REGARDING MUNICIPAL FINANCES

Tax Rates are High and Will be Higher, with Much Property Reverting to Cities—Progress of Irrigation—Business Generally Quiet

(Staff Correspondence.)

Calgary, October 28th, 1920.

FALL conditions in Alberta seem to be satisfactory—rather quiet just now for this season of the year, but a very open fall is being experienced, and farmers are busy on their land, getting ready for next year. There is a tendency also to hold wheat shipments on account of the price being lower than anticipated. In Medicine Hat business was fairly brisk, with manufacturing plants going at full capacity in several instances. With cheap fuel, and no sign whatever of it diminishing, Medicine Hat should make considerable progress in the next few years. At present the board of trade are putting on an active membership compaign, the aim being to enroll four hundred members.

Irrigated Lands Sell at High Prices

The need of irrigation is felt more each year around Medicine Hat. Large tracts of irrigated land are available, and it is steadily being taken up at prices ranging around $75 an acre. Mayor Brown, of Medicine Hat, is doing a great service to western Canada in connection with the Western Canada Colonization Association, which he has fathered, and is now pushing so successfully in eastern Canada. The great need of the West is undoubtedly the bringing in of a desirable class of settlers and the proper looking after them when they do come.

The outlook this fall in Calgary is good—somewhat quiet just now, but no one is feeling at all pessimistic. Alberta, as a whole, has a much better crop than last year, although not as good as was expected. Wholesale business is fairly good, but collections are rather slow at present. Alberta seems to have the best crop yield of the three provinces this year. Some threshing still remains to be done, but with the present open weather it will all be completed soon.

Difficulties in Municipal Finance

The convention of the Union of Alberta Municipalities opens on November 9th in Lethbridge. Some apprehension is felt as to the financial outlook for many of the western cities. The mill rate is high at present, 40 and over in some cases, but it will undoubtedly be higher next year. In Calgary, just last week, some four million dollars' worth of property reverted to the city, some of it central inside property that owners did not seem to think worth while redeeming. In Lethbridge and district the feeling is good. The outlook for irrigation is greatly improved and the Lethbridge Northern project will now be rapidly pushed forward. Irrigation is the salvation of Southern Alberta, and much credit is due to irrigation associations and to those who have preached the gospel, in season and out, for the last ten years. Their labors are, year by year, bearing more fruit.

The absence this fall of a Victory Loan campaign in the West seems to leave a vacancy. This may account for the rather quiet period at present being experienced. With good fall weather and great preparation being made for next year, the outlook in the West is encouraging.

C.P.R. TO BUILD NEW LINE

A contract has been signed between the Canadian Pacific Railway Co. and the government of the province of Quebec for the building of 51 miles of railway line in the [illegible] region, which will open to transportation one of the most fertile sections of the province. The contract was signed by Messrs. Beatty, president of the C.P.R.; Grant Hall, vice-president, and A. D. MacTier, second vice-president, while Hon. Antonio Galipeault signed for the Provincial government.

VALUATION FOR CUSTOMS PURPOSES

Ruling of Department Was Belated and Instructions Were Obscure—United States Still Favored by Valuation at Par

By A. B. Barker

UP to a very short time ago the Canadian customs' valuation of invoices in foreign currency was made at par and the duty charged on this amount, regardless of the rate of exchange. The result was that, while the duty charged on invoices from the United States was based on an undervaluation, that on imports from Great Britain and other European countries was based on an absurd overvaluation. With a duty, say, of 40 per cent. on an article from the United States when American funds were at a premium of 15 per cent., the effect of this method was to cut the rate of duty to 34 per cent. On an article imported from France, whose currency is now worth less than one-third its former value, the effect of a 40 per cent. duty, based on the par of exchange, would be to make the rate of duty actually charged something like 120 per cent. Of course, this rate was not paid, as, by buying the article from an American importer this weird ruling of the Canadian customs could be gotten around.

In thus buying from the American importer the Canadian paid the duty on the American wholesale price, though, as the goods would be purchased out of bond, he would pay for them at the actual European price, plus, of course, a profit to the American importer, who is not in business for his health. The department insisted on thus penalizing the imports from Great Britain in favor of the American dealer, regardless of the fact that the members of the government were urging Canadians to buy as far as possible in Great Britain and curtail purchases in the United States in order to correct the rate of exchange. The ostensible reason for this ruling was that the low rate of exchange on European funds would permit "dumping," but prices have advanced in Europe in proportion as the value of their currency has depreciated.

Now Based on Current Rate

Recently the Customs authorities realized the absurdity of their course and made a new ruling. The language, however, in which it was drawn was so obscure that some four circulars within a month were necessary to explain its meaning. The basis of valuation now is the value of the foreign currency in its relation to gold, and for customs purposes the value of this currency is considered to be the rate of exchange on Canada in the country of origin at the date of shipment. The new ruling, however, still discriminates in favor of shipments from the United States, for, as the currency of that country is on a parity with gold, American invoices are valued at par for duty purposes in Canada. If they were treated like the others the value would be based on the present value of Canadian funds in New York. There may be good reasons for this favored treatment, but the practice hardly corresponds to the preaching of those in authority, who urge increased trade with Europe.

The action of the department in taking the rate of exchange in the country of origin, instead of the rate current in Canada, is also a matter of surprise to the ordinary mortal, as the simplest method would be to accept the Canadian rate of exchange on the foreign markets as the basis of computation.

Bearing on Foreign Trade

The whole question has a distinct bearing on our foreign trade. If we are to export our surplus, we must accept goods in exchange for those we ship. We have done so in the past but not directly. We sold to Europe, and with the proceeds purchased goods in the United States, so that in reality we exchanged goods for goods. This being the case, the part of wisdom would appear to be to get as much goods in exchange for ours as is possible. This has nothing whatever to do with the relative merits of protection or free trade. It is simply a matter of getting our money's worth.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

BANK BRANCH NOTES

During the month of September there were twelve branches of Canadian banks opened. The following have not already been mentioned in *The Monetary Times*: Boischatel, Ange Gardien, Que., Nationale; Lisle, Ont., Merchants; Moose Jaw, Sask., Merchants; Notre Dame des Bois, Que., Nationale; West Edmonton, Alta., Hochelaga; Westerham, Sask., Standard.

Out of five branches closed in September two have not yet been mentioned in *The Monetary Times*: Cartorville, Ont., Union; Port Carling, Ont., Nova Scotia.

The branches opened were distributed among the banks as follows: Nationale, 2; Dominion, 1; Commerce, 1; Merchants, 2; Royal, 2; Nova Scotia, 1; Toronto, 1; Hochelaga, 1; Standard, 1.

The Royal Bank of Canada announce the opening of a branch at Hay Lakes, Alta.

R. J. Williams has been appointed acting manager of the Bank of Montreal, at Regina, Sask.

James Cameron, who has been manager of the Canadian Bank of Commerce at Swift Current, has been appointed manager of the branch at Moose Jaw. Mr. Cameron is succeeding Arthur Maybee, who has been appointed manager of the main branch at Calgary.

EXCHANGE QUOTATIONS

Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates as follows:—

	Buyers.	Sellers.	Counter.
N.Y. funds	10 9-16 pm	10 11-16 pm	....
Mont. funds	10c. dis.	Par.	1/8 to 1/4
Sterling—			
Demand	$3.8350	$3.8450	...
Cable transfers	3.8450	3.8550	....

Bank of England rate, 7 per cent.

New York quotations of exchange on European countries, as supplied by the National City Co., Ltd., Toronto, as at October 28, 1920, follow: London, cable, 347; cheque, 346¼; Paris, cable, 6.35; cheque, 6.34; Italy, cable, 3.74; cheque, 3.73; Belgium, cheque, 6.73; Swiss, cheque, 15.75; Spain, cheque, 13.82; Holland, cheque, 30.45; Denmark, cheque, 13.70; Norway, cheque, 13.60; Sweden, cheque, 19.44.

GRAIN MOVEMENT SWELLS CURRENT LOANS

An increase of more than $32,000,000 in current loans in Canada, largely as a result of the western crop movement, is shown in the September bank statement. Savings deposits increased by about $8,500,000, while demand deposits increased by nearly $37,000,000. The following are the advance figures:—

	Sept., 1920.		Changes from Aug., 1920.
Reserve fund	$ 130,325,640	+	$ 142,980
Note circulation	231,091,885	+	3,721,091
Demand deposits	677,286,905	+	36,92[illegible]
Notice deposits	1,270,191,097	+	8,55[illegible]
Total deposits in Canada	1,947,481,002	+	45,477,[illegible]
Deposits outside Canada	355,2[illegible]8,992	—	1,[illegible]1,181
Current coin	81,037,676	—	1,082,81[illegible]
Dominion notes	173,772,522	—	5,[illegible]47,969
Deposits, central gold reserve	10[illegible],012,5[illegible]3	—	5,8[illegible]0,0[illegible]
Call loans in Canada	114,669,611	—	1,67[illegible]
Call loans outside	186,962,960	—	[illegible],925,98[illegible]
Current loans in Canada	1,417,5[illegible]0,756	+	32,050,60[illegible]

Total liabilities	2,847,426,216	+	69,1[illegible]
Total assets	[illegible],110,014,769	+	[illegible]8,8[illegible]

A detailed review will be given in these columns next week.

CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co., during the week ended October 22, 1920, in provinces, as compared with those of previous weeks and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1919.
Oct. 22	1	8	1	3	2	1	1	2	0	19	..
Oct. 15	2	10	2	0	2	0	0	3	0	19	7
Oct. 8	5	10	2	0	2	2	0	0	0	21	10
Oct. 1	3	4	0	1	3	4	0	2	0	17	11

RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the first three weeks in October:—

Canadian Pacific Railway.

	1920.	1919.		Inc. or dec.
October 7	$5,356,000	$3,965,000	+	$1,391,000
October 14	5,689,000	4,029,000	+	1,660,000
October 21	5,983,000	4,241,000	+	1,742,000

Canadian National Railway.

	1920.	1919.		Inc. or dec.
October 7	$2,657,913	$2,140,414	+	$ 517,499
October 14	2,901,802	2,012,883	+	888,919
October 21	2,917,348	2,167,313	+	750,035

Grand Trunk Railway.

	1920.	1919.		Inc. or dec.
October 7	$2,737,818	$2,115,530	+	$ 622,288
October 14	2,557,273	2,148,124	+	409,149
October 21	2,666,086	2,101,885	+	564,201

WEEKLY BANK CLEARINGS

The following are the Bank Clearings for the week ended October 28, compared with the corresponding week last year:—

	Week ended Oct. 28, '20.	Week ended Oct. 30, '19.		Changes.
Montreal	$132,674,083	$134,179,180	—	$ 1,505,097
Toronto	108,985,304	92,906,762	+	16,078,542
Winnipeg	94,572,053	68,758,319	+	25,813,734
Vancouver	21,104,740	15,521,230	+	5,583,510
Ottawa	8,707,504	8,046,645	+	660,859
Calgary	11,495,887	10,503,563	+	992,324

Are You a Trustee?

IF so, you may be interested to learn that this Corporation also acts as agent for personal Trustees, taking charge of the administration of estates for them and performs such duties as keeping estate funds fully employed in high-class investments, collection of revenue, cutting coupons, management of real estate, rendering statements and remitting balances to beneficiaries at regular intervals, keeping securities in Safety Deposit Vaults, etc. Many Trustees find this the most satisfactory way for them to administer an estate—by turning it over to us as their agent and at the same time retaining the responsibility imposed on them under the Will.

THE FINANCIAL OUTLOOK IN ALBERTA

Good Crop is Powerful Influence, But Credit is Tight and Taxes are High

By Angus Lyell

FINANCIAL conditions in Alberta in general are dependent on the produce of the field. The province is essentially an agricultural one, although it has vast mining resources, particularly coal and probably oil. During the summer months, business is generally dull, pending the outcome of of the harvest. Should the crop prove a failure, then a more or less hard winter in the cities would follow. Climatic conditions, over which man has but little control, are the governing, and unknown, factor in crop production, on which the financial prosperity of the province depends.

A long, hard winter, extending from the sixth day of October to the third day of May; stringent financial conditions, due to three crop failures in succession; shortage of feed, causing heavy loss of live stock; spring operations fully four weeks behind the average; these factors did not cause a bright outlook at the beginning of the season, but still there was optimism, which has been fully justified. The crop on an acreage basis is the best on the prairie.

Estimated Wheat Yield

Returns as yet are not complete; but the latest estimate of the Dominion Bureau of Statistics is that Alberta will have a wheat crop of 82,972,000 bushels, compared with 40,305,000 bushels for Manitoba and 136,880,000 for Saskatchewan. This is a very excellent result, considering the fact that, owing to the lateness of the season, oats had to be sown in certain districts instead of wheat.

The area under cultivation in wheat this year has been estimated at about 3,500,000 acres, which is considerably in excess of that of 1915, which was a record year for production, when there were 2,138,031 acres in wheat, 1,827,071 acres in oats, and 304,009 acres in barley. More land was brought under cultivation during the years of the war, with the result that to-day, while the average yield per acre for wheat is much less than in 1915, the total production may be 23,000,000 bushels more. Perhaps wheat may average only from eighteen to twenty bushels per acre, as against 31.12 bushels in 1915.

Values Will Be High

The price, unless there is a sharp and unforeseen break, should considerably exceed that of 1915, when the average price of wheat was eighty cents; of oats, thirty-one cents; and of barley, forty-four cents; the total value of the yield being—wheat, $58,325,600; oats, $25,532,900; and barley, $4,310,100. If wheat averages $2.00 a bushel, the return will be nearly four times that of 1915, while the revenue from oats and barley should be at least double.

The cost of putting in and taking off the crop has been heavy, due not only to the high rate of wages prevailing for farm help, but the outlay for seed. The obligation of the province for seed grain loans, according to the estimate of the minister of agriculture submitted at the last session of the legislature, was approximately four million dollars. This represents advances to those who have had crop failures, and tells, in part, the story of the hardships of the last three years. Such loans are, of course, a lien on the land and its produce, and will now have to be paid. It has been estimated that should the price of wheat fall below $1.60 a bushel, there will be an actual loss in farming operations. It is well to keep this in mind when considering the bumper crop.

Financing the Crop

The Wheat Board has ceased its operations and there is, consequently, a good deal of speculation on the financing and marketing of the crop. The amount required to move the crop will be large, and the Canadian Council of Agriculture think that the government should have continued in control fo another year. The farmers' companies are hardly strong enough financially to meet the situation; local bankers can operate but within specified limitations; and perhaps, afte all, the government may have to lend its assistance.

The crop, on the whole, is good all over the province but especially so in the dry belt in the south and in the Peace River district in the north. True, there are spots where the yield is but scanty, as in the neighborhood of Macleod and Medicine Hat. Round Lacombe, again, where there is usually ample moisture, there was too little this year, with the result that the crop there is not up to the average. Generally speaking, however, the yield is good.

Railways Are Doing Better

The moving of a heavy crop is usually a serious problem for the railways. In the districts fed by the Canadian Northern there was cause for much complaint in the old days, but since the government obtained control of the line the service has been substantially improved. In the Peace River district, there will be much better transportation facilities this winter; the Canadian Pacific Railway Company is doing its best to put the Edmonton, Dunvegan and British Columbia line in working condition.

Business in the cities has been dull for months, pending as usual the outcome of the harvest. But while there are already signs of increased activity, it may be comparatively late in the year before there is much substantial improvement. At present there is but little money in circulation, and credit has been, and still is, restricted. Where there are specific contracts for future delivery, farmers can obtain advances against these. In other cases, borrowing is not easy. Then there are the existing debts to be liquidated. In view of the hardships of the past three years, it is hardly likely that the net balance will be squandered in luxuries, although in former years where there were good harvests spending has usually been free.

Prices as elsewhere maintain a high level. But the demand for some commodities has been limited. Certain articles of clothing may be mentioned. The good crop, however, may tend to stimulate trading and, in that way, help to maintain a high level in prices.

In most of the towns and cities there has been a substantial increase in taxation during the year. The rate in Calgary jumped from 36.5 to 44.75 mills; in Edmonton, from 35.3 to 45 mills; in Lethbridge, from 38.87 to 42 mills; and in Red Deer, from 30 to 40 mills. And it is difficult to see how further increases can be avoided. The area of most of the cities is far too large, because of foolish speculation in land in the boom days, and the tendency now is towards contraction, through the reconversion of some of the subdivisions into farm lands. Tax sales, which are now compulsory, are burdening the cities with vacant lots, and the problem is what use can be made of these. At present, they are unsaleable.

Coal Market Restricted

While the coal output will likely exceed that of last year, development remains slow. The big problem is the opening of a wider market. The barrier is the high cost of transportation. Economic and industrial pressure may before long solve the question of a market in the east. The mines, both at Drumheller and Lethbridge, are capable of [illegible] development. Even those now operating, if worked all the year, could produce over ten million tons annually. And last year Canada imported 17,308,837 tons of coal, valued at $[illegible], as against exports of 2,070,050 tons, valued at $12,[illegible].

But on the whole, Alberta has had a prosperous year. And there is still much scope for agricultural and industrial development in the province. Probably less than one-fourth of the [illegible] area is under cultivation, while mining is but in its infancy. The proceeds of the crop this year, however, will be [illegible] in paying existing debts. It is next year's harvest, if there is a bounteous one, that will [illegible] the [illegible] development.

ACCIDENT AND SICKNESS INSURANCE*

Uniform Conditions Drawn Up and Approved at Recent Conferences—Ready for Legislative Consideration

By A. E. Fisher
Superintendent of Insurance for Saskatchewan

THE subject of uniform statutory conditions for contracts of accident and sickness has been assigned to me. This question was very fully dealt with at the conference held in Winnipeg on December 4th to 6th, 1917. As there are quite a number of superintendents who were not then members of the association, may I briefly outline for your information the steps leading up to the standardization at the date referred to?

In 1917 the superintendent of insurance at Ottawa, in collaboration with representatives of the Casualty Managers' Association, prepared for enactment a set of statutory conditions which should form part of every contract of accident and sickness insurance in force in Canada. Copies of this draft were sent to each superintendent of insurance for suggestions and criticism, based on the requirements of the insurance laws of the particular province. Protests were immediately lodged with the superintendent at Ottawa; in the first place, on the grounds of jurisdiction, and the second place, because they did not affect companies of provincial organization and license which might be underwriting this class of business.

Difficulty Over Jurisdiction

There is no doubt but that Mr. Finlayson was sacrificing jurisdiction in the commendable effort for uniformity. I personally had the pleasure of calling on him relative to the standardization and thoroughly discussed with him the whole question. Subsequently, section 134 of the Insurance Act of Canada was enacted, which states "that every such policy shall contain in substance the terms and conditions hereinafter specified." Subsection 4 of section 134 states that: "Any of the foregoing terms or provisions which are inconsistent with terms or provisions required to be contained in the policy by the law of the province in which the policy is issued shall not, to the extent to which they are so inconsistent, be required to be contained in the policy."

Uncertainty as to Provisions

This bill does not attempt to compel the companies to insert these provisions of the policy in the exact words of the law, as is the case in fire insurance and hail insurance in the western provinces. Subsection 4 undoubtedly creates an ambiguity in the minds of the insured as he does not know whether or not the provisions printed on the policy are consistent with the laws of the province in which he resides and in which the policy was issued.

On account of this uncertainty created and the knowledge of the provincial powers, it was decided to hold a conference of superintendents in Winnipeg in 1917, mainly for the purpose of standardizing accident and sickness contracts. A set of statutory conditions was drafted after a thorough discussion of the subject, and we were ably assisted in this work by Mr. Emo, of the Globe Indemnity, Mr. Willans, of the Imperial Guarantee, Mr. Rodden, Mr. Paterson, Mr. Walker and several other managers well qualified to discuss the subject. A meeting was held in the city of Regina in 1918, at which the superintendents of Ontario, Manitoba, Saskatchewan and Alberta were present. Mr. Willans was representing the casualty companies on this occasion. The Winnipeg draft was revised and copies sent to the various insurance departments. I have with me here to-day a supply of statutory conditions as drafted in Regina in 1918 and it simply remains for us to once more review these and prepare them for presentation to our provincial legislatures in the form of a conference bill.

---

*An address before the conference of provincial insurance superintendents, Winnipeg, October 4—7, 1920.

PUBLICATIONS RECEIVED

Currency Exchange Tables.—By G. B. Snell, Bank of Montreal, Montreal. 43 pp.; $7.50.

A book entitled "Currency Exchange Tables," by G. B. Snell, of the head office staff of the Bank of Montreal, issued some months ago, has been welcomed by the business houses of Canada as a timely aid for calculating the exchange on New York funds. The table gives the exchange on all amounts from $100 to $10,000, at all rates from 1/64 to 1 per cent., advancing by sixty-fourths and from 1 3/32 to 10 per cent., advancing by five thirty-seconds. The exchange on larger or smaller amounts can be arrived at by simply moving the decimal point to the right or left as required.

The second edition, just issued, contains in addition a table showing the comparison between the premium on United States funds in Canada and the discount on Canadian funds in the United States. Since the rates have reached their present high point, to the ordinary person it has often been a source of wonder that the discount quoted in New York is a point or two below the rate of premium quoted in Canada. This new table shows exactly what the difference amounts to at all rates from 1/16 to 24 per cent., advancing by sixteenths. For instance, by consulting the table, we see that when the rate of premium in Canada is 12 1/16 per cent., the equivalent discount in New York would be 10.76, or approximately 10¾ per cent. The explanation is that if the rate in Canada was 12 1/16 and one wished to convert $100 of Canadian money into funds, payable in the United States, the bank would not, as one would at first glance suppose, deduct $12.06, and issue a draft for $87.94, but would deduct 10¾ per cent., or $10.75, and issue a draft for $89.25. If $12.06 were deducted the rate of premium would be considerably more than 12 1/16 per cent., as $10.75 is exactly 12 1/16 per cent. of $89.25.

On the other hand, a customer of a bank in the United States asking for a rate for a $100 draft, payable in Canada, would be given the quotation 10.75 discount, as the draft would cost him $89.25. That is, for $89.25 in American money he would receive $100 in Canadian funds—an amount 12 1/16 per cent. greater than the sum he would be required to pay.

To return to the condition in Canada the layman must not become confused by this explanation and expect to go to his bank for a $100 draft, payable in the United States, and pay only $10.75 premium. For a $100 draft on the United States he would have to pay a premium of $12.06, that is, 12 1/16 per cent. of $100. The difference is that in one case he is given $100 in United States funds, and in the other case he is given the amount of United States funds that $100 Canadian money will buy.

Bankers will no doubt find the addition to "Currency Exchange Tables" of great value, as it will be especially useful when they are called on to remit to United States correspondents in New York funds, the proceeds of Canadian items sent to them for collection. The tables will also be of equal value to all commercial houses that have dealings with firms in the United States. The price of the book is $7.50, and can be obtained from G. B. Snell, c/o Bank of Montreal, Montreal, Canada.

McCURDY BUSINESS TAKEN OVER

The business of F. B. McCurdy and Co., members of the Montreal Stock Exchange, according to an announcement from Montreal, has been purchased by a new firm under the name of Johnston and Ward. The change has been brought about directly through the appointment of F. B. McCurdy to the government post of minister of public works, and his consequent retirement from active business. The new firm which has taken over the business will remove the executive offices from Halifax to Montreal.

The new firm of Johnston and Ward is headed by Capt. Stanley Johnston, M.C., and has associated with him R. H. [illegible], Alfred Beasser, and K. R. Schofield.

DOMINION TRUST PAYMENT

J. G. Gwynn, liquidator of the Dominion Trust Co., has received an order from Justice Murphy authorizing him to pay a dividend of ten cents on the dollar upon those claims of unsecured creditors which have so far been allowed, and set aside claims of unsecured creditors not yet allowed, but to be adjudicated upon in the near future. Secured creditors have already been paid more than $25,000,000, and the amount of claims as adjudicated upon and allowed upon which the dividend will now be paid is $2,358,774; the unsecured claims still to be adjudicated upon total $167,748, and will likely be reduced.

Numerous Insurance Licenses Issued Last Month

Mostly Provincial Registrations—Another American Company Authorized to Write Fire Business in Canada—Agents Register Under New Regulations in Ontario—British Columbia a Popular Insurance Field

ANOTHER American insurance company was authorized to write fire insurance in Canada during September, namely, the National Liberty Insurance Co. of America. License was issued by the Dominion superintendent of insurance, Ottawa, for that purpose. The chief agency of the company is to be situated in the city of Ottawa, and E. H. Hornbostel has been appointed chief agent.

The following companies, which are already operating under a Dominion license, have been authorized to extend their scope:—

Globe Indemnity Company of Canada, to transact inland transportation insurance; the Northern Assurance Company, Limited, to transact burglary insurance; London and Lancashire Guarantee and Accident Company of Canada, to transact the business of burglary insurance and insurance against loss or damage occasioned by larceny, theft, or stealing from the person by violence, threat, hold-up or otherwise.

As was announced in these columns previously, the T. Eaton Life Insurance Co. has received a Dominion license to transact life insurance in Canada. The company will assume the liability under the group life insurance which has been in force on the lives of employees of The T. Eaton Co. Ltd., since the beginning of the year and under which the company has paid to date over fifty thousand dollars to the legal representatives of deceased employees. Facilities will also be offered whereby employees may obtain regular life insurance on standard plans subject to medical examination.

The company is under the management of P. S. McLean, formerly of the actuarial staff of the North American Life Assurance Co. Mr. McLean is an honor graduate of Toronto University in mathematics and is an associate of the Actuarial Society of America and of the British Institute of Actuaries.

The Canada Security Assurance Co., incorporated by act of the legislature of the province of Alberta, has reinsured all its outstanding policies of insurance in the Canada Security Assurance Co. incorporated by act of the parliament of Canada, and the latter company has assumed the payment of the outstanding claims and liabilities of every description of the former company, and the provincial company will apply on December 27, 1920, to the minister of finance for the release of the securities deposited under the provisions of the Insurance Act, 1917. All liabilities of the Canada Security Assurance Co. are guaranteed by the Norwich Union Fire Insurance Society of Norwich, Eng.

W. O. H. Dodds, chief agent of the Mutual Life Insurance Co. of New York in Canada, states that the action of the Equitable Life Assurance Society in terminating its new business activities in Canada has prompted some inquiries concerning his company's intentions. He wishes those interested or concerned to know that the Mutual Life Insurance Co. of New York look upon their Canadian agency organization and business as an important factor in their affairs, and they have no plans under consideration or in contemplation that will in any way affect or disturb them. On the contrary, they believe that the new business possibilities for them in Canada have not yet been fully developed and they expect to take their part in the growth and prosperity of Canada.

New Ontario Regulations

On October 1 the new provincial act regulating Ontario insurance agents went into effect. Only regularly authorized insurance agents may sell insurance, and the new act provides a penalty of $200 for a breach of the law. Heretofore a number of lawyers have been doing insurance business as a side issue to their law practice. According to the new act, the individual partners or employees of insurance firms must each have a license in order to issue policies. A separate license is required for each kind of insurance. Under these new regulations more than 1,200 licenses were issued to agents already operating in the province.

The provincial government has given notice that the following companies have been authorized to write insurance in the province, the class of business being indicated. Licenses issued expire on April 30, 1921, and may be renewed:—

Hartford Accident and Indemnity Co., to transact accident, automobile, burglary, guarantee, livestock, plate glass and sickness insurance. National Benefit Assurance, Ltd. (London, Eng.), to transact fire, accident and sickness insurance. Girard Fire and Marine Insurance Co., to trasact fire and tornado insurance. Sterling Fire Insurance Co., of Indiana, U.S.A., to transact fire and tornado insurance. Northwestern Mutual Fire Association, to transact fire, fidelity and surety insurance (covering automobile embezzlement only) and motor vehicle insurance, except against the hazard of injury to persons. Canada Security Assurance Co., to transact fire, hail and automobile insurance.

British Columbia Licenses

That British Columbia is a popular insurance field is evident from the number of companies which have extended their scope to include that province within the past few months. The following licenses have been issued since the middle of September to companies which had not previously been writing business in British Columbia:—

Hartford Accident and Indemnity Co., to transact accident, automobile, burglary, guarantee, livestock, plate glass and sickness insurance. Chief agent, H. R. Budd, Vancouver.

London Mutual Fire Insurance Co. of Canada, to transact automobile insurance. Chief agent, C. G. Hobson, Vancouver.

Traders and General Insurance Association, to transact the business of fire insurance. Chief agent, C. D. J. Christie, Vancouver.

Lumbermen's Mutual Casualty Co., to transact the business of automobile insurance. J. H. Constantine, Vancouver, attorney for the company.

Sterling Fire Insurance Co., of Indiana, U.S.A., to transact fire and tornado insurance. H. R. Budd, Vancouver, attorney for the company.

The Marine Insurance Co., Ltd., which has been writing marine and inland marine insurance in the province, has been authorized to transact automobile insurance as well. The National Benefit Assurance Co., Ltd., has also been authorized to write accident and sickness insurance in addition to marine insurance, for which it is already licensed.

Other Provincial Registrations

The Manitoba department of insurance has issued certificates of registration to the following companies:—

Sterling Fire Insurance Co. of Indiana, U.S.A., for fire and tornado insurance.

Hartford Accident and Indemnity Co. of Hartford, Conn., to transact accident, automobile, burglary, guarantee, livestock, plate glass and sickness insurance.

Canadian Hardware and Implement Underwriters to transact the business of fire insurance.

Minnesota Implement Mutual Fire Insurance Co., of Owatonna, Minn., to transact fire insurance.

Hardware Dealers' Mutual Fire Insurance Co., of Stevens Point, Wisconsin, to transact fire insurance.

Retail Hardware Mutual Fire Insurance Co., of Minneapolis, Minn., to transact fire insurance.

Grain Insurance and Guarantee Co., of Winnipeg, Man., to transact fire and guarantee insurance.

National Benefit Assurance Co., Ltd., of London, Eng., to transact the business of fire, accident, and sickness insurance.

Certificates of registration have been issued by the Alberta Insurance Department as follows: Pacific Marine Insurance Co., to transact fire, inland transportation and automobile insurance.

Hartford Accident and Indemnity Co. of Hartford, Conn., to carry on sickness, accident, burglary, guarantee, livestock, auto, and plate glass insurance.

Grain Insurance and Guarantee Co., of Winnipeg, Man., to transact fire and guarantee insurance.

Licenses have been issued by the department of insurance of the province of Quebec, as follows:—

Canada Security Assurance Co., to transact hail, fire and automobile insurance. Chief agent is P. W. Tasker, Lake of the Woods Bldg., Montreal.

Sterling Fire Insurance Co. of Indiana, U.S.A., to transact fire and tornado insurance. Chief agent for the province is H. A. Fromings, Montreal.

Traders and General Insurance Association, Ltd., to transact fire insurance. Chief agent is W. J. Cleary, Lewis Bldg., Montreal.

The Globe Indemnity Company of Canada, previously authorized to transact throughout the province of Quebec the business of accident insurance, sickness insurance, burglary insurance, automobile insurance, guarantee insurance, fire insurance and forgery insurance, has been permitted to include inland transportation insurance.

The London and Lancashire Fire Insurance Co., duly registered to transact fire, automobile and explosion insurance, has changed its name to the London and Lancashire Insurance Co.

Application will be made by the Agricultural Insurance Co., Ltd., to the Saskatchewan legislature at the next session for an act increasing the capital to $1,000,000 and giving the directors power to increase the capital stock further with the sanction of the shareholders, and also giving the company power to effect policies of insurance on the health of any person and on growing crops and for such further and other powers and privileges as the shareholders and directors may seem advisable.

Introduce Merchants Marine Here

It is the intention of the Employers' Liability Assurance Co., Ltd., to introduce the Merchants Marine Insurance Co., Ltd., of London, Eng., one of their subsidiaries, for the transaction of fire business in Canada in the near future. The Merchants is now in its fiftieth year, having been founded in 1871, and has an annual premium income of $2,000,000 and total assets of about $7,000,000.

C. J. Metcalfe, hitherto superintendent for the Prudential over Toronto Number 1 district, has been transferred to the superintendency of Windsor, Ont. Geo. MacPherson has been transferred from Pittsburgh, Pa., to Toronto Number 1.

C. H. Smith, late Inspector with the Canadian Fire Underwriters' Association, has associated himself with M. Davison as general fire insurance brokers. Mr. Smith was inspector with the C.F.U.A. for some four years.

PRIVY COUNCIL HEARING CANADIAN CASE

Among the cases now before the Privy Council of Great Britain on appeal from colonial courts, is that to decide whether Dominion companies are subject to legislation in the provinces requiring license or registration as a condition of exercising their corporate powers within the provinces. Several parties are joined in this issue, including the attorneys-general of the Dominion and of Ontario.

DOMINION REVENUE LOWER IN SEPTEMBER

Expenditures Also Substantially Reduced—Surplus of Receipts Over Disbursements Greater Than in Previous Month

NOTWITHSTANDING the fact that ordinary revenue was lower by more than $1,000,000 in September, as compared with the previous month, the Dominion revenue and expenditure account last month made a better showing than in August, inasmuch as disbursements were reduced by nearly $14,000,000.

A further increase of $22,032,728 is shown in the net debt, as compared with an increase of $19,986,518 in August. While these increases may seem large, it is encouraging to note the substantial reduction, as compared with last year.

The following are the details, as submitted by the finance department:—

Total Assets $590,000,000

Domestic and Foreign Banking Facilities for Your Home and Overseas Trade.

OKANAGAN LOAN AND INVESTMENT TRUST

At the annual meeting of the Okanagan Loan and Investment Trust Company at Kelowna, B.C., on September 9th, the financial statement of the company was presented to shareholders, showing total assets of $640,675, chiefly made up as follows: Cash on hand and in bank, $6,527; Victory bonds, $32,589; loans, secured by first mortgage, $384,702; trust funds invested in Victory bonds, $30,412. Liabilities to the public, including trust accounts, deposit accounts, bank, guaranteed mortgage certificates, with accrued interest, totalled $115,049. Contingent reserve for losses is stated as being $23,769, while reserve is $95,000. Net profits for the year were $36,972, divided as follows: $27,255, being 7 per cent. dividends; added to reserve, $9,000; balance carried forward, $717.

An appended statement to the report shows how the company has grown since it was formed in May, 1909. At the end of the first year's operations paid-up capital was $135,060, reserve $6,000, and dividend payment 6 per cent. In 1915 paid-up capital was $390,560, reserve $63,000, and dividend 2 per cent. The last annual statement shows capital paid up $390,580, reserve $95,000, and dividend 7 per cent.

DEFICIT ON MANITOBA TELEPHONES

A deficit of $200,000 in the operation of the Manitoba Government telephone system for 1920 has been announced by Premier T. C. Norris, who stated that increased rates will be necessary. The deficit is due mainly to increased wages and operating expense.

SEVENTY-SECOND ANNUAL REPORT OF THE

CONSUMERS' GAS COMPANY OF TORONTO

YEAR ENDING SEPTEMBER 30th, 1920

THE Directors have pleasure in presenting the Seventy-Second Annual Report and Financial Statement.

It is gratifying to report a substantial increase (10.28%) in the quantity of gas sold during the year, as compared with that sold in the previous year, and an increase of 5,760 in the total number of customers supplied.

The following table shows the progress of the Company, by decades, during the past fifty years:—

Year	Gas Output M Cu Ft	No. of Meters in use	Population of District Supplied	Cons. per Capita Cu. Ft.	Persons per Meter	Miles of Main
1870	45,518	1,403	56,000	531	40	43
1880	110,383	3,906	75,110	1,378	19	98
1890	507,555	13,242	160,141	2,408	12	192
1900	838,215	26,982	225,000	3,326	8	251
1910	2,621,247	65,349	400,000	6,019	6	421
1920	5,127,827	122,793	575,000	8,546	4.6	601

It will be noted that, notwithstanding strong electrical competition encountered during the past ten years the output of gas during that period has nearly doubled. The number of customers has also increased about ninety per cent., although in the same period the population served by the Company has increased only forty-four per cent.

There has also been, during the past ten years, a large increase in the number of purposes for which gas is used.

The Profit and Loss Account, after the payment of the usual dividend, shows a surplus of $129,708.93, which amount has been placed to the Credit of the Reserve Fund. Compared with the magnitude of the figures involved, this surplus appears a small one, and especially so when bearing in mind the adverse balances of several years, during the war period, which must be gradually recovered.

The year's operations were affected by marked increases in the prices of all commodities necessary for the manufacture and distribution of gas. During the past three months prices have advanced at a greater rate than in any similar period in the Company's history. Both Coal and Gas Oil have advanced to prices undreamed of in the past, and the Company is paying for these materials at the present time from two to three-and-a-half times the prices paid in 1915.

The cost to the Company of exchange on remittances to the United States during the year was $117,357.17.

Taxes for the year amounted to $240,231.73, an increase of $50,168.67 over the preceding year.

There is no indication of any immediate reduction of these high costs. The Company will therefore have to meet a greater burden during the coming year.

This fact has made it necessary for the Directors to raise the price of gas to the consumers 15 cents per 1,000 cubic feet, making the net price $1.25 per 1,000 cubic feet.

The utmost endeavor has at all times been made by the Directors to keep the price of gas to the consumers as low as possible, and advances have been made only after it had become clearly evident that such advances were imperative.

Although the high rates paid for labor have added largely to the Company's operating expenses, this item would have been much more serious had it not been for the wise policy of having in the past provided an effective system of practical labor saving equipment.

It has been necessary to carry out during the year many repairs and improvements to the plant in order to maintain the usual high standard of efficient operation.

To meet the increasing demand for gas, it had become necessary to make additions to the manufacturing plant. The new equipment, which is now under construction, consists of two Oil Gas Sets, having a capacity of 4,000,000 cubic feet of gas per day.

Two new storeys have been added to the Company's Mutual Street building for the purpose of providing accommodation for the Meter Repair Shops, which are to be transferred from Adelaide Street. The Company's premises on Adelaide Street will be rebuilt and incorporated with the Head Office building on Toronto Street. This new structure will provide a commodious Sales Room for gas appliances besides supplying much-needed additional accommodation for the Head Office Clerical Staff.

The Directors regret having to record the death, on the 9th instant, of Mr. Thomas Long, a member of the Board for more than twenty-three years.

Mr. Long was deeply interested in the affairs of the Company, and the services which he rendered as a member of the Board were much appreciated by his Co-Directors.

Sir Edmund Osler, a Director of the Company since the year 1901, and who now wishes to be relieved from some of his many interests, has expressed his intention to retire from the Board.

Sir Edmund Osler has at all times rendered valuable service to the Company, and the Directors regret very much his retirement.

The following statement for the past, as compared with the preceding year, shows:—

	Meters.	Gas Sales.
Year ended 30th September, 1920..	122,793	$5,030,145.6
Year ended 30th September, 1919..	117,033	$4,018,259.5
Increase	5,760	$1,011,886.1

All of which is respectfully submitted.

A. W. AUSTIN, President.

We beg to report the completion of the audit of the books and vouchers of the Consumers' Gas Company of Toronto for the year ending 30th September, 1920, and certify to their correctness.

(Signed) W. E. SAMPSON,
EDMOND GUNN, F.C.A.,
Auditors.

Toronto, 20th October, 1920.

PRESIDENT'S ADDRESS

THIS is the seventy-second anniversary of the Consumers' Gas Company. It is still "going strong," and is much in evidence. The statement and report for the year 1920 is now submitted for your consideration, and I trust will meet with your approval. You will notice in the last ten years the output of gas has nearly doubled, and is now over five billion cubic feet per annum, or an average of over fourteen million cubic feet per day. We estimate that we are supplying a population of 575,000, which, of course, means the city and suburbs.

The time is approaching when extensions must be made to rapidly growing districts, and many mains that are too small to supply the thickly settled localities they serve must be replaced by larger ones. It will be necessary also to plan for a new unit for the production of gas, which will probably take two or three years to complete. The cost of such extension will require to be provided for by the issue of further Capital Stock. The unissued shares of the present authorized Capital Stock of the Company amount to $639,000 par value. This stock when offered should prove attractive, as there has never been any interruption to the payment of dividends, which are payable quarterly. The dividends is a first charge on the income of the Company, and there is no preferred stock nor any bond issue. The usefulness of gas is assured, and the Company will, no doubt, live up to its reputation in giving the public an efficient service at a low price.

During the first nine months of the Company's financial year we had the benefit of favorable contracts for oil and coal made previously, but in making new contracts, under which we have been receiving coal and oil for the past three months, the prices were increased enormously. We hope, however, that these high prices will not long continue, and that the price of gas can again be reduced to the consumer. Taxes continue to increase, and the Company is one of the largest contributors to the City funds. Another item of importance, and unprecedented in the history of this Company, is the premium we must pay on remittances for coal, freight, etc., payable in United States funds.

During the year Mr. W. H. Pearson, our former General Manager, passed to his reward. He was with the Company for fifty-five years, retiring some years ago. Mr. Pearson worked and lived to see this Company the largest gas company in Canada. He performed his duties honestly, faithfully and intelligently, with unusual devotion to the welfare of this institution and the community at large. I am glad we were able to obtain the portrait of him, which now graces a wall of this room. It will always remind us of his clean, untarnished record, and honorable, useful life.

The death of Mr. Thos. Long, who for twenty-three years was one of our directors, is deeply regretted by all of us. He was one of our largest shareholders, and had implicit faith in the future growth and prosperity of the Company.

We also regret that Sir Edmund B. Osler desires to resign his position on our Board, feeling unable to give the Company's affairs the attention he would like. We shall miss his good advice and his successful business experience and ability.

There are now two vacancies on the board, and to fill these vacancies the names of two shareholders largely interested in the Company will be submitted to you.

We have again to record our appreciation of the faithful services rendered by the Company's officials and employees.

THE following gentlemen were elected Directors for the ensuing year: A. W. Austin, Esq.; A. H. Campbell, Esq.; Wellington Francis, Esq., K.C.; F. LeM. Grasett, Esq., M.D.; John Hoskin, Esq., K.C., LL.D., D.C.L.; H. Langlois, Esq.; L. Goldman, Esq.; Lieut. Col. J. F. Michie; W. Mulock, Jun., Esq.

At a meeting held subsequently Mr. A. W. Austin and Mr. Wellington Francis, K.C., were unanimously re-elected President and Vice-President, respectively.

SUCCESS AND POPULARITY IN BANKING

"Popular" Banker Seldom Successful—How to Refuse a Loan Banking System Sets High Standard for Managers

"WE have no reason to feel ashamed of the banking profession and the opportunity it affords for service," said Frank Pike, manager of the Merchants Bank, Edmonton, before a meeting of the Alberta managers of the bank recently. He continued: "The banks are performing a great task in the world to-day—just as necessary and just as important as that of any other business or profession. What is our task, what are our duties, and what is the object of our existence? We are the great custodian of the nation's money. To our safe-keeping is entrusted the proceeds of all toil and labor, the savings of the people, with the full knowledge that we will hold inviolate the trust imposed upon us of investing public funds, not only safely, but in such a manner that they will be available when required. Our first duty undoubtedly is to our depositors. It is also our duty to endeavor, to the best of our ability, to keep the wheels of commerce running smoothly and to assist the legitimate development of the productive resources of our country.

"Our business or profession is one requiring tact, judgment and resourcefulness. It requires exceptional ability to be able to balance the scales fairly between depositing and borrowing customers. We recognize our duty to both, but it takes many years of study and experience to know just where to draw the line. Fortunately, we have in our chief executive the men who have the necessary courage, experience and ability to safely guide our banking institutions, which are the mainstay and bulwark of the business of the country.

Hold Customers' Respect

"To be a successful banker requires much more firmness and courage than the man on the street usually attributes to his banker. One of our former general managers has made the statement that the 'popular banker is seldom, if ever, a successful one.' What he meant, no doubt, was that the manager who seeks cheap popularity through the avenue of his institution cannot be successful. It is easy enough to make good fellows of ourselves at the bank's expense, but on the other hand, a manager cannot be a success unless he holds the respect of his customers, and he cannot possibly hold their respect unless he is natural, sincere and genuine, because nothing that is not genuine and sincere can succeed. Therefore the first ideal of service which I would mention would be to be always sincere, frank and aboveboard to customers.

"The average man very quickly sees through camouflage and deceit, and a banker who has not the courage of his convictions and who will not talk plainly and sincerely with his customers does not deserve their respect. Borrowers, no matter what their proposals, or the size of the loans applied for, are entitled to a courteous, considerate hearing, and there is no reason why customers should be antagonized on account of the refusal of the loan, if intelligent explanations are made. It is not sufficient merely to say that money is tight and therefore the loan cannot be granted, but the reason why money is tight should also be explained, and the average customer is sufficiently intelligent to quickly grasp the situation. We can do a great deal more than we are doing to educate the people to a proper realization of the functions of a bank and how necessary and how important it is that bank funds be kept absolutely liquid, and not tied up in speculative business ventures, or long term investments.

Banks Set an Example

"There is just one other point I would like to emphasize, and that is the importance of being absolutely scrupulous in our dealings with customers.

"The Canadian banks must set an example of the strictest commercial and moral integrity, down to the smallest detail. Above all things, we must value our word and our promise if we are to win the goodwill, respect and confidence of the public. There must never be the slightest question of our honor and integrity, nor the slightest suggestion of trickery or sharp practice. Our word must be as good as our bond. The general managers of the banks have set very high ideals regarding these matters, and their instructions are that these ideals be lived up to on all occasions. I like to think that Canadian commercial integrity, based on British traditions, is the highest in the world, and as bankers we can do great service to our country by setting the example of always holding the standard high and by expecting and looking for the same high ideals from our customers."

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended October 22nd:—

Temiskaming Mine, 87,979; La Rose, 87,315; Mining Corporation of Canada, 283,230; Nipissing Mine, 194,815; total, 653,339. The total since January 1st is 22,363,997 pounds or 11,181.9 tons.

MANITOBA HAIL INSURANCE

The Manitoba District Hail Insurance Act, passed at last session of the legislature, will be proclaimed November 1st. All rural municipalities in Manitoba will be required to submit the question to their ratepayers at the December elections, giving the voters the right to say whether or not the municipality shall form part of Manitoba hail insurance district. The Act becomes operative, providing thirty-five or more municipal districts vote affirmatively.

U.S. FIDELITY AND GUARANTEE CO.

Canadian agents representing the United States Fidelity and Guarantee Co. met in convention on October 25 in Toronto, and listened to educational addresses delivered by representative officials of the company from Baltimore. The chief speaker was J. R. Bland, of Baltimore, president of the company. Mr. Bland said the company, which makes a business of insuring the honesty of citizens, divides the people of the world into three classes—those honest, innately, those honest because of policy, and plain crooks. "We used to wake up in the morning," he said, "and find that the company had lost a quarter or a half-million during the night. Then we were in our swaddling clothes; it used to make our hair stand on end. Now we merely regard it as a casual happening, and go on as if nothing had happened."

In the evening Mr. Bland was the principal speaker at a dinner tendered the agents of the company from all over Ontario. Mr. Bland stated that the fact that the company had $2,000,000 invested in Canadian securities was sufficient guarantee of the confidence it had in the stability and soundness of such securities, and the future development of Canadian business. He also called attention to the fact that Col. A. E. Kirkpatrick, who has been manager of the company in Toronto since its inception in Canada twenty years ago, had been instrumental to a very large extent in producing the large volume of Canadian business which the company now enjoys. Other speakers were Col. A. E. Kirkpatrick, J. Frank Supplee, resident secretary of the company in New York City; J. W. Hartley, superintendent Casualty Department, Baltimore; Howard Bland, vice-president and secretary of the company, Baltimore; Charles G. White, superintendent of agents, Baltimore; Sidney Hall, superintendent of Contract Department, Baltimore, and L. R. Sollenberger, superintendent of Judicial Department, Baltimore.

President Bland announced that the company will celebrate its silver anniversary next year, its assets since its inception having increased from $250,000 to $30,000,000.

PRECEDENCE OF MORTGAGE AND EXECUTION

Alberta Supreme Court Decides Question of Priority—System Different from Ontario

IN a recent case before the Supreme Court of Alberta it was held that under the Land Titles Act an execution and a mortgage are alike in that each is a statutory charge upon land. Each charge takes its priority according to registration and binds to the extent of its statutory authority, and a mortgagee of a mortgage registered prior to an execution is protected in regard to advances made after registration of the execution if he has no actual notice of such execution.

Facts of the Case

The facts of the case as stated by Harvey, C.J., are:—

"On October 9, 1913, the defendant, Gordon, gave to his co-defendant, Alliance Trust Co., a mortgage on certain property in Fort McMurray for $30,000. The mortgage was registered on October 10, and on October 28 a cheque for $25,000, the full amount that was to be advanced, was sent by the trust company to one Bennett, who held a power of attorney from Gordon. On the following day he endorsed the cheque as attorney, and deposited it in the bank. There were numerous executions registered against the land prior to the mortgage, which apparently was paid out of this money. On October 29, the day on which Bennett deposited the cheque, plaintiffs' solicitors wrote a letter to him advising him that they had, on behalf of the plaintiffs, signed judgment against Gordon, and requesting payment out of the moneys being advanced if he were acting for the mortgage company, and if not, the agent for the mortgage company requesting information as to who was. Mr. Bennett apparently referred them to Hyndman, Milner and Matheson, for on November 3 they write them, enclosing a statement of the amount required to satisfy the executions in their hands, which they say is at the request of Mr. Bennett. It appears from the records of the Land Titles office that an execution for the last judgment had been registered on October 25. Messrs. Hyndman and Co., on November 4, write asking further particulars, and intimating that there may not be sufficient money to pay all the amounts chargeable against the defendant.

"It does not appear what happened after that until a letter from plaintiffs' solicitor to the trust company direct, on February 14, 1914, notifying them of the execution and claiming priority to the mortgage, though registered after it. This letter was acknowledged, and then there is silence, so far as the material before me shows, until June, 1918, when an action was begun for a declaration that the execution has priority over the mortgage though registered subsequently."

Time of Registration Rules

The following contain the decisions of their Lordships:—

"Section 23 provides that registered instruments 'shall be entitled to priority the one over the other according to the time of registration and not according to the date of execution. . . . And as soon as registered every instrument shall become operative according to the tenor and intent thereof, and shall thereupon create, transfer, surrender, charge or discharge, as the case may be, the land or the estate or interest therein mentioned in the instrument.' And section 41 also provides that upon registration of any instrument the estate or interest specified therein shall pass, or, as the case may be, the land shall become liable as security in manner and subject to the covenants, conditions and contingencies set forth and specified, etc.

Mortgage Was Effective First

"There seems no doubt from these sections that the mortgage became effective upon its registration, which was prior to the registration of the execution, but effective for what purpose and to what extent? The sections say it shall operate 'according to its tenor' so as to make the land 'liable as a security,' and the question at once arises, security for what?

"A transfer on registration operates at once to put an end to the interest of the transferor, but a mortgage is entirely different, and it affects the beneficial interest of the mortgagor in the land to a smaller or greater extent according to the circumstances. It seems perfectly clear that if no money were ever advanced while the title would be clouded by the registration of the mortgage, the beneficial interest of the mortgagor would not be affected. It is surely a security only for the amount of the indebtedness of the mortgagor. Whatever the inchoate right or contingent interest of the mortgagee may be before the moneys are advanced, I cannot see how the mortgage can be held to charge the land with the payments of, or make it security for any moneys until such moneys are advanced, and if they are advanced, the land remains charged with, and security for only so much as remains from time to time, unpaid. I am by no means satisfied, that though registered prior to an execution, a mortgage will be entitled for all purposes and to the full extent to priority over the execution.

"Now it is apparent that between the Ontario system and ours two important differences exist. In the first place, under our system the legal estate is not vested in the mortgagee, and in the second, registration is not merely notice but in itself creates interests. I think it may safely be taken without argument as plain that an execution creditor's rights are not superior to those of a mortgagee who makes an immediate advance upon the security of the mortgage, and that the right of a mortgagee in advancing the first principal moneys of a mortgage cannot be less than those of one making later and further advances under the terms of the mortgage.

"I think, therefore, that the writ filed on October 27 attached only upon such interests in land of the debtor as were covered by a legal estate or interest, but of course that it caught up all equitable interests up to the extent of the legal interest, though no further.

"Under our Land Titles Act an execution and a mortgage are alike in this, that each is a statutory charge upon land. Each charge takes its priority according to registration, and binds to the extent of its statutory authority.

"The party liable to pay may safely continue payments to the other unless he has actual notice that the other has no longer a right to the money, and subsequent registration merely is not equivalent to actual notice.

"In the present case it cannot be held that express notice was given the mortgage company before payment over."

CLAIM FOR FIRE DAMAGE SETTLED

The action brought some time ago by the Attorney-General of Canada, on behalf of His Majesty the King, against Arthur G. Peuchen and the McLaren Lumber Co., of Blairmore, Alta., has been amicably settled out of court between the parties. There was a large sum of money involved in the action, but the officials of the forestry branch in Calgary decline to say what amount was paid in settlement by the defendant company. The action was for damages for timber destroyed on Crown lands, following the disastrous fire, which burned over a considerable area of the McLaren Lumber Company's limits, as well as Crown lands, in July, 1917, and also claimed compensation for expenses incurred in fighting the fire. It was expected that the action would be tried at the special sittings of the Exchequer Court of Canada, held in Calgary a few days ago.

The plaintiff, on the recommendation of the forestry branch of the Department of the Interior, being the department most interested in the enforcement of this claim, has accepted a lump sum in full settlement of the claim for damages and expenses, being, however, a sum considerably less than the actual amount sued for, and the defendants have also paid the plaintiff's taxable costs. Had the action proceeded on its way through the courts, it is quite likely that the litigation would have been prolonged on account of the number of interesting points, both of law and fact, which were involved, but the settlement arrived at now disposes of the matter without further litigation or delay.

News of Industrial Development in Canada

Fraser Companies Will Greatly Extend Operations—Big Scheme for Development of Canadian Border is Under Consideration—British Match Manufacturing Concern Will Form Canadian Subsidiary—One Million and Half in Fox Furs Shipped from Prince Edward Island

SINCE the Fraser Companies, Ltd., was incorporated in 1917, it has become one of the greatest pulp, paper and lumber manufacturing organizations in Eastern Canada. The company owns 210 square miles of freehold timber land, located mostly in the eastern part of Quebec and the province of New Brunswick, and in addition holds leasehold cutting rights on 900 square miles of privately owned land. The company's pulpwood lands and limits are situated tributary to Temiscouata Lake, near the boundary of Quebec and New Brunswick. The pulp mill at Edmundston, N.B., is approximately twenty miles from the borders of the Temiscouata limits. In addition, ten saw mills are located throughout the territory mentioned.

A progressive policy has been pursued by the enterprise during its few years of operation, and the announcement that the transfer of the New Brunswick Railway Company's extensive timber limits, amounting to approximately 1,600,000 acres, to the Fraser interests, is now in the course of completion, indicates that such a policy is not being neglected.

The option which the Fraser interests obtained on the New Brunswick Railway Company's lands last June expired this month and has been renewed, some difficulties which for a time threatened to put an end to negotiations having been overcome. Full details of the negotiations are not yet known, but it is understood that a new organization will be formed to absorb the pulp, paper and lumber enterprises presently in operation, and that the Fraser interests will figure prominently in the transaction. It is also understood that there will be an issue of stock to take care of the deal.

Border Industrial Plans

Plans to develop western Ontario as an industrial centre are in the process of consummation. Particulars of the scheme have not been definitely announced, but according to advices from Windsor, the Canadian Pacific Railway, the Pennsylvania Railroad, the Canadian Steel Corporation, Ltd., and the Essex Terminal Railway have entered jointly into a scheme involving the expenditure of $200,000,000.

The plans under which the various interests are linked provides for entrance into Canada of the Pennsylvania Railroad by means of the International bridge to be erected over the Detroit River—a short cut for that country through southwestern Ontario from Detroit to Buffalo—where it is to link up with the Michigan Central Railway for transportation of products of the Canadian Steel Corporation, Canadian subsidiary of the United States Steel Corporation, and for establishment of a network of rails all over the border district by the "Big Four."

The $200,000,000 to be spent on the project includes $75,000,000, the estimated cost of the steel plant and the extensive town site of Ojibway; $28,000,000 on the international bridge across the river, stock for which has already been partially marketed by brokers in Detroit and New York; and the balance for acquiring property and constructing lines, freight yards, a $1,000,000 union station in Windsor, and other facilities.

In addition to the vast expenditures undertaken by the United States Steel Corporation of Gary, Ind., in the construction of its huge Canadian subsidiary plant at Ojibway, it has recently arranged for the payment of $201,1[illegible] to the Essex Terminal Railway to finance the extension of that road to Amherstburg, and a linking it to the steel plant from the Sandwich entrance. The international bridge is an important factor in the undertaking. With an American entrance in the vicinity of West Grand Boulevard, Detroit, it will strike the Canadian side near Assumption Church, Sandwich, at a height of 100 feet from the ground. It will then continue on an easy grade for some 1,600 to 2,000 feet until level is again reached, in the vicinity of Erie and Wellington streets, Windsor.

Large strides have been made toward the completion of the big steel plant at Ojibway. The Canal or slip, running in off the Detroit River has been completed, while the docks are being rushed toward completion. Some $2,000,000 has been spent on the slip and dock alone.

Match Manufacturing Company Here

Negotiations are under way for the establishment in Canada of a branch of Maguire, Paterson and Palmer, Ltd., the large British match and box manufacturing organization. Timber limits of the Bronson estate at Chelsea on the Gatineau River, some miles north of Ottawa, have been purchased by this enterprise, and a Canadian subsidiary is now in the process of formation. The exact location of the plant is still undecided, but a good shipping point is one of the most important considerations.

It is understood that the board of the new Canadian company is not yet completed, and it is probable that other well-known financiers may be added to those already appointed. George Cahoon, Jr., president of the Laurentide Co., Ltd., and Sir Lomer Gouin, are the only known representatives up to the present. Financing of the new subsidiary will be undertaken by the parent organization, according to advices.

Other Pulp and Timber Gleanings

Timber limits aggregating over 200 square miles have been put up for tender by the Ontario government. The limits are scattered throughout the north country, running from small bits of one or two square miles to limits of 72 square miles. There are two of the latter size, one in the Townships of Kimberley and Cairo in Timiskaming, and another in Thunder Bay, in the district west of the Townships of Hele and Sterling. There is one limit of 30½ square miles in the Townships of Ryan and Palmer, Algoma, and one of 15 square miles in the north half of McFadden Township, Timiskaming. The balance are small limits, for most part adjoining limits of operating companies. In the past these would have been disposed of without tender, but under the new policy of the Department of Lands and Forests they must be tendered upon in the usual way.

A circular issued by Clarke Brothers, Ltd., now building a pulp mill at Bear River, N.S., for which a bond issue was sold some months ago, announces that delays have occurred in the construction program, that the buildings are now nearing completion and the machinery is being rushed forward and set up as fast as it arrives.

"As far as our pulp mill is concerned," says the circular, "the delays have been beneficial to the company, for during this period the permanent situation in kraft pulp has become more accentuated, and has brought home to us more forcibly the wisdom of increasing the output of our mill. The original mill was at the rate of [illegible] tons per day. The extension we are now installing will give us a capacity of 50 tons per day. Although we have been able to double the capacity of our mill, we only found it necessary to increase our indebtedness by $250,000, making our total indebtedness $1,250,000, which will more than complete these additions and improvements and provide working capital as we require to carry on under the intended program. The additional finances have been arranged."

New Brunswick's greatest industry is expected to receive something of a set-back this year, owing to conditions of the lumber markets. Lumber operators are planning smaller cuts than usual for the coming winter, and it is be-

lieved that the total lumber cut of the province will be smaller than it has been for several years. In almost every part of the province sawn lumber is piled high, awaiting shipment. Considerable quantities of this material were purchased for the British government while the war was on, including the purchase in advance of lumber to be cut later. The existence of these stocks has had a depressing effect on the British market, and the exchange conditions have acted as a further barrier to shipments. The increased rail freights and the difficulty experienced in securing cars has had the effect of limiting exports to the United States markets. Some of the largest operators of saw mills have not sold their output for the last two years, and others still have this year's cut on their hands.

The Riordon Co., Ltd., recently purchased from M. J. O'Brien, Ltd., 1,125 square miles of timber limits on the Upper Ottawa Valley. The purchase also included the undeveloped water power formerly held by O'Brien on the Quinze River. Pulpwood from the limits will go to the Riordon mill at Kipawa, while the pine logs will go to the company's sawmills at Ottawa.

Fox Industry Profitable

More than a million dollars worth of silver fox pelts have been exported from Prince Edward Island during the past season. During the same period half a million dollars' worth of breeding stock has been shipped to various parts of the globe.

Winnipeg's first venture into the hemp industry, launched this spring by the Western Fibre Co., will result in a successful first year, according to reports. There were 526 acres of hemp sown by the different farmers of the district, and the probable yield is around 300,000 pounds. With the price at 20 cents per pound, the company will realize $30,000. Seed cost the company about $8,500 and machinery a little over $20,000, so that with a moderate expense for reaping, the first year's operations will show a small profit.

Work has commenced on the new Markham flour mills, which are being erected opposite the Grand Trunk Railway station. The mills when completed will be the largest in York County. They will be operated by Hydro power and will have a capacity of one hundred barrels of flour a day. It is expected that the mills will be operating before Christmas.

Nickel Plant Not for Canada

It is announced that the International Nickel Co. will commence the erection of a new $3,000,000 plant at Huntington, W.V., about November 1 next. The plant is for rolling Monel metal into sheet form from the ingots. Hitherto this work has had to be done by other mills, but the company has now decided to establish its own plant for the purpose. According to an officer of the company in Toronto, this plant is logically one to be erected in the United States, as there is no sale for that product here. Apparently the proposed erection of this plant was in the minds of those who started the report some weeks ago that a new and important extension was to be erected by the International at Copper Cliff, Ont., where its mining and smelting works are carried on. It is stated, however, that there is no extension of the Canadian works under consideration at the present time.

The Canadian Locomotive Co. has received an order for four locomotives for the Temiskaming and Northern Ontario Railway Co. It is stated that this order will make about twenty-eight engines yet to be completed. At the present time the men in the works are busy on ten locomotives which are being built for the Grand Trunk.

September output of the collieries of the province of British Columbia totalled [illegible] tons, according to returns made by the provincial department of mines. Of this total, Vancouver Island's output was 150,807 tons.

The Canada Copper Corporation announces that its new plant at Allenby, British Columbia, began operations on October 18. Although the plant was ready to begin operations on July 1, 1919, lack of transportation facilities prevented doing so until the present year.

NEW INCORPORATIONS

Maguire, Patterson & Palmer (Canada), Ltd., $5,000,000—San Francisco & McMurray Oil Refining Co., Ltd., $3,000,000—Wiser's Distillery, Ltd., $3,000,000

LIFE INSURANCE SERVICE

THE ultimate success of a Life Insurance Company depends largely upon what its policyholders think of the service they receive. The Continental Life has long since passed this test, and earned a high reputation for paying claims promptly. 1920 will likely prove the best year in the Company's history. Write for booklet. **"Our Best Advertisers."** For Manager's positions in Ontario, apply with references, stating experience, etc., to **S. S. WEAVER, Eastern Superintendent, at Head Office**

One Hundred Per Cent. Increase in Five Years

The Mutual Life of Canada is celebrating its jubilee year by "rounding" the two hundred million dollar mark, having doubled the amount of assurances in force since the year 1915. This 100% increase in five years is without doubt due to the unsullied record for fair, liberal and equitable dealing with its policyholders, and in the second place to the increasing popularity of the mutual principle in life insurance The mutual is becoming generally recognized as the most economical the most democratic and the most equitable system of life insurance. The greatest and most powerful life insurance organizations in the world are mutual, and the Mutual of Canada organized on that basis, is meeting with a similar success. The assets of the Mutual are a source of satisfaction, amounting at present to approximately $40,000,000 guaranteeing every contract and providing a substantial surplus.

BE A MUTUALIST!

The Mutual Life Assurance Co. of Canada

Waterloo Ontario

In This Year of Abundant Harvest

do not overlook Life Insurance—the surest promise that future years will be abundant too!

Nothing is lacking to make Great-West Policyholders well satisfied with their contracts. Low premiums, high profits, liberal conditions—every advantage of modern protection.

In short Policies of unequalled value, as an unequalled demand clearly proves.

News of Municipal Finance

Winnipeg Net Debenture Debt is More Than Six Millions—Assiniboia Accounts Not in Good Order—Galt Assessment Has Increased $1,717,790—Calgary to Abandon Costly Borrowing Practice—Regina Proposes to Reduce Utilities Deficit by One Half

Brandon, Man.—Approximately $650,000 has been collected in taxes this year, or 50 per cent. of the total levy.

Saanich, B.C.—Up to October 13th, 1920, $180,594 had been taken in by the municipal treasury in current taxes, or 88.77 of the total levy. In addition, arrears had been collected to the amount of $32,9[illegible]6, or 66.41 per cent. of the amount on the books at January 1st, 1920.

Regina, Sask.—There was a deficit on utilities of $117,600 at the end of September. According to Commissioner Thornton, this will be cut in half by the end of the year, provided conditions are favorable. A new unit at the power house will reduce the loss of this department from $66,000 to $20,000, it is expected.

West Kildonan, Man.—Ratepayers are demanding an explanation of the increase of 12 per cent. in the school board levy and 7 per cent. in the municipal commissioner's levy. The tax rate this year has been set at 29 mills, and taxpayers are protesting against this. The municipal council has explained that there will be an additional expenditure of $72,000 for the school board's programme. A meeting will be called soon to discuss the problem.

Galt, Ont.—An increase in the city's assessment of $1,717,790 is shown in the report of Assessor Welland, which has just been made public. The following are the new figures and the increases over last year.

Land, $3,953,685; increase, $608,085. Buildings, $6,761,670; increase, $702,650. Total, $10,715,355; increase, $1,310,735. Total taxable property, $8,719,795; increase, $1,095,730. School rates, $460,950; decrease, $40,795. Exemptions, $1,995,560; increase, $215,205. Business, $1,146,975; increase, $196,101. Income, $691,470; increase, $210,954. Total assessment, $12,553,800; increase, $1,717,790.

Calgary, Alta.—A practice of temporary borrowings out of current revenue to carry on old jobs around the city is to be stopped. The mayor recently told the finance committee that this practice, which has been going on for years, is resulting in an accumulating over-expenditure each year which is not provided for in the levy for that particular year, even if all the taxes were collected, which they are not. As a result of this the committee passed the following resolution:—

"That temporary financing in the future out of current revenue be discontinued unless the source for repayment is set forth at the time of the borrowing, and then only if it is to be repaid during the current year, unless the expenditure may be capitalized and made redeemable in a period not to exceed five years."

Victoria, B.C.—Authorization was given to the city comptroller to arrange for the transfer of $2[illegible]0,000 of the city's Dominion government registered bonds to bearer bonds with a view to investment in other securities. By so doing the city will gain a considerable sum in interest. Ald. Sargent, chairman of the finance committee, who recommended the scheme, stated that it is proposed to change the city's holdings of [illegible] bonds to [illegible] bearing [illegible] per cent. [illegible] interest, amounting to $1,[illegible] a year, or $1[illegible], spread over fourteen years, when the bonds would mature. The [illegible] bonds, he said, would be taxable, but this would only affect individual holders, as the city would not have to pay. He said that bond dealers usually asked for bearer bonds in open market transactions, and it was, therefore, desirable to get this class instead of the registered variety.

Montreal, Que.—According to figures given out at the city hall last week, the city has increased its ownership of unbuilt properties, on which taxes have been allowed to lapse for two years, by the purchase from the sheriff of 221 more vacant lots. The city authorities announce that, while the law permits the owners to redeem their holdings within two years on the conditions specified in the city charter, very few people take advantage of this provision of the law, and that probably not more than 10 per cent. do so within the stated period. Last year the city bought in numerous vacant lands for the protection of the city's interests, and as most of these lots are still held by the corporation, it has now become the owner of over 400 lots.

It is announced that the city need not hold these lots for two years, but that if there is a second sale in that time the original owner still retains his right to buy them back on the payment of expenses and taxes and the sale price, plus 15 per cent. The city, though increasing its ownership of land, is protected, as the lots are said to be worth at least the taxes due, and that, therefore, the city is not the loser, except as regards the interest on money expended.

A statement by the Administration Commission shows that the cost of city administration for 1921 will be $2,582,151, as compared with $2,099,911 for 1920.

Winnipeg, Man.—Gross debenture debt of the city, according to figures just available, is $39,728,765, while the net debenture debt is $6,221,228. The following figures show how the net debt is arrived at:—

Gross debt		$39,728,765
Deduct—		
Revenue producing and other special debts as follows:—		
Ratepayers' share of local improvements	$11,453,219	
High-pressure special assessments	1,284,632	
Public school board	3,500,000	
Water works system	7,190,732	
Hydro-electric system	7,402,000	
	$30,830,583	
Total sinking fund	$11,033,138	
Less, sinking fund on above specials	8,356,185	
	$ 2,676,953	$33,507,536
Net general debt		$ 6,221,228

Outstanding debentures and stock will mature as follows, according to the report: $[illegible] in 1920, $236,716 in 1921, $261,804 in 1922, $[illegible] in 1923, $170,561 in 1924, $[illegible] in 1925, $[illegible] in 1926, $[illegible] in 1928, $25,000 in 1929, $201,272 in 1930, $[illegible] in 1931, $216,200 in 1932, $[illegible] in 1933, $[illegible] in 1934, $826,802 in 1935, $1,137,807 in 1936, $246,848 in 193[illegible], $104,000 in 1939, $6,290,672 in 1940, $6,12[illegible] in 1940 [illegible], $[illegible] in 1941, $12,380,649 in 194[illegible], $88,000 in 19[illegible], $[illegible] in 1946, $210,[illegible]42 in 1948, $[illegible] in 194[illegible], and $[illegible] in 19[illegible].

Assiniboia, Man.—At a meeting of ratepayers last week it was unanimously resolved to petition the Manitoba government to appoint a special commissioner to investigate and report on the affairs of the municipality. The action was the outcome of the [illegible] special report issued by W. A. Henderson and Co., chartered accountants, which drew attention to the fact that the municipal accounts are away behind in posting and generally in such a state of confusion that an exact statement of the municipality's position cannot be prepared. The special report says: "The present condition of affairs, if continued, can only lead to confusion, if not to considerable loss, through the lack of knowledge of the municipality's accounts and finances, as the staff seems to be always weeks behind in the accounting work."

Reeve Richardson, who was present at the meeting, asked for a postponement of judgment until the auditors' report was studied by the council and passed on. He drew attention to

the statement in the special report that no irregularities had been discovered. He admitted that the bookkeeping of the municipality was not up to date, but claimed that it was nevertheless correct. Councillor Stockdale endorsed the reeve's statement, and warned the ratepayers against hasty and ill-advised action which might be greatly to the prejudice of the municipality, he said.

W. D. Bayley, M.L.A., gave a comprehensive review of the whole situation. He said the statement in the special auditors' report that no irregularities had been found was true enough, but the accounts of the municipality were in such shape that irregularities could exist without being discovered. He strongly urged the appointment of a special commissioner. The meeting was thoroughly in accord with this view. Several ratepayers drew attention to the fact that there was no time to lose, as division of the municipality was close at hand, and it was necessary that matters be cleared up so that the new councils would have a fair start, and that an equitable distribution of assets and liabilities be arrived at. During the discusson it was pointed out that as far back as 1917 the municipal commissioner had drawn attention to the slackness of Assiniboia's accounting system.

Government and Municipal Bond Market

British Columbia Makes Another Loan at a High Price—Lethbridge District Farmers Favor Bonding of Land for Purpose of Constructing Irrigation System—Saskatchewan Officials Push New Domestic Loan—Alberta in Market for a Million

BRITISH Columbia's issue featured the government and municipal bond market this week. The price received by the province was a good one, being on a basis of about 4.80 per cent., but this was only made possible by the exchange rate existing between this country and the United States, as the bonds will be disposed of across the line.

During the past year Canadian provinces have borrowed more than $100,000,000, of which the greater part was secured from United States investors. If exchange goes back to par within a short time, the provinces may consider themselves extremely fortunate. In the meantime, however, they should not be entirely satisfied with the prices they have received for their securities.

If the United States had not been available as a market for Canadian securities, where would the provinces have obtained their money? This is a rather difficult question to answer, but the experiences of some dealers who have endeavored to place large amounts of securities in Canada, would seem to indicate that only a very small portion of one hundred millions would have been obtainable here.

For the first time in the history of Canada, farmers have bonded their land for the purpose of constructing an irrigation system. On October 21, by an overwhelming majority, residents of the Lethbridge Northern District voted in favor of bonding their land for an amount of $5,400,000. The result of voting was 262 for and 16 against. The securities to be issued will bear interest at the rate of 6 per cent., and will mature over a period of thirty years.

More Domestic Loans

Fredericton, N.B., is now offering to citizens over the counter and through its bankers the Bank of Nova Scotia, $160,000 bonds, which are exempt from city taxes. The bonds are for various maturities being redeemable each year from December, [illegible], to December, [illegible], are offered at prices to yield 6 per cent., and are in denominations of $500.

The rural municipality of Assiniboia, Man., which recently failed to receive a favorable response from bond dealers for its securities, is now testing the local market with an offering of $[illegible] 6 per cent. serial debentures maturing from one to 20 years, in denominations of $50 and $100. When the municipality rejected all tenders about two or three weeks ago, the rate of the highest bid was not given out. That it was somewhere around the 8 per cent. mark, however, can be fairly concluded from the fact that the present issue is being offered to purchasers on a [illegible] per cent. basis.

Milton, Ont., will sell to local citizens $[illegible] debentures. The finance committee has also recommended another issue of debentures to the amount of $[illegible] for high school purposes, and if this is finally passed, it will probably be treated in the same manner.

After several attempts, Windsor, Ont., has failed to place an issue of $[illegible] 7 per cent. instalment debentures. Tenders were asked until October 22 last for these securities, but the highest bid of 93.11, which was on about a 6.90 per cent. basis, was considered unsatisfactory. The city formerly considered the advisability of selling these debentures locally, but has apparently abandoned the idea. It is doubtful whether the issue would have met with a very good reception locally, especially in view of the unfavorable advertising which it has received.

Another Ontario municipality, which has been successful in underwriting its own debentures, is Exeter. According to a report from London, the village has disposed of $50,000 5½ per cent. debentures locally. In view of the size of the village, this is considered a good piece of business.

Enthusiastic Over Saskatchewan Loan

If optimism and fine spirit can sell anything, Saskatchewan is going to market at least a large part of the $3,500,000 5 per cent. farm loan debentures, as the officials in connection with the proposed loan are not lacking in this respect. Doubt as to the success of the undertaking has been frequently expressed, while the officials themselves are aware that the task is not a small one. There is a good spirit of co-operation, however, and, in spite of the hardships of reduced prices for grain and unfavorable conditions in some parts of the province, satisfactory results are expected.

Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:

Borrower.	Amount	Rate %.	Maturity.	Tenders close.
[illegible], Ont.	$ 20,000	6	10-years	Oct. 30
Glace Bay, N.S.	[illegible]	[illegible]	Various	Oct. 30
[illegible], Sask., R. [illegible] Telephones	[illegible]	8	15-instal.	Oct. 30
[illegible] Tp., Ont.	[illegible]	[illegible]	10-instal.	Oct. 30
[illegible], Ont.	8,000	6½	20-instal.	Nov. 1
[illegible], Ont.	[illegible]	5½	30-instal.	Nov. 1
Alberta	1,000,000	[illegible]	10-years	Nov. 1
[illegible], Ont.	[illegible]	6½	20-instal.	Nov. 2
[illegible], Ont.	7,874	6	15-instal.	Nov. 8
[illegible], Sask., [illegible]	2,000	8	15-instal.	Nov. 10
[illegible], Que.	[illegible]	6	20-instal.	Nov. 11
[illegible], Que.	[illegible]	6	Optional	Nov. 11
[illegible] County, Ont.	[illegible]	6	20-instal.	Nov. 12
Yellow Grass, Sask.	12,000	7	10-instal.	Nov. 12

Yellow Grass, Sask.—The town is asking for tenders until November 12, [illegible], for $12,000 7 per cent. 10-instalment debentures.—H. J. [illegible], secretary-treasurer.

6.30%
Until October 1st, 1940

Markets may come and markets may go, but purchasers of Province of Saskatchewan 6% Gold Bonds to-day at 96.62 and interest are assured of 6.30% for twenty years.

These bonds afford an excellent opportunity to dispense with the necessity for frequent reinvestment. They also guard against any changes in the money market that may occur in years to come.

Victory Loan—
A Comparison

In 1914 Dominion of Canada 3½ Bonds, due in 1934, were selling at 93, yielding approximately 4%.

To-day you can buy Dominion of Canada 5½% Bonds, due in 1934, at 93, yielding 6.25%.

In 1934 both Bonds will be redeemed at 100 CENTS ON THE DOLLAR.

A 5½% Bond, due in 1934, selling to-day to yield 4% would cost 115.96.

Township of Teck, Ont.—Tenders will be received until October 30, 1920, for the purchase of $10,000 6 per cent. 10-instalment debentures. The money will be used for schools.

Ford City, Ont.—Tenders will be received until November 2, 1920, for the purchase of $50,000 6½ per cent. 20-instalment housing debentures, guaranteed by the province.

Oshawa, Ont.—Tenders will be received until November 8, 1920, for the purchase of $78,743.88 6 per cent. 15-instalment debentures, the proceeds of which issue will be used for local improvements.

Glace Bay, N.S.—Tenders close at 4 p.m., October 30, 1920, for the purchase of the following 6 per cent. debentures: $175,000 for schools, maturing in thirty years, in denominations of $1,000 and interest payable semi-annually at Glace Bay; $15,000 for pavement repairs, in denominations of $500, and maturing $1,000 each year, with interest as above.—N. F. McNeil, town clerk.

Amos, Que.—The village is asking for tenders up till November 11, 1920, for the purchase of $55,000 6 per cent. 20-instalment debentures, the proceeds of which issue will be used for fire protection, sewers, sidewalks and to consolidate the floating debt. Securities are in denominations of $100 and $500, and are redeemable at the Banque Nationale at Quebec, Montreal or Amos.—C. A. Lafrance.

Temiskaming, Que.—The municipality of the second division of the county of Temiskaming will receive tenders until November 11, 1920, for the purchase of $24,500 6 per cent. debentures, the proceeds of which will be used for a circuit and magistrate's court. The securities are redeemable in 25 years, but if necessary the maturity will be reduced to 10 or 5 years, with sinking fund at a rate based on the term of the the loan. Tenders should stipulate this.—J. Grenier, secretary-treasurer.

Saskatchewan Telephones.—Tenders will be received until October 30, 1920, for the purchase of $24,500 telephone debentures of the South-West Moosomin Rural Telephone Co., Ltd. Securities are repayable in fifteen equal annual instalments, and bear interest at 8 per cent.—W. C. Bruce, Moosomin.

Offers will be received by A. E. Crosby, Expanse, until November 10, 1920, for the purchase of $2,500 8 per cent. debentures of the Aldenburg Rural Telephone Co., Ltd., maturing in 15 equal annual instalments.

Debenture Notes

Iroquois Falls, Ont.—Debentures to the amount of $45,000 will be issued by the Separate School Board of the town.

Windsor, Ont.—A by-law to raise money for the purchase of parks in the border cities, has been rejected by ratepayers.

St. Vital R.M., Man.—On December 3, 1920, ratepayers will be asked to vote on the issue of $30,000 debentures for school purposes.

Edmonton, Alta.—The $2,000,000 of securities recently purchased by Morris Bros., of Portland, will be personally delivered by the city treasurer and the finance commissioner, and will also be signed at the point of delivery, in order to make the bonds non-negotiable until actually delivered. Mayor Clarke also states that more than $500 will be saved by this method of delivery.

Sydney, N.S.—Last May eight money by-laws were submitted to ratepayers, calling for the issue of debentures to the amount of $297,000. One of the by-laws, amounting to $10,000, was defeated, and, according to the legislation granted, the defeat of one item defeated the whole object of proceedings. The city is in need of money, but cannot borrow until the statute is amended at the next House of Assembly and another vote has been taken.

Bond Sales

Campbellton, N.B.—The Eastern Securities Co., Ltd., recently purchased $17,000 5½ per cent. debentures, due August 1, [illegible], and are offering them in denominations of $500 at 88.14 and interest.

Manitoba Schools.—J. A. Thompson and Co., Winnipeg, report the purchase of the following school debentures: Glencairn Con. S.D., $14,000; Melba S.D., $5,000; Hoffnungsort S.D., $5,000; Moray S.D., $2,000. In each case the bonds bear 8 per cent. and are payable at the end of 20 years.

Greater Winnipeg Water District, Man.—An offer by A. E. Ames and Company of 90.093 for the $800,000 6 per cent. 20-year bonds, payable in Canada only, has been accepted by the administration board. At this rate the district pays more for the 10-year bonds, payable in Canada and United States, than 6.90 per cent. for its money.

Bids for the 10-year bonds, payable in Canada and United States, were: Wood, Gundy and Co. and Dominion Securities Corporation, 97.77; Dominion Loan and Security Co. and Wells-Dickey Co., 97.63; A. E. Ames and Co., 97.093; First National Co., Detroit, Minnesota Loan and Trust Co., A. Jarvis and Co., Edward Brown and Co. and Canadian and General Securities, Ltd., 94.978; W. A. Mackenzie and Co. and R. A. Daly and Co., 94.77; R. C. Matthews and Co., N. A. Macdonald and Co. and Carstens and Earles, 91.90.

For the 20-year bonds, payable in Canada only, the bids were: A. E. Ames and Co., 90.093; Wood, Gundy and Co., 89.63; A. Jarvis and Co. and Canadian General Securities, Ltd., 87.33; W. A. Mackenzie and Co. and R. A. Daly and Co., 88.35.

British Columbia.—A syndicate, composed of Carstens and Earles, of Seattle, the Royal Financial Corporation, of Vancouver, the British-American Bond Corporation, and Gillespie, Hart and Todd, of Victoria, has purchased the $1,000,000 three-year 6 per cent. bonds of the province at 103.351, Canadian funds, or on a basis of about 4.80 per cent. Other tenders received were:—

Blyth, Witter and Co.	103.25
Wells-Dickey Co. and the Minnesota Trust Co., of Minneapolis	103.306
A. E. Ames and Co., and Halsey, Stuart and Co.	102.57
R. C. Matthews and Co., Toronto, Paine, Webber and Co., and A. B. Leach and Co., of Chicago	102.29
Wood, Gundy and Co.	101.24

Saskatchewan.—The following is a list of debentures reported sold by the Local Government Board from October 2nd to 9th, 1920:—

Schools.—Tisdale, $16,000, Rhyl, $4,000, St. Albert, $4,000; Waterman-Waterbury Manufacturing Co. Sunny Ridge, $3,000; W. B. Perkins, Milestone.

Rural Telephones.—Lone Corner, $3,300; R. E. Robb, Qu'Appelle. Heavylands, $400; town of Biggar sinking fund. South Cupar, $5,450; Agricultural Insurance Co. Spy Hill, $1,700; R. Berwick, Ltd. Tramping Lake, $8,000; Wood, Gundy and Co. Big Quill, $9,250; J. Holiski, Wynyard. Elfros, $39,500; R. O. Berwick and Co. Donwell Canora, $31,800. Tullis, $3,000; W. L. McKinnon and Co.

Village.—Imperial, $2,000; J. R. Wallace, Imperial.

Town.—Maple Creek, $8,200; local purchasers.

TRADE PREFERENCE WITH WEST INDIES

The Chamber of Commerce of Jamaica, B.W.I., has distributed to Canadian boards of trade copies of eleven resolutions relating to trade with Canada. The resolutions explain the principles involved in granting a preference on all goods produced or manufactured in the colony, exported from there into Canada, and all goods being the natural and manufactured products of Canada imported into Jamaica. They express the desire that trading with the Dominion by Jamaica be more expanded and intimate, but regret that the arrangements for full preference on sugar under the Dutch standard in color is aimed to shut out from the Canadian market the better grades of sugar produced in Jamaica in the interest of the Canadian refiners.

Canadian Stocks Continue Irregular Trend—Money is the Controlling Factor—Trading Greatly Reduced—Shareholders of Price Brothers Ratify Reorganization Proposals—Forms of Subscription to New Howard Smith Common are Lenient

FOR many weeks past, the trend of stock prices both here and in New York, has been distinctly irregular, while trading has been greatly reduced. Last week's operations indicated no departure from this condition, but the more pronounced irregular downward movement hinted that the worst is not yet over. Money is the controlling factor, and as no relief is yet in sight the stock markets must continue to yield to its influence.

In the New York market speculation is distinctly limited by the money situation, which shows little change, harvest and commercial needs continuing to absorb practically all of the available credits. Strength of bonds and the demand for investment securities seem to indicate that surplus funds are being used for investment purposes rather than speculative.

Very few issues on the Canadian exchanges maintained the price levels set at the opening, while in a great many cases the closing price was the low for the week. The pressure on papers was heavy, while the "merger" stocks also suffered considerably. In Toronto Canadian General Electric, Steamships, pfd., and Spanish River, pfd., were slightly stronger, while Mackay also registered a gain. The report of the Consumers Gas Co. was evidently favorably interpreted, as that issue was somewhat higher. The banking section was notably firm.

The volume of trading from day to day, commencing October 21, is shown in the following figures:—

	Montreal		Toronto	
	Listed shares	Bonds	Listed shares	Bonds
Thursday	14,364	$ 43,400	2,814	$ 44,500
Friday	8,169	15,600	2,842	59,300
Saturday	6,473	5,800	1,942	17,100
Monday	4,130	17,900	1,043	42,300
Tuesday	4,915	25,200	1,208	5,400
Wednesday	11,349	14,710	1,298	8,300
Totals	59,400	$122,610	11,147	$176,900

Capitalization Increases

Supplementary letters patent have been issued to the Dougall Varnish Co., of Montreal, Que., authorizing it to increase its capital from $250,000 to $500,000 by the issue of 1,[illegible]00 common shares of $100 each and 1,000 preferred shares of $100 each.

J. T. Wing and Co., Ltd., of Windsor, Ont., incorporated under the laws of Ontario, have been authorized to increase the capital stock from $40,000 to $500,000 by the creation of 4,600 shares of $100 each.

Cluett, Peabody and Co., of Canada, Ltd., Montreal, manufacturers of Arrow shirts, collars, undersuits and handkerchiefs, have purchased the business of Williams, Greene and Rome Co., manufacturers of similar wear, Kitchener, Ont., and as a result have increased their capitalization. New stock is being absorbed by the company.

Patterson Bros., diamond merchants, Sault Ste. Marie, Ont., recently incorporated, will have a paid-up capital of $150,000. All the stock will be absorbed privately.

The issue of $1,200,000 8 per cent., first mortgage and collateral trust gold bonds of the Ottawa, Light, Heat and Power Co., particulars of which were given in these columns two weeks ago, has been underwritten entirely by the Royal Securities Corp., and Harris, Forbes and Co., Incorporated.

Permission has been granted the New Brunswick Telephone Co. by the New Brunswick Public Utilities Commission to increase its capital stock by $400,000. This amount is to reimburse the company for money borrowed for plant extension.

Price Brothers' Reorganization

Shareholders of Price Brothers, Ltd., have ratified the recommendations of the board of directors with regard to reorganization. The proposals are to transfer the present extensive business and holdings of the company to a new concern with the same name in consideration of 426,710 shares of the new enterprise's common stock, and the assumption by the new concern of bonded debt and other obligations. Holders of the present Price Bros.' stock will receive five shares of the new security for each one of old. New shares will be of $100 par value.

Sir William Price has made the following statement regarding various statements which have been circulating and which have been creating wrong impressions:—

"In order to set at rest various rumors, let me state that Price Bros. and Co. have not now, and never have had, any intention of amalgamation with any other company."

Terms of Howard Smith Shares

Particulars of the terms of subscription to the new $1,000,000 issue of common stock of the Howard Smith Paper Mills, Ltd., which was announced in these columns last week, have been given out as follows:—

The new stock is available to shareholders of record at the close of business on November 5 next. Ten per cent. on subscription or before November 15; 15 per cent. on or before December 15; 15 per cent. on or before January 15, 1921; 15 per cent. on or before February 15, 1921; 15 per cent. on or before March 15, 1921, 15 per cent. on or before April 15, 1921, and 15 per cent. on or before May 15, 1921.

Right to subscribe expires at 3 p.m. November 15 next. Warrants must at the same time be surrendered to the company. Shares may be paid in full on December 15 or any

NEW CAPITAL FOR TORONTO GENERAL TRUSTS

The $500,000 of unissued capital of the Toronto General Trusts Corporation is to be offered to the shareholders at $175 per share. This is the remaining $500,000 of the $1,000,000 addition to capital authorized at the meeting on May 7 last. Payment is to be made in five instalments of $35 each on December 10, March 1, May 1, July 1 and September 1. The offer is open to subscribers on the books of the corporation at the close of business on November 20, in the ratio of one share to every three shares of capital held.

A circular issued on October 28th, to shareholders, says:—

"As the corporation is not permitted to allot fractions of shares, the shareholders may, if they so desire, purchase a sufficient number of shares in the open market before the 20th day of November next to bring their respective holdings up to three shares or a multiple thereof. The shareholders may, however, if they prefer, purchase or sell through their brokers rights to fractions after the 20th day of November, 1920, and a form of assignment for that purpose is enclosed herewith, and on presentation of the necessary number of fractional assignments to constitute a whole share with subscription for such share an allotment of a whole share will be made.

"Enclosed you will find a subscription form on which please fill in the number of shares you desire to take, sign (having your signature duly witnessed) and return together with a remittance for the first instalment of $35 per share payable on the 10th day of December, 1920.

"Shareholders who do not subscribe for their proportion of the new stock on or before the 10th day of December next forfeit their rights thereto; and all shares not subscribed for and the first instalment of capital and premium paid thereon within such period shall be deemed to have been declined and shall be dealt with by the directors in such manner and on such terms as they may prescribe.

"Shareholders may pay one or more instalments in advance and all payments will be entitled to interest representing dividend on the capital stock (not premium) at the rate of 12 per cent. per annum from the date of such payment made on and after the 10th day of December, 1920. Receipts will be issued for each payment, and stock certificates will be issued immediately after the next ensuing dividend day following the payment of the stock in full."

THREE BANKS DECLARE BONUSES TO SHAREHOLDERS

During the present month the three largest banks of Canada have declared special bonuses to shareholders. The dividend rates and the amount of the bonuses are as follows:—

	Dividend rate %.	Bonus %.
Bank of Montreal	12	2
Bank of Commerce	12	1
Royal Bank	12	2

The Bank of Montreal bonus was announced after the regular directors' meeting on October 19, when the usual quarterly dividend of 3 per cent. was declared. That of the Bank of Commerce was also announced last week, and is payable December 1 to shareholders of record November 15. The Royal Bank bonus, announced on Tuesday, is payable on December 15 to shareholders of record of November 30.

The market prices of these stocks have responded only slightly, as the following comparison of highest prices for the weeks ending on the respective dates indicates:—

	Oct. 6.	Oct. 13.	Oct 20.	Oct. 27.

DEBENTURES FOR SALE

PROVINCE OF QUEBEC

MUNICIPALITY OF THE VILLAGE OF AMOS, COUNTY OF TEMISCAMING

Public notice is hereby given that the municipality of the village of Amos will receive until Thursday, the Eleventh day of the month of November, 1920, at 5 o'clock p.m., at the office of the undersigned, sealed tenders endorsed "Tenders for debentures" amounting to $55,000 issued under the By-law No. 34, to consolidate the floating debt, improve the fire protection and construct certain sidewalks and sewers.

These bonds or debentures amounting to $55,000 in denominations of $100 and $500 will be dated the first August, 1920, redeemable in Canada by series of annual instalments at the offices of the Banque Nationale at Quebec, Montreal, or at Amos, the interest at the rate of 6 % per annum, to be payable semi-annually at the said offices of the Banque Nationale the first February and August.

The series of annual instalments shall be payable as follows:—

1st	August,	1921	. $1,200	1st	August,	1931	... $2,400
"	"	1922	. 1,300	"	"	1932	... 2,600
"	"	1923	. 1,400	"	"	1933	... 2,800
"	"	1924	1,500	"	"	1934	. . 3,000
"	"	1925	. 1,600	"	"	1935	. . 3,200
"	"	1926	. 1,700	"	"	1936	. 3,400
"	"	1927	. 1,800	"	"	1937	... 4,000
"	"	1928	. 1,900	"	"	1938	... 5,000
"	"	1929	. 2,000	"	"	1939	... 5,500
"	"	1930	2,200	"	"	1940	.. 6,500

Tenders will be received for these debentures redeemable in twenty years, by series as above given or for a shorter term issue redeemable in ten or five years with sinking fund at a rate based on the term of the loan.

The tenders must be accompanied by an accepted cheque equal to one per cent. of the amount of the total issue. The cheques of the tenderers whose tenders are not accepted, shall be returned to them without delay; that of the tenderer whose offer is accepted, shall be returned to him after the execution of his contract.

The lowest or any tender not necessarily accepted.

Every tender must specify whether the price offered does or does not include the accrued interest on the debentures at the time of delivery.

The tenders will be considered at a public sitting of the council which shall be held on the eleventh November, 1920, at 7 o'clock p.m. at the customary place, or at adjournment of said sitting.

Given at Amos, this 19th October, 1920.

C.-A. LAFRANCE,
Secretary-Treasurer.

Corporation Finance

Consumers Gas Has Small Surplus—Heavy Operating Expenses a Great Setback—Detroit Railway Withholding Dividends to Serve the Public—Mexican Power Bondholders Assured of a Better Future for the Company—Brompton Dividend Increased

Saskatchewan Co-operative Elevator Co., Ltd.—Three hundred and eight elevators were operated during 1919 and 21,841,550 bushels of grain were handled, according to the annual report of the Co-operation and Markets Commissioner of the Provincial Department of Agriculture.

The company made a profit of $193,599, declared a dividend of 8 per cent to its shareholders and transferred $36,416 to the reserve.

Brompton Pulp and Paper Co.—Declaration of a quarterly dividend of $1.75 per share, payable November 8th next to shareholders of record of October 31st, as against a previous rate of $1.50, indicates an increase in disbursements from 6 to 7 per cent

An official statement, given out after the meeting of the board, said that the directors wished the shareholders to know that the increased disbursements to be made next month were due altogether to the excellent earnings of the company's United States subsidiaries, the Groveton and Claremont enterprises.

Mexican Light and Power Co., Ltd.—A letter to bondholders of the company and security holders of the Mexican Electric Light Co., the Pachuca Light and Power Co. and the Mexico Tramways Co., signed by T. Porter, assuring that action for the protection of such holders will be taken. The letter outlines the political troubles in Mexico during the past year, and points out that the companies are recovering from the effect of these disturbances.

As to the position of the companies, some improvement has been made in operating efficiency of the tramways since the company was returned to its owners by the government The hydraulic plants of the Light and Power Company are overtaxed, and steps are being taken to install a new unit at the Necaxa power-house. Matters outstanding between the companies and the government of Mexico are being discussed with a view to settlement For instance, no indemnity was paid by the government for occupying the tramways for over four years. The tramways is also seeking the right to increase fares to meet the general rise of wages and materials Chartered accountants are working on the accounts to establish the exact financial position of each company.

It is stated that during the past summer President E. R. Peacock and H Malcolm Hubbard visited Canada and Mexico, seeing the principal men connected with the government of the latter country. At that time Huerta was provisional president, and he, as well as General Obregon, who later became president, gave emphatic assurances of every possible protection to foreign capital.

Detroit United Railway.—After returning to [illegible] from a visit to New York, where the directors have been in session for several days, A. J. Ferguson, vice-president of the road, made the following statement:—

"The general situation of the company is that, by reason of withholding increased dividends, representing a fair return on the value of its property it has employed in serving the public, it has accumulated a large surplus. In January, [illegible] the company was authorized to issue $25,000,000 of bonds secured by a mortgage on its property, to provide for underlying bonds and to meet requirements from time to time with reference to the extension and development of its lines. It was considered at the time that the provision made by the $25,000,000 mortgage would provide for necessary extensions and betterments indefinitely, but the increase in population and the development of industries and commercial activities within the territory served by the company's transportation has been so great that the provision thus made has been exhausted, the mortgage having now been closed several years.

"The increased demand for extension of the company's system and general facilities continues, and our bankers have advised that before or in connection with the adoption of any permanent financial plan the company's properties be segregated—the city lines from the suburban ones. If this plan, which is under consideration, shall, upon full investigation and consideration, be deemed wise, it would involve a reorganization to some extent, and also the adoption of a comprehensive programme with reference to the financial needs of the country, both for the near and distant future. The company," continued Mr. Ferguson, "proposes to efficiently serve the people within the territory occupied by its system depending on it for service, having full regard to the future increase in population. If a plan of reorganization and for permanent financing be finally approved by the board of directors of the road, it will, of course, be submitted to the stockholders for their consideration."

Consumers Gas Co.—A surplus of $129,708 is shown in the annual report of the company for the year ended September 30th last, as compared with an adverse balance of $127,064 in 1919. Gross income for the year amounted to $6,426,896, compared with $5,706,215 in 1919. This good showing, however, was offset to a large extent by an increase in operating expenses from $4,540,298 to $5,186,622.

In his report to shareholders, A. W. Austin, president, points out that during the year there was an increase of 10.28 per cent. in the quantity of gas sold and an increase of 5,760 in the total number of customers supplied. He observes that, notwithstanding strong electrical competition encountered during the past ten years, the output of gas during that period has nearly doubled. The number of customers has also increased 90 per cent., although in the same period the population served by the company has increased only 44 per cent. There has also been a large increase in the number of purposes for which gas has been used.

In regard to the profit and loss account, Mr. Austin draws attention to the fact that the surplus of $129,708 has been placed to reserve. He also states that, compared with the magnitude of the figures involved, this surplus appears a small one, and especially so when bearing in mind the adverse balances of the past several years during the war period which must be gradually recovered. The year's operations were affected by marked increases in the prices of all commodities necessary for the manufacture and distribution of gas. During the past three months, it is pointed out, prices have advanced at a greater rate than in any similar period in the company's history. Both coal and gas oil have advanced to prices undreamed of, and the company is paying for these materials at the present time from two to three and a half times the prices paid in 1915.

The general financial position of the company was not materially changed. Total assets at the end of the year were $[illegible], as against $11,911,208 at the end of the previous year. The following figures show the principal changes:—

	1920.	1919.
Balance brought down	$ 1,210,274	$ 965,917
Interest	60,592	57,536
Dividends	536,070	535,999
[illegible]	513,902	499,445
Transferred to reserve	129,708	......
Reserve fund	3,346,982	3,119,668
Capital stock	5,360,700	5,360,700
Real estate, plant, etc.	10,775,954	10,444,795
[illegible]	141,497	141,530
Accounts receivable	516,557	456,415
Accounts payable	318,710	233,044
[illegible]	1,346,538	1,268,288
Materials and supplies	655,950	693,494

LOAN COMPANIES EXPERIENCE GOOD DEMAND

Activity in Mortgage Field Greatest in Years—Prosperity in Saskatchewan Has Exceptions

(Staff Correspondence.)

Regina, Sask., October 23, 1920.

FARM prosperity is resulting in an active demand for mortgage loans, according to H. W. Givins, manager of the Huron and Erie Mortgage Corporation in this city, and president of the Land Mortgage Companies' Association of Saskatchewan. In an interview with *The Monetary Times* Mr. Givins said:—

"At this time of the year, late October, the farmer in Saskatchewan reviews the work of the year, and he knows fairly well whether his farming operations have been profitable or otherwise.

"The prosperity of western farmers has received much generous advertising—in exchanges of views, at tariff inquiries and elsewhere—but less is heard of the men who find the balance on the wrong side of the ledger, and comparatively little is heard of the earlier years of struggle of the successful farmer, when only an untiring energy and a determined tenacity, mixed with characteristic western optimism, have enabled him to carry on and lay the foundation for his present satisfactory financial position.

Some Farmers Suffer Loss

"In not a few districts the 1920 balance sheet of many western farmers shows a heavy loss, and those of others a quite inadequate return for the labor of the year. When one considers the extensive and wide-spread areas throughout which our grain-farming operations are carried on, the varying weather conditions and the different qualities of soils, it is not to be expected that all crops will be uniformly bountiful, or that there shall be no crop failures at all.

"The areas where crops this year are poor are not large, and it is encouraging to note that many districts where returns in 1919 and 1918 were much below the average have this year produced good crops, which will enable the farmers there to substantially reduce their liabilities.

"Looking at the province as a whole and considering our estimated total grain production for this year, there is, I think, justification for a general feeling of satisfaction. In Saskatchewan and in all western Canada financial and business conditions are bound to show, as a result of increased production, very substantial improvement and increased stability.

Increase in Crop Production

"Recently published estimates indicate that, as compared with the year 1919, the province of Saskatchewan will show an increase in production of the various grains of 47,000,000 bushels of wheat; 60,000,000 bushels of oats; 4,000,000 bushels of barley and rye, and over 4,000,000 bushels of flax. Alberta shows increases in production of wheat, oats, barley and rye, represented by very similar figures, and Manitoba, while showing little or no increase in wheat production, shows an increase of approximately 6,500,000 bushels in the coarser grains. The products from the farms of western Canada, therefore, should very materially strengthen the financial and commercial position of Canada, as a whole, both at home and abroad.

"In Saskatchewan within the past year, sales of farm lands—both improved and unimproved—have been quite numerous, and prices have in many districts advanced considerably. Many successful farmers from the western States are purchasing farms in Saskatchewan, and where the land is still in its virgin state they are proceeding to bring it under cultivation without delay. As a result, there are large areas of newly broken land in many districts, and this, added to the additional acreage being brought under cultivation in the ordinary development of improved farms, gives promise of further progress and substantially increased production next year.

Loan Conditions Healthy

"The business of mortgage companies in Saskatchewan can be said to be in a very healthy condition, and the outlook is generally regarded with satisfaction. From the proceeds of their 1920 crops borrowers will be substantially reducing their mortgage loans, improving their buildings and bringing more land under cultivation, and as a result the securities held by mortgage companies will be strengthened and increased in value.

"At the present time the demand for mortgage loans is very active indeed. It might be said that not for many years have mortgage companies been able to secure such a large volume of exceptionally attractive investments. While, owing to the stringent financial conditions of the past few months and the resulting shortage of funds, some companies have been obliged to curtail their loaning operations, the substantial repayments on existing investments, which will, no doubt, be available in the very near future, should provide funds to take care of a very large volume of new business.

"Further development and more substantial improvements, the bringing of new land under cultivation and the increase in the value of our farm lands all tend to widen the field for investment and create a greater demand for the funds which mortgage companies provide for just such purposes. These conditions also give some indication of steady substantial progress in the upbuilding and development of Saskatchewan."

CORPORATION SECURITIES MARKET

(Continued from page 42)

subsequent payment date, while all shares paid for on December 15 will rank for dividend of record January 10, and so on over the other payment dates. Interest at the rate of 8 per cent. per annum will be allowed on all instalments paid on the due dates, such interest to run from date of payment of each instalment and to be payable on the next following dividend date. Warrants will be issued upon closing of transfer books on November 5 next. Certificates of common capital stock will be issued on and after May 15, 1921.

New Stock Offerings

The Sterling Securities, Ltd., and the Standard Bond Corporation, Ltd., Halifax, N.S., are offering $250,000 8 per cent., preferred stock of the J. W. Cumming Manufacturing Co., Ltd., at par with a bonus of 20 per cent. common. The J. W. Cumming Co. is a manufacturer of coal mining tools, equipment, drop forgings, crankshafts and connecting rods for farm tractors and gasoline engines, etc.

Motor-Sundries Corporation, Ltd., recently incorporated to take over the business of Motor-Sundries, Ltd., Toronto, is offering 1,500 shares of common stock of a par value of $100, to take care of increasing business and to provide sufficient capital to purchase or erect a manufacturing plant to fulfill orders now offered. A large proportion of the new company's stock is held by shareholders in the old company.

Traders Finance Corporation, Ltd.

Traders Finance Corporation, Ltd., is the name of a new company recently formed in Winnipeg to finance dealers in automobiles by purchasing their notes secured by their stock in trade. No public offering of preferred shares has been made yet, but advance subscriptions from the company's associates will probably amount to about $100,000 for the time being. "We have a large connection with the grain trade," said W. W. Evans, manager to *The Monetary Times*, "and these gentlemen are using their funds at the present time to the last available dollar in the conduct of their own business, and we do not intend to place the proposition before them systematically until the first of the new year, when the peak load of the grain business has passed. By that time we anticipate that, general conditions being normal, at least $250,000 additional stock will be taken up in Winnipeg."

RECENT FIRES

Business Sections of the Towns of Margaret, Man., and Ste. Stanislas, Que., Were Damaged—Western Canada Flour Mill at Brandon and the Globe Waterproof Clothing Co. at Montreal Also Suffer Losses

Arnprior, Ont.—October 21—The lumber piles of S. R. Rudd and Co. were destroyed by fire. The loss is $15,000, with $8,000 insurance.

Aurora, Ont.—October 23—Residence of Harry Hawkes, in Whitchurch township, was destroyed by fire.

Aylmer, Ont.—October 24—Fire did $20,000 damage when a fire occurred in the outbuildings on the farm of Thomas Ritchie, on the Aylmer Road.

Barons, Alta.—October 20—Shoe shop of Charles Knowles was damaged by fire. The loss is $1,500, with no insurance.

Belleville, Ont.—October 22—The power house of the Hydro-Electric Power Commission of Ontario, situated at Healy Falls, was damaged by fire. The origin of the fire was caused by the explosion of lightning-arrester tanks.

Bowmanville, Ont.—October 24—William M. Horsey, police magistrate, sustained a loss of $4,000 by the burning of his farm buildings.

Brandon, Man.—October 21—Spontaneous combustion caused a fire at the oatmeal plant of the Western Canada flour mill, doing $15,000 damage.

Cobalt, Ont.—October 23—The shaft-house at the La Rose Mine was destroyed by fire.

Dana, Sask.—October 22—Home of Nicholas Stuecnski was destroyed by fire. There were three fatalities.

Hampton, N.B.—The fires reported in last week's issue at Hampton, Ont., should have been Hampton, N.B.

Justice, Man.—October 18—Ogilvie Elevator, containing 20,000 bushels of grain, was destroyed by fire.

Margaret, Man.—October 21—Main portion of the village was wiped out by fire. The fire, which is believed to be of incendiary origin, destroyed eight buildings; an estimated loss of $75,000.

Montreal, Que.—October 2[illegible]—Damage estimated at $20,000 was done by fire of unknown cause in the premises of the Globe Waterproof Clothing Co., 56 Notre Dame Street West.

October 27—Fogarty Garage, Ltd., 17 Murray Street, was damaged by fire. The cause of the fire is thought to have been a backfire in an automobile.

Morse, Sask.—October 21—Residence of Mr. Roehat was destroyed by fire. Two fatalities.

Mount Forest, Ont.—October 21—A barn on the farm of Mr. Walls, on the second concession of Egremont, near Mount Forest, was destroyed by fire.

Mulvihill, Man.—October 19—House of Mons Larson was damaged by fire. The fire was caused by lightning. The loss is partly covered by insurance.

North Hatley, Que.—October 22—Residence and two barns belonging to Alfred Simard were destroyed by fire. The loss is partly covered by insurance.

Owen Sound, Ont.—October 22—A [illegible] occupied by Wm. McKibbon, [illegible] 2nd Avenue East, was damaged by fire. The fire was started from a wood stove.

Port Hope, Ont.—October 2[illegible]—Several buildings on the farm of Frank Anderson, Hunker Hill, were destroyed by fire. The loss is a very heavy one and has only a small insurance.

Quebec, Que.—October 2[illegible]—Six houses were damaged when a fire swept through a section of St. [illegible] [illegible] about three miles west of the city. The loss is estimated at $[illegible].

St. Johns, Que.—October [illegible]—Fire in the stables at the rear of Simpson's grocery store destroyed the stables and three horses perished.

Ste. Stanislas de Kostka, Que.—October [illegible]—[illegible] two stores, one [illegible] and a [illegible] shed were destroyed by fire. The fire was caused from a defective chimney. The loss is estimated at $[illegible].

Simcoe, Ont.—October 2[illegible]—Catching fire from a pile of burning leaves, a barn belonging to J. H. Jackson, [illegible] Street, was destroyed.

October 25—Dwelling of Herbert Barber, Main Street, was damaged by fire, which is believed to have started from the kitchen stove. The loss is estimated at $3,000, with $1,800 insurance.

Thornhill, Ont.—October 22—Barn containing season's crops on the farm of John Moriarity was destroyed by fire.

Toronto, Ont.—October 22—Walnut Dairy, 90 Annette Street, was damaged by fire. The loss is estimated at $5,000. Premises at 140 Quebec Avenue were damaged by fire. The loss is $1,300. Three hundred dollars' damage was done to the office of Joseph Oliver's lumber yard, foot of Spadina Avenue. The cause of the fire is unknown. The building at 80 Nelson Street was damaged to the extent of $800.

October 23—Fire of unknown cause did $4,000 damage to the three-story brick dwelling at the corner of Forest Hill and Spadina Road. The house was not occupied, and is owned by the Peterman estate.

Wolfe Island, Ont.—October 26—Residence of Fred Watts was destroyed by fire. One fatality.

ADDITIONAL INFORMATION CONCERNING FIRES

Bridgeburg, Ont.—October 13—The Railroad Y.M.C.A. was damaged by fire. The cause of the fire is unknown. The loss is $11,000, with insurance of $13,000 in the G.T.R. Co. and the Atlas Insurance Co.

Conquerall Bank, N.S.—October 6—Union Church was damaged to the extent of $5,000 and a barn owned by Mr. Heckman suffered a loss of $500. There was no insurance on either.

Manitoba.—The fire commissioner's statement for the month of August shows that there were 170 fires with a loss of $163,378. The following were the class of structure destroyed or damaged by fire during the month: Dwellings 37, farm buildings [illegible]2, automobiles 13, hotels 3, stores 2, garages 2, laundries 2. Rubbish heaps caused 28 fires, electricity 12, lightning 26, matches 17, explosions 6, smoking 11, sparks [illegible], and spontaneous combustion 4.

Ontario.—The following is a summary of the Ontario fire marshal's report for September:—

	1920.	Corresponding months of 1919.
Number of fires	791	720
Aggregate loss	$901,714	$931,918
Insurance loss	637,953	621,825
Loss not covered by insurance	263,761	310,093

Loss for nine months of 1920, compared with the corresponding period of 1919:—

	1920.	1919.
Number of fires	7,052	7,251
Aggregate loss	$8,263,094	$8,284,419
Insurance loss	5,917,167	5,439,784
Loss not covered by insurance	2,315,927	2,844,635

The chief fires of the months were at Ottawa—Day's rink and [illegible], $[illegible]; Smith's lumber mill at Callander, $[illegible]; two stores at Brockville, $29,318.

The chief cause of fire during the month was lightning, which was responsible for [illegible] fires, aggregating $171,365. The chief classes from which the September fires came were:—

	No.	Loss.
Farm barns	162	$299,222
Dwellings	390	178,723
Mercantile stores	78	110,175
Manufacturing plants	39	129,062

The fire casualties reported for the month are: Killed, two [illegible]; injured, one man and four women. [illegible]

Winnipeg, Man.—[illegible]—Building of the Owl Mfg. [illegible] was damaged by fire. The fire was caused from a [illegible] which ignited gas. The total loss is [illegible] insurance of $9,200 in the Canada Security Assurance Co. and the Newark Fire Insurance Co.

Call loans elsewhere	169,532,189	193,888,245	186,962,960	+10.0	−3.6
Circulation	229,532,356	237,697,647	212,988,866	− 5.7	−2.1

BUSINESS conditions as they stand now are to some extent reflected in the above figures, which represent the principal changes in the September bank statement. The substantial increase in current loans is largely the result of the demand for credit for crop moving purposes. An increase in savings deposits of about .7 per cent. brings that account up to more than $7,000,000 above the previous record, which was set in October, 1919. The trend in demand and notice deposits during the past thirteen months is shown in the following table:—

	Deposits payable on demand.	Deposits payable after notice.
1919—September	$650,743,015	$1,227,437,715
October	705,280,241	1,262,746,984
November	728,657,589	1,137,858,277
December	703,329,292	1,138,086,691
1920—January	621,408,024	1,163,297,037
February	620,069,555	1,187,027,307
March	657,412,028	1,197,719,570
April	652,918,760	1,209,573,990
May	645,957,229	1,229,073,515
June	659,622,583	1,243,700,977
July	639,415,025	1,253,170,443
August	640,361,707	1,261,647,732
September	677,286,905	1,270,194,097

The following figures also illustrate the actions of these two accounts in September for the past six years:—

Sept.	On demand.	After notice.	Total.
1915	$359,315,280	$ 693,339,851	$1,052,655,131
1916	454,148,049	816,374,171	1,270,522,220
1917	451,749,532	966,393,541	1,417,143,073
1918	588,940,119	1,037,498,920	1,626,439,039
1919	650,743,015	1,227,437,715	1,878,180,730
1920	677,286,905	1,270,194,097	1,947,481,002

Call Loans Higher

Further restriction of credit for stock market purposes in Canada is not apparent, as there is an increase of more than $1,000,000 in call loans for the month, although it will be noted from the following figures that such loans are smaller in volume than they were at the beginning of this year:—

Loans.	Current in Canada.	Call in Canada.
1919—September	$1,058,572,202	$ 96,912,709
October	1,104,940,160	100,549,390
November	1,189,408,423	121,754,469
December	1,207,109,046	125,888,760
1920—January	1,226,962,963	132,015,334
February	1,257,015,902	127,251,919
March	1,322,267,030	128,233,310
April	1,347,238,230	125,644,859
May	1,349,079,981	119,114,493
June	1,365,151,083	115,272,587
July	1,377,276,853	115,360,894
August	1,385,470,153	113,598,923
September	1,417,520,756	114,669,611

Call Loans Abroad Reduced

Another substantial reduction in call loans abroad indicates that the banks are further restricting credits for stock market purposes in New York, and using the money to advantage in Canada. It has been suggested that in times of tight money, such as at the present, that the greater part of these loans be called and the money used for better purposes in this country. This, however, would not be possible, or at least practicable, as the loans represent part of the cash reserve of the banks, and if the money was brought back, the greater part of the funds would have to be kept in the vaults here, so that the public would not benefit, and in addition the banks would lose.

Call loans abroad since January, 1917, are shown in the following table:—

	1917. $	1918. $	1919. $	1920. $
January	155,717,470	132,687,066	140,819,656	170,206,805
February	162,341,556	160,239,494	155,983,681	184,469,882

(Continued on page 6).

Of the deposit in Central Gold Reserves $11 502,[illegible] is in gold coin, the balance is in Dominion Notes

C. SAUNDERS, *Deputy Minister of Finance*

than it would ordinarily have done, steadily rising prices having necessitated the use of an increasing amount of credit to handle the stocks of goods.

Provided the banks can supply this increasing demand for credit, without impairing their reserve, there is nothing prohibiting them from doing so. Last September demand liabilities, including demand and savings deposits, amounted to $2,539,747,648, and against this was held [illegible].98 per cent., in immediately available assets, while the September demand liabilities amount to $2,789,677,552, against which is held 29.51 per cent. in immediately available assets. It will be seen, therefore, that the banks have more than maintained their liquid position in the face of heavily increased demands for credit.

A further comparison shows that holdings of Dominion government, provincial, municipal and other securities by the banks have decreased more than $267,288,296 during the year. This would seem to indicate that these securities have been exchanged for short-term paper. Assuming that the integrity of the Canadian bankers is without question, and that their bill files are in good order, the position of the Canadian banks is much better than it was a year ago, and, in addition, the needs of commerce and industry have been supplied.

Gold and Dominion Notes

Other changes in the statement call for little comment. Loans to municipalities were reduced by about 13 per cent., while advances to provinces were increased by about $800,000. Dominion government demand deposits also increased by about $3,000,000.

(Continued on page 8)

SAVINGS DEPOSITS ESTABLISH NEW HIGH RECORD

(Continued from page [illegible])

Gold and Dominion notes, which had previously shown steady reductions, advanced nearly $6,500,000. The changes for the month are as follows:—

Gold and sub-coin in Canada	+	$ 264,98[illegible]
Gold and sub-coin elsewhere	+	817,862

BRITISH COLUMBIA'S PROVINCIAL "VICTORY" LOAN

War-Time Method to be Utilized to Raise $5,000,000 for Provincial Purposes—State of Trade at the Coast

(Staff Correspondence.)

Vancouver, B.C., November 3, 1920.

VANCOUVER has made considerable headway during nineteen twenty. Its population has increased from [illegible] 000 in September, nineteen nineteen, to 203,000 in September, nineteen twenty. Bank clearings for the same months are increased by nearly eighteen million dollars. Building figures are up nearly one hundred per cent over last year, and generally there is a much better feeling in the metropolis of the Pacific Coast. Just at present things are quiet in Vancouver, but this is more or less general all over Canada, and compared with Seattle, Vancouver is fairly good.

The mining industry in British Columbia is [illegible] for the development of, in fact, are all the [illegible] natural resources of the province. Just at present the [illegible] of [illegible] which [illegible] and the [illegible] of labor, partly caused by the [illegible] of the [illegible], is having a [illegible] effect for the [illegible] of mining enterprises. However, the [illegible], [illegible] and Alice Arm [illegible] are operating right along.

The Okanagan fruit crop is neither so large nor so favorable as last year, but at the same time it is by no means a failure. In the Lower Valley a large amount of [illegible] have been destroyed as a result of heavy [illegible].

The outlook for the lumber industry is promising, though the increase of freight rates has [illegible] the trade, and production is not as large as could be [illegible]. Orders are piling up plentifully. [illegible] production in the United States and Canada [illegible] the [illegible], will exercise an [illegible] influence in lumber [illegible], as the demand from this source is always large. The [illegible] cannot be held back for any prolonged period, and [illegible] may soon be looked for as a result of the [illegible] need for lumber, the shortage of dwellings and building materials.

Tourist business in the coast cities is year by year assuming larger proportions in Vancouver, and is one of the city's largest industries. Last winter, from reliable information, a daily average of three thousand prairie farmers were in Vancouver, and from statistics gathered would spend more money than the combined payroll of the largest shipbuilding plant where hundreds of men are employed.

It is reported from Victoria that British Columbia is to float a five-million dollar domestic loan, the first domestic loan ever raised in the province. The proceeds of the loan will be used for good roads and buildings and extensions of the University of British Columbia at Point Grey. The selling campaign will start about the end of the year. It will be carried on by British Columbia bond houses and men, and will be similar in many ways to the Victory loan campaigns, in denominations of $100 and up.

TARIFF COMMISSION GONE TO EAST

Charlottetown Yesterday and Sydney To-morrow—Increase in Inland Revenue for October—Higher Mail Charges Arranged

(Special to *The Monetary Times*.)

Ottawa, November 4, 1920.

NOW that the west has been fully heard from, and Ontario has had some opportunity to express its views, the tariff commission has gone to the maritime provinces to hear evidence there. To-day it sits in Charlottetown, where the eastern sessions commence. On Saturday, November 6, there will be a meeting at Sydney, N.S.; Monday will be devoted to Halifax, Tuesday to St. John, and Wednesday to Moncton. There will be four meetings in Quebec, the first at Quebec city on Thursday, November 11, the second at Sherbrooke on Friday, the third at Three Rivers on Saturday, and the Montreal meetings beginning on Monday, November 15. After that there will be a few days in Ottawa, when the itinerary for Ontario will be arranged. It is expected that the Ontario trip will consume two weeks, Toronto alone accounting for three or four days, the time allotted being based largely on the experience in Montreal.

Inland Revenue Increased

An increase of $8,066,775 in the inland revenue returns for the month of October, as compared with the returns for October, 1919, is shown in the monthly statement of the Department of Inland Revenue. The total for the month just closed was $12,841,242 as against $4,774,466 for October, 1919. Chief items in the summary issued by the department were: Excise, October, 1919, $3,608,264, against $3,[illegible] for October, 1920; excise seizures, October, 1919, $19,[illegible], against [illegible] last month; war tax, October, 1919, $1,[illegible], against $[illegible],298 in the month just closed. The revenue from methylated spirits in October, 1919, was $41,[illegible], as against [illegible] last month. The increase in war tax [illegible] the month of last year was $8,[illegible], the [illegible] for the month of October $8,[illegible].

[illegible] for ocean and rail carriage [illegible] Postal Union Convention, which [illegible] will increase "mail transit [illegible]," [illegible] Blondin, Postmaster-General, [illegible] each country carries [illegible] to another via its mail [illegible] account is kept of what is [illegible] made at rates decided on by [illegible] will be as high as 50 cents [illegible] cards, and less for other [illegible] at the convention that the [illegible] value in making reimbursements [illegible] between nations was the gold [illegible]

WHERE HAS THE MONEY GONE?

"WHERE will the money go?" asks a prominent Canadian bond house, referring to the estimated return of $1,250,000,000 from the grain crops of this country during the present year. Some of these and other funds will no doubt be invested in bonds, but the record of bank deposits during the past year suggests that there is a wide loop-hole through which an immense sum has disappeared. Where did this money go? is an equally pertinent question at the present time, and one which is causing the financial community some concern.

Savings deposits in the chartered banks at the end of September were $1,270,194,097, compared with $1,227,437,715 at the end of September, 1919. Deposits on demand were $27,000,000 greater. While these figures seem healthy enough they indicate an unsound position when viewed along with the course of loans. Current loans in Canada increased from $1,058,572,502 to $1,417,520,756 during the same period, while call loans in Canada increased from $96,912,909 to $114,669,611. Current loans outside of Canada grew from $151,814,511 to $202,590,184, and call loans from $169,532,489 to $186,962,960. This is a total increase of $445,000,000 in loans, while the total increase in deposits in Canada was only $70,000,000. That this growth is different from usual is evident from the following comparison over the past five years, the figures being as at September 30 in every case:—

	Deposits in Canada	Current loans in Canada
1915	$1,052,655,131	$ 771,086,757
1916	1,270,522,220	752,545,756
1917	1,417,143,073	855,306,953
1918	1,626,439,039	942,802,018
1919	1,878,180,730	1,058,572,202
1920	1,947,481,002	1,417,520,756

This comparison shows the following annual excesses of Canadian deposits over current loans in Canada: 1915, $281,568,354; 1916, $517,976,464; 1917, $561,836,080; 1918, $683,637,021; 1919, $819,608,528; 1920, $529,960,246.

The heavy commitments required to move the 1920 crop are in part responsible for the high level of current loans at the end of September, and are reflected in the increase in demand deposits. The disappearance of several hundreds of millions of dollars during the past year must, however, be due to some other influences as well. Merchants are unquestionably carrying very heavy stocks, in spite of their strenuous efforts, both in the wholesale and retail branches, to reduce them during the past few months. Such a situation is commonly found at the close of a period of activity and rising prices, and the number of firms which pay the supreme penalt yfor their over-optimism is already showing an increase, as the comparison of failures regularly shown in *The Monetary Times* indicates not only the merchants, but also the manufacturers have accumulated large stocks of goods which cannot now be unloaded. Another loophole has been the speculative fever which has resulted in the sinking of millions of dollars in existing and new enterprises, such stocks being purchased near the end of a period of rising prices. An immense sum has also gone out of this country to repurchase sterling issues of Canadian bonds, these investments, though made in the face of the finance minister's request to the contrary, at least have the merit of being sound and of reducing the amount of interest which must in future be sent abroad annually.

MARKETS FOR CANADIAN SECURITIES

THE ability of the United States to maintain her leading position as a creditor nation will have to be determined in the next few years. That position was attained not by the achievements of that country, but rather by the default of others. Britain, France and Germany could not lend abroad when they had difficulty in meeting their own wartime requirements. They are recovering, however, and will probably recover still more in the next couple of years, and the time may be near at hand when European capital will seek investment in this and other fields abroad. The factor of exchange, so long as sterling, francs and marks remain at a discount, will retard this movement, just as it has attracted American capital by reason of the depreciation of [illegible] Canadian dollar in New York. The return of the [illegible] [illegible] however, and may soon be [illegible] [illegible]duced.

The relative position attained by the United States, Great Britain and other leading nations concerns Canada as a debtor country. We have borrowed from them [illegible] and will continue to borrow wherever the money is available. A prominent American financier, John J. Arnold, vice-president of the Bankers' Union for Foreign Commerce and general manager of the H. V. Greene Co., of Boston, Mass., in an address at Montreal on October 27, expressed the view that the United States could not long retain its present outstanding position. He referred to the fact that previous to the war Britain, France and Germany had been creditor nations, while the United States had been a debtor nation. The situation had changed as regards the war, but because of the manner in which the United States has become the creditor nation and the other countries the debtor nations, he believed that the United States was occupying a most unenviable position. Historians would not ask how this had come about, but what the United States was going to do in the matter. He pointed out that Britain, France and Germany had acquired their creditor-nation positions because of their contributions towards constructive effort to the outside world. Britain had aided in building up the United States, Germany in building up Latin South America and the Orient, and France in building up Russia, but the United States had turned from a debtor nation to a creditor nation merely because of the war and not by aiding others.

A TIME FOR SCRUTINIZING COSTS

UNTIL quite recently almost any kind of goods or services could be sold as fast as they were produced. Price was a secondary consideration and little attention was therefore paid to economy in production. During the past few months the situation has changed, one industry after another experiencing a slackening in trade. Business, it seems, is never normal. It is either good or bad, and following a prolonged period of unusual expansion, anything other than distinct quietness cannot be expected for some time to come.

The business which would retain a fair measure of activity must now scrutinize its costs with the utmost care. Too brisk conditions do not make for efficiency, and numerous weaknesses have crept into methods of production and marketing. While a reduction in profits and wages cannot altogether be prevented in the face of falling prices, yet so far as the situation can be met by improvements in business methods such improvements are eminently desirable. Indications of where such economies can be enforced may be found through the cost accounting systems established in so many firms during the past twenty years. Nevertheless the number of Canadian industrial concerns availing themselves of the advantages of an adequate cost accounting system is surprisingly small. All manufacturers have some method peculiar to their own business of getting at their costs, but the only system that can be thoroughly relied upon to do what it is intended to do in that regard is to have the cost finding plan linked up with the general accounting. Then only is it possible to know exactly the origin of profits and of losses. This may involve a system of perpetual inventory which, if properly kept, will prove of great value to any business.

Cost accounting serves to show where a profit is made by a firm and where a loss is sustained. It shows the cost of the production of an article and it is from the information thus obtained that the selling price of the article is arrived at. Material, labor and overhead expenses are the three big items in cost accounting and the most common fault with many firms is a lack of appreciation of [illegible]. The practice of salvaging waste material is being put into force more and more as manufacturers begin to realize its value. Losses [illegible] are usually due to waste. The time is at hand when those manufacturers who have been neglecting systematic methods of cost finding will be well advised to bestow some attention upon it. The expenses of installation should be regarded as a secondary matter when the benefits to be derived are considered.

CANADA SHOULD NOT STAND ALONE

SHOULD a government which doubted the necessity and which acknowledged its inability to control commodity prices put into force regulations aimed at controlling the price of securities? This is the question which the Dominion government has answered in the affirmative. But in the sphere of finance, as well as commerce, this function has been found to be beyond the bounds of practicability. The money market is wider than the market for any commodity, and the machinery for trading is more complicated. In enlisting the co-operation of the members of the Bond Dealers' Association and of the stock exchanges, the finance minister secured control of a large part of the trading fraternity, but the independent operations of a minority has rendered ineffective the whole program. At meetings held last week in Toronto and Montreal, addressed by Sir Henry Drayton, dealers unanimously pledged their support to his embargo, but were equally in accord in their denunciation of the outside brokers who are still importing securities, and who have regularly been able to undersell the members of the stock exchanges and of the Bond Dealers' Association.

The embargo is a weak effort to change a big situation. The finance minister is anxious that it should be continued until the wheat crop is well in motion, which would be, perhaps, the end of the year. The importation of securities has not been the cause of the pressure in current loans, however, nor will the embargo swell bank deposits to any great degree. What the embargo does do, so far as it is effective, is to maintain a price for securities in Canada which is not warranted by world-wide investment conditions. Investors should not be called upon to pay an artificially high price for securities, while the Canadian market is shut off from those holders of our bonds and stocks in Europe who bought with all faith in the fairness of the government of Canada. At the end of a period of great prosperity, with the best harvest in our history, is our distress so great that we need thus sacrifice our reptuation abroad?

29[illegible]261,000 bushels of wheat and 543,058,000 bushels of oats, compared with 193,260,400 and 394,387,000 bushels respectively last year, are another sign of lower prices.

* * *

The proposed elimination of sinecures rather than the German name of the firm is probably the reason for the unpopularity at Ottawa of the report of Griffenhagen and Co., Chicago, on the reorganization of the civil service.

* * *

If Canada is such a strong and resourceful country as she is reputed to be, and there is no doubt that her material and human resources place her in an exceptionally favorable position, why is it necessary for the finance minister to appeal to patriotism to relieve the financial situation? The sentimental appeal of war-time can scarcely have weight in times of peace. Investment is strictly a business transaction and should be treated as such by the government.

* * *

The subject of becoming public "futilities," which has been [illegible] [illegible]ned by public service corporations on this continent, recalls the story of the mule's christening. A [illegible] [illegible] by a colored boy asked: "What [illegible]"

"[illegible]"

"[illegible] such a peculiar name?"

"[illegible] and readin' de papers. [illegible] use dan anything else in de [illegible] his level best just de same."

PERSONAL NOTES

Ernest P. Fredericks, secretary of the Belleville, Ont., Chamber of Commerce, has resigned.

Sir Thomas Tait has been appointed to succeed the late E. G. Henderson as president of the Canadian Salt Company, Windsor, Ont. Sir Thomas, who was previously vice-president of the company, is known chiefly for his connection with railway enterprises throughout the British Empire. He received his education at the Montreal high school and later at McGill University. He entered the railway service in 1880, and filled various positions with the Canadian Pacific Railway and the Grand Trunk Railway. Later he became assistant general manager of all lines, following which he was manager of eastern lines and afterwards manager of transportation of all lines. From 1903-10 he was chairman of the Victorian Australia State Railways.

N. B. Allen, of the stock brokerage house of A. E. Osler and Company, Toronto, has been elected a member of of the Toronto Stock Exchange.

C. A. Mathews has been appointed assistant treasurer of the province of Ontario, succeeding C. H. Sproule, who is retiring under the new provincial superannuation scheme. As assistant treasurer Mr. Mathews will be the permanent head of the department, handling about $80,000,000 of [illegible] per annum and also borrowings [illegible] the [illegible] Mr. Mathews has been in the department for [illegible] the [illegible] the [illegible] to be [illegible] Treasury [illegible].

[illegible] who has been in the service of the [illegible] for the past [illegible] years, has been appointed to the position of [illegible] for Canada.

H. Gordon Hurd, formerly assistant actuary of the Great-West Life Assurance Company, has been appointed assistant actuary of the Fidelity Mutual Life of Philadelphia.

J. F. Mackay has resigned as secretary-treasurer of Willys-Overland, Limited, Toronto, to become vice-president and general manager of the John Morrow Screw and Nut Company, of Ingersoll, Ont.

Ralph Gilchrist, of Detroit and Alpena, has been elected to the directorate of the Dominion Sugar Company, Chatham, Ont., to succeed the late H. B. Smith of Bay City. Mr. Gilchrist is interested in many industrial concerns in Canada and the United States.

R. H. M. Temple, general solicitor of the Canadian National Railways at Winnipeg, Man., and general claims agent of western lines, has had his jurisdiction extended to include the Grand Trunk Pacific Railway.

C. G. Cowan, who for a few years past has been connected with the foreign department of the American Bank Note Company in New York, has returned to Ottawa where he will be permanently located as general manager of the company for Canada, working with J. A. Machado, who is vice president and executive officer of the business.

A. C. Turner, partner in the investment house of Turner, Spragge and Company, Toronto, which company recently purchased a seat on the Toronto Stock Exchange, has been elected to represent his house on the floor of the exchange. Mr. Turner left the Toronto University in 1908, took a position with A. E. Ames and Company, was later with A. Jarvis and Company, and following that was manager of the bond department of Bongard, Ryerson and Company. In 1917 he went overseas and was granted a commission in London, Eng., in the Royal Naval Volunteer Reserves. When he returned to Canada after the armistice he formed a partnership under the name of Turner, Spragge and Company.

Gordon Brown, [illegible] in the auditor's department of the province of Ontario for some years, has been appointed to [illegible] James Clancy, former provincial auditor, who has been superannuated.

A. H. [illegible] vice-president in charge of [illegible] maintenance and construction departments of the Canadian National Railways, under [illegible] vice-president of construction [illegible] has been appointed vice-president [illegible] maintenance. Mr. [illegible] and construction [illegible] the general operation [illegible].

THE EXCHANGE RATE

VI.—What Controls It?

WE have already dealt with the principal Trade factors governing the Exchange Rate, and we now come to the influence of the Inflation of the Currency.

Before the great war, it was universally accepted that a paper currency should have behind it a very substantial gold (or silver) reserve. The purpose of this reserve was to admit of the redemption of paper currency on demand.

One method of war financing adopted by the belligerents was to increase their note issues without a corresponding increase in the reserves of gold. Redemption in full of the paper currency, therefore, became impossible. To retain the gold reserves then existing, these Governments refused, until the return of settled conditions, to redeem in gold any notes which they issued.

Canada made less use of this method than most of the belligerent countries, but the percentage of notes issued against the amount of the gold reserve held has risen considerably.

In the United States, the proportion of notes issued to reserve held did not rise to the same extent, and the comparison is one of the factors in the world valuation of our respective currencies.

Next week in article No. VII. we will deal with a second war measure which has had an important effect on the Exchange Rate, namely, the Restriction on the Export of Gold.

CROP ACREAGE IS REDUCED IN 1920

Yield is Substantially Increased, However—Record Harvest of Oats—Quality of Cereals Much Better—Condition of Root and Fodder Crops Improved

A DEFINITIVE statement of the areas sown to the principal field crops in Canada for the year 1920, as compared with 1919, together with a second or provisional estimate of total yields, has been prepared by the Dominion Bureau of Statistics. The statement shows that the acreage was reduced, but notwithstanding the yield was greatly increased. The quality of cereals and roots was also substantially improved.

The areas are estimated on the basis of returns collected last June from individual farmers throughout Canada under arrangements made between the Dominion and provincial governments for the joint collection of the annual agricultural statistics of Canada. These have been in force since 1917 for four provinces and since 1918 for all the provinces. The provisional estimate of total yields is based upon the areas so established and upon returns of the average yields per acre as reported by crop correspondents at the end of September

Areas of Field Crops

The total areas estimated to be sown to the principal field crops for 1920 are in acres as follows, the comparative figures for 1919 being given within brackets: Wheat, 18,232,374 (19,125,968); oats, 15,849,928 (14,952,114); barley, 2,551,919 (2,645,509); rye, 649,654 (753,081); peas, 186,348 (230,351); beans, 72,163 (83,577); buckwheat, 378,476 (444,732); flax, 1,428,161 (1,093,115); mixed grains, 811,634 (901,612); corn for husking, 290,316 (261,607); potatoes, 784,544 (818,767); turnips, etc., 290,286 (317,296); hay and clover, 10,379,292 (10,595,383); alfalfa, 238,556 (226,869); fodder corn, 588,977 (511,769). For oats the area returned for 1920 is the highest on record.

Yield of Principal Cereals

According to the reports of crop correspondents at the end of September, the average yields in bushels per acre of the principal cereals, as compared with the averages for 1919 in brackets, are as follows: Wheat, 16 (10); oats, 34¼ (26¼); barley, 27¾ (21¼); rye, 18¾ (13¼); peas, 19¾ (11¾); beans, 20 (16½); buckwheat, 26¼ (23¼); flax, 7½ (5); mixed grains, 38¾ (31); corn for husking, 47¼ (64). The provisional estimate of the total yields of these crops, in bushels, is as follows: Wheat, 293,361,000 (193,260,400); oats, 543,078,000 (394,387,000); barley, 65,559,000 (56,389,400); rye, 12,190,000 (10,207,400); peas, 3,702,800 (3,406,300); beans, 1,435,800 (1,388,600); buckwheat, 9,966,500 (10,550,800); flax, 10,756,000 (5,472,800); mixed grains, 31,197,000 (27,851,700); corn for husking, 13,696,000 (16,940,500). The yield of oats for 1920 is the highest on record.

Prairie Yield

The following is the second or provisional estimate, in bushels, of the grain yields in the three prairie provinces, the corresponding totals for 1920 being given within brackets: Wheat, 263,915,000 (165,544,300); oats, 323,270,000 (23[illegible]000); barley, 42,789,000 (36,682,100); rye, 9,040,000 (7,262,100); and flaxseed, 10,307,000 (5,232,300). By provinces, the estimated yields are: Manitoba—Wheat, 37,879,000 (40,9[illegible]300); oats, 56,219,000 (57,698,000); barley, 18,040,000 (17,149,100); rye, 2,415,000 (1,089,100); flaxseed, 1,465,000 ([illegible]00). Saskatchewan—Wheat, 138,340,000 (89,994,000); oats, 148,098,000 (112,157,000); barley, 11,289,000 (8,971,000); rye, 1,802,000 (2,000,000); flaxseed, 7,986,000 (4,190,000). Alberta—Wheat, 87,696,000 (34,575,000); oats, 118,953,000 ([illegible]000); barley, 13,460,000 (10,562,000); rye, [illegible] ([illegible]000); flaxseed, 856,000 (222,000).

The quality of the cereal crops at harvest time, as compared with a standard of 100, which represents the average weight per measured bushel for the ten years 1910-19, is reported as follows, the corresponding percentages for 1919 being given within brackets: Fall wheat, 102 (96); spring wheat, 96 (91); all wheat, 98 (92); oats, 101 (90); barley, 99 (89); rye, 98 (92); peas, 100 (91); beans, 99 (95); buckwheat, 97 (96); mixed grains, 102 (94); flaxseed, 97 (93); corn for husking, 101 (94).

The condition of root and fodder crops at the end of September, expressed in percentage of the decennial average, was as follows: Potatoes, 101 (95); turnips, etc., 98 (91); sugar beets, 100 (85); fodder corn, 102 (95); alfalfa, 99 (91). The figures within brackets are those of September 30th, 1919.

MERITS OF PUBLIC UTILITIES

A small booklet issued by Nesbitt, Thomson and Co., Montreal, entitled, "The Indispensable Servants of Our Community Life," presents the case of public utilities securities for the consideration of Canadian investors. While admitting the serious position to which these companies had fallen a year ago by reason of limited earnings and mounting costs, the booklet claims several advantages for the companies to-day as follows:—

"1. Operating costs following the general price decline have begun to recede.

"2. Rates for service rendered have in most cases been increased by popular vote, or by the decision of public utility commissions.

"3. During the past few months the net earnings of most companies have shown an increase.

"4. A great many Canadian companies generate their power from water and are not seriously affected by coal costs."

TWO INDUSTRIES ARE DULL

In its November letter the Royal Bank of Canada summarizes business conditions as follows:—

"A period of readjustment such as that which most industries are now facing is always one of peculiar difficulty. A fortunate characteristic of the Canadian market is its tendency to move more deliberately than that of the United States, thereby giving Canadian industries more time and opportunity to prepare themselves for altered conditions. Basically, Canada's commercial position is a sound one and general business is far from being bad. Wholesale and retail trade conditions are less favorable than they were at this date last year, but the money actually realized or expected from large crops is having a beneficial effect. A marked disposition has been noted on the part of purchasers in both the wholesale and retail trades to hold back in expectation of lower prices. Future orders are affected more than purchases for immediate delivery. The latter are good, especially in the west. This is a logical development of the general uncertainty as to next year's price level. Taking Canada as a whole, the industries in which special dullness is reported are clothing and boots and shoes. Hardware is the only trade in which increased prices are reported.

"The labor situation throughout the Dominion appears, for the most part, to be very much improved. Reports show that labor is more efficient and that the men are more anxious to hold their positions than they have been at any time since [illegible]. Some unemployment is anticipated on the Pacific Coast when the laborers return from the prairie provinces after the harvesting.

"It is reported from all over Canada that the building operations that have been undertaken are absolutely inadequate. The housing situation is poor; there is the greatest [illegible] and rents are high. Shipping on the lake and [illegible] has been quiet during the summer, but considerable improvement has taken place recently on account of the movement of grain and consequent demand for cargo space. Several [illegible] Canadian shipbuilding plants, called into existence by the needs of the war, are now idle."

Paris, France	Banque Nationale
Kingston, Jamaica	Canadian Bank of Commerce
Toronto (Cherry & Villiers Streets)	Bank of Montreal
Dauphin, Man.	Dominion Bank of Canada
Aux Cayes, Haiti	Royal Bank of Canada

Permission has been given the Imperial Bank to build a $10,000 branch bank on the south-west corner of Queen St. and Carlaw Ave., Toronto.

L. C. Armstrong has been appointed manager of the Portage Ave. and Carlton St. branch, Winnipeg, of the Bank of Hamilton.

A. A. Robit, former manager of the Home Bank at Sarnia, has sent in his resignation to assume duties with a financial corporation in Chicago.

EXCHANGE QUOTATIONS

Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates as follows:—

	Buyers.	Sellers.	Counter.
N.Y. funds	10 5-16 pm	10⅜ pm	....
Mont. funds	Par	Par.	⅛ to ¼
Sterling—			
Demand	$3.7825	$3.7925	
Cable transfers	3.7925	3.8025	....

Rate in New York for sterling demand, $3.43 to $3.43¾.

Bank of England rate, 7 per cent.

New York quotations of exchange on European countries, as supplied by the National City Co., Ltd., Toronto, as at November 1, 1920, follow: London, cable, 343¼; cheque, 342¾; Paris, cable, 6.16; cheque, 6.15; Italy, cable, 3.61, cheque 3.60; Belgium, cheque, 6.56; Swiss, cheque, 15.60; Spain, cheque, 13.70; Holland cheque, 33.30.

MOLSONS BANK'S PROFITS SLIGHTLY LOWER

Although earnings for the year ended September 30th 1920 were larger than for the previous year, the profits of the Molsons Bank, in the annual statement just made public, are shown to be slightly less. The showing as to profits [illegible] before the usual deductions for government taxes, pension fund and other allowances, is equivalent to [illegible] per cent. on the outstanding capital stock of the company, against approximately the same figure last year, [illegible] per cent. in 1918 and [illegible] per cent. in 1917. After all deductions were made there remained a balance at the credit of profit and loss account of [illegible] against [illegible] in 1919, the [illegible] being [illegible] by the fact that [illegible] was made to the reserve account of the bank this year compared with [illegible] a year ago and $100,000 in the 1918 period. [illegible]

The balance sheet portion of the statement, [illegible] [illegible]

MONTHLY BANK CLEARINGS

The following are the Bank Clearings for the month of October, compared with the same month last year:—

Are You a Trustee?

If so, you may be interested to learn that this Corporation also acts as agent for personal Trustees, taking charge of the administration of estates for them and performs such duties as keeping estate funds fully employed in high-class investments, collection of revenue, cutting coupons, management of real estate, rendering statements and remitting balances to beneficiaries at regular intervals, keeping securities in Safety Deposit Vaults, etc. Many Trustees find this the most satisfactory way for them to administer an estate—by turning it over to us as their agent and at the same time retaining the responsibility imposed on them under the Will.

FIRE INSURANCE AND THE FISHING INDUSTRY

Explanation of Policies and Their Clauses as Affecting This Class of Property—The Special Hazards and the Best Kind of Protection

By A. Z. De Long,
Terminal Agencies, Ltd., Vancouver

IN writing this paper on fire insurance as pertaining to the fishing industry, it is not my intention to give you a technical treatise on this subject, nor to delve too deeply into the policy contract, nor the history of the business, because in order to do so I would have to have much more time than is at my disposal, but rather to touch on a few general subjects that I believe are often overlooked by the public in general, and by those interested in the fishing industry in particular.

The first item I am going to call your attention to is the contract contained in the policy itself. A great many business men—and especially the smaller insurers—do not realize that a fire insurance policy is a legal contract entered into by an insurance company and the owner whose property is insured. In this contract the company agrees to reimburse the assured for certain losses on the payment of a certain premium, provided the assured lives up to certain warranties and conditions as laid down in the policy. How many men receive their policy from their fire insurance broker or agent, look at the outside of it, see the amount for which the policy is written and the premium attached thereto, throw the policy into the safe with other policies, send the agent a cheque for the premium (if he does not forget it), and never looks on the inside of the policy to see how or in what manner he is covered, and therefore does not realize that in case of loss this scrap of paper may stand between him and the poorhouse.

All policies contain certain statutory conditions which are fixed by law, but in addition to this, other conditions are added to make the policy applicable to the particular risk to be covered. These are attached to the regular policy and are called "forms" or "wordings," and may give to the assured certain broader policy conditions and privileges under his contract which he might not otherwise have. It is most important that these forms covering on the same risk should read alike and be absolutely concurrent, as otherwise, in case of loss, a serious difficulty might arise in making the apportionment of the loss as between the various companies interested. So—scrutinize the form and watch your policy conditions, see that they are concurrent and that your interests are fully protected, be careful to always live up to your part of the contract, so that in case of loss there will be no question as to whether or not you are perfectly covered. In connection with the forms which I have just mentioned, your attention is called to the fact that these are drawn by various agents and brokers in a great many different ways, but by these forms is indicated the way in which your insurance actually covers, and are of great importance.

Blanket and Specific Covering

There are various ways of covering property, but two to which I wish to call your particular attention—what is known as "Blanket Covering" and that which covers specifically on the different items. For instance, you may have two or three buildings which adjoin. These buildings can be written, under tariff regulations, as one risk, but a great many times you will find that the agent has written these buildings as separate risks, naming a specific amount on each one. It is to your advantage, however, to have the insurance cover as one risk—in other words, blanket the insurance to cover on all risks—because if you do this, in case of loss, the total amount of insurance can all be applied to one building, while if the insurance covers specifically you can only collect for the one building up to the amount of the actual insurance placed on that building. The same remarks apply to stock. Always have your policy cover as much of your risk under one item as is permissible and eliminate specific insurance as much as possible. This is to your advantage.

We now come to the question of carrying blanket insurance on buildings that are not attached. In this case it is necessary for the assured either to write his insurance with co-insurance or with the distribution clause. A great many assureds carry co-insurance on their property, without knowing what co-insurance means. Briefly, the co-insurance clause is as follows: In consideration of the reduced rate, or the special form under which the policy is written, it is stipulated and made a condition of the contract that the insurance company shall be liable for no greater proportion of any loss than the amount insured under the policy bears to a determined percentage of the actual cash value of the property described in the policy. In other words, in as much as the company is writing your policy at a lower rate, or granting you certain concessions in the way of form, you agree with the company to carry insurance up to such percentage of the value of the property as is mentioned in the policy—which is generally either 80 per cent. or 90 per cent. Failing to do this, you agree to become a co-insurer for the difference between what you do carry and what you should have carried.

Co-insurance Clause

For example, you have property worth $10,000 and agree to insure for 80 per cent. of that value—you therefore should carry $8,000. You do carry $8,000 of insurance and you have a loss of $4,000. The company in that case would pay the total amount of the loss because you have lived up to your agreement with the company and have carried 80 per cent. of that value. On the other hand, you have $10,000 worth of value; you should carry $8,000 of insurance; you do actually carry only $6,000. We will assume that you have a loss of $4,000. In that case the companies will pay 6/8 of that $4,000, and you have to stand 2/8 of that loss yourself. The reason why the insurance companies have such a clause is because they can afford to insure certain classes of property at a lower rate and with better policy conditions, if the assured will agree to carry enough insurance to make it improbable that the companies will be called upon to pay the face value of the policies, or total loss to them, when only a portion of the property is destroyed.

Assuming that the rates are the same with and without co-insurance, and that two men each own buildings side by side, we will assume that the buildings are worth $50,000 a piece and the insurance company issues a policy for $10,000 on each building. Supposing that the first man carries a total of $40,000 insurance on his building and the second man carries but $10,000. A fire occurs and damages each of these buildings to the extent of $10,000. Both men are paid in full, but in the one case the company who carried $10,000 on the building which is insured for $40,000 only contributes $2,500 towards the payment of this loss, while in the other case where they have the full $10,000 and that is all that is carried, they have to pay the face value of the policy. Had this company issued a policy for $40,000 on the first building, they would then have paid the whole $10,000 loss, but they would only have paid a quarter of the face value of their policy, while they would have received a premium on $40,000. So the companies feel that the man who carries the full insurance is entitled to a lower rate than the man who carries a smaller amount of insurance, in as much as the chances are remote that the insurance will all be paid out. The usage of co-insurance is becoming generally accepted on certain classes of risk, and while co-insurance is not compulsory on dwellings, farm property and some classes of mercantile risks it is becoming quite general. It is a clause that is often misunderstood by the insurers and it is one that should be looked carefully into before allowing it to become a part of your policy.

JOHN R. LITTLE, Managing Director

Another clause which is of special interest to owners of cold storage plants is that clause known as the "Consequential Damage Clause" or "Cold Storage Clause." By consequential damage is meant damage which is caused by the interruption of the cold storage machinery by fire, which allows the temperature in the cold storage plant to rise and damage the goods stored therein. This might happen even though no fire, smoke or water came in contact with the goods, or anywhere near the cold storage plant in question. It should be specifically stated on all policies covering goods in storage, whether or not it is the intent of that policy to cover consequential damage, and while under the ordinary policy the companies would undoubtedly deny liability for consequential damage—even though there was no clause on the policy—still, this would probably result in hard feeling between the assured and the company in case of a loss, with the claim denied. It is therefore important where consequential damage insurance is desired, that two sets of policies should be written, so as to prevent complications arising out of non-concurrence or the question of contribution. The companies assuming the fire risk should accept any loss due to consequential damage, and those companies who are writing the consequential damage should have a special form of policy covering this particular portion of the risk.

Special Hazards

In speaking of hazards generally found in connection with canneries, that of gasoline particularly comes to our notice. In many canneries gasoline is stored in close proximity to the main plant. This constitutes a severe hazard, with the added possibility of making insurance policies void.

Mostly the gasoline fishing boats and tenders procure their fuel supply from the cannery out of which they operate, which necessitates large quantities being on storage. As those who are in the habit of daily handling this liquid rarely consider its hazard, where feasible, a separate wharf for the storing and handling of all oils should be erected, or other proper precautions taken for the handling of the same. A point to bear in mind is that metal drums are not sufficient protection and that empty containers should be more carefully handled than full ones, because the danger from these is greater.

Care should be taken, also, in the handling of lacquer. Not more than one day's supply should be kept in the cannery building, and in no case should it be used or handled when any fire or open light is burning in the vicinity.

Precautions to be Taken

The following precautions and suggestions are brought particularly to your attention:—

All electrical equipment should be properly installed and inspected periodically; metal drip pans should be provided for all bearings; steam pipes should be at least two inches from woodwork and around main steam lines covered with asbestos slag and wrapped; lamp or lantern room for filling and storing lamps or lanterns should be in a separate building; no smoking should be allowed in buildings, and signs to this effect should be freely posted. If sanitary cans are not used, soldering equipment should be so arranged that any hazard from the same would be eliminated. Woodwork in and around all soldering machines and furnaces should be protected by metal at least two feet on all sides of the doors, and brought up at the back to meet the [illegible]. All pots should have water pans under and same kept filled with water when not in use. Benches should be covered with tin or other metal and should be bent up at least [illegible] inches at the back of the bench. Metal stacks from soldering machines or pots should extend to not less than [illegible] feet above the apex of the roof and properly protected where passing through or near woodwork.

The blacksmith's forge should be set out from the wall or other woodwork and floor protected with metal and [illegible] hood provided. Gasoline or naphtha engines should not have their tanks attached to the body of the engine or located in the wharf or cannery. Supply tank should be buried not less than four feet underground and fill [illegible] of any building. The engine should not be used below the grade or first floor of the building, and the gasoline should be forced directly from the tank to the engine by pump. The engine room should be well ventilated at both the floor and ceiling. The plant at all times should be kept clean and a daily inspection of same during the packing season should be instituted for that purpose. All fire fighting apparatus should be given the best of care and always ready for instant use should fire occur.

Canneries having smoke-house in connection therewith should have proper arrangements for taking care of this hazard. If possible, the smoke-house should be of fire resisting construction, and communications, if any, to main building should be protected with standard fire doors. The sill in openings on firing floor should be at least twelve inches in height and a drain should be provided to carry oil drippings away from the plant. Steam jet should be provided for fire protection.

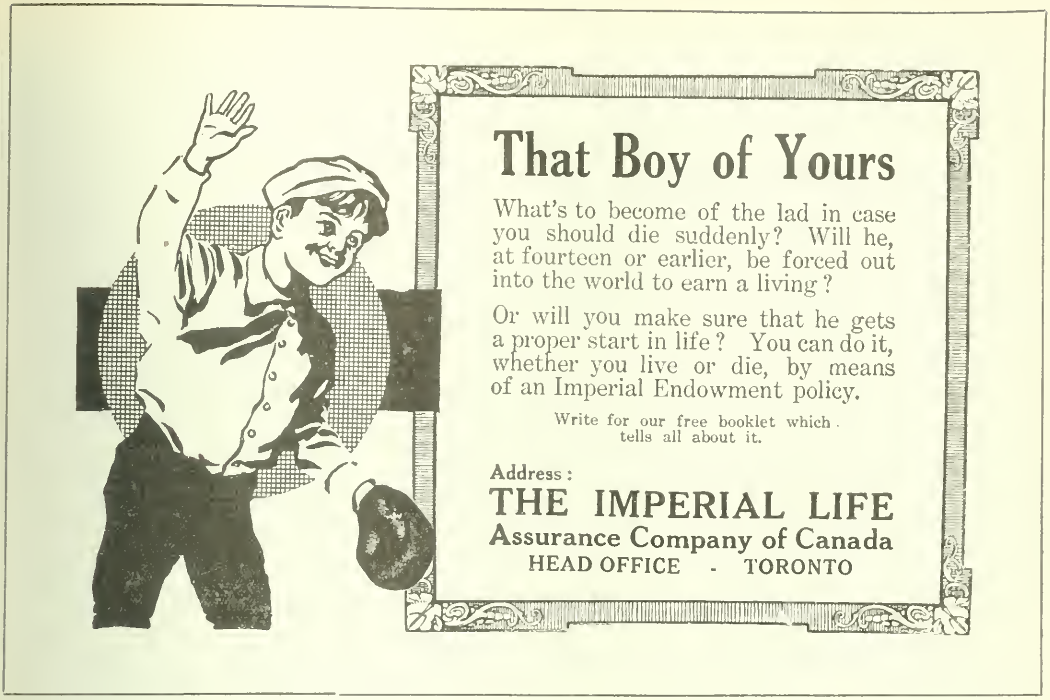
Arrangement of boilers is an importance item. They should be properly set and encased in brick. It is preferable to locate boiler house more than twenty-five feet from the main buildings. Metal stack should be at least twelve inches clear from all woodwork and wood floor not nearer than six feet from boiler front. Web or net tarring vats, especially if fire heat is used, introduce a distinct hazard. This should never be attempted in or near the main buildings, nor should freshly tarred or oiled nets be stored in cannery or within one hundred feet thereof. The oiling of nets is a serious hazard and great care should be taken in this regard.

Fire Protection

The question of fire protection is one that enters largely into the matter of your rate. In cannery plants the water supplies would depend largely upon the size of the plant and the surrounding conditions. There should be a good gravity or pump supply. If gravity supply, to be of sufficient capacity to insure the maintenance of the required number of fire streams, with fifty pounds flowing pressure at the nozzle, for a period of at least two hours. If pump supply, the pump should be of not less than 500 gallons per minute, one of the Underwriters Standard, and should be equipped with automatic regulator, lift to be not more than twelve feet, steam pressure to be not less than fifty pounds, to be maintained for the pump at all times during the operating season. This pump should be located in a detached pump house. If the pump house is of combustible construction, it should be located at least forty feet from the main buildings. The distribution main should be not less than six inches in diameter. Hydrants should be two way, 2½ inch, located not less than forty feet or more than one hundred feet from any building, and sufficient in number so that it would not be necessary to string more than one hundred feet of hose to reach any part of a building. Fifty feet or more of two inch hose, with one inch nozzle, should be attached to each hydrant. These hydrants and hose should be protected with good substantial hose houses, and should contain wrenches, spanners and whatever tools are necessary for prompt action in case of need. Regular inspection and test of these hydrants and hose should be made at least once every two weeks. These hydrants should also be protected in cold weather against freezing.

Inside Protection

When it comes to the inside system, supply mains should not be less than four inches in diameter. Standpipes should not be less than 2½ inches. All valves should be two [illegible] fifty feet of number one two inch linen hose, with [illegible] nozzle attached to each valve. The Underwriters' Standard for a cannery is one inside standpipe for every [illegible] feet of floor area. All of this [illegible], in order to pass the Underwriters' Standard. [illegible] the standpipe is not installed, one 2½ gallon [illegible] extinguisher for each 2,500 square feet or fraction thereof of floor area, and one cask or barrel with [illegible] pails attached thereto, for every



That Boy of Yours

What's to become of the lad in case you should die suddenly? Will he, at fourteen or earlier, be forced out into the world to earn a living?

Or will you make sure that he gets a proper start in life? You can do it, whether you live or die, by means of an Imperial Endowment policy.

Premises in Merchants Bank Building in each city

27

2,500 square feet or fraction thereof, on each floor. The underwriters ask that these casks be painted red so as to be made very conspicuous. The capacity should be at least 40 gallons, and in a cold climate forty pounds of common salt should be dissolved in each cask. Two fire pails should be hung with each cask. It is better to have round bottomed pails so they will not be used for ordinary purposes and thus be out of place in an emergency. These pails also should be painted red and marked with the word "fire," so as to insure their use for fire purposes only. They should be placed so that they will be constantly in sight and should never be covered with stock or rubbish. They are best located near exits and stairways. In the case of the extinguishers, regular inspections should be made and the extinguishers should be recharged at least every six months. Suitable tags should be attached to these extinguishers bearing the date of the last inspection, and when they were recharged. All fire protection equipment should be put in charge of the foreman or engineer, who should be held responsible for their condition.

As stated at the beginning of this paper, the question of fire insurance in connection with your particular industry is a big one, and I have only touched on some of the more important items in a very brief way. There are many other things which could be discussed at length and which would be of interest to you. It is my belief that it is good policy for any insurer to appoint a firm of competent brokers or agents to look after their insurance for them. By so doing, this agent will receive enough remuneration so that he can afford to devote the proper time and attention to your insurance matters, which they deserve. He can act as your insurance adviser and keep your policies in order for you, while if you scatter your insurance around to a dozen different agents or brokers, no one of them is going to take the interest in your risk which they should take, with the result that your interests are not looked after to your best advantage.

TOO MUCH POWER FOR WINNIPEG COUNCIL

City Council Can Borrow Unlimited Amount Without Reference to Ratepayers, According to Legislation Passed at Last Session

Money may be borrowed to an unlimited amount for Hydro Electric purposes by the city council of Winnipeg, points out a prominent Winnipeg barrister, who has followed this subject closely, in a communication to *The Monetary Times*. This is the effect of legislation passed at the 1920 session of the Manitoba legislature. He says:—

"Under the provisions of the Winnipeg charter from the time of its first enactment by-laws for the creation of debts must be submitted to the votes of the ratepayers. Exceptions are made in the case of debts payable within the municipal year and for ordinary expenditure, otherwise the assent of three-fifths of the voters is required. By-laws for expenditures in connection with the hydro-electric system were also required to be submitted to the ratepayers before any contemplated extensions were proceeded with. But at the last session of the legislature this last named provision was in effect repealed and the following substituted:—

Recent Amendment

"'For the purpose of providing for any additions, extensions, enlargements and repairs of or to the hydro-electric system, buildings, plant, machinery, transmission lines, conduits, overhead lines, services and appliances relating thereto, [illegible] of buildings [illegible] construction and equipment, the city may, by by-law or by-laws passed from time to time, incur and create an additional debt or debts in the name and on behalf of the city for the aforesaid purposes. The principal sum of such debentures shall be made payable not more than [illegible] years from the date of the debentures [illegible] and shall bear interest at such [illegible] the money market [illegible] principal and interest shall be payable in such instalments and at such times and places as the council shall fix by its by-laws. It shall not be necessary to submit any such by-laws to a vote of the electors or for the approval of the public utility commissioner, and upon the council finally passing same and issuing such debentures, they shall be a valid and binding charge upon the city, and, as against ordinary city indebtedness, shall be a preferential charge, mortgage, hypothec or pledge on and against the lands, plant and property and appertaining to the city hydro-electric system.

"'The funds belonging to the depreciation reserve of the hydro-electric system of the city may be used in purchasing any debentures issued as herein provided covering additions, extensions, enlargements or repairs to the hydro-electric system as aforesaid, which debentures may be purchased as an investment for such depreciation reserve at such prices as may be decided upon by resolution of council.'

"So far as the public is concerned no adequate notice was given of the application for this amendment and with a lot of other miscellaneous amendments it was passed by the legislature without discussion.

No Control by Ratepayers

"The amendment is of the most serious character. Under it by-laws creating an indebtedness of unlimited millions can be legally passed by the city council without reference to the ratepayers. Any rate of interest that may 'suit the money market' can be fixed. The authority of the public utilities commissioner is dispensed with. The amount to the credit of the 'depreciation reserve' can be used to pay the debentures issued and such debentures when purchased become an 'investment' for such 'depreciation reserve' at such prices as may be decided upon by resolution of the council. If this 'depreciation reserve' exists in the form of a special fund, this legislature authorizes the perversion of a trust from the purposes for which it was created. If, however, it exists merely as a matter of city bookkeeping, the amendment apparently authorizes the city council to purchase the debentures out of the amount owed by the city to the 'depreciation reserve.'

"The legislation is, to say the least, extraordinary. Already the city council has authorized an additional expenditure of $1,700,000 on its hydro-electric system. The ordinary statutory provisions safeguarding the ratepayers by requiring their assent are ignored. It creates a situation that may prove dangerous, especially when it is remembered that perhaps one half of the present members of the council represent socialistic views and interests. The amendment itself should surely have been submitted to the ratepayers before being presented to the legislature. It seems singular that the advocates of public ownership of public utilities should be unwilling to allow the public even to express an opinion on the assumption of further heavy financial obligations in connection with them, when it is the public that is responsible for those liabilities, and in the end must pay them. It would be a matter of interest to learn the inner history of this amendment, the existence of which is generally unknown and the serious possibilities of which have not been presented to the ratepayers for their consideration."

GOVERNMENT SHIPS WILL CARRY PASSENGERS

The Canadian Government Merchant Marine, Limited, will enter the passenger business, it was announced at the company's offices at Montreal recently. The passenger [illegible] January next to the Bahamas, [illegible] from St. John, N.B. Each of the [illegible] will have accommodation for thirty [illegible] of the space being reserved for [illegible] this new venture are the [illegible] "Canadian Fisher," now nearing [illegible] to be ready to sail before [illegible]

CANADA'S TRADE SHOWS NO IMPROVEMENT

Latest Figures Reflect Same Movement Which Has Been in Progress During the Past Year

CANADA'S trade statement for the year ended September 30th, 1920, as prepared by the Dominion Bureau of Statistics, calls for very little comment, inasmuch as the figures reflect the continuance of the same movement which has been in progress during the past nine months. "Canada's adverse trade balance" has become a hackneyed phrase, and the latest figures seem to indicate that it may continue so for some time. It seems that our relations with the United States, the United Kingdom and other British colonies need the most attention. With the exception of France, our foreign trade continues along favorable lines.

BRITISH-AMERICAN FINANCE CORPORATION

The British American Finance Corporation has been incorporated with a capital of $1,500,000, head office in Toronto and a branch in New York, and Sir William Wiseman, a banker of London, England, as president. The new company will deal in Canadian, American and Mexican securities. Sir William Wiseman, the promoter of the company, was a British officer in the war, was a member of the British [illegible] at Washington after the war, and was an adviser for the British government on American affairs at the Peace Conference in Paris. Associated with Sir William in the Canadian undertakings are F. B. Robins, Toronto, real estate broker, and George A. Touche and Co., chartered accountants.

MONTREAL AND QUEBEC SAVINGS INSTITUTIONS

Changes in the position of the Montreal City and District Savings Bank and the Caisse d'Economie Notre Dame de Quebec were not very significant in September. The former institution increased its savings deposits slightly, while deposits in the latter were somewhat reduced. It is noteworthy of mention that both banks have substantially increased their loans on securities, while cash holdings are considerably lower. Holdings of municipal securities have also been reduced. The following figures show the principal changes in the September statement:—

Montreal City and District Savings Bank

	Sept., 1920.	Sept., 1919.	Aug., 1920.
Dom. gov. demand dep.	$ 260,043	$ 93,599	$ 285,043
Notice deposits	43,889,372	40,029,501	43,554,974

STANDARD RELIANCE ASSETS SHARES DISTRIBUTED

Share certificates in the Standard Reliance Assets, Ltd., were delivered this week to the shareholders of the Standard Reliance Mortgage Corporation. A year ago last August the Standard Reliance Assets was formed to take over the assets of the Standard Reliance. The meeting of creditors, at which the decision to form this company was reached, authorized the official referee and the liquidator to appoint directors. This they did after consultation with representatives of the principal bodies of creditors, and in most cases pursuant to resolutions passed by those bodies. The directors were as follows: G. T. Clarkson, president; J. A. Walker, K.C., Chatham, vice-president; A. S. Maynard, Chatham; T. W. Ralph, North Augusta; T. Hall, Ayr, and S. C. Meyers, Elmira.

In an interview a few days ago, G. T. Clarkson, the liquidator of the corporation, said that the new shares had not been distributed earlier because of the fact that there was delay in receiving the 7,500 claims and securities, adjusting the claims, passing them before the court, completing the records and writing and issuing the certificates. Some [illegible] of these are being sent to creditors. Several parcels of [illegible] real estate in Toronto have been sold, but not the most important. The Arcade property still hangs fire. All offers received have been dealt with.

The investigation as to the past history of the Standard Reliance has been largely but not fully completed. What the cost will be cannot be estimated until it has been completed, and it will then be passed by the court. It will be [illegible], the liquidator assured the creditors, as and when [illegible] the [illegible] of the company to do so. The advantages of the investigation, in the way of securing further [illegible], have been, the liquidator says, considerable. "Yes," he said, "the advantages received up to this point have been very [illegible], [illegible] the necessity of making such an investigation, and it will pay for itself many times [illegible]

Investments in Public Ownership in Canada[*]

Citizens of This Country Have One Billion Invested—Dominion Enterprises Total $670,000,000, Railways Being Chief Item—Provinces in Telephone, Railway and Hydro-Electric Schemes Totalling $124,000,000—Cities and Towns Have Important Services

CANADIAN citizens have an investment of approximately $1,000,000,000 in publicly owned and operated enterprises—railways, telegraph lines, telephones, grain elevators, water works, light and power plants, etc. This investment has been made through the various governments—Dominion, provincial and municipal. While the latest and most accurate figures procurable have been used in this compilation, in many cases they apply to periods from six months to one year previous to date. In that time investments in public service enterprises have increased considerably. This figure, therefore, may be taken as a conservative estimate.

Canadian citizens have adopted a large and courageous programme of public ownership. No citizen can dodge his or her share of the responsibility for its success or failure. The best friend of the country and public ownership is he who acknowledges his responsibility, insists on competent administration of all publicly owned enterprises, bears clearly in mind the dangers which lie in their path and refuses to be silenced by charges of disloyalty raised by interested parties. Politics, as that much-absued word is commonly understood, is exceedingly inhospitable to independence of thought, speech or action. Politics, in this sense—national, provincial or city hall—must be kept entirely divorced from the operation of citizen-owned public service enterprises. The knowledge and practice of politics in its noble sense—i.e., the science and art of government, cannot be too widely disseminated and cannot be other than advantageous to all corporate undertakings.

Too Much Left to Taxpayer

Underlying the administration of any and all business enterprises are certain sound business principles. These principles hold, irrespective of the ownership. When citizens, in their governmental capacities, go into commercial business they operate under the same immutable laws of administrative efficiency. If they ignore them, the results are certain and inescapable, but, inasmuch as governments are not persons, but governing corporative collections of persons, they can pass the loss on to the citizens through their taxing power. But this only prolongs the day of reckoning. There are limits even to the taxing power. That limit is, on one side, the paying ability of the citizens and, on the other, the degree of ease with which citizens can transfer their interests to other communities where the burdens of taxation are not so heavy.

The best safeguard of public ownership is a frank recognition of the fact that a government possesses no magic wand which can reverse administrative principles or change deficits into surpluses by a gesture. There are certain well defined monopolies which, in the nature of things, must be operated by the state or other government. There are certain other undertakings partaking of the nature of a monopoly which should be operated by the public if the public can afford the proper machinery for their administration. There are others which may be operated by the public to its own advantage if the public are sufficiently wide awake, [illegible] and pertinacious to compel the observance of sound principles of administration.

The Dominion Government

Canadian citizens, through their Dominion government, have an investment of approximately $670,000,000 in such enterprises as railways, steamship lines, grain elevators and telegraph lines. The greatest portion of this amount is, of course, in steam railways.

Although the Dominion government began its ownership of railways as a condition of confederation, with the building of the Intercolonial Railway, which was completed in 1876, it is only within the past two or three years, with the taking over of the Grand Trunk Pacific and the Canadian Northern railways, that this enterprise has reached enormous proportions. The Grand Trunk Railway, which is also being acquired, will greatly add to the total amount invested, as estimated above. While the federal government has been more or less forced into its present expansion along this line, it would seem that, with the carrying out of the present enlargement, sufficient scope will be secured to give the policy of public ownership of railways a thorough test.

The Merchant Marine

The mercantile fleet, which is being built with the idea of developing Canadian export trade, is operated by a company under the charter name of the "Canadian Government Merchant Marine," the directors of which company are members of the board of directors of the Canadian National Railways. The investment in this enterprise is now $58,179,563. The steamship operations are more or less necessary in order to "round out" the railway operations.

The telegraph lines owned by the Dominion government were not established for the purpose of entering into competition with privately owned lines, but were built in connection with the railways, or to supply places not already served, or to give communication to remote settlements and out-of-the-way districts. The investment in telegraph lines now amounts to $2,629,000.

The deficit on operation for the fiscal year ending March, 1919, was $508,375 for these telegraph lines, on a total expenditure of $739,707. It might be noted, however, that signal service messages, meteorological service messages and fisheries bulletins are carried free on these lines.

The Canadian Grain Act, 1912, gave the Dominion government power to erect and operate terminal grain elevators, and five of such elevators are now in operation at: Port Arthur, Ont.; Saskatoon, Sask.; Moose Jaw, Sask.; Calgary, Alta.; and Vancouver, B.C.

Although the postal service is a public service enterprise of the highest type, it has not been included in the total of $670,000,000 previously mentioned. Its service is so basic and its use so universal that it might well be considered one of the "ordinary" departments of the government. However, it differs from them inasmuch as its operating expenses are raised by direct fees for services rendered instead of by taxes. While this service would seem, at present, to be operated at a profit, it must be taken into consideration that in operating expenses, as they are now made up, no allowance is made, as would necessarily be the case in private business, for interest on investment in buildings used for postal service purposes or for depreciation of same, etc.

The Provincial Governments

The investment of the citizens in public service enterprises through their provincial governments, totals about $124,000,000, made up as follows:—

Province.	Nature.	Amount invested.	Total investment for province.
Prince Edward Island	None	....	None
Alberta	Telephones	$11,394,589	$11,394,589
Saskatchewan	Telephones	7,857,385	7,857,385
Manitoba	Telephones	11,047,473	
	Elevators	1,195,385	12,242,858

[*] From a bulletin issued by the Citizens' Research Institute of Canada.

Alberta Flour Mills, Limited

CAPITAL STOCK

Balance of Issue $1,400,000

CALGARY, October 25, 1920.

ALBERTA FLOUR MILLS, LIMITED, has been Incorporated and organized to own and operate flour mills and grain elevators and to deal in grain and grain products, and have under construction at Calgary a flour mill that will have a capacity of between 7,000 and 8,000 barrels of flour per day. The construction is reinforced concrete throughout and the mill when completed will be the most up-to-date and best equipped in Canada.

The thoughtful investor realizes that conditions in the industrial world are very unsettled and that the enterprises with the greatest element of safety are those dealing in a necessity of life.

Alberta Flour Mills, Limited, is a ground floor proposition. The stock is all Common Stock and every holder of stock has paid the full par value thereof. The stock is $100 per share, fully paid and none assessable. There is no Bonus Stock and no Promotion Stock.

The annual statements of the big milling companies and the listed value of their stocks prove most conclusively that there is a good profit in milling wheat and there is no place on the American Continent more advantageously situated to manufacture and distribute flour and feed than Calgary.

The directors of the Company are leaders in Western Canada and their many years of experience in Western Canadian development have put them in a position to know the magnitude and class of industry that can be successfully conducted.

ALBERTA FLOUR MILLS, LIMITED

Head Office: - - 508 New Burns Building, CALGARY, Canada

ALBERTA FLOUR MILLS, LIMITED

APPLICATION FOR SHARES

Make all payments to the order of Alberta Flour Mills, Limited

To the Directors of
ALBERTA FLOUR MILLS, LIMITED, Calgary, Alberta.

Gentlemen:—I hereby make application for.......................... ....Shares of the Capital Stock of Alberta Flour Mills, Limited, and herewith enclose the sum of........................ ....Dollars ($.................. ....), being the first instalment of 50 per cent. of the par value thereof. I request you to allot to me the said shares upon the terms of the company's prospectus and agree to accept the same, or any less number that may be allotted to me, and agree to pay the balance of the par value of the shares allotted in pursuance thereof as follows: 50 per cent. in 90 days after allotment.

I hereby authorize you to register me as the holder of the said shares.

ALBERTA FLOUR MILLS, LIMITED,
508 New Burns Building,
Calgary.

Province.	Nature	Amount invested.	Total investment for province.
Ontario	Hydro-electric development	$62,000,000	
	Railways	22,334,918	$84,334,918
Quebec	None	. .	None
Nova Scotia	None	. . . . . .	None
New Brunswick	Railways	8,193,855	8,193,855
P. E. Island . . .	None	. . . . . .	None

In New Brunswick and Ontario—as in the case of the Dominion government—a considerable amount has been invested in railways. These were usually undertaken by the provinces to serve certain districts not reached either by Dominion or privately owned lines. On this account such lines are infrequently paying propositions, but may nevertheless be justifiable.

Ontario's hydro-electric enterprise, which is, in effect, a joint provincial and municipal undertaking, is an outstanding example of public ownership. However, while the amount, $62,000,000, has been listed in this bulletin as a provincial investment, it is not one in the same sense as "railways," because in time the municipalities will have redeemed all the outstanding bonds and the investment will then be totally municipal.

The three middle western provinces operate telephone systems which are, from their very nature, monopolies, and, therefore, afford the best chance for successful public ownership and operation.

The Municipal Governments

The investment of Canadian citizens in public service enterprises, through their municipal governments, is approximately $215,000,000, made up as follows:—

Municipalities in	Waterworks.	Electric light and power.†	Street railways.	Sundry.
B. C. . .	$ 16,563,090	$ 2,511,033	$ 88,935	$ 1,949,481
Alta .	8,400,000*	4,857,346	5,894,000	1,900,000
Sask. .	7,600,000*	5,829,678	3,468,000	9,000
Man. .	9,900,000*	8,597,550	450,000	12,000
Ont.	38,000,000*	36,000,000‡	8,000,000	2,670,000
Que.	30,000,000	4,479,157		4,860,000
N. B. .	4,300,000*	505,431		1,340,000
N. S.	5,400,000*	781,123		
P. E. I. . .	345,000*			
Total	$120,508,090	$63,559,318	$17,900,935	$12,740,481

---

*Estimate made from bonded indebtedness of municipalities for such enterprises.

†These figures supplied by courtesy of the Dominion Bureau of Statistics, Ottawa.

‡Provincial plant investment is not included.

From this table it will be seen that the largest amount invested by municipalities in public service enterprises, $120,000,000, is for waterworks. Very few Canadian municipalities are now supplied with water by private corporations.

If waterworks are to be conducted on a thoroughly businesslike basis—i.e., service at cost, it is essential that they be operated without a deficit. At the present time, this is not the case in a great many municipalities. Interest charges and depreciation should be taken into account. The [illegible] as many municipalities [illegible] to keep [illegible] of this account separate from the general debt.

Electric light and power also has the large investment of [illegible]. Of this amount, however, [illegible] is in Ontario, and includes the investments of the various municipalities in the hydro-electric enterprise. The function of supplying light and power is a comparatively recent development in Canadian public ownership, but [illegible] ownership and operation, [illegible] the existence of [illegible] which is absolutely essential to [illegible] administration.

The investment of municipalities in street railways has had its main development in the western provinces. Here over-extension of lines has proven to be rather a handicap to economical operation. Considering the direct relation of transportation to the development of the community, municipal ownership of street railways, properly conducted, is an important factor in the progress of many communities.

Under "Sundry" have been grouped such undertakings as: Irrigation schemes, gas plants, wharves, abattoirs, telephones, etc.

TWO NEW INSURANCE LICENSES ISSUED

One for Fire in Ontario and One for Burglary in Quebec—Dale and Co. Will Represent Beaver Fire

TWO new insurance licenses have been announced during the past week in Canada. Both are provincial, and are extensions of business on the part of companies already doing business in this country.

Authorization has been granted to the National Liberty Insurance Company to transact fire insurance in the province of Ontario. The license issued expires on April 30th, 1920. The Hartford Live Stock Insurance Company has also been authorized to transact live stock insurance in the province.

The London and Lancashire Guarantee and Accident Company, which is already licensed to transact in the province of Quebec the business of guarantee, accident, sickness, plate glass, automobile and fire insurance, has been authorized to write burglary insurance and insurance against loss or damage occasioned by larceny, theft or stealing from the person by violence, threat or otherwise, in addition to the above classes.

Application will be made at the session of the legislative assembly of Saskatchewan, commencing on the 4th day of November, 1920, for an Act to incorporate Midwest Fidelity and Guarantee Company, Limited, with power to undertake the business of a guarantee company in all its branches, to insure against loss arising for non-fulfilment of contract, breach of trust and defalcation, and generally with all powers appertaining to such business.

Agency Appointments

Dale and Company, well-known insurance agents in Montreal, Que., have been appointed to represent the Beaver Fire Insurance Company, of Winnipeg, in Montreal. The Beaver Fire Insurance Company was formed some years ago, largely to write preferred business only through its mortgage connections in the west, but latterly has decided to extend its business in the east. The company was formed some six years ago, and its officers include the following: W. J. Christie, president, a Winnipeg capitalist; G. W. Allan, K.C., vice-president, a director of the Canadian Bank of Commerce; J. Galt, director, president of the Union Bank of Canada, and F. M. Morse, a well-known Winnipeg merchant.

Harry C. [illegible], formerly special agent of the Travelers Insurance Company, has been appointed assistant [illegible] of the Toronto branch office in charge of liability [illegible] with jurisdiction over the province of Ontario. [illegible] a graduate of the Hartford Insurance [illegible] underwriting and agency [illegible] Home Office Training School. He [illegible] wide experience in production [illegible]

A new [illegible] under the name of Rothwell and [illegible] the Winch Building, Vancouver, B.C., [illegible] stocks, bonds and insurance. The manager, [illegible] has, since his return from [illegible] stock department of [illegible] retains his seat on the [illegible] The company will shortly move [illegible] Granville St., Vancouver.

DEBENTURES, FOR SALE

TOWN OF COCHRANE, ONTARIO

TENDERS FOR DEBENTURES

Sealed Tenders will be received by the undersigned up to and including November 16th, 1920, for the purchase of $32,000 6% 20-year Instalment Bonds of the Municipality of the Town of Cochrane, issued for the purpose of purchasing Local Telephone System. Interest and Principal at Cochrane, Ontario. Issue has received assent of Electors.

W. L. WARRELL, Treasurer,
Municipality of Cochrane.
274

CITY OF TORONTO

$2,853,000 SERIAL BONDS

Sealed tenders, endorsed, "Tender for City of Toronto Bonds," addressed to Thomas L. Church, Esq., K.C., Mayor and Chairman of the Board of Control, will be received by the undersigned until 12 o'clock noon, Wednesday, 10th November, 1920, for the purchase of $2,853,000 bonds, issued for various purposes, under several by-laws, and due 1921-1950 (approximate average maturity of the whole, 17½ years).

Full details as to the purposes for which the bonds are issued and amounts maturing annually, together with financial statement of the City, will be furnished on application.

The legality of the issue has been approved by Mr. J. B. Clarke, K.C., Toronto, and his favorable opinion will be engraved on each bond.

The bonds are an obligation of the City at large, are issued in coupon form, with provision for registration of principal, bear dates October 1st and November 1st, 1920, and are of the denomination of $1,000.

They are payable, both as to principal and interest, in Toronto, and carry interest at the rate of 6% per annum, payable half yearly.

Engraved bonds will be ready for delivery on or about November 22nd, 1920. Delivery and payment, with accrued interest, are to be made at the office of the undersigned.

Tenders will be received for the bonds issued under any number or all, of the By-laws, but not for a part of those issued under any one By-law.

A certified cheque, payable to the undersigned, for 2% of the par value of the bonds tendered must accompany the tender.

Tenders specifying for bonds other than those herein described, or containing conditions varying from the above, will not be considered.

The right is reserved to reject any or all proposals.

GEO. H. ROSS,
Commissioner of Finance.

Treasury Department,
City Hall, Toronto, Canada, November 1st, 1920.
[illegible]

$5,000,000.00

PROVINCE OF ONTARIO

7-YEAR 6 PER CENT. GOLD BONDS

Sealed tenders endorsed, "Tenders for Province of Ontario Bonds," addressed to the undersigned, will be received for the purchase of $5,000,000 (Five Million Dollars) seven-year gold bonds of the above Province, dated 15th November, 1920, due 15th November, 1927, bearing interest at the rate of six per centum per annum, payable half-yearly on the 15th November and 15th May. Principal and interest payable in gold coin at the office of the Treasurer of Ontario, Toronto, or at the Bank of Montreal, Montreal, Canada, or at the agency of the Bank of Montreal in the City of New York, U.S.A., at the option of the holder.

Bonds to be in denominations of $1,000 each, with coupons attached, and may be registered as to principal only.

Payment for bonds, and delivery thereof, to be made at the office of the Treasurer of Ontario at the Parliament Buildings, Toronto, on or before the 19th November, 1920, less the amount of the deposit. Interim debentures will be supplied on payment of the money, to be exchanged for the definitive bonds on completion by the engravers.

Tenders to be addressed to the Honorable P. Smith, Treasurer of Ontario, Parliament Buildings, Toronto, and delivered not later than 12 o'clock noon on Monday, the 15th day of November, 1920.

Tenders must be for the whole amount offered, and must be accompanied by marked cheque for $50,000, to be applied, in the case of the successful tenderer, in payment for bonds.

The highest or any bid not necessarily accepted.

P. SMITH,
Treasurer of Ontario.

Toronto, November 3rd, 1920. 280

UNION BANK DECLARES BONUS

Another bank to declare a bonus to shareholders is the Union Bank of Canada which has announced [illegible]. This, with the regular quarterly dividend at [illegible], will make a distribution for the year of 12 per cent., [illegible] the best in the history of the bank. Recent figures [illegible] dividends by the Union are as follows: 1904 to 19[illegible] [illegible]; 1911 to 1916, 8; 1917 to 1917, [illegible] [illegible] 1919, 10.

GROUP INSURANCE

The British Columbia Refining Company, with head office in Vancouver, has taken out a group policy with the Sun Life Assurance Company which amounts to approximately half a million dollars. Under the terms of the contract the officials and heads of departments are assured for a flat amount of $[illegible],000 each and all other employees for an initial amount of $1,000, increasing by $100 for each year of continuous service up to the maximum of $2,500, and credit is given for past service, the company paying the entire premium.

Comptroller Mitchell, of Edmonton, Alta., is endeavoring to have all municipal employees covered by a group policy.

Toronto teachers are considering the adoption of a system of group insurance whereby the entire staff of over [illegible] teachers will be able to secure life insurance without medical examination. It is proposed that the fees be deducted from the salaries of the teachers and paid out in one single premium.

[illegible], Ltd., Toronto, have prepared a [illegible] for their clients. It contains [illegible] and other information, and pages [illegible] purchases and sales, etc.

One of Four Millions

(A Photograph Direct from the War-Stricken Area)

$1 per Month Preserves the Life of One Child

Millions of war orphans in Central Europe are growing up undernourished and stunted. Thousands of them are dying of typhus, tuberculosis and small-pox. There is almost a complete lack of the nourishing foods growing children need, of clothing, of doctors, nurses and medical supplies. The condition of the children is pitiable in the extreme. Upon this coming generation depends largely whether these nations will be healthy and right-minded or a hot-bed of anarchy and degeneracy—a menace to the world.

It has been found by experience that the cost of caring for a waif child is approximately three dollars per month; that of the supplies that are required by imports about one dollar is needed; and therefore the dollar that we provide, together with the local support of local governments, local municipalities, local charities and local services practically preserves the life of one child.

The British Empire War Relief Fund will be administered in Europe by the British Red Cross in co-operation with the League of Red Cross Societies. Send your contribution care of:

VALIDITY OF CONDITION IN TRUST DEED

Clause Providing for Delay in Instituting Action Held to be Effective by British Columbia Courts

In a recent case the British Columbia Court of Appeal decided that a condition in a trust deed postponing the right to enforce was valid, or, more fully, that a condition in a trust deed postponing the debenture-holder's right to enforce his security until such time as the trustees fail after notice to take steps to protect the interests of the debenture-holders, is a valid condition, and an action cannot be maintained in the absence of such notice.

The plaintiff sued upon a bond, one of a series issued by the defendant company secured by a trust deed by way of mortgage. The individual defendant guaranteed payment of the bond. The conditions precedent to the plaintiff's right to recover his claim against the defendant company were performed with one exception. This condition is imposed in the following manner: The bond refers the holder to the trust deed "for a particular description of the terms and conditions thereof on which said bonds are issued and secured," thus incorporating with the bond the conditions of the trust deed, so far as the above words are effective for that purpose.

Must Give Notice of Action

Article 21 of the trust deed declares that no bondholder shall have the right to institute any proceedings for foreclosure of the trust deed, or for the execution of the trusts thereof, or for the appointment of a receiver, or for any other remedy under the trust deed, or for the lien created thereby, or otherwise, without first giving notice to the trustee. The article contains also another provision, partly a repetition of the above, reciting that it is agreed that no bondholder shall institute proceedings for foreclosure or for the appointment of a receiver, or for the collection of any of the moneys evidenced by such bonds other than upon the terms and conditions and in the manner herein specified.

Macdonald, C.J.A., says in part: "The language seems to me to be sufficient to debar a right of action by the bondholder otherwise than in conformity with the conditions set forth in the bond, namely, the giving notice to the trustee."

"As regards the guarantor, I think his liability to the plaintiff arose when default was made in payment of the bond and that, as to him, there is no obstacle in the plaintiff's way such as stands in his way in respect of the defendant company. The judgment against him should, therefore, not be disturbed. But as regards the defendant company, the appeal should be allowed."

DOMINION PERMANENT DIRECTORS MUST PAY

The sum of [illegible], with interest from 1912, was ordered to be returned to G. T. Clarkson, as liquidator of the Dominion Permanent Loan Company, by former directors of the company, in a judgment given by Justice Lennox, October 9. The former directors from whom the money is to be recovered are F. C. Denne, J. S. Deacon, John Dunn, Hon. Thomas Crawford, and W. J. B. Galbraith and Mary H. E. [illegible] of the estate of Rev. William Galbraith. The money was received as the secret consideration of the sale of [illegible] company to the Dominion Permanent, and Justice Lennox, in giving judgment, gave as his opinion that [illegible] had been misrepresented to the [illegible] and that the whole transaction was [illegible] and fraudulent.

A writ for $100,000, alleged to be due under [illegible] undertaken on behalf of the Patricia Wagon Co., has been issued by the Bank of Toronto against C. Oliver [illegible], Ont., and Mary Eliza [illegible]. The bank claims the Patricia Wagon Co. owes it [illegible]

JUDGMENT AGAINST FIRE COMPANIES

On October 11 the Superior Court of Quebec province maintained Joseph Sauriol in his claims for fire insurance under two policies—one held with the Liverpool, London and Globe Insurance Co., Ltd., on which $2,850 was adjudged to be due, and the second with the Globe and Rutgers Fire Insurance Co. of the City of New York, on which the court awarded $2,250, being in each instance for loss suffered through a fire which destroyed plaintiff's hotel and effects on St. Heloise Street, St. Hyacinthe, on March 13, 1918. Plaintiff declared that his total loss through the fire exceeded $14,000.

The cases were united for hearing, and the companies contested the plaintiff's claims on the alleged ground that he had misrepresented the value of his property, and in this way prevented the companies from a proper appreciation of their risk.

It was urged by the defence that the hotel and effects were insured in the first instance in a third company for $6,000, and that subsequently this amount was reduced to $4,000. Taking this fact into consideration, when plaintiff applied for additional insurance the Liverpool, London and Globe Co. made it a condition of acceptance of the application that there should be an expert valuation. Plaintiff agree to this, and submitted that such valuation was made, with results found to be satisfactory. The additional policies were issued and he insisted that his present claims ought to be met.

Justice Guerin said the evidence did not justify the conclusion of the defendants that the plaintiff had at any time made false representations in order to obtain additional insurance. At most, the promise that he made was that an inventory should take place of his household effects, and a valuation obtained of the buildings which were to be insured under the two polices. "But," added the judge, "neither of these two companies thought it necessary to wait until this was done before issuing the policies, and the promise was for something which was to be done some time subsequent to the date of the issue of the policies. But such promise has not been pleaded for the defence."

In the light of the proof, the court condemned defendants to pay the amounts claimed in each instance—$2,850 and $2,250, with interest as from October 22, 1918, and the costs.

OLD SUIT IS SETTLED

The end of litigation which has been taken into various courts of British Columbia during the last ten years and the material of which has formed the issue of several actions at law, has just been reached in the Supreme Court of the province, when R. T. Elliott, K.C., obtained judgment in the suit brought against him by Ephraim E. Hodgson to recover [illegible],000. The suit came to a sudden termination after Mr. Elliott had been cross-examined by W. J. Taylor, K.C., counsel for the plaintiff. Mr. Taylor rose and informed the court that the plaintiff was willing that judgment with costs should be given for the defendant.

The plaintiff's claim was made by way of an action for [illegible] of the sum of $25,000, being the amount of claim [illegible] against Mr. Geo. B. French, which amount plaintiff alleged was owing by Mr. Elliott to Mr. French. The [illegible] $100,000 which Mr. Elliott testified [illegible] paid in 1910 to agents of Mr. French in full [illegible] by Mr. French in respect of the commission paid to Mr. Elliott for the negotiation of the sale of the [illegible] coal properties to Messrs. Mac[illegible] in the same year.

[illegible] is opening an office in Victoria, B.C., [illegible] Oscar Bass, solicitor. Besides the head office in [illegible] and branch at Toronto, the [illegible] Winnipeg, Regina and [illegible]

News of Industrial Development in Canada

Some Manufacturers are Feeling Trade Depression—Reduction of Staffs is Necessitated—Textile Mills in the East are Engaging English Workers—Dominion Foundries is Extending Hamilton Plant

CURTAILMENT of production and reduction of staffs is now being undertaken by several Canadian industries located on the Canadian border. In a large number of cases the organizations affected are branches of American firms. The Ford Motor Company of Canada has announced a cut in working hours to four days a week, commencing November 1st, and continuing for an indefinite period. Gordon M. McGregor, general manager of the company, explained that the business depression which is affecting all parts of the country is responsible. He declared the company preferred to keep the entire staff employed on a part-time basis rather than lay off a percentage of the men. Already 10 per cent. of the normal staff has been laid off. The industrial outlook, according to Mr. MacGregor, is anything but encouraging. He does not expect a return to normal before the end of February or March next.

Twenty per cent. of the men of the Kelsey Motor Wheel Company have been laid off. M. G. Campbell, manager of the company, said: "We are not quite certain of our next course. We can work full time with the present staff and close down towards the end of next month, or we can work three or four days a week and continue throughout the month. The third alternative is to secure more men, rush through the remaining orders and then close down completely. Personally, I favor working three or four days a week."

Forty per cent. of the staff of the Dominion Forge and Stamping Co. have been laid off. Only one shift is now in operation. Scant likelihood of an industrial rally is the view of Pearson Wells, secretary-treasurer of the company. The Trussed Steel Company reports feeling the effects of sharp depression. Immediate action has not yet been decided upon.

Textile Industry Also Depressed

In a review of the situation in his industry, H. B. Peabody, general manager of Peabody's, Ltd., Walkerville, Ont., stated:—

"For some time the manufacturing of overalls in our factory has been completely discontinued, and it is impossible to prophesy when operations will be resumed. Our cotton mill, however, is running on one-half capacity basis, and will continue to do so for some time to come, providing circumstances at present prevailing remain as now. The only cause that I can attribute to the general depression conditions now prevalent is the fact that the public, influenced by articles in newspapers, have been extremely wary in purchasing goods, particularly the merchants engaged in selling these goods, both wholesaler and retailer.

"It is absolutely impossible to make further reductions in the price of overalls. Canadian Cottons, Ltd., have established a price on denim and cotton material used in the manufacture of overalls at forty four cents per yard. This price will remain in effect until June, 1921, in order to compete with prices established by American manufacturers on these materials. The price set in Canada is extremely low, and equals the minimum of any other country. We cannot possibly manufacture [illegible] until the purchasing public realizes the serious condition now prevailing, and also realizes that further reductions in our prices are impossible at the present time.

"Growers of cotton in the United States are refusing to sell their products at the present quoted price, and are holding out for at least a ten cent increase per pound. This, when the new crop is placed on the market, will mean that greater cost will be placed on the manufacturer."

While most sections of the textile industry are feeling the effect of the trade depression, which has greatly affected that industry in England and the United States, it is evident that in Eastern Canada, at least, some cotton manufacturers are running at full capacity. Some of the mills, including the Gibson mills of Canadian Cottons, Ltd., at Marysville, N.B., are engaging operatives who have been thrown out of work by trade depression in Lancashire, England.

A party of eighty Lancashire operatives, the majority of the skilled workers from the mills in the Manchester district, arrived in Quebec last week to take positions in the Verdun mills of the Dominion Textile Co., Ltd., Montreal. The party consisted of thirty men and fifty women. In all, there were 400 operatives in Manchester ready to sail for Canada, but as housing conditions in Hochelaga, Valleyfield, Magog and elsewhere are congested it was not considered desirable to engage all at this time.

There has been a scarcity of operatives in the cotton mills of Quebec province, Marysville and Milltown, N.B., during the summer, but with the closing of the farming season and the general dullness in New England and Lancashire textile centres, there will be less difficulty in keeping the Canadian mills fully supplied with help during the winter. The movement from Lancashire to Canada, although limited, is the first of the kind in textile circles since before the war. Another large party is expected to arrive from Lancashire this fall.

Dominion Steel Foundries Extending

Building operations on an extension to the premises of the Dominion Foundries and Steel, Ltd., Hamilton, Ont., have been commenced. The extension will cost $1,500,000, and will be completed, it is expected, by next summer. The output will be increased from 5,000 to 15,000 tons of steel per day.

The Whitman and Barnes plant, one of the oldest and largest industrial concerns at St. Catharines, Ont., has been taken over by J. H. Williams and Co., the largest drop forge corporation on the continent, with plants at Buffalo and Brooklyn. The United States plants will serve the United States market and the St. Catharines plant the Canadian and export trade.

Before the end of the year the three selling offices of Armour and Company in Montreal will be closed. The big Chicago meat packing firm is getting out of the Canadian market entirely.

Copeland Flour Mills, Ltd., recently incorporated with an authorized capital of $2,000,000, with head office at Midland, Ont., are erecting a large flour mill.

The tannery of the John Palmer Company factory at Fredericton, N.B., has been closed temporarily, but the management said recently that it would be reopened in December, if not before. Charles K. Palmer, the managing director of the company, which manufactures oil tanned footwear, said the shutting down of the tannery was because of general business conditions and adoption of a policy being quite generally adopted in the trade "to go along quietly for the next [illegible]."

Gasoline Plant for Toronto

Announcement has been made that British and Canadian interests have secured an option on the patented process for the manufacture of a special type of gasoline discovered by Dr. Joseph Wilson Trotter, of Birmingham, Alabama, and that within the next month they would establish in Toronto the Toronto [illegible] and Manufacturing Company and a subsidiary concern, the Mona Oil Company, with a [illegible] capitalization of five million dollars. A number of [illegible] are interested in the new undertaking, among them being Dr. H. M. Alexander, who has been appointed [illegible] of the company. The location of

CANADIAN MINING INSTITUTE MEETING

Western Developments Feature This Year's Convention at Winnipeg—What Oil Find Means to Alberta

THE 1920 meeting of the Canadian Mining Institute was held in Winnipeg, October 25-27. Development of minerals in western Canada, especially as regards coal and iron, featured the discussions. T. C. Norris, premier, welcomed the delegates, and O. E. S. Whiteside, manager of the International Coal and Coke Co., of Coleman, Alta., presided. Among the speakers, the program included: Prof. J. A. Allen, Alberta University, on "Minerals of Alberta"; Prof. J. S. DeLury, Manitoba University, on "Rice Lake Mining Prospects"; Prof. R. C. Wallace, on "The Flin Flon and Other Mineral Deposits in Northern Manitoba"; F. E. Gray, editor, Canadian Mining Journal, on "Western Coal Development and Marketing"; T. R. Deacon, on "Uses and Development of Pulvarized Coal"; George Bancroft, president, The Pas Board of Trade, on "The Mandy Copper Mine"; J. P. Gordon, of The Pas, on "Copper Lake Mineral Field"; J. Knobel, Prince Albert, on "Founding a Western Iron and Steel Industry."

President's Address

Mr. Whiteside, in the course of his presidential address, said that in 1898, when the Canadian Mining Institute came into being, it was quite certain that its founders would have scoffed at the idea of Manitoba ever being a field in which it might exercise its functions to useful effect. Mr. Whiteside said it was only within the last few years that Manitoba had been regarded as anything more than a wheat-growing area of the Dominion, the region whose wheat had made Canada famous the world over. But, as if to prove her impartiality and to insure that every province of Canada should be possessed of mineral wealth, however richly endowed it might be with other natural resources, nature had established within the borders of Manitoba an area which already had been proved to contain mineral deposits of great value. He said Manitoba had the beginning of what, he hoped, would become an important and flourishing mining industry. Faith in the future of that industry had justified the mining men in Winnipeg in founding a branch of the Canadian Institute of Mining and Metallurgy, which had become one of the most active of all the organizations of the institute, he asserted.

Mr. Whiteside explained that one of the functions of the institute is service through co-operation. The institute, with associations of a like nature, exerts a far-reaching and eminently beneficial influence in the community in general by reason of the spirit it animates, he said. The institute, he asserted, should offer its services to the government. This it had not failed to do in the past, but the opportunities now were greater in this respect than ever before.

The necessity for more accurate information on Canada's mineral resources was emphasized by Dr. Allen. He declared that accurate information was required with reference to Alberta, because that province was on the verge of what might be the greatest oil boom excitement that had ever occurred on the American continent. The prospects were most promising, Dr. Allen said, for the occurrence of a large producing oil field in the far north, and that already many oil seekers were preparing to strike north as soon as the ice was thick enough for travelling. The great problem in the immediate future to be solved was that of transportation.

Mr. F. E. Gray called attention to the gap of 2,000 miles which unfortunately intervened between the eastern coal fields of Canada and the lignites of Saskatchewan. The gap could be bridged, he said, by the extension of deep waterways from the east up to Ontario, and by the adoption by the railways of a comprehensive plan for carrying coal from the east. While the consumption of bituminous coal in Canada was [illegible] tons annually, only 14,400,000 tons were produced in Canada, but this could be raised to 20,700,000 tons from existing mines alone. The supplies in the east [illegible] to the west were immense, and it was [illegible] the solution of the coal problem lay.

1870 —— OUR GOLDEN JUBILEE —— 1920

One Hundred Per Cent. Increase in Five Years

The Mutual Life of Canada is celebrating its jubilee year by "rounding" the two hundred million dollar mark, having doubled the amount of assurances in force since the year 1915. This 100% increase in five years is without doubt due to the unsullied record for fair, liberal and equitable dealing with its policyholders, and in the second place to the increasing popularity of the mutual principle in life insurance. The mutual is becoming generally recognized as the most economical, the most democratic and the most equitable system of life insurance. The greatest and most powerful life insurance organizations in the world are mutual, and the Mutual of Canada, organized on that basis, is meeting with a similar success. The assets of the Mutual are a source of satisfaction, amounting at present to approximately $40,000,000, guaranteeing every contract and providing a substantial surplus.

News of Municipal Finance

Alberta and British Columbia Municipalities Seeking New Sources of Revenue—Montreal Tax Collections Proceeding Satisfactorily—Redemption of Calgary Tax Sale Property Produced Poor Results—Athabasca Wants to Realize on Arrears

SOME western municipalities, notably in Alberta and British Columbia, are endeavoring to obtain permission from their respective provincial governments to increase their revenue. At the Union of Alberta Municipalities' convention, which is to be held next week, a special committee will submit a resolution, asking the province to permit cities and towns to collect considerable of the taxes paid to the government to be placed to their own account. The resolution will ask that the municipalities be allowed 50 per cent. of the automobile licenses collected, 50 per cent. of the police court fines which the government collects, and that they be granted the right to collect a 5 per cent. increment tax in addition to the 5 per cent. collected by the government at the present time.

Victoria, B.C., which has repeatedly brought before the provincial government the question of new sources of revenue for the city, but without success, will again demand that the government take some action in this matter. It is not the council's intention to exactly increase the civic revenue, but to relieve the present taxpayers, who are feeling the strain, by drawing on other sources. Alderman Sargent, chairman of the finance committee, has made the following comment in regard to the situation:—

"Some people have criticized us for our tax sale policy. I think it has been the best we could devise under the conditions we have had to accept, but, apart from its other merits, I believe that the tax sale we have just concluded will be of value in convincing the government that the municipalities cannot any longer be neglected. This tax sale, which resulted in the city having to take over some 600 lots, which will not be revenue-producing until they are sold, has been a demonstration that there has got to be a big revision in the tax system. It has conclusively proved that taxation of land has been overdone, that the property-holders are overburdened, and that the onus of maintaining the financial obligations of the city rests unfairly on the shoulders of one section of the population, namely, those who pay the taxes on land and improvements. Long ago we reached the parting of the ways when the government would have been justified in making it possible for the municipalities to extend their scope of taxation and draw upon new sources of income. I feel that we are now close to the point when there simply must be a revision, and I am hoping that this tax sale will make as strong an impression on members of the government as it has on myself and other members of the council."

Vancouver will shortly be engaged in finding out just where they can draw more revenue from, and how much they can draw. It is understood that a committee of fifteen has been formed and will be assisted in their efforts by Dr. H. Brittain, of the Bureau of Municipal Research, Toronto.

Should these municipalities be able to convince the governments of their rights, they will be in a position to greatly strengthen themselves, and will also be able to reduce their debt and improve their credit standing in the money market. The provincial governments, it is hoped, will do all in their power to help them achieve this end.

Edmonton, Alta.—City utility departments show a net loss of $1[illegible] for the nine months ended September 30th. City officials realize the seriousness of the situation and are now considering an adjustment.

Vancouver, B.C.—The city will purchase $[illegible],000 of its own [illegible] debentures, which carry 7 per cent. interest. To make the purchase, some unexpended by-law balances now in the bank and drawing only 4 per cent. interest will be used.

Brockville, Ont.—According to the report of the assessors, the city's assessment for 1921 reached a total of $[illegible], an increase of $161,01[illegible] over this year. The increase is largely in land improvements and $75,000 income assessments.

Athabasca, Alta.—The municipality has applied for action by the commission in regard to twenty subdivisions on which there are arrears of taxes amounting now to some $70,000. A full investigation into the standing of each of the subdivisions will be made by Mr. Martin, commissioner. He will then give decisons either in the direction of reducing the tax arrears or cancelling the subdivisions, the effect of the former action being that the municipality will be able in many cases to realize on the delinquent property by putting it up for tax sale.

Calgary, Alta.—The city is in a rather unfortunate position regarding property redemptions. Less than $150,000 out of approximately $1,500,000 had been received by the city treasurer's department on property redemptions up till October 22nd, the last day set by law for the redemption of property included in the tax sale lists.

This means that property upon which nearly a million and a half of taxes is due will go under the hammer at the tax sale on December 4th, or has already passed into the hands of the city by virtue of failure to pay tax sale dues. It means that four million dollars' worth of property is likely to come into possession of the city, some of which is very valuable vacant property in the heart of the city, property which, in the boom days, would have sold for anywhere from $500 to $2,000 a foot. The policy of the commissioners is to retain valuable property until something like value can be received for it, but the problem of meeting the loss in revenue from taxes on this property will be one to be faced by the incoming council, though some effort has been made by this year's finance committee to make provisions for new revenues as far as possible.

Montreal, Que.—Assistant Treasurer Collins has given out some interesting figures regarding tax collections. On the 1919 arrears the amount collected was $2,397,838; on the 1918 arrears, the amount collected was $1,577,584. There is a big falling off for the collection of the 1917 arrears, the sum being $[illegible]3,724; on the 1916 arrears the amount collected was $7,530, and on the 1915 arrears the collections amounted to $2,027.

Despite the heavy collections on the 1918 arrears, there was still due on October 20th last, for the year in question, the sum of $169,625. In October, 1919, the amount due for the property taxes of 1917 was $303,878. The amounts outstanding for 1918 are composed largely of contested assessments, and also the taxes due on properties sold by the sheriff at the recent sales, for which returns have not yet been made.

At the present time the collections on the 1920 tax rolls continue to come in well, and these collections of the realty tax will continue, as in past years, to be paid in at the city hall in fairly large amounts. On October 20th, 1920, the amount outstanding in the realty tax for 1919 was $2,357,171, and on October 20th, 1919, the amount due on the same tax was $2,[illegible]271 on the 1918 accounts, by which it may be seen that the collection of this revenue is more satisfactory than it was a year ago.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended October 29th:—

Dominion Reduction Co., [illegible],000; Temiskaming Mining Co., [illegible]; Coniagas Mine, 6[illegible],619; O'Brien Mine, 64,033; Mining Corporation of Canada, 66,938; McKinley-Darragh, [illegible]; [illegible]; Nipissing Mine, 279,680. Total, [illegible]. The total since January 1st is 23,261,620 pounds, or [illegible] tons.

Government and Municipal Bond Market

Alberta Issue Goes to United States Investors—British Columbia to Float Domestic Loan at the End of the Year—Ontario Asking for Another Loan—Lethbridge Irrigation Bonds Will Soon be on the Market—Some British Columbia Districts Will Also Approach Provincial Government for Aid in Irrigation

ANOTHER Canadian bond issue has gone to United States investors in the sale of $1,000,000 6 per cent. 10-year securities across the line by Harris, Forbes and Company, Incorporated, and the National City Company. The bonds were offered in New York at $92\frac{7}{8}$, which is on a basis of slightly under 7 per cent.

British Columbia is going to float a $5,000,000 domestic loan at the end of the year, according to advices from Victoria. The proceeds will be used for roads and for building extensions to the British Columbia University. This is the first loan of its kind to be made by the province, and it seems is rather a large one to commence with. To borrow such a large amount now would hardly be possible, but times may change materially before the end of the year. It is understood that the provincial treasurer has been sounding bond dealers in the province and those most closely in touch with the market, and the fact that the loan is to be made at the end of the year would seem to indicate that the Canadian bond market will be in a fairly good condition to receive large offerings.

Winnipeg's local loan is going as well as can be expected. Up to the present time about $102,000 of the securities have been disposed of at 96.63. At the present time Greater Winnipeg Water District bonds are being offered at 92.87 and interest, yielding 6.65 per cent., by A. E. Ames and Company.

Irrigation Bonds

As soon as the provincial treasurer of Alberta has given his approval the $5,100,000 7 per cent. 30-year Lethbridge Northern irrigation bonds will be offered for sale. The securities will be offered to investors in both Canada and the United States, it is understood, but it is expected that the greater number will find their way across the line.

This new irrigation scheme has established a precedent which may become very effective. At a meeting of the Associated Boards of South-east British Columbia at Fernie, B.C., recently, the question of bonding land for irrigation purposes was brought up. It was urged that the provincial government be asked to lend its aid to irrigation projects which would bring into cultivation the large areas now lying waste in the Kootenay valley. Other similar proposals were also presented. It was maintained that the advantages to the province would justify it in extending credit where private capital could not be secured.

Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

Borrower	Amount.	Rate %.	Maturity.	Tenders close
Oshawa, Ont	$ 78,743	6	15-instal	Nov 8
Rapid City, Man.	2,000	7	10-instal	Nov 8
Aldenburg, Sask., R. Telephones	2,500	8	15-instal.	Nov 10
Amherst, N.S.	40,000	6	30 years	Nov 10
Moose Jaw, Sask	100,000	6	3-years	Nov 10
Nova Scotia	2,000,000	6	Optional	Nov 10
Parry Sound, Ont	93,745	6	15 & 30 inst	Nov 10
Toronto, Ont	2,853,000	6	Serials	Nov 10
Amos, Que.	55,000	6	20-instal	Nov 11
Temiskaming, Que	24,500	6	Optional	Nov 11
Renfrew County, Ont.	150,000	6	20-instal.	Nov 12
Langenburg, Sask	9,500	8	15-years	
Ontario	5,000,000	6	7-years	Nov 15
Yellow Grass, Sask	12,000	7	10-instal.	Nov 15

Langenburg, Sask.—The Hohenlohe Rural Telephone Co., Ltd., is offering for sale $9,500 8 per cent. 15-year debentures. H. Fieseler, Langenburg.

Rapid City, Man.—The town is asking for tenders until November 8th, 1920, for the purchase of $2,000 7 per cent. 10-instalment debentures. C. G. Murray, secretary-treasurer.

Parry Sound, Ont.—Tenders are being called until November 10th, 1920, for the purchase of $75,000 6 per cent. 30-instalment debentures and $18,744.65 6 per cent. 15-instalment debentures.

Moose Jaw, Sask.—Tenders are being asked until November 10th, 1920, for the purchase of $100,000 6 per cent. 3-year bonds. Securities will be made payable in Canada only, or in both Canada and the United States at the option of the purchaser.

Toronto, Ont.—Sealed tenders will be received until noon, November 10th, 1920, for the purchase of $2,853,000 6 per cent. serial bonds, due 1921-1950 (approximate average maturity of the whole, $17\frac{1}{2}$ years). (See advertisement elsewhere in this issue.)

Ontario.—The province has not yet finished borrowing for this year. Tenders are now being asked until November 15th, 1920, for $5,000,000 6 per cent. 7-year gold bonds, dated November 15th, 1920, and due November 15th, 1927. Securities are payable both in Canada and the United States. (See advertisement elsewhere in this issue.)

Amherst, N.S.—Tenders will be received until November 10th, 1920, for the purchase of $40,000 6 per cent. 30-year bonds. The securities are dated November 1st, 1920, are in denominations of $500, and the proceeds of the issue will be used for hospital extension. R. D. Crawford, town clerk and treasurer.

Nova Scotia.—The province is asking for bids on $2,000,000 6 per cent. bonds until November 10th, 1920. Alternative offers must be submitted as follows: On 20-year securities payable in Canada only; on 10-year securities payable in Canada and United States; on 5-year securities payable in Canada and United States.

Debenture Notes

Stratford, Ont.—An amount of $50,000 will be borrowed for current expenditures.

Paris, Ont.—The council has authorized the issue of $11,000 debentures for sidewalk purposes.

Port Colborne, Ont.—Ratepayers have carried a by-law to purchase a park at the cost of $20,000.

York County, Ont.—The county council, which had authorized a bond issue of $20,000 to carry on the work of establishing a municipal home, has authorized an additional amount for the same purpose.

Watford, Ont.—All tenders were rejected which were received for the $52,000 $5\frac{1}{2}$ per cent. 30-instalment debentures.

Etobicoke Township, Ont.—A by-law has been passed by the council, authorizing the issue of $25,000 debentures for school purposes in Islington.

Glace Bay, N.S.—On November 10 ratepayers will be asked to vote on a $6,000 money by-law, authorizing the purchase of new water meters.

Winnipeg, Man.—The municipal council has passed a by-law authorizing the borrowing of $30,000 for school purposes in the school district of Woodlawn.

Calgary, Alta.—At the coming civic elections a by-law authorizing the borrowing of $265,000 to adjust the finances of the street railway, will be submitted. During the year and up to December 20, 1920, there will have been expended the sum of [illegible] on capital account, and it is estimated

6.30%
Until October 1st, 1940

Markets may come and markets may go, but purchasers of Province of Saskatchewan 6% Gold Bonds to-day at 96.62 and interest are assured of 6.30% for twenty years.

These bonds afford an excellent opportunity to dispense with the necessity for frequent reinvestment. They also guard against any changes in the money market that may occur in years to come.

TORONTO -:- CANADA

that there will be a loss on the sale of debentures to the amount of $8,691, making a total of $265,000 to be made up.

Freeman Township, Ont.—Tenders will be received until November 27, 1920, for the purchase of $10,000 7 per cent. 20-instalment school debentures. E. J. Barnes, township clerk.

Saskatchewan.—The following is a list of authorizations granted by the Local Governments Board from October 9 to 23, 1920:—

Schools—10-years not exceeding 8 per cent. annuity: Churchill, $1,865; Mulberry, $1,300; Sleaford, $7,000. Findlater, $7,000 8 per cent., 20-years' annuity. Fairwell Creek, $3,000 8 per cent. 15-years' annuity.

Rural Telephones—15-years 8 per cent. annuity: Arlington, $1,050; Glenford, $3,800; Heron, $600; Hohenlohe, $9,500; Mikado, $10,000; Manna, $1,100; Bulyea, $550; Wilmot, $4,300; Sylburn, $10,000; Turtleford, $12,000.

Village—Dafoe, $3,200 8 per cent. 10-instalment, for improvement.

Bond Sales

Manitoba.—It is understood that the New York Life Insurance Company has completed arrangements to take $300,000 of the province's bonds, which mature in 1923.

Courtney, B.C.—Pemberton & Son recently purchased $30,000 7 per cent. 20-year coupon gold bonds, and are now offering them in denominations of $1,000 at 88.29, to yield 8.20 per cent.

Kentville, N.S.—Mahon Bond Corp., Ltd., has purchased $[illegible]1,100 6 per cent. 25-year debentures at a price which is on a basis of about 6.17 per cent. H. M. Bradford and Co. bid 91.36; the Eastern Securities Co., Ltd., bid 93.37, while the Home Bank of Canada offered $26,963.70. The securities are now being retailed at 97 and interest, yielding 6¼ per cent.

Thorold, Ont.—R. C. Matthews and Co. have been awarded $20,000 6 per cent. 10-year debentures at a price of 94.60. At this rate the municipality pays about 6¾ per cent. for its money. Harris, Forbes and Co., Inc., bid 94.37; Canadian Debentures Corp., 94.36; W. A. Mackenzie and Co., 94.36; A. E. Ames and Co., 94.13; and C. H. Burgess and Co., 93.31.

Kitchener, Ont.—C. H. Burgess and Co. have purchased $[illegible],000 6 per cent. 20-instalment debentures at a price of [illegible], which is on about a 6.60 per cent. basis. The bonds are guaranteed by the province, and the proceeds of the issue will be used for housing purposes. Other tenders received were:—

N. A. MacDonald Co.	[illegible]
Harris, Forbes and Co., Inc.	[illegible]
Dominion Securities Corp.	[illegible]
A. E. Ames and Co.	[illegible]
Wood, Gundy and Co.	[illegible]

Brockville, Ont.—The town has awarded an $[illegible] 6 per cent. 20-year issue of debentures to A. E. Ames and Co., at 96.09, which is on about a 6[illegible] per cent. basis. [illegible] for the issue was [illegible] as will be seen from the following list:—

A. E. Ames and Co.	[illegible]
Harris, Forbes and Co., Inc.	[illegible]
[illegible] Corp., Ltd.	[illegible]

Corporation Securities Market

Stocks Continue to Move with Uncertainty Both in Canada and New York—New Brunswick Telephone Securities Offered — Alberta Flour Mills Issuing Common — Several Other Companies Will Offer Stock

ALTHOUGH a number of issues retrieved their losses which had been sustained during the early part of the week, the appearance of the Canadian stock markets at the close on November 3 had not greatly improved over exhibits of previous weeks. Papers were the weakest issues both in Montreal and Toronto, but according to several authorities on that industry there is nothing in the situation to warrant or account for such declines. The market for pulp and paper stocks in Canada has been greatly influenced by the weakness in such stocks across the line of late, and reports of imports of paper from Europe has led to a great deal of nervousness. A fair display of strength was made by several of those issues connected with the British Empire Steel Corporation.

Bank stocks in both Toronto and Montreal were considerably firm, but in some issues there was a tendency towards weakness. Union Bank did not favorably respond to the announcement of the two per cent. bonus, but in view of the general market for bank stocks now, a large gain could not be expected.

The situation in New York was not materially changed. Those who were expecting the stock market there to respond to the election results were somewhat disappointed. As one broker pointed out, any advance in prices as a result of the Republican sweep must be based principally on sentiment. The credit situation has not been changed by the election, and as the market is dependent on credit it would not be reasonable to expect any great change in stock prices. The federal reserve board's review of business finds that readjustment is proceeding quietly and in an orderly manner and also sees an approach to business stability. As a whole the board's conclusions are reassuring, both for general business and speculation.

Liquidation Only Temporary

Liquidation of Canadian stocks which was in evidence at the beginning of the week was only of short duration. The following figures illustrate this fact:

	Montreal		Toronto	
	listed stocks	bonds	listed stocks	bonds
Thursday	22,644	$ 31,900	1,994	$ 9,600
Friday	11,612	22,700	1,207	13,200
Saturday	1,655	11,612	622	16,100
Monday	4,208	13,500	674	11,600
Tuesday	3,221	36,500	1,840	71,100
Wednesday	8,103	15,200	983	24,800
Totals	51,443	$131,412	7,320	$146,400

The figures for the previous week were: Montreal, listed stocks, 53,400; bonds, $122,610. Toronto, listed stocks, 11,147; bonds, $176,900.

New Brunswick Telephone Stock Offered

It was announced in these columns last week that the New Brunswick Telephone Co. had been authorized to increase its capital stock by $400,000, the money to be used for the reimbursement of the company for money borrowed for plant extension.

The new shares, which are of $10 par value, are being offered at 110 and accrued dividends, to yield 7.27 per cent., by the Eastern Securities Co., Ltd., and J. M. Robinson and Sons.

The present capital stock of the company, including the present issue, is $2,099,470, and bonds outstanding total $41,000. There is no authority to issue any more bonds. The present plant value is placed at $2,551,245, and the estimated replacement value is $5,150,000. A review of the company's business shows that in 1909 revenue was $228,919 while this year it is placed at $723,234.

Alberta Flour Mills

An offering of common stock of the Alberta Flour Mills Ltd., is now being made at $100 per share, fully paid an non assessable. There is no bonus or promotion stock.

The company was organized to organize, own and oper ate flour mills and grain elevators and to deal in grain an grain products. Further particulars of such operations an the new stock, will be found in an advertisement elsewher in this issue.

Capital Changes

Marshall-Wells Co., Ltd., incorporated under the law of the province of Manitoba, will shortly ask authorizatio to increase the capital stock from $1,000,000 to $2,000,000 by the creation of 10,000 new shares of a par value of $10 each.

The Purity Ice Cream Co., recently incorporated i Montreal with a capital of $100,000, will offer preferre stock direct to the public. The buildings and offices of th company are those formerly occupied by the Duncan Mill Co., 218 Mountain Street.

The Copeland Flour Mills, Ltd., recently incorporate with an authorized capital of $2,000,000, and head office a Midland, Ont., is arranging to sell part of the stock to th public.

At a special meeting of the bondholders of the Wester Power Co. of Canada, held in Montreal on November 1, th resolution calling for the waiving of certain provisions i the trust deed in exchange for guarantee of principal an interest on the bonds by the British Columbia Electric Rail way Co. was passed unanimously by a substantial majorit of the $5,000,000 bonds outstanding. It is understood whe all details are disposed of that the bondholders will b

"Hedging" Grain Facilitates Marketing

Sale of Wheat Futures by Farmer and Again by Elevator Company Enables Farmer to Realize on Crop at Once—Millers Buy in Advance, Protecting Themselves on Flour Contracts—Speculator, who Alone Risks Uncertainty of Market, Balances Supply and Demand

By C. BIRKETT,
Secretary, Fort William and Port Arthur Grain Exchange

GRAIN exchanges and their methods of doing business are little understood by the average business man not in the grain business. They should be. Grain is our basic industry and affects every business institution in Canada, both large and small. Close to one billion dollars will be brought into circulation by the sale of agricultural products grown in western Canada this year.

The important matter of hedging grain (you might know it by the name of futures or options) is a mystery to many and little understood. Ignorance makes the business man unappreciative; in fact, the reverse is often the case. You hear men on the street refer to grain exchanges as gambling holes and dens of thieves, and yet the business of these men would materially suffer if the grain exchanges and the machinery of the grain trade were withdrawn from the market.

Hedging Avoids Speculation

Curiously enough, while hedging is sometimes designated speculation by the uninformed, it is primarly used to avoid speculation. This is the fundamental reason for the hedging market. Banks lend money to any person, firm or corporation in the grain business only on the understanding that all purchases or sales of grain or flour are properly hedged. This is the bank's insurance against violent price fluctuations, and make more safe the credit granted.

First of all let us clearly understand the word hedging and its relation to futures and options. Hedging grain in simple language means matching a purchase with a sale or vice versa. A person who owns grain sells it on the exchange for future delivery, specifying some particular month. That is where the term "futures" is injected and the only "option" in the transaction is that the seller of the grain for future delivery has the option of delivering the grain on any day during the specific month; either the first day or the last day.

Speculator Balances Market

There are two main classes who take advantage of the hedging market. These are (a) sellers—farmers, country elevators, etc., and (b) buyers—millers and exporters.

It stands to reason that the trade of these two large bodies cannot always balance daily. There are not always sufficient buyers, neither are there always sufficient sellers. The result is the injection of a third party—the professional speculator who provides the balance wheel for the whole.

To make hedging operations more intelligent to the readers who are not in the grain business, we will give concrete examples.

Sells at Once to Avoid Risk

Jones owns 50 country elevators and in each one he has a competent manager buying grain from the farmers. Probably during a busy day in October 50,000 bushels of grain will be purchased in these elevators. Mr. Jones now owns the grain but he will not be able to sell it until it has been graded in Winnipeg and weighed at Fort William. He doesn't know when cars will be obtainable to ship the grain out, neither does he know whether the price will be maintained or whether it will fluctuate up or down. He, therefore, orders his manager to sell 50,000 bushels for December delivery, feeling sure the grain will have gone forward by that time. He knows what he paid for the grain; he knows what he sold it for, and what is the best of all, he knows what he has made on the transaction.

Best System for Farmer

It will be seen at a glance that the privilege of hedging grain permits the grain dealer to pay the producer the best possible market price. A little thought on the part of the reader will substantiate this. If hedging was not permitted or no facilities were provided, the country elevator operator would have to protect himself against delays in transportation by taking from the current cash price a sufficient margin to recoup him against any fluctuations that might arise in price. In this case the farmer would receive less for his produce and the country elevator operator would in time undoubtedly be a business failure. With the hedging facilities provided, and with such a wonderful system of telegraphs and telephones, the farmer is enabled to secure for his grain the highest market price on the basis of Fort William, less, of course, freight charges, etc.

Miller Buys for Future Delivery

The question might now be asked—"To whom does the country elevator operator sell his wheat for future delivery?" The answer is to the miller, exporter or speculator. The miller might have sold a large quantity of flour on contract for future delivery, he wants to make sure that he can secure the wheat at a price low enough to give him a profit, so he goes into the hedging market and buys wheat for future delivery. He then knows what the wheat is going to cost him when delivered. If he is a good miller he knows exactly what it is going to cost to grind the wheat into flour, and he knows what he can sell the flour for at some future date. The same procedure takes place when the exporter has an order from overseas. If he was not able to buy grain for future delivery the export business of grain in Canada would drop to a minimum. Transportation and finances would be seriously tied up and our whole marketing system would suffer.

Speculative Element

The third class who operate in a hedging market are the speculators. The work of these speculators is misunderstood and no doubt the public opinion in regard to futures is based on the work of this class of trader.

As stated herein before it stands to reason that the millers and exporters do not want from day to day all the hedging trades that are available. They only go into the market as the demand for the products milled or handled by them warrant. It will, therefore, be seen that there must be, of necessity, a third party who is always willing to step into the breach to take the trades as they come into the market from day to day. If the third party did not exist the constant market would not be present. The work of the speculator serves a useful purpose in this way; that is, by their willingness from day to day to either buy or sell at any time. They utilize the market facilities and permit the owners of country elevators to buy grain on any day of the week from the producers. The economic value of the hedging market would be seriously impaired if the country elevators could not make rapid trades from day to day. The speculator is the man who permits this to be done.

It requires a separate article to give the reader full information about the theory, benefits and evils of speculation. It is an economic subject of vital importance.

Corporation Finance

Western Canada Flour Mills Profit Lower—Lack of Export Business the Principal Factor Canadian Pacific Net Earnings Improved in September Ottawa Light and Heat Company Takes Over Ottawa Power — Barcelona and Brazilian Traction Companies Made Better Showing in September

Brazilian Traction, Light and Power Company.—Net earnings of the company again showed a favorable increase in September, as compared with last year, the figure being 1,208,000 milreis, or the second highest increase this year, the highest being in August. For the first nine months gross earnings amounted to 96,665,000 milreis, as against 83,559,000 for the same period last year, while net earnings for the nine months amounted to 51,544,000 milreis, an increase of 7,911,000 for the year.

Barcelona Traction, Light and Power Co.—A very favorable showing was made in net earnings of the company for September, the figure being 1,945,823 pesetas, an increase of 793,844 pesetas over the same month last year. Aggregate net from March 1, was 12,126,693 pesetas, an increase of 4,364,538 compared with the same period a year ago.

At the present time the labor situation in Barcelona, Spain, is far from promising, but it does not appear as though the company has been greatly affected. At the end of October, workers in the electric light plant threatened strike in sympathy with the metal workers, but whether they have done so yet it is not definitely known. If they do so, however, it will no doubt be reflected in subsequent statements of the company's earnings.

Carriage Factories, Ltd.—At the annual meeting of the company in Toronto last week, the old directors were re-elected, with the exception of W. F. Brock, whose place was taken by F. J. Neale, of Toronto. President J. B. Tudhope, who was in the chair, announced that the company's bonds, which had been repurchased, together with Victory bonds purchased, both filed with the Montreal Trust Company, now amount to more than $30,000 over the total bonded indebtedness of the company. It was also pointed out that the company's liabilities had been reduced by $1,130,000 during the past two years. Operations at the Orillia plant were being turned more in the direction of motor accessories, leaving the carriage business to the Alexandria plant. Business is somewhat dull in both lines at present, and no prophecy could be made as to conditions in the immediate future.

Ottawa Light, Heat and Power Co.—Announcement has been given of the purchase by the company of Ottawa Power Co., including the hydraulic power plant, power house situated on Victoria Island, and also six water lots at the Chaudiere. Recently a bond issue of $1,200,000 was made by the company, and at the time it was announced that the money would be used to acquire additional developed water power. The above-mentioned deal was undoubtedly the reason for the new financing, although nothing was said at the time.

London Street Railway.—After a personal inspection of the receipts of the railway for October, Commissioner E. B. Ingram, of the Ontario Railway and Municipal Board, made the following statement:—

"I am of the opinion that the board can pay to the men surplus earnings that accumulated during the month of September. The increase will be given the men on the 1st inst. And this appears to be satisfactory to the employees as far as I can ascertain."

In regard to the redemption of bonds, Mr. Ingram states that the board has definitely made up its mind to redeem the bonds as a mortgage provides and as has been done for five years before the board took over the road.

Canadian Pacific Railway Co.—An improvement is shown in the September earnings statement, which has just been issued. Gross earnings show an increase of 14.[illegible] per cent., as compared with an increase of [illegible] per cent. in August, over the corresponding months a year ago, while operating expenses in September showed an increase of 19.9 per cent., as compared with 37 per cent. in August. The gross for the month at $20,009,287 is the largest for September in the history of the road, and a record is created also in expenses for the month which amount to $16,100,632. Net earnings at $3,908,654 show a decrease from a year ago of $183,264, while showing an improvement over the August figures, where the net showed a decrease of $1,577,354.

Although down from the net earnings of September, 1919, the showing under review exceeds that made in 1918 and 1917, but falls below that made in any year back to 1909, including the so-called poor years immediately preceding and following the year of the war, although in those years the gross for September amounted to only slightly above $10,000,000, or one-half the earnings shown for the month recently passed. Gross earnings for September also create a record for any month this year up to that time.

Gross earnings for the nine months amount to $146,000,000, which is $20,000,000 above that for the preceding year, and more than double the gross earnings in 1915. Yet in 1915 the net profits of the railroad for the nine months amounted to more than $24,000,000, while for the period under review they amounted to barely more than $19,000,000. In fact, net earnings are the smallest in the recent history of the road. In 1915 net profits were equal to more than one-third the total earnings; in 1920 net was equal to less than one-eighth.

Western Canada Flour Mills Co., Ltd.—Profits of the company, after providing for reserves, for the year ended August, 1920, amounted to $414,723, as compared with $437,986 in the previous year, a decrease of $23,263. This showing is in line with recent exhibits of companies operating in a similar field. In regard to the decline, Andrew Kelly, president, points out in his report to shareholders that such a position was due to the lack of export business, the mills of the company having been shut down at various intervals in the period, with the result that production was reduced substantially. With the abolition of the Canadian Wheat Board, Mr. Kelly points out, there is now permitted the resumption of business with foreign connections as prevailed before the war. Provided the mills are operated to capacity, he states, the current year's results should be satisfactory.

Dividend payments were the same at $250,000, while bond interest is shown as $79,253, as compared with $83,555 in the previous year. A special Victory bond dividend which was distributed to shareholders to the amount of $250,000 in October, 1918, was repeated in November, 1919. The balance carried forward was $518,335, as against $712,865 last year.

While total assets of the company are lower, being $5,-[illegible], as compared with $5,635,633, the liquid position is slightly stronger. The following principal figures illustrate this point:—

	1920.	1919.
Current assets	$2,213,371	$2,110,171
Current liabilities	1,194,093	1,101,626

Itemizing the above two accounts shows the following result:—

	1920.	1919.
Accounts and bills receivable	$ 291,547	$ 598,326
Inventory	1,302,907	935,779
Victory Loans	169,650	250,000
Cash	79,009	251,651
[illegible]	100,256	74,414
Bond interest	38,874	41,174
Dividends accrued	100,000	100,000
Accounts and bills payable	1,055,219	960,451

Farmers' Telephone Company.—The company, which operates in Carleton County, N.B., is making application to the provincial Public Utilities Commission for increased rates. The company asks for an increase in residential rates from $14 to $20, and on store and office telephones from $18 to $30. The company's revenue in 1919 was $9,000, which amount did not cover expenses.

Toronto and Niagara Power Company.—The company has advised its power users of another increase in rates. The average cost of current under the new rates is 2.6 cents per k.w.h. This average compares with 2.2 cents in 1918 and 1.6 cents in 1917. The reason for the increase is given as increased labor charges, cost of materials, taxes, etc.

"HEDGING" GRAIN FACILITATES MARKETING

(Continued from page 49)

It might also be stated that the public, farmers, professional men, etc., also deal in "futures." Grain exchanges, however, do not approve of the public participating, because in so far as this class is concerned it is nearing the gambling stage. They do not understand market conditions, etc., and as a general rule have a blind faith in some information they have received from a so-called friend. The public should not participate in the "futures" market. The grain trade of western Canada has reached the point now where reputable firms will not handle accounts of this nature; they never do any good, but more often than not breed distrust.

The producer himself sometimes takes advantage of the hedging market, and he has a perfect right to do so. We will say, for instance, that a farmer has 5,000 bushels of wheat, and thereby ties up his entire liquid capital. Some farmers, who understand the hedging process, sell their wheat when it is thrashed instead of holding it, and then turn round and buy wheat on the May option. This means they have only possibly 25% of their capital invested in the option and 75% of capital is available from the sale of wheat. If the market advances the farmer will make money just the same as if he had held his own wheat. If the price goes down he will lose just the same as if he held his wheat. The one advantage he has, however, is that the grain has been marketed and he has had the use of at least 75% of the value thereof, and the other 25% is held by the broker as a margin on the May wheat.

Less Capital Necessary

To the student it is quite apparent that the privilege of hedging prevents a monopoly and also reduces to a minimum the marketing cost. It will be seen that if hedging was not permitted large financial concerns would only be able to co-operate They would be the only concerns that would have sufficient funds to carry large quantities of grain. The small companies would not be able to do this, because so much money would be needed to carry grain.

If any one has studied the marketing system of the grain trade and investigated the cost thereof, it is quite apparent that the margin the producer pays for the marketing of his grain is very nominal. I very much doubt whether there is any other commodity in the world that is handled on so close a margin as grain. The grain trade of western Canada is satisfied with a small profit on account of the huge volume and on account of hedging facilities that are provided for them. Banks have always been able to finance the movement of the western crop, but even a bank would not lend money to a person, firm or corporation for the purchase of grain at country points, if hedging facilities were not available. Hedging is the banks' insurance

Manitoba's potato crop this year will be 3,700,000 bushels, the Manitoba Agricultural Department announced on October 8, after the conclusion of an estimate based on reports from all sections of the province. This is short by more than 1,500,000 bushels of an average yield

CORPORATION SECURITIES MARKET

(Continued from page 46)

notified when and where the bonds will formally receive the guarantee, which, it is felt, should materially enhance their value.

The Oak Tire and Rubber Co., Ltd., is offering through a local brokerage house $250,000 8 per cent. participating preference stock at $100 per share, and carrying with it a common stock bonus. The proceeds of this issue will provide for extension to the company's present factory sufficient to practically double their present production.

Payment of Abitibi Debentures

As a result of arbitration, the decision has been made that the $1,000,000 Abitibi Power and Paper Co. 7 per cent. convertible debentures redeemed by the company at 110 and interest on April 1st last, are payable in New York funds.

In accordance with the decision, it is understood that the Montreal Trust Co. forwarded cheques on November 3rd to all debenture holders registered as of April 1st, 1920, for the amount of the premium on New York funds, as at that date, together with interest from April 1st to November 3rd, the date of payment At the time the Abitibi Co. redeemed the debentures there was a divergence of legal opinion as to whether the company should redeem them, paying for them 110 and accrued interest in Canadian funds, or the same amount in United States funds, which were then at a premium. Royal Securities Corporation, the original underwriters of the issue, negotiated an arrangement on behalf of their clients with the Abitibi Company whereby the legal point involved was submitted for arbitration to Eugene Lafleur, K.C., of Montreal. A decision has now been given with the results indicated.

RECENT FIRES

Royal Canadian Mounted Police Buildings at Brandon, $200,000—Planing Mill at Whitby, $20,000—Two Barns at Swift Current, $17,500

Brandon, Man.—October 2[illegible]—Fire which [illegible] [illegible] [illegible] the loss of [illegible] [illegible] [illegible] Royal Canadian Mounted Police [illegible] [illegible] [illegible] with [illegible] [illegible]

Brockville, Ont.—October [illegible]—[illegible] [illegible] [illegible], [illegible] [illegible], belonging to John [illegible], was destroyed by fire. [illegible] [illegible] [illegible] in the [illegible] is thought to have been the origin of the fire.

Chatham, Ont.—November 1—The Imperial Oil Company's pumphouse was damaged by fire. The loss is $1,000.

East St. John, N.B.—November 1—The [illegible] building [illegible] to the Boys' Industrial Home was damaged by fire.

Fredericton, N.B.—November 2—The frame [illegible] on Queen Street, which was first used by the House of Assembly of New Brunswick, was destroyed by fire.

Gagetown, N.B.—October 29—Fire of an unknown origin completely destroyed two barns and their contents belonging to William Graham at [illegible]. The loss, which amounted to $2,000, was not covered by insurance.

Janetville, Ont.—October 2[illegible]—The house of Fred M[illegible] was burned to the ground causing a loss of $4,000.

McConnell, Que.—The buildings belonging to Alfred [illegible], known as the Carlton Turner Place, were destroyed by fire. The loss is only partially covered by insurance.

Montreal, Que.—November 1—Several dwellings, from 91-100 Notre Dame Street East, were damaged by fire. The loss was partly covered by insurance.

Newcastle, Ont.—October 31—The large barn and stable in Hope township, the property of Wm. Payne, of Clarke township, was destroyed by fire.

New Hamburg, Ont.—November [illegible]—G.T.R. station destroyed by fire.

Port Hope, Ont.—November 1—Large barn and [illegible]house, the property of Mrs. [illegible] of Toronto, and situated [illegible] off the main street, was destroyed by fire. Loss [illegible] [illegible] of $600.

Squamish, B.C.—October [illegible]—The Gilbert and Merrit [illegible] was destroyed by fire. The [illegible] was fully [illegible].

Swift Current, Sask.—October 26—Two barns on the [illegible] of Wm. H[illegible] were completely destroyed by fire, causing a loss of $17,000, with insurance of $8,800. The fire was caused from spontaneous combustion.

Toronto, Ont.—November 1—Oil tank factory of S. F. [illegible], 6[illegible] Fraser Avenue, was damaged to an extent of $1,000. A fuse blowing out ignited one of the tanks. A fire broke out on the third floor of a building at 124 King Street West. The loss is estimated at $1,100.

Upper Dorchester, N.B.—October 26—The sawmill and [illegible] of James Anderson and Son was totally destroyed. The loss is estimated at $15,000, partially covered by insurance.

Whitby, Ont.—October 30—Fire did damage to the amount of $20,000 to the planing mill owned by the Whitby Brick and Clay Products Co.

Winnifred, Alta.—October 26—The home of Fred Brown was destroyed by fire. One of the children playing with matches started the fire.

ADDITIONAL INFORMATION CONCERNING FIRES

Bowmanville, Ont.—October 24—Barns, stables and contents belonging to W. M. Horsey were destroyed by fire. The fire was believed to be caused by incendiarism. The loss, which is $7,000, was not covered by insurance.

Port Arthur, Ont.—October 17—The planing mill of the Pigeon River Lumber Co., Ltd., was damaged by fire. The total loss on contents and building is $30,000.

Stewiacke, N.S.—October 10—Large sawmill, valued at $57,000, and lumber in yard valued at $115,000, belonging to Rufus E. Dickie, was destroyed by fire. The fire started over the boiler house. The sawmill was insured to the amount of $20,000 in the following companies: North British Mercantile, Home Underwriters' Agency and National Fire Insurance Co. of Hartford. There was no insurance on the lumber, but the greater part of it belonged to the British government.

ONTARIO FIRE INSURANCE AGENTS' ASSOCIATION

A constitution and by-laws for the Ontario Fire Insurance Agents' Association were adopted at a meeting held in Toronto on October 27th. Plans for the association had already been discussed at a preliminary meeting held on September 8th, summoned by the Toronto Insurance Conference, when a temporary organization was brought into being and a committee to draft constitution and by-laws appointed.

About one hundred agents attended the meeting on Wednesday last. It was decided that the operations of the association should be confined to the province of Ontario. The objects of the association are, as defined, to assist in the regulation of fire insurance in the interests of the public, the [illegible] companies and the agents; to aid in the observance of [illegible] and [illegible] statutes relating to fire insurance, and to [illegible] the interests of the members in every [illegible] [illegible]. Any individual, firm or corporation in Ontario holding a fire agent's certificate is eligible for membership.

The following officers were elected: President, John S. [illegible], [illegible]; [illegible], [illegible] F. Bonin, Port Arthur; [illegible] [illegible], [illegible]; A. A. [illegible], Midland; Cecil Bethune, [illegible]; [illegible] [illegible] T. [illegible], Ottawa; J. J. Mason, Bowmanville; [illegible] [illegible], [illegible]; J. T. Truman and Hugh [illegible], [illegible]; [illegible] [illegible], St. Catharines; George [illegible], [illegible]; [illegible] [illegible]thwaighte, Sault Ste. Marie; [illegible] [illegible], [illegible]; A. E. [illegible]pin, Chatham; R. M. [illegible], [illegible]; [illegible] [illegible], St. Thomas; R. Thomas Orr, [illegible]; [illegible] [illegible]; [illegible] H. Weddell, Peterboro'; [illegible] [illegible]; [illegible] [illegible], Kingston; Lewis [illegible]; [illegible] [illegible], Orillia; Charles C. [illegible]; [illegible] [illegible]; [illegible] H. Bennett, Barrie; William [illegible]; [illegible] H. Seibert, Kitchener; [illegible] [illegible]; [illegible]; secretary-treasurer, J. H. King, [illegible] [illegible].

Necessity and Opportunity for Canadian Exports

Small as Well as Large Manufacturers Can Increase Business by Looking Abroad—Private and National Advantages—Domestic Markets Are Contracting—Assistance Provided by Government — Steamships Sail From Montreal and Vancouver to Many Foreign Ports.

By COL. C. R. HILL,
Managing Director, Hill and Co., Ltd., Toronto

(This is the first of a series of articles on Practical Exporting, to be published in The Monetary Times.)

EVERY newspaper and industrial magazine of to-day contains some reference to exports; every financial paper quotes current exchange in its relation to exports and shows that a Canadian dollar is only worth ninety cents in the United States; the Navy League, the big banks, the Department of Trade and Commerce all urge the Canadian manufacturer to export.

The first article in this series deals with the advisability and necessity of exporting as well as with the opportunities for the big and small manufacturer. However, it is useless telling a man to talk Chinese until he has learned the language, and the subsequent articles are designed to give practical information on exporting from the period of seeking foreign markets to that of making actual shipments.

Subjects of Discussion in this Series of Eight Articles on Foreign Trade.

1. Necessity and Opportunity for Canadian Exports.
   (a) Necessity for Export.
   (b) The Field for Exports.
2. How to get into the Export Field.
   (a) Sending representatives abroad.
   (b) Direct correspondence through Government Trade Organization.
   (c) Advertising in Export publications.
   (d) Through medium of Export Commission houses.
3. Home Organization for Export Sales.
4. Foreign Organization for Export Sales.
   (a) Foreign Branches.
   (b) Exclusive agencies.
   (c) Independent customers.
5. Making up prices for foreign markets.
6. Financing of Exports.
7. Freight forwarding and shipping documents.
8. Miscellaneous Problems.

Necessity for Export

It is both a national and individual duty for big and small Canadian manufacturers to commence or expand export sales.

Firstly, from the national aspect, it is apparent to anyone who studies international finance that the more money which is owing to Canada for products sold abroad, the more actual value is placed on our own currency in the foreign financial exchanges. Secondly, from the national standpoint, comes the value of advertising which goes with every Canadian-made article used thousands of miles from home. No one will deny that the finest and greatest advertisement Canada has had in its history was that caused by the fighting ability, initiative and personal good character shown by our men in France and Belgium. The praises of Canada resounded around the world from 1915 to 1918. Foreign buyers who never thought of Canada before the war have since studied our producing possibilities and are eager to prove that their kindly sentiment is not a temporary thing. No one can better commercialize and make permanent that sentiment than the Canadian manufacturer by proving that the quality of Canadian products is as sterling as the character of our fighting men. Thirdly, from the national standpoint, is the bald, plain fact that commercial reasons are at the back of all wars and will best be avoided by binding nations together with strong mutual commercial interests.

Recent Activity Was Abnormal

Dealing with the question of exports from the standpoint of the manufacturer's domestic problems is a little more difficult. Generally speaking, the manufacturers realize that the buying in 1919 and early in 1920 represented abnormal conditions; construction had been stopped for so long that a rush came on, which was only retarded by high prices. Stocks of all essentials and non-essentials had become depleted under war conditions and required replenishing; money was released from war purposes. All these things caused enormous domestic orders and prevented the manufacturer from either seeing the necessity or possibility of filling foreign orders. In the meantime, many plants have been extended and more machinery installed on the expectation of a furtherance of heavy domestic business, which will really become less until conditions become more normal.

The obvious remedy is to seek foreign markets to keep these plants working to full capacity and at profitable prices. Furthermore, the seeking process should not be delayed, as the development of foreign markets is a lengthy process. This can best be appreciated when one realizes that a letter posted to Cape Town or Calcutta to-day cannot produce a reply for nearly three months. Therefore, to get into a foreign and distant market is a matter of patience as well as study, and temporary domestic problems should not be an excuse for delaying an export campaign.

To the very big manufacturer the foreign market has been tried with more or less effort and in various ways. However, the very smallest manufacturer has a foreign market if he will only try it out. It might be noted that an Ontario manufacturer of golf shafts with a very small plant of lathes, and who does nothing more than make a plain smooth shaft, sells virtually his entire output in England; nevertheless, he submitted his product to South Africa three months ago and received a substantial order by return mail. A Toronto manufacturer of plain wooden rulers cannot catch up with his export orders.

Therefore, these series of articles should be read and re-read by the small plant owner, as well as the executives of more pretentious establishments.

The Field for Export

This is a broad and indefinite subject on which reams of paper might be printed and sufficient population and trade statistics to make one dizzy. There is no one in Canada competent to say what is or is not saleable in a distant country, unless he has been there or studied the possibilities from reliable information originating in that country. For instance, to consider India as a field only suitable for articles required in hot countries is a fallacy. It is hot on the central plains but not on the northern hills. To estimate whether a Canadian manufactured article will sell in Italy is impossible until one knows whether the Italians like it, whether the delivered price meets domestic or foreign competition, and whether the Italian government will allow it to enter the country.

The best way to know what export field each article may expect is to try it out in as many trading countries as it is possible to get into. The various channels by which this may be accomplished will be dealt with in the article which follows this in the next issue of *The Monetary Times.*

Shipping Facilities

In any event, trade follows steamer routes, and it may be taken for granted that Canadian products of many varieties have found a market in the countries where the ocean liners call after leaving on their regular trips from Canadian Atlantic and Pacific ports. November sailings from Canada include the following: From Montreal to Liverpool, London, Glasgow, Dublin, Antwerp, Rotterdam, Hamburg, Havre, Trinidad, Melbourne, Auckland, Buenos Aires, Rio Janeiro, Santiago, Calcutta and Singapore; from Vancouver to the British Isles and the Orient.

In addition to the above sailings there are regular lines out of New York going to numerous additional ports, established to take care of United States exports and which are just as available for Canadian exports passing through the States in bond.

To further appreciate the field for Canadian exports, one must know that the Department of Trade and Commerce at Ottawa has studied the possibilities in almost every country, resulting in the establishment of Canadian trade commissioners in many lands. Extensions to this service are under contemplation and in the meantime, where there is no direct commissioner, the British trade commissioners' service is always willing to do its share in introducing Canadian products.

In the next issue dealing with the problem "How to Get Into the Export Field," particulars of this Canadian and British trade commissioners' service will be given.

MAY PROSPECT FORESTS FOR OIL

New Regulations of Dominion Government—National Debt Still Further Reduced in October

(Special to *The Monetary Times.*)

Ottawa, November 11th, 1920

RECENT developments in oil prospecting in the west have made necessary some new regulations. An order in council just passed sets forth that requests have been made to the Interior Department that the petroleum and natural gas regulations, applicable to Dominion lands, should be extended to the forest reserves, in order that an opportunity may be given to test the lands with a view to discovery, and representations have been made that, from surface indications, these lands may contain a commercial supply of oil. It would, therefore, appear to be advisable in the public interest, says the order, that persons desiring to do so be permitted to prospect for oil and natural gas in at least a portion of these reserves, since the discovery of these products would be of great public benefit and would also materially enhance the value of portions of the reserves retained by the Crown. The new regulations come in force on December 1 next.

Another order-in-council provides that, for a period of five years after the date upon which the Minister of the Interior decides that oil in commercial quantities has been discovered [illegible] per cent. [illegible] Thereafter it shall be 10 per cent.

Measures for Prospectors' Safety

[illegible] Royal Canadian Mounted Police. In consequence, only those in good physical shape to stand the rigors of an Arctic winter and have enough "grub" to keep them, will be permitted to go. The northwest company that made the discovery has applied for leases, which will probably be granted, but under stringent regulations.

Another oil strike is reported at Czar, near Wainwright, Alberta. When the Petroleum and Gas Act was applied to the forest reserves, it was provided that half the profits should go to the Crown, and a similar provision is likely to be made now. The limit leased to any one person is 1,920 acres. The Shell Oil Co. development, which did not materialize, undertook to split the profits with the government.

National Debt Reduced

Expanding revenues last month brought a reduction in the net Canadian national debt of $2,634,356. At the end of September the net debt (no credit being taken for non-active assets) stood at $2,276,516,163. During October it was reduced to $2,273,881,806, at which figure it now stands. The [illegible] revenue, coupled with a heavy fall in capital expenditure due to the practical closing up of war accounts, is regarded with keen satisfaction. During the seven months of the fiscal year ending October 31 ordinary revenue was as follows: 1920, $256,576,96[illegible]; 1919, $186,408,795, an increase in revenue of $70,168,172. Total revenues collected in October alone were $[illegible], compared with $27,323,334, an increase of over [illegible] million dollars.

The new taxes imposed on sales and luxuries last session are proving to be money-getters. They are included in [illegible] returns under the head of inland revenue, [illegible] last month was nine times what it was in October [illegible], the figures being: October, 1919, $[illegible]; October, 1920, $[illegible]. Income tax collections [illegible] in comparison with $272,691 in October, 1919 [illegible]. Business profits tax [illegible]. Both customs and excise also [illegible]. Ordinary expenditure during the last [illegible] 1920 and 1919 was: 1920, $[illegible]; 1919, $[illegible]; increase, $21,341,507. Capital expenditure during the seven months was $21,804,572 in 1920, in comparison with $230,164,048 in 1919.

Western Farmers Hit by Drop in Wheat

But They Are Not the Only Ones Caught by Falling Prices—Producers Must Lose by Movement Which Benefits Consumer—Two Dollar Wheat Would Net Farmer Just $1.70—Farming Profits May be Small This Year

By ANGUS LYELL

FARMERS all over the west will be hard hit if there is any further material drop in the price of wheat. The cost of putting in and taking off the crop has been abnormally high, and if less than two dollars a bushel is realized, the margin of profit, in a good many cases, will be very small. The government has rejected the appeal of the Canadian Council of Agriculture for the re-introduction of a wheat board, similar to that employed last year, on the ground that the concerted control of the foreign markets which then existed is no longer operative. The government will interfere only if a situation develops similar to that which existed last year.

What gain the average farmer will make with wheat selling round two dollars a bushel can at best be but estimated. An important factor—in fact, the controlling factor—is the yield per acre, which varies considerably. In some districts, it may be heavy enough to provide for a reasonable gain even if the price dropped to a dollar and a half a bushel, while in others, it may be so scanty that two and a half dollars might be required to avoid a loss.

It is often hard to determine just what is the actual gain or loss on farming operations. Proper records of operating expenditures may not have been kept. Allowance may not have been made for capital outlays, or for depreciation on the equipment used or other factor of production. One farmer who gave evidence the other day before the Tariff Commission at Edmonton stated that he expected a return of $3,685 from a five-hundred-acre farm. But he admitted that he was not including his own labor and that of his adult son in the operating charges. Very likely he was also omitting other proper charges against his revenue, such as interest on his capital investment—in land, buildings, machinery, work-horses, and so on—and depreciation on his wasting assets. A marked drop in the price of wheat would likely eliminate this man's gain.

Costs Were High This Year

The year has been a hard one on the farmers in the west. Owing to the poor crop last year, there was in several districts not only a shortage of seed but insufficient feed. This led, in many cases, either to a loss in disposing of live stock or a heavy outlay for maintenance. The cost of seed was high. In Alberta, for example, seed oats cost from $1.25 to $1.75 a bushel, and wheat from $2.50 to $3. Many farmers had to purchase their seed. Then labor for spring operations cost about one hundred dollars a month, exclusive of board, and, in some cases, men had to be engaged for the whole season so as to ensure the harvesting of the crop. Day wages in the fall soared to eight and ten dollars a day.

On an average, about two and a half bushels of wheat is required per acre for seed. At three dollars a bushel, the cost per acre for seed would be $7.50. Then let us put the average cost of labor per acre at $11, which, I think, is not excessive for all operations—plowing, discing, harvesting, thrashing. Estimate the interest on the capital invested in land, buildings, work-horses, and equipment at $6.50 an acre, and we have total charges of $25 an acre.

Net Return from Two Dollar Wheat

The average yield of wheat in Alberta this year will be about twenty bushels to the acre, which is better than the yield in Saskatchewan. Now, twenty bushels at two dollars each gives a return of $40. But wheat selling at $2 would net the producer only about $1.70 at the elevator, or $34 an acre, which, according to our estimate, would give a gain of $9 an acre. The return from a five-hundred-acre field, which is much larger than the average under cultivation, would be but $4,500. But were the market price to fall to $1.60 a bushel, it is obvious that the margin of profit might be entirely eliminated. In pre-war days, when wheat sold at ninety cents a bushel, the cost of operation was very much less.

Wise Action in Removing Control

It is unfortunate from the viewpoint of the farmers that there has been a marked drop in the price of wheat, because of the heavy cost of production. But I think the government acted wisely in abolishing price control, and I cannot see that it would be in the best interests of the people as a whole were any measures now taken—if any could be taken—to bolster up a falling market, even though the agents of those European nations which most need our wheat may be helping to manipulate prices.

Market conditions last year were very different from those which now exist. European buyers were short of capital, and the buying and selling devolved on the nations interested. Both the United States and Canada, as exporting countries, had to finance the European powers that purchased their wheat, either by granting loans or credits. For that reason, it was necessary to fix prices and to practically eliminate a free trading market.

This year there is no such restraint. There is no concerted purchasing by the European nations. The European nations are receiving no aid from Canada or the United States to help them in financing their imports. There is an open market.

We all know very well that the high level of prices of commodities cannot be maintained. We know that, when a sharp break comes, some—producers, manufacturers, jobbers, speculators, and others—are bound to suffer loss. It will be unfortunate if our farmers are "nipped," but a general decline in the cost of food will be a blessing to millions. Once there is a marked reduction in the cost of the necessaries of life, there will be a general break in the cost of everything. We will be well on the road to normal conditions.

World Market Must Rule

European buyers cannot well be criticized for purchasing in the cheapest market. France has an excellent crop, perhaps more than ample for her needs. Britain, too, has a good crop, although it is considerably short of her requirements. To-day, both the Canadian and the United States dollar are at a premium in the London market. You can (at the date of writing) buy the pound sterling in Canada at $3.85—a discount of about twenty-two per cent. This means that if the market price of our wheat is two dollars a bushel, the British purchaser has to pay an extra forty-five cents for it. The premium on the United States dollar is higher. While present exchange conditions continue, overseas buyers will undoubtedly delay their orders as long as possible and then reduce them to a minimum.

But the good harvest this year will be a blessing to the average man. While the tendency in the west is for the producers to hold their wheat in expectation of an increase in the market price, the wheat cannot be carried in storage for ever. It will be forced on the market by sheer necessity. There is little money at present in circulation, business is far from active, and merchants are beginning to insist on settlement of their accounts. Very soon a condition will be reached where it is imperative to sell. And while a loss to the farmers is to be regretted, more so than a loss to the sugar refiners who endeavored to bolster up prices, a general reduction of prices will be of untold good to the community.

BRITISH COLUMBIA WOULD BORROW MORE

Complain that Eastern Institutions Fail Them and They Must Go South for Capital

(Staff Correspondence.)

Vancouver, Nov. 11, 1920

THE future of Vancouver will be built up around its shipping and export trade, and, while just at present export trade is somewhat quiet from Pacific Coast ports, the outlook for the future is undoubtedly bright. Vancouver has a wonderful harbor, and has immense possibilities before it. The natural resources of the province of British Columbia are possibly greater than any other province in the Dominion, and much capital will be needed to develop them.

There is a more or less marked feeling of bitterness among representative men in Vancouver at the financial institutions of eastern Canada and our big financial men for their lack of foresight in not giving greater assistance or taking advantage of the great opportunities there are for the development of British Columbia resources. They claim that American interests are much keener in seeing the need and taking advantage of it, and that many of the important developments have American capital behind them, particularly in mining, pulp industry and numbers of others.

More Capital Needed

Surely the great heritage that Canadians have in the province of British Columbia should be attractive enough to Canadian and British capital, so that in the immediate future the necessary money for turning these great resources into wealth would be made available.

In Point Grey municipality considerable growth has taken place this year. More than six hundred houses have been built, and there is urgent need for increased water supply to take care of the population. To further show the growth and importance of Vancouver, the C.P.R. contemplates making extensive enlargements and alterations to the magnificent Hotel Vancouver, at present one of the largest and finest of the C.P.R. hotels.

British Columbia Electric's Position

Population and business is increasing steadily at the Pacific Coast. Figures compiled by the public utility companies show many more consumers than there were a year ago. The British Columbia Electric Railway Company has made some two thousand new lighting connections in the last year, and there were many homes built outside the lighting area. A recent compilation places the population of Greater Vancouver at 2[illegible],000.

In the last few months the increase in street car traffic in and around Vancouver has been, roughly, 500,000 a month. In meeting this increase the British Columbia Electric Railway Company is in an anomalous position. In the first place the government of the province at its last session put through an Act changing the rule of the road from left to right. The cost of this change would be mainly connected with changing the tracks and rolling stock of the street railway companies, and it is estimated that the change would cost about a million dollars. The British Columbia Electric Railway Company in the meantime cannot order any more rolling stock until this change is put either way, but no one in the province has decided who is to pay for making the change, and there the matter rests. In the meantime the traffic continues to grow.

Utilities' Jurisdiction Not Yet Settled

Another condition is connected with the fares charged in Vancouver. The railway company is at present under the jurisdiction of the Dominion Railway Commission, although [illegible] has taken a stated case to the Supreme Court of Canada for hearing in February on the question of its jurisdiction. At the last session of the Federal House an Act was passed returning the British Columbia Electric Railway Company to provincial jurisdiction at the end of one year, which expires in July, 1921. This means that the company will return to the original fares as fixed in the dozen or more franchises with cities and municipalites. As the company now collects six and seven-cent fares, authorized first by the late Provincial Public Utilities Commission and then ratified by the Dominion Railway Commission, the possibility of a return to a five-cent fare is serious. In the meantime the company is receiving requests for extensions and better service, but, owing to the uncertain condition of its fares, it replies that nothing can be done in the direction of further investment until its fares are definitely fixed.

Industrially, Vancouver is forging ahead rapidly. Since January, 1916, 296 new power consumers have located in the city, with a connected horse-power of 15,529. In the same time 8,186 new lighting customers connected with the British Columbia Electric lines. Similar increases are recorded by the British Columbia Telephone Company.

"EQUITABLE" NOT AN INSURANCE TRADE MARK

Department Holds American Company Has No Proprietary Interest in Title—Ontario Equitable Life and Accident Will be Name of New Company

THE word "equitable" is of such common use in the names of insurance companies that no one company can claim its exclusive use. This is the substance of a ruling of the Ontario Insurance Department in connection with the application for incorporation of the Ontario Equitable Life and Accident. Superintendent Gray says:—

"It was urged that the word 'equitable' was so associated in Canada with the business of the Equitable Life Assurance Society of the United States as to have become the property of that company in connection with life insurance in a manner similar to a trade name in a commercial enterprise. I have come to the conclusion that the Equitable Life Assurance Society of the United States has no proprietary interest in the word 'equitable.' It was, in the first instance, copied by this company from the Equitable Life Assurance Society of England, which had already acquired a world-wide reputation. The word 'equitable' is part of the name of another English company, known as the 'British Equitable Assurance Company,' and also that of another company, called the 'Scottish Equitable Life Assurance Society,' and of at least two other companies incorporated in the United States. Furthermore, the cases establish that the word is not of a quality which contains the essentials necessary to constitute a trade mark or trade name. (See Standard Ideal vs. Standard Sanitary 1911 Appeal Cases, p. 78.)

Aim to Prevent Confusion

"Aside from the above considerations, the real question upon which the decision of the department must be based is whether the name 'Ontario Equitable Life and Accident Insurance Company,' proposed to be given to the new company, is liable to be confused with the name, 'The Equitable Life Assurance Society of the United States.' My conclusion is that no confusion will result from the fair use of both names.

"If any attempt is made by representatives of the new company to pass off the policies of the new company as being the policies of the other company, there are proper and adequate legal remedies for such an offence.

"In order that the misuse of the name, innocent or otherwise, may be guarded against, the applicants will be asked to provide an undertaking or agreement in form satisfactory to the department to the effect that in any abbreviation of the name of the company for ordinary purposes the word 'Ontario' will be retained to distinguish the name from that of any other company whose name includes the word 'equitable.'

"In coming to this conclusion and adopting this suggestion I have been guided by what has been the practice of insurance departments in other jurisdictions, particularly in Canada and Great Britain in similar circumstances."

SELLING CANADIAN GOODS ABROAD

SOONER or later this country must build up a substantial surplus of exports over imports, and maintain that surplus for an extended period. This will not make Canada rich, but will merely enable it to pay the interest on the immense sums which have been borrowed abroad. A large part of our exports will no doubt for a long time to come consist of raw materials, the product of our farms, forests, mines and fisheries. But in adopting protection with its consequent high costs we have imposed a handicap on these industries, which must be offset by the export of products of our manufacturing industries whose existence and success is made possible by the tariff.

Canada has not in the past been able to build up a permanent surplus of exports. The favorable balances of the fiscal years ended March 31, 1916, 1917, 1918, and 1919 were the result of war conditions. The only favorable balances on record before these years were in 1880 and in the four years 1895 to 1898. In every case the surplus has quickly disappeared when the special conditions causing it were removed. The war-time surpluses were due to the unusually large exports to the United Kingdom, France and other allied countries. In the twelve months ended September 30, 1920, our exports to Great Britain were only $375,461,000, compared to $549,209,181 in the preceding twelve months, and to $712,670,404 in the twelve months ended March 31, 1918. The exports to France were, for these three years, $43,941,390, $73,688,731, and $131,460,692 respectively. These reductions reduced our total exports from $1,358,419,580 in 1918 to $1,210,541,387 in 1919, and to $1,208,919,175 in 1920, being made up in part by increases in exports to other countries.

This is the national aspect of our foreign trade problem. It has also a practical significance to Canadian manufacturers, who build up a large war-time business abroad under the stimulus of a world-wide scarcity of goods, and who must now build up an efficient export organization if their scale of operations is to be maintaind under the more keenly competitive conditions which will prevail in the next few years. Foreign business is a new field for most Canadian manufacturers, and it is one in which success is to be achieved only after years of preparatory work. A comprehensive survey of the situation is made in the series of articles, the first of which is published in this issue of *The Monetary Times*, by Col. C. R. Hill, who has made a close study of the question and whose firm has already been of service to many Canadian manufacturers since it was organized last year.

The suggestions made in these articles are practical, dealing with export organization at home and abroad, agencies, sales campaigns, financing, shipments and packing, and the numerous details which must be considered in foreign business. While Canada is not dependent on foreign business to the same extent as are countries like the United Kingdom, whose prosperity has been built up in this way, yet Canadian manufacturers will benefit to the extent that they can advance our products to the manuactured stage, rather than have them exported merely as raw materials.

FACTORS IN PRICE REDUCTION

BUSINESS men are no longer deceiving themselves as to the trend of business on this continent. Quietness has been rather more in evidence across the border than in this country, for there prosperity had reached its maximum and New York exchange was at a premium in almost every other country. It was expected therefore that the United States would be the first to feel the change, and this expectation has been realized. The industrial and commercial situation in Canada, it is pointed out by the Canadian Bank of Commerce in its November *Commercial Letter*, is influenced to so great an extent by the movements of commodity markets in the United States, particularly those of domestic raw products, that the continued fall on the part of cotton and wool, combined with a determined effort on the part of growers to hold their stocks for higher prices, cannot fail to have an unsteadying effect on Canadian manufactures.

The prospect of a further decline in commodity prices continues to favor conservative buying. Other factors in determining this attitude are the publicity given to the Tariff Commission's investigations, the gradual elimination of government control from the marketing of important manufactured and domestic products, and the feverish movements of foreign exchange. On the other hand there are some reassuring factors. Immigration continues to increase, the greater number coming from British territory. Meanwhile United States farmers continue to take up holdings in western Canada, where land values are firm with a decidedly upward tendency, as is also the case in eastern Canada.

The marketing of the cereal crops during the early part of October was delayed somewhat by declining prices and a shortage of railway cars. Holders of live stock who were favored with good fodder crops deferred shipments pending an improvement in market conditions, but in spite of this an average number of cattle found its way to the markets. Terminal and country elevators are congested with grain, the holders anticipating an advance in prices. Under such conditions the current obligations of farmers and country store keepers have not been liquidated as promptly as expected. This situation creates a strain upon the available supply of credit. In certain extensive areas in the west, there has been an accumulation of farmers' obligations for seed grain, current liabilities, and mortgage arrears caused by a series of bad harvests. Fortunately the threshing returns in most of these districts indicate satisfactory crops this season.

A NEW PROPOSAL ON THE HOUSING PROBLEM

THE housing shortage is now a thing of the past. Property rentals and values have advanced to such a degree that there need no longer be a gap between demand and supply; in fact, it may be necessary to restrict house rents and thereby control the value of improved property, which is the net rental capitalized.

Such at least is the viewpoint suggested by a bill which has just been drafted by the Ontario government for submission at the next session of the legislature. The bill aims at setting up courts for the regulation of house rents. But the record of building by no means confirms this viewpoint. Costs of construction are still so high as to prevent builders from placing houses on the market at the present time. Even the present level of rentals is not sufficiently high to make such an investment profitable, and there is also to be considered the possibility of rents coming down in the period of dullness and contraction upon which we appear to be entering. House rents must be determined on the basis of present construction costs; that such rents may afford too large or too small a return on all property is unavoidable, just as a change in commodity or security prices affects the values of those held by previous purchasers.

A New York court has just held an act providing for the control of rents to be unconstitutional on the grounds that it discriminates between the owners of old and new property. While our Canadian constitution is not so specific in its definition of the rights of the individual as is that of the United States, the spirit of British law requires that there be no restriction of property rights so long as competition prevails. Apart from the fundamentally monopolistic character of land values, improved properties are still bought and sold in the open market, there being no controlling group on either side. If there are still insufficient houses in our industrial centres, the level of commercial values must be made sufficiently high to enable them to be built at a margin of profit. The government [illegible] tried to solve the problem without having given [illegible] to this consideration, and failed to do so. Almost every city in Canada is now [illegible] the control of rents, but [illegible] at the proposed Ontario bill [illegible] any remedy to the situation.

INSURANCE TRAINING REQUIRED

SEVENTY out of one hundred and sixty-eight universities in the United States now have courses in insurance or are about to start such courses. Practically no attention has been given to insurance by Canadian universities, and as systematic training of employees is a difficult thing for an individual company to carry on there is a good opportunity for co-operative effort on the part of the companies. The Insurance Institute of Toronto has offered courses in insurance for the past twenty years, but employees have made little response. Many years ago there was a similar institute in Montreal, but it passed out of existence; last year, however, the Fire Insurance Society of Montreal commenced an active educational program.

There are many organizations of this kind in the United States. At the twelfth annual conference of the Insurance Institute of America in New York recently, President Frederick Richardson reported a substantial development of interest in the institute movement. Not only has there been a large increase in the number of students attending classes and sitting for the examinations, but a much more general recognition of the functions performed by the organization has been secured, he said. The necessary financial assistance to carry on the work planned in previous conferences is now assured, and the institute will go ahead with its program, which includes the following: (1) A permanent office for the institute, with a paid secretary, whose duty it will be to direct the various activities under the president; (2) incorporation of the institute; (3) the preparation of a revised casualty course and life and marine courses; (4) the preparation of suitable text books that may be used both for class work and for tuition by correspondence. A decision will soon be made as to whether the institute will seek to obtain a federal or a state charter, and if the latter, in what state to incorporate.

* * *

The strength of the public ownership movement on this continent is proven by its ability to survive such revelations of graft as are now being made in connection with the United States Emergency Fleet Corporation.

* * *

The Dominion government has instructed its various departments to conserve paper and twine. To the casual visitor to government offices the superfluity of labor is the most glaring example of extravagance.

* * *

A returned soldiers' organization now urges another "bonus" of $8,000,000 on account of loss of exchange on pay received overseas. The ingenuity of war veterans in finding new "claims" on the government could be better applied in productive channels.

* * *

A Montreal despatch dated November 10 states that the Canadian Banks will not finance the importation of securities, while another Montreal despatch of the same date refers to an offering of city of Paris bonds through several Montreal institutions which are members of the Bankers' Association or of the Bond Dealers' Association. The Paris bonds are for the purchase of goods in Canada, but is not money released in Canada to the credit of Britishers also available for the purchase of Canadian goods?

* * *

Tips on oil stocks are the order of the day, but such tips are not always of value. Lunching recently at a club of which he had just become a member, a broker enquired of the waiter if there was any rule against tips.

"No, sir," replied the expectant waiter.

"Well then, [illegible] any Consolidated Oil stock, and it [illegible]."

PERSONAL NOTES

THOMAS COSTELLO, who for some years has been textile [illegible] and Dominion appraiser of customs, has resigned his position to take over the management of the Toronto branch of the Capital Trust Corporation of Ottawa.

M. P. LANGSTAFF, the assistant general manager and actuary of the newly formed Ontario Equitable Life and Accident Insurance Company, of Waterloo, Ont., has been actuary of the Dominion Life Assurance Company, Waterloo, since 1910. Previous to that he was connected with the Imperial Life and the Continental Life, becoming assistant actuary of the latter. He is a Fellow of the Institute of Actuaries of Great Britain and an associate of the Actuarial Society of America. As a result of the organization efforts of S. C. Tweed, the general manager, and of Mr. Langstaff, the first issue of $500,000 of capital stock has already been fully subscribed. This was accomplished between October 1st and October 29th, and probably establishes a record in life insurance organization in Canada.

J. H. C. LAWRENCE, a well known figure in Winnipeg financial circles, was recently appointed manager of the Winnipeg branch of the Canada Permanent Trust Company, to succeed G. F. R. Harris. The Canada Permanent Trust is an offshoot of the Canada Permanent Mortgage Corporation whose headquarters are at Toronto, and the formation of the trust company was undertaken to work hand in hand with the parent company, doing general trust company business. Mr. Lawrence has been with the company since 1896 in various capacities both in the east and the west. He is Winnipeg manager of the Canada Permanent Mortgage Company as well, succeeding G. F. R. Harris.

D. J. McDONALD has been elected president of the [illegible] and Western Land Corporation to succeed [illegible]. The company is one of the pioneer land [illegible] of Saskatchewan, and has its head office at Toronto. The vice-presidents are Sir George Foster and Hon. [illegible] Watson.

OBITUARY

A. J. MACDONELL, manager of the Kingston, Ont., branch of the Bank of Montreal, died on November 5, following a brief illness. Mr. Macdonell entered the Ontario Bank at Lindsay in 1877, and was promoted to Port Hope, Montreal and Cornwall, and became manager at Emerson, Man., in 1881. The next year he was appointed superintendent of the North-West Territory. In 1884 he was appointed assistant manager at Winnipeg, and subsequently became manager at Mount Forest, Port Perry, Guelph, Port Arthur and Sudbury, Ont., from which place he went to Kingston.

SALE OF PACIFIC COAST FIRE INSURANCE CO.

The sale has just been consummated of the Pacific Coast Fire Insurance Co., with head office in Vancouver, B.C., to the Century Insurance Co., Ltd., of Edinburgh, Scotland. The Century acquire the controlling interest in the company, paying $120 per share for fully paid shares, directors and shareholders receiving the same price for their stock.

With the control of the Pacific Coast Fire passing to that of the Century, no change in the name of the company will be made and the head office will continue to remain in Vancouver, B.C. T. W. Greer, who has been solely responsible for putting through this important deal, has been manager of the Pacific Coast Fire for the past twelve years, two years as branch manager in Toronto and ten years as managing director in Vancouver, is to remain under contract with the organization, and he will also continue to act as manager for the Century Insurance Co., Ltd. of Edinburgh, Scotland, and the Vulcan Fire Insurance Co. of Oakland, California, which position he has held jointly with the Pacific Coast Fire during the past five years.

T. W. GREER

The premium income written by the office this year will amount to approximately $800,000 in premiums, all three companies operating the Canadian field from Quebec west to British Columbia.

The Pacific Coast and Century net loss ratios for the first ten months of this year are in the neighborhood of 35 per cent., whereas the Vulcan have a net loss ratio in Canada this year for the first ten months of well under 20 per cent.

ROYAL TRUST COMPANY MEETING

A year of satisfactory progress and continued growth in the business of the Royal Trust Company was reported at the annual meeting of the shareholders on November 9th, presided over by Sir Vincent Meredith, Bart. The old board of directors and executive of the company were re-elected at the meeting with Sir Vincent Meredith, Bart., president, and Huntley R. Drummond, vice-president.

[illegible] that the amendments to the [illegible] passed at the last session of the [illegible] discriminatory legislation, brokers, [illegible] and commission merchants organized [illegible] will contest its validity in the [illegible] according to a decision reached on Octo-

THE EXCHANGE RATE

VII.—What Controls It?

We have shown in former issues of this series that currencies, outside their own countries, are commodities, not money; the advantage of Bills of Exchange over gold for making settlements and the effect of the Trade Balance on the Exchange Rate. In our last article, we explained the influence of the Inflation of the Currency. We will now deal with the effect of the second of the War Finance measures, the Restriction of the Export of Gold.

Before the War, except during the greatest financial crises, paper currencies of the chief countries could be redeemed in gold on demand, and the gold could be sent to another country.

The fact that this was possible had great controlling influence on fluctuations in exchange, for when the premium on a Bill of Exchange on any country rose above the cost of shipping and insuring the gold, settlements were made by such shipments. Gold reserves, if depleted by shipments to countries where our paper money was at a discount, usually were restored by the purchase of gold in countries where our paper money was at a premium. The range of the rise and fall in exchange was thus kept within comparatively narrow limits.

When war broke out, however, all the belligerents prohibited the export of gold in order to retain as large reserves as possible for their future financing.

The principal controlling factor in the exchange market was therefore withdrawn, and the price of Bills of Exchange depended chiefly on whether the amount offered exceeded, or was less than the demand.

In our next issue, a week from to-day, we shall touch upon some other influences on the exchange value of the dollar which, to keep the problem in its simplest form, have so far been omitted.

THE CANADIAN BANK OF COMMERCE

INTERIM REPORT ON ONTARIO TIMBER PROBE

Commissioners Recommended That Legal Action be Taken to Secure Amounts Due Government

ACTING upon recommendations contained in a second interim report by Justices Riddell and Latchford, the Ontario government will at once take action in the courts to recover from the Shevlin-Clarke Lumber Co., of which J. A. Mathieu, Conservative member for Rainy River, is general manager, a sum running into millions, due to the province on lumber for which no return was made. This is the second interim report to be issued by the commission which has been enquiring into the timber licensing operations of the province.

Recommend Legal Action

The commissioners, in advising the government that proceedings should be taken, express themselves strongly regarding the way the company has dealt with the government. "From the facts before us, in great measure from the books and records of the company and from their servants, we think the Shevlin-Clarke Company has defrauded the province of large sums of money," says the report. "In our opinion, such proceedings should be taken by the Attorney-General for the punishment of those who have committed forgery and perjury as the evidence submitted herewith may justify. We also recommend that proceedings be taken to recover from the Shevlin-Clarke, Limited, of Fort Frances, the sums of money unlawfully withheld from the province, and for the cancellation of the license for berths 45 and 49 in the Quetico Forest Reserve."

The two berths referred to were given to the company under license by Hon. G. Howard Ferguson on August 30, 1919, without notice to the public and without competition as required by the regulations of the department then in force. The commissioners, in commenting upon Mr. Ferguson's assumption that he had a right as minister to deal with such matters regardless of that regulation, point out that there is no provision in the statutes or regulations allowing an exception to the clear provisions set up in the regulations, and assert that the issue of the license by Mr. Ferguson was a violation of the law of the province.

Proper Returns Not Made

The greater part of the interim report is devoted to showing how it was possible for the Shevlin-Clarke Company to get millions of feet of lumber for which they made no return to the Crown. It emphasizes the extent to which the province was dependent upon the honesty of the cullers, and then goes on to show how the cullers appointed by the government were appointed. The commissioners do not comment upon the contradiction in the statements of Mr. Mathieu and Hon. Mr. Ferguson. The former maintained that he had the patronage for the district, while Mr. Ferguson declared that no member had the patronage in his department—Mr. Mathieu or anyone else—but they point out that the cullers at the company's operations might well believe that their appointment depended upon Mr. Mathieu's good will. They draw attention to the fact that some of the cullers appointed by the government to measure the timber cut by the company were for a part of the year in the employ of the company, and one was in receipt of money from the company all the year around.

The report explains the system of keeping records, the provision calling for an oath as to the correctness of the records at the end of the season. These checks, say the commissioners, should have been sufficient to ensure a reasonably accurate return of the timber cut. "But," says the report, "the returns made to the government by cullers and by the company's servants on behalf of the company disclose a great deal of perjury and forgery. In many cases affidavits were made in blank, in many cases alleged affidavits were not sworn to, and in many cases the signatures to the affidavits were deliberate forgeries. Some of these documents were prepared and completed in the company's offices."

In the nine years from 1911 to 1919 inclusive the mills of the company produced 649,946,017 feet of lumber, but the government received returns for, and was paid on only 294,181,714, so that the company had 355,764,303 feet more lumber than appeared in the return to the government.

GRAIN SITUATION TO DATE

The Northwest Grain Dealers' Association estimates this year's crop production in the prairie provinces as follows:—

	Acres.	Bushels per acre.	Total bushels.
MANITOBA			
Wheat	2,687,000	15.1	40,573,700
Oats	1,887,000	33.6	63,403,000
Barley	865,000	22.3	19,289,500
Rye	268,000	15.7	4,207,600
Flax	62,000	6.8	421,600
SASKATCHEWAN			
Wheat	9,440,000	13.3	125,552,000
Oats	5,126,000	29.8	152,775,000
Barley	480,000	20.4	9,792,000
Rye	202,000	14.8	2,989,600
Flax	1,032,000	5.8	5,985,600
ALBERTA			
Wheat	3,644,000	17.6	64,134,400
Oats	2,906,000	25.2	102,291,000
Barley	418,000	26.	10,868,000
Rye	88,000	18.6	1,636,000
Flax	84,000	6.5	546,000
AGGREGATE			
Wheat	15,771,000	14.6	230,260,000
Oats	9,919,000	32.1	318,449,000
Barley	1,763,000	22.6	39,949,500
Rye	558,000	15.8	8,834,000
Flax	1,178,000	5.9	6,943,000

A summary of the grain situation as at October 30 is made by the association as follows:—

WHEAT SITUATION

	Oct. 30, '20. Bushels.	Nov. 15, '19. Bushels.
Wheat inspected to date	59,250,000	60,329,000
In store at country point	28,500,000	24,500,000
In transit, not inspected	12,000,000	4,500,000
Allowed for seed and country mills	37,000,000	36,000,000
	136,750,000	

Balance in farmers' hands to market, 93,510,000 bushels; amount yet to be inspected, 174,010,000 bushels.

	Bushels.	In store, country points. Bushels.
Oats inspected to date	8,929,000	5,160,000
Barley	2,901,000	1,720,000
Rye	1,022,000	625,000
Flax	772,000	500,000

The Royal Bank Building, one of Toronto's large office buildings, has just been purchased by the Childs Co., Ltd., which has for some years past occupied the ground floor as a restaurant, for $1,000,000.

Bankers in Great Britain: The London Joint City & Midland Bank, Limited, The Royal Bank of Scotland

BRITAIN TO REPAY $150,000,000

In 1916 the Canadian banks loaned the British government $100,000,000 for the purchase of munitions, and a similar amount in 1917 for the purchase of wheat. These loans are now being repaid. For the first six months, commencing November 1, the monthly payments will be $5,000,000 each, and for the next year $10,000,000 per month, thus wiping out the debt by May, 1922.

These loans were originally advanced on a three-years' basis, and at a moderate rate of interest. Renewals have been made from time to time, and repayment commenced at the beginning of this year. From January 1, 1920, till May 1 monthly payments of 10 millions each were made by Great Britain, thus leaving the present balance of 150 millions to dispose of.

Great Britain still owes Canada about 180 millions, in addition, which represents the credit balance due the Canadian government on the various advances made mutually by the two governments to each other to cover their respective war expenditures in the two countries. No arrangements for the liquidation of this debt are known to have been made as yet. The repayment of the other debt of 150 millions to Canadian banks, will, however, materially assist the credit position of the Dominion, and bankers express much satisfaction that the account is being thus disposed of.

EXCHANGE QUOTATIONS

Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates as follows:—

	Buyers.	Sellers.	Counter.
N.Y. funds	12¾ pm	13 pm	....
Mont. funds	Par.	54 pm	⅛ to ¼
Sterling—			
Demand	$3.82	$3.83	.
Cable transfers	3.83	3.84	

Bank of England rate, 7 per cent.

New York quotations of exchange on European countries, as supplied by the National City Co., Ltd., Toronto, at November 11, 1920, follow: London, cable, 337⅞; cheque, 337⅛; Paris, cable, 5.79; cheque, 5.78; Italy, cable, 3.44; cheque, 3.43; Belgium, cheque, 6.12; Swiss, cheque, 15.30.

RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the month of October:

Canadian Pacific Railway.

	1920.	1919.	Inc. or dec.
October 7	$5,356,000	$3,965,000	+ $1,391,000

BANK BRANCH NOTES

Four New Branches Announced This Week—Royal Bank Branch at Woodbridge Robbed

The following is a list of branches of Canadian banks which have been opened recently:—

Wedgeport, N.S.	Royal Bank of Canada
Toronto City Hall Branch ...	Dominion Bank
Lower Wood Harbour, N.S. ..	Royal Bank of Canada
St. Thomas, Ont.	Royal Bank of Canada

T. V. B. Bingay, manager of the branch of the Bank of Montreal at Yarmouth, N.S., has been granted leave of absence from about the 1st of December.

D. McCallum, formerly manager of the Bank of Nova Scotia at Portage la Prairie, has been appointed manager of the branch at Fort William.

Harry J. Sterling has returned to Winnipeg and entered the service of the Bank of Hamilton as manager of the Princess St. branch, succeeding Geo. McCombie, who was recently made assistant manager at Vancouver, B.C. Mr. Sterling first associated himself with the Bank of Hamilton at Simcoe, Ont., twenty years ago, and has occupied positions of accountant at the Winnipeg main office and manager of the Fort William branch.

The branch of the Royal Bank in Woodbridge, Ont., was robbed of $15,000 in notes on the night of November 2. Some weeks ago an attempt had been made by robbers to enter the bank, but neighbors gave an alarm and the robbers escaped. This time the vault was broken open. James Fleming, who had just left the bank that evening to go on a vacation, prior to taking up a new appointment as manager of the Royal's branch at Bolton, Ont., was arrested the following day in Toronto. He was released at once, however, and has now entered an action for $50,000 damages against the bank, alleging malicious prosecution, trespass and false imprisonment.

WEEKLY BANK CLEARINGS

The following are the Bank Clearings for the week ended November 11, 1920, compared with the corresponding week last year:—

	Week ended Nov. 11, '20.	Week ended Nov. 13, '19.		Changes.
Montreal	$164,392,544	$131,452,622	+	$32,939,922
Toronto	107,551,105	100,925,696	+	6,625,409
Winnipeg	110,806,325	68,139,541	+	42,666,784
Vancouver	17,148,162	13,627,783	+	3,520,379
Ottawa	15,214,940	15,105,121	+	109,819
Calgary	12,199,332	10,698,932	+	1,500,400

Marine Insurance, Policies and Claims

The Bill of Lading and the Insurance Policy are the Important Documents—Four Main Clauses of Marine Insurance — Differences Between Marine and Fire Insurance Policies — "General Average" and its Significance

MARINE insurance practice in Canada was the subject of a comprehensive address given by B. G. D. Phillips, Vancouver manager of Dale and Co., before the Board of Trade of that city recently. Mr. Phillips' address, as summarized by the *British Columbia Financial Times*, was as follows:—

"The two most important documents in connection with a shipment of goods are the bill of lading and the insurance policy, the former giving the title to the goods and the latter protecting the assured in case of damage by sea perils.

"The general idea that one gets upon reading a bill of lading is that, whilst the shipowner agrees to carry goods from one point to the other and makes conditions with regard to the payment of the freight, he takes care to provide, so far as it is possible to do so, that he shall not be held liable for any damage which may occur to the goods in transit. He is entitled to do this by reason of the fact that he is what is known as a contract carrier, and in this connection the difference between a common carrier and contract carrier may be noticed.

"Common" and "Contract" Carriers

"When a railway is to be built an Act of Parliament is passed authorizing it, and concessions of land are obtained in order that the line may be constructed. When it is completed it practically becomes a public utility, and the conditions under which it transports goods are laid down by the Railway Commission. The railway bill of lading starts out with the words that the carrier shall be liable for all loss or damage which may happen to the goods, with the exception of damage caused by the "act of God," "riots," "strikes," and one or two other causes.

"The steamship company, on the other hand, is usually a private concern financed by private capital, and does not obtain any concessions such as the railway company. They are, therefore, in the position of making their own contracts with regard to the carriage of goods, and these are only modified by law in certain instances. In the United States we have the Harter Act, a similar act in Australia and the Water Carriage of Goods Act in Canada, the intention of all three acts being the same, viz., to provide that the shipowner cannot contract himself out of liability for his own negligence.

What a Marine Policy Covers

"The insurance policy covers goods against perils of the sea, and a mistake is often made by those who are insuring cargo in taking it for granted that the mere fact of insuring means that the underwriters are responsible for all damage which may happen to the goods in transit. Such, however, is very far from being the case. Just as there are different kinds of accident and sickness policies, the cost of which vary according to the risks covered, so there are different kinds of insurance policies of which the same remarks are true.

"The question is often asked underwriters by those wishing to insure cargo whether it is not possible for them to so insure the goods that they may call upon underwriters to pay any loss on arrival, no matter how it is caused The answer to this is that it is possible to do so, but the assured usually finds that the cost of such insurance is more than he is prepared to pay. Moreover, as a rule, the regular insurance companies are more or less averse to giving insurance of this kind, and it usually has to be obtained at Lloyds.

"Before dealing with the different clauses of marine insurance, two points may be noticed in which marine insurance differs from fire insurance.

"If you have a shipment of goods for which you have paid, say, $1,000, and you figure that on arrival here they will be worth, say, $1,500, you are perfectly entitled to insure them for that amount. Suppose the market drops, and as a matter of fact they would only be worth $750 on arrival, and for the sake of argument say the ship and cargo are totally lost by fire a day before they arrive at destination, the assured is entitled to recover the full face value of the policy, which in this particular instance would show a profit of $750. If these goods had been insured under a fire policy all that the assured could recover would be the cost of replacing them, or, say, $750.

"If you insure your house under a fire policy for $5,000 and you have a loss of, say, $2,000, the policy is automatically decreased by that amount, and in order to reinstate it you have to pay an additional premium, but if you insure a ship for that amount, you may have, during the year, three or four losses of $2,000 and end up with a total loss, for all of which underwriters would be liable, nor would they receive any further premium than the amount paid them when the policy was originally taken out.

Classes of Marine Insurance

"Marine insurance on cargo may be divided into four classes:—

"First, against the risk of total loss. This is the form generally used in connection with insurance on cargo by scows, and the reason that underwriters are unwilling to give fuller cover is that the risk of part of a cargo washing overboard is very considerable, and the premium they want to cover this loss is probably more than the owner of the cargo would be willing to pay. There are, of course, cases in which this risk is covered, but the premium is naturally increased in proportion.

"Secondly, what is known as an 'F.P.A.' policy, which is the most common form of marine insurance, and apparently the least understood. There are two forms of 'F.P.A.' clause. First, the English, which reads: 'Free from particular average unless the vessel or craft be stranded, sunk, burnt, on fire or in collision—the collision to be of such a nature as may reasonably be supposed to have led to the damages claimed for.' The American form reads: 'Free from particular average unless caused by the vessel being stranded, sunk or burnt.'

"A concrete example will best show the meaning of and difference between these two clauses, and by way of parenthesis it may be said that 'particular average' simply means a partial loss or damage accidently caused to any particular interests as opposed to 'general average,' which signifies an expense or sacrifice voluntarily incurred for the benefit of all interests at risk on board a vessel.

"If you have a shipment of goods insured under an English 'F.P.A.' clause and the shipment arrives damaged by heavy weather, but the vessel was not stranded, sunk, burnt or in collision, or, in insurance language, the 'F.P.A.' warranty has not been broken, you have no claim on your underwriters. If, however, one ofthe above contingencies has occurred, even though it is not responsible for the damage, the 'F.P.A.' warranty is open and underwriters have to make good the loss. Under the American clause the loss, in order to be recoverable, has to be the direct result of the vessel being stranded, sunk, burnt or in collision, so that it will readily be seen that an assured should always take care to have the English clause in his policies.

"The third form of insurance is known as 'with average' insurance—sometimes called 'all risks.' The latter

JOHN R LITTLE, Managing Director

term, however, is misleading, as it does not mean what it says. A 'with average' policy includes all the conditions of an 'F.P.A.' policy, but in addition it provides that if the goods receive damage which amounts, as a rule, to 3 per cent. of their value, the assured can recover, even though the warranty has not been broken. There are many kinds of 'average' clauses drawn up in connection with various classes of goods which time did not permit the speaker to touch on.

"The last form of insurance is an 'all risks' policy, and by this term the speaker means a policy which covers all and every risk of whatsoever nature. As stated above, it is difficult to obtain this form of insurance, and the rate runs anywhere from four to ten times the amount charged for 'F.P.A.' insurance.

Settlement of Claims

"Now as to the settlement of claims, which, after all, is the point in which the assured is most interested. First of all, that where goods arrive damaged at their port of destination, the consignee is not entitled to abandon them merely because they are damaged, but must take delivery of them, pay the charges in the ordinary way and prove his loss. If the underwriter decides to compromise the claim or to pay a total loss and take over the goods himself, he is entitled to have these goods handed to him free from all charges for freight and duty, the reason being in most instances that he does not insure the freight and duty. It is settled law that the basis of adjustment of losses in connection with cargo is the sound market value at destination, and in this connection he gave two instances to show how this works out.

"Supposing, for example, that a consignee is importing a shipment of goods, the invoice price of which is $1,000—he probably insures for $1,100, covering his profit of 10 per cent. The goods, on arrival at destination, with the addition of freight and duty, are probably worth, say, $1,500. Now if they arrive damaged, the first thing to be ascertained is what their wholesale value in damaged condition actually is. Supposing that the consignee feels that he can dispose of the goods for, say, $1,200, or, in other words, that there is a damage of 20 per cent., and this basis is agreed to by underwriters, he recovers from underwriters 20 per cent. of the insured value, or $220. If, on the other hand, no agreement can be reached as to the actual percentage of damage, the only method of arriving at the amount of the loss is by selling the goods at auction, and, assuming that they realize $750 gross, or, in other words, that there is a 50 per cent. loss on the sound value, the consignee can recover 50 per cent. of the insured value, or $550.

How Losses are Adjusted

"Now, in the first instance, it will be seen that the loss on the sound value is $300 and the consignee recovers only $220, and in the second instance the consignee's loss is $750 and he only recovers $550. This difference is a frequent cause of dissatisfaction and complaint on the part of consignees, as they feel that they are not receiving justice from underwriters As a matter of fact, this is not the case.

"The value of any shipment of goods at destination is really made up of four component parts: (1) Invoice value and shipping charges. (2) Duty. (3) Freight payable at destination. (4) Profit.

"Now in the cases above mentioned, and this is the basis on which goods are usually insured, the consignee covers his invoice value and his profit, but does not insure the duty and the freight payable at destination. Now, if one had a 50 per cent loss, it affects all the component parts that go to make up the value of the goods, and, to take the last case quoted as an example, what the consignee recovers from his underwriters is 50 per cent. of the invoice value and 50 per cent. of the profit, both of which are insured, but he does not recover 50 per cent. of the duty and freight, which amount to $200, for the reason that he has not insured them. It, therefore follows that if a consignee wishes to completely cover himself in case of loss he must, in addition to insuring the invoice value and the profit, cover also the duty and the freight payable at destination against 'particular average' only. He does not need to insure these against 'total loss' or 'general average,' because, in the event of the goods not arriving, there will be no duty or freight to pay.

Meaning of "General Average"

"The term 'general average' above is a form of loss which is covered by all marine policies unless specially excluded. Countless books have been written on the subject of 'general average,' but the following simple example will give a general idea of what it means. If a ship and cargo go ashore, it is reasonable to expect that unless something is done to float the ship both the vessel and cargo will eventually become a 'total loss.' In order to avoid this tugs are sent out. Possibly part of the cargo is discharged, and eventually by this means the vessel is floated. The benefit thus gained is not confined to any one interest, but is common to all parties who have anything at risk on the boat, and the expenses incurred are divided over the various items at risk in proportion to their respective values at destination. This is, of course, only the briefest outline, as 'general average' is a very complicated subject."

PRICES DECLINED IN OCTOBER

A decline of 4.8 per cent. in wholesale prices during October is recorded by a new index number which has been constructed by Professor H. Michell, of McMaster University, Toronto. It is based on forty commodities, twenty foodstuffs and twenty manufacturers' goods. The figure was 242.1 for the month of October, a decline of 4.8 per cent. over the previous figure of 254.5 for the month of September, and a decline of 18.1 per cent. over the peak of 298.3, reached in May of this year. In foodstuffs declines were registered in flour, beef, bacon, butter, cheese, sugar, rice, canned tomatoes and oatmeal, while fresh eggs advanced. In manufacturers' commodities declines were registered in rubber, wool, cotton, hides, silver, lead, copper, tin, the remaining commodities staying unchanged.

It is noticeable that the decline from August to September was one of 7.8 per cent., while that from September to October was only one of 4.8 per cent. This is to be accounted for on the ground that, while the declines were actually more in number, they were less violent, showing a more general but equal recession. Every indication points to a steady and general decline in all lines for some time at least, but there seems to be no danger of a serious break in the markets, says Professor Michell. The index number is based on the last quotation of each month in the Toronto markets, the base, 100, indicating the average price of the commodities for the years 1900 to 1909.

LONG SERVICE WITH LONDON AND LANCASHIRE

Eight officials of the London and Lancashire Fire Insurance Company, who were recently assembled in Chicago, averaged over thirty years of service with the company, the aggregate being 243 years. The occasion was a dinner given by Manager Charles E. Dox, of the western department, in honor of General Manager F. W. Pascoe Rutter, who is now on his way around the world, visiting the principal branches of the company.

Mr. Rutter himself heads the list with a credit of 47 years' service; Alfred Wright, manager at Toronto and chief agent for Canada, 38 years; A. G. McIlwaine, Jr., United States manager, 34 years; A. W. Blake, branch manager at Winnipeg, 32 years; A. R. Hancock, manager at Atlanta, 27 years; Carl Clausen, superintendent of agents of the western department, 24 years; Alfred Brame, superintendent of agents of the south-western states, 21 years, and Charles E. Dox, manager at Chicago of the western department, 20 years.

BOND SALES OVER FORTY MILLIONS

October Total Which is Second Highest on Record This Year was Swelled by Grand Trunk Issue—Bulk of New Financing Done Across the Line

SALES of Canadian bonds during October reached the large sum of $43,880,000. This figure compares with $9,389,176 in September and $48,101,575 for March of this year, which month holds the record for new financing for 1920. In October a year ago there were practically no sales, the Victory loan campaign claiming the attention of all bond selling organizations.

The large volume of new bond issues last month does not indicate any strength or activity of the Canadian market, but rather reflects the power of the American market to absorb our securities, inasmuch as $39,450,000 of the total was placed across the line. All of the provincial bonds, the Grand Trunk Railway securities and the two largest corporation issues were sold to United States investors.

While the total of municipal sales was smaller than in the previous month, there was more activity in that section of the market, at least as far as Canada is concerned. In September, the total was chiefly made up of two large issues,

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 135

Notice is hereby given that a dividend of Three per cent. upon the capital stock of this Bank, being at the rate of twelve per cent. per annum, has been declared for the quarter ending 30th November next, together with a bonus of one per cent., and that the same will be payable at the Bank and its Branches on and after Wednesday, 1st December, 1920. The Transfer Books of the Bank will be closed from the 16th November to 30th November next, both days inclusive.

By Order of the Board,
JOHN AIRD,
General Manager.
Toronto, 15th October, 1920. 260

LAKE OF THE WOODS MILLING COMPANY, LIMITED

DIVIDEND NOTICES

Notice is hereby given that a Dividend of 1¾ per cent. on the Preferred Stock of **Lake of the Woods Milling Company, Limited**, for the three months ending November 30th, 1920, has been declared, payable on Wednesday, December 1st, 1920, to shareholders of record at the close of business on Saturday, November 20th, 1920.

By Order of the Board.
R. NEILSON,
Assistant Secretary.

Notice is hereby given that a Dividend of 3 per cent. on the Common Stock of **Lake of the Woods Milling Company, Limited**, for the three months ending November 30th, 1920, has been declared, payable on Wednesday, December 1st, 1920, to Shareholders of record at the close of business on Saturday, November 20th, 1920.

By Order of the Board.
R. NEILSON,
281 Assistant Secretary.

UNION BANK OF CANADA

DIVIDEND No. 135

Notice is hereby given that a dividend at the rate of 10% per annum upon the Paid-up Capital Stock of the Union Bank of Canada has been declared for the current quarter, and that the same will be payable at its Banking House in the City of Winnipeg, and also its branches, on and after the First day of December, 1920, to shareholders of record at the close of business on the 15th day of November next.

The Transfer Books will be closed from the 16th to the 30th day of November, both days inclusive.

By Order of the Board.
H. B. SHAW,
General Manager.
Winnipeg, October 22nd, 1920.

Notice is also given that a bonus of 2% has been declared on the Paid-up Capital Stock, payable to shareholders with the dividend referred to above.

By Order of the Board.
H. B. SHAW,
General Manager.
Winnipeg, October 30th, 1920. 284

CANADIAN PACIFIC RAILWAY COMPANY

DIVIDEND NOTICE

At a meeting of the Board of Directors, held to-day, a dividend of two and one-half per cent. on the Common Stock for the quarter ended 30th September last, being at the rate of seven per cent. per annum from revenue and three per cent. per annum from Special Income Account, was declared payable on 31st December next to Shareholders of record at 3 p.m. on 1st December next.

By Order of the Board.
ERNEST ALEXANDER,
Secretary.
Montreal, 8th November, 1920. 288

BOND SALES OVER FORTY MILLIONS

(Continued from page 22)

namely, Ottawa $2,300,000 and Edmonton $2,075,000, both of which went to the United States.

Prices were not materially changed for municipals, very few issues being made at better than 6½ per cent. The provinces apparently made some good bargains as a result of the exchange situation between this country and the United States, but, as has been pointed out in these columns before, their satisfaction may be short-lived.

A summary of last month's bonds sales, with comparisons, follows:—

	Oct., 1920.	Sept., 1920.	Mar., 1920.
Provincial	$ 9,250,000	$3,750,000	$14,850,000
Municipal	3,530,467	5,639,176	8,367,299
Railroad	25,000,000	....	24,000,000
Corporation	6,100,000	....	884,276
	$43,880,467	$9,389,176	$48,101,575

THIS YEAR'S FIRE LOSS ALREADY HIGH

October Figure Brings Ten Months' Total to $21,215,299, or Just $2,500,000 Short of Last Year's Total

Fire losses in Canada in October, as estimated by *The Monetary Times*, were as follows:—

Fires exceeding $10,000	$1,856,000
Small fires reported	111,901
Estimate of unreported fires	500,000
	$2,467,901

Several conflagrations took place during the month. The plant of the Canadian Cereal Mills in Tillsonburg was the heaviest loss, while fires in Wadena, Sask., St. Stanislas, Que., Brandon, Man., Stewiacke, N.S., and Port Arthur, Ont., caused losses of $100,000 or over.

The Monetary Times' record for the past four years shows the following monthly losses:—

Month.	1917.	1918.	1919.	1920.
January	$ 1,918,660	$ 2,688,556	$ 3,915,290	$ 2,637,850
February ..	2,009,953	2,243,762	1,091,834	1,895,575
March	2,050,650	1,682,286	2,154,095	1,793,200
April	1,317,714	3,240,187	1,080,070	3,229,500
May . .	1,163,110	3,570,014	1,785,130	2,001,819
June . ..	1,184,627	3,080,982	3,337,530	1,424,319
July .. .	1,101,734	3,369,684	1,118,377	1,426,850
August . .	1,230,183	3,110,445	1,374,495	1,857,800
September ..	1,301,700	917,286	1,940,272	2,480,485
October .	701,605	5,119,145	1,023,288	2,467,901
November .	959,049	1,059,580	2,339,870	....
December ..	5,144,100	1,733,917	2,047,496	.
Totals .	$20,086,085	$31,815,844	$23,207,647	$21,215,299

List of Large Fires

The following are the October fires causing damage of $10,000 or over:—

Grassey Lake, Alta., Oct. 1, business section, $65,000.
Toronto, Ont., Oct. 1, apartments, $50,000.
Drumheller, Alta., Oct. 2, business section, $50,000.
Sherbrooke, Que., Oct. 2, barns, $30,000.
Colonsay, Sask., Oct. 3, hotel, $12,000.
Elcan, Alta., Oct. 5, plant, $12,000.
Mount Forest, Ont., Oct. 6, barns, $15,000.
Ayr, Ont., Oct. 9, barns, $20,000.
Victoria, B.C., Oct. 10, plant, $20,000.
Stewiacke, N.S., Oct. 11, lumber mill, $150,000.
Tillsonburg, Ont., Oct. 14, plant, $500,000.
Ste. Stanislas de Kostka, Que., Oct. 15, business section, $200,000.
Port Arthur, Ont., Oct. 17, mill, $100,000.
Hamilton, Ont., Oct. 18, plant, $10,000.
Belle River, Ont., Oct. 19, flax, $50,000.
Downsview, Ont., Oct. 19, barns, $15,000.
Wadena, Sask., Oct. 19, business section, $300,000.
Brandon, Man., Oct. 21, plant, $15,000.
Quebec, Que., Oct. 22, residences, $10,000.
Montreal, Que., Oct. 23, offices, $20,000.
Arnprior, Ont., Oct. 24, lumber piles, $15,000.
Aylmer, Ont., Oct. 24, farm buildings, $20,000.
Margaret, Man., Oct. 24, main portion of village, $35,000.
Swift Current, Sask., Oct. 26, barns, $17,000.
Upper Dorchester, N.B., Oct. 26, sawmill, $15,000.
Brandon, Man., Oct. 29, police buildings, $200,000.
Whitby, Ont., Oct. 30, planing mill, $20,000.

Analysis of Causes

Among the causes reported were: Sparks, 2; lightning, 4; spontaneous combustion, 2; incendiarism, 2; matches, 4; explosion, 1; stoves, 2; defective chimney, 1.

The following structures were destroyed or damaged: Barns, 27; business sections, 4; garages, 3; buildings, 11; residences, 26; stores, 1; hotels, 2; mills, 7; apartment, 1; convent, 1; apple evaporator, 1.

Deaths From Fires

Peterboro, Ont., Oct. 4, burnt in building	1
Belleville, Ont., Oct. 8, playing with matches	1
Kitchener, Ont., Oct. 11, burnt in building	1
Kitchener, Ont., Oct. 14, struck by lightning	1
Quebec, Que., Oct. 20, clothing caught fire	1
Morse, Sask., Oct. 21, burnt in building	2
Dana, Sask., Oct. 26, burnt in building	3
Wolfe Island, Ont., Oct. 26, burnt in building	1
Toronto, Ont., Oct. 28, clothing caught fire	1
North Sydney, N.S., Oct. 30, clothing caught fire	1

THORNTON-DAVIDSON CREDITORS MEET

Creditors of the stock brokerage firm of Thornton, Davidson and Company met in Montreal on October 22nd and formally appointed five inspectors to represent them in respect to their claims against the suspended house. A number of the creditors, it was stated, had not yet filed their claims, and these were given until November 12th either to do so or to forfeit their rights in this respect. The sentiment expressed at the meeting was optimistic of an ultimate satisfactory settlement. The five inspectors appointed by the creditors are: M. S. Wheelwright, H. J. Murphy, L. J. Lehuray, A. J. Carpenter and H. J. Allison.

DEBENTURES FOR SALE

$5,000,000.00

PROVINCE OF ONTARIO

7-YEAR 6 PER CENT. GOLD BONDS

Sealed tenders endorsed "Tenders for Province of Ontario Bonds," addressed to the undersigned, will be received for the purchase of $5,000,000 (Five Million Dollars) seven-year gold bonds of the above Province, dated 15th November, 1920, due 15th November, 1927, bearing interest at the rate of six per centum per annum, payable half-yearly on the 15th November and 15th May. Principal and interest payable in gold coin at the office of the Treasurer of Ontario, Toronto, or at the Bank of Montreal, Montreal, Canada, or at the agency of the Bank of Montreal in the City of New York, U.S.A., at the option of the holder.

Bonds to be in denominations of $1,000 each, with coupons attached, and may be registered as to principal only.

Payment for bonds, and delivery thereof, to be made at the office of the Treasurer of Ontario at the Parliament Buildings, Toronto, on or before the 19th November, 1920, less the amount of the deposit. Interim debentures will be supplied on payment of the money, to be exchanged for the definitive bonds on completion by the engravers.

Tenders to be addressed to the Honorable P. Smith, Treasurer of Ontario, Parliament Buildings, Toronto, and delivered not later than 12 o'clock noon on Monday, the 15th day of November, 1920.

Tenders must be for the whole amount offered, and must be accompanied by marked cheque for $50,000, to be applied, in the case of the successful tenderer, in payment for bonds.

The highest or any bid not necessarily accepted.

P. SMITH,
Treasurer of Ontario.

Toronto, November 3rd, 1920. 280

TOWN OF COCHRANE, ONTARIO

TENDERS FOR DEBENTURES

Sealed Tenders will be received by the undersigned up to and including November 16th, 1920, for the purchase of $32,000 6% 20-year Instalment Bonds of the Municipality of the Town of Cochrane, issued for the purpose of purchasing Local Telephone System. Interest and Principal at Cochrane, Ontario. Issue has received assent of Electors.

W. L. WARRELL, Treasurer,
Municipality of Cochrane.
274

ROMAN CATHOLIC SEPARATE SCHOOL BOARD

The Roman Catholic Separate School Board for Sault Ste. Marie, Ontario, offers for sale $85,000 in six per cent. debentures, interest half-yearly. Tenders will be received up to November 30th. Particulars furnished on application.

V. McNAMARA,
Secretary-Treasurer.
287 Box 536, Sault Ste. Marie, Ontario.

DEBENTURES FOR SALE

TOWN OF PEMBROKE

Tenders will be received by the undersigned, marked "Tenders for Debentures" on the outside, up to 3 p.m., Wednesday, November 24th, 1920, for the following:—

$33,000.00 General Debentures, ten-year, instalment, with interest at six (6) per cent. Principal and interest payable the First day of December in each year at the Bank of Nova Scotia, Pembroke.

$14,000.00 Public School Debentures, thirty-year, instalment, with interest at six (6) per cent. Principal and interest payable on the 30th day of October in each year at the Bank of Nova Scotia, Pembroke.

The highest or any tender not necessarily accepted.

S. L. BIGGS,
286 Clerk-Treasurer.

THE ROYAL BANK OF CANADA

Tenders will be received by the undersigned for the whole or any portion of approximately four thousand (4,000) shares of $100 each of the new stock of The Royal Bank of Canada issued on the 31st May, 1920, pursuant to a resolution passed by the Board of Directors on that date.

The shares comprise the unaccepted allotments and the fractions which, under the provisions of the Bank Act, were not allotted.

The stock will rank for dividend from date of payment. Interim receipts will be issued, which may be exchanged for regular stock certificates on and after 1st March, 1921.

Tenders must state the price per share offered and be accompanied by a certified cheque for ten per cent. of the amount. In case a tender is accepted, the balance will be payable on allotment.

The bank does not bind itself to accept the highest or any tender.

Tenders will be received up to 3 p.m. on Monday, November 15th, and must be marked "Tender for Stock," and addressed "The General Manager, The Royal Bank of Canada, Montreal."

By order of the Board. 282

C. E. NEILL,
Montreal, November 1, 1920. General Manager.

PLACING INSURANCE OUTSIDE PROVINCE

At a regular meeting of the Vancouver Fire Insurance Agents' Association held recently, comments were made on the fact that some of the banks and manufacturing concerns placed their insurance outside the province. It was mentioned that some of the manufacturing concerns advertised "Buy B.C. made goods," and they insured these same goods in eastern Canada and United States.

Complaint was also made of the alleged unfairness of some of the bigger insurance companies operating as board companies in eastern Canada, and cutting rates in B.C. by operating non-board. Expressions of regret were made that there was apparently no redress in this connection.

The Vancouver Fire Insurance Agents' Association (which is composed entirely of agents of board companies) decided after a lengthy discussion "not to traffic directly or indirectly with non-board companies."

The Molsons Bank

Proceedings at the Sixty-fifth Annual General Meeting of The Molson's Bank, Held at their Banking House in Montreal, Tuesday, November 2nd 1920.

The Sixty-fifth Annual General Meeting of the Shareholders of The Molsons Bank was held in the Board Room of their Banking House, 200 St. James Street, Montreal, Tuesday, November 2nd, 1920, at 3 o'clock.

The President, Mr. Wm. Molson Macpherson, took the chair, and there were present the Vice-President, Mr. S. H. Ewing, Messrs. F. W. Molson, Wm. M. Birks, J. W. Ross, J. M. McIntyre, Walter Molson, C. E. Spragge, Alfred Piddington, W. B. Blackader, Arthur Browning, H. J. Tellier, S. W. Ewing, P. E. Bilkey, R. S. White, and others.

The President, having called the meeting to order, requested Mr. H. A. Harries to act as Secretary, and after that gentleman had read the advertisement calling the meeting, and said that notice of the meeting had been mailed to each Shareholder in accordance with the requirements of The Bank Act, the President named Messrs. C. E. Spragge and Alfred Piddington to act as Scrutineers.

The minutes of the last Annual Meeting were taken as read and adopted.

The President then called upon the General Manager, Mr. Edward C. Pratt, to read the Annual Report, as follows:—

THE ANNUAL REPORT

Montreal, 2nd November, 1920.

To the Shareholders of The Molsons Bank:

Gentlemen,—The Directors have the pleasure to submit the Balance Sheet for the year ending 30th September, 1920, and to report that the net profits after making provision for bad and doubtful debts and for the rebate of discount on Current Loans, is $822,718.23, which, with the amount brought forward from last year, $275,435.66, in all $1,098,153.89, has been appropriated as follows:—

Dividends	$480,000.00
Contribution to Officers' Pension Fund	25,061.23
Charity Fund	5,000.00
To provide for Dominion Government Taxes	70,000.00
Leaving at credit of Profit and Loss Account, 30th September, 1920	518,092.66
	$1,098,153.89

As usual all the branches of the Bank have been carefully inspected during the year, and we have pleasure in testifying to the zeal and efficiency of our staff.

During the year 12 Branches and Sub-Agencies were opened in the following places:—

BRITISH COLUMBIA

Arrowhead (Sub-Agency to Revelstoke)

ONTARIO

Coatsworth
Harrow
Morpeth (Sub-Agency to Ridgetown)
McGregor
Ridgeway
Yonge and Bloor Streets, Toronto

QUEBEC

Amqui
Hochelaga (Montreal)
St. Roch (Quebec)
St. Sauveur (Quebec)
Wellington St., Verdun (Sub-Agency to Cote St. Paul, Montreal)

The Auditors, Messrs. Lemuel Cushing and Charles A. Hodgson, whose report is appended to our Balance Sheet, offer themselves for re-election. Mr. George Creak, the senior member of the firm, we regret to report, has passed away since our last meeting.

W. M. MOLSON MACPHERSON,
President.

	$1,098,153.89

WM. MOLSON MACPHERSON, President.
EDWARD C. PRATT, General Manager.

AUDITORS' REPORT TO SHAREHOLDERS

We have checked and verified the Cash, Investments and Securities of The Molsons Bank at the Chief Office in Montreal on 30th September last, and also at another time as required by the Bank Act, and we have at different times during the year checked and verified the Cash and Securities held at other important Branches of the Bank.

We have compared the Certified Returns from all the Branches with the entries in the Books at the Chief Office of the Bank as at 30th September, 1920, and find that they agree therewith; and all the transactions which have come under our notice have been, in our opinion, within the powers of the Bank.

We have obtained all the information and explanations we have required, and we certify that in our opinion the above Statement is so drawn up as to exhibit a true and correct view of the Bank's affairs at the close of business on 30th September, 1920, according to the best of our information and the explanations given to us, and as shown by the books of the Bank.

LEMUEL CUSHING }
CHAS. A. HODGSON } Auditors.
Chartered Accountants.

Montreal, 19th October, 1920.

The General Manager, Mr. Edward C. Pratt, gave a few words of explanation with regard to the Annual Statement, during which he said:—

The most striking change this year is the large decrease in Dominion and Municipal securities, over $11,000,000, and on the other side the decrease of over $5,000,000 in the amount owing to the Dominion Government. Last year's figures were exceptionally large, owing to the Government requirements just prior to the issue of the last Victory Loan and the reduction is mainly due to the paying off of Dominion and British Government loans. We may look for a further reduction in the same items in the coming year.

The great demand for commercial loans in Canada is reflected in the increase of $7,800,000 in our loans and discounts. Our deposits show reasonable growth, a little over $3,000,000.

There is an increase in Bank Premises of $325,000. This covers expenditure that we found it absolutely necessary to make either in buying, building or improving our properties. We can assure you that the Bank now is very well equipped at practically all its offices.

With a total of assets and liabilities of about the same amount as last year, we have returned practically the same profits, although the expense of conducting the business has largely increased.

The memorial to our officers who fell and who served in the war, referred to at our last meeting, has just been erected in our Montreal Office, and you are invited to inspect it as you pass out.

THE PRESIDENT'S ADDRESS

The President, Mr. Wm. Molson Macpherson, then delivered his annual address, as follows:—

The Sixty-fifth Annual Statement of the Bank which has just been submitted to you, showing profits slightly in excess of those of last year will, I am sure, be satisfactory to the Shareholders.

In a few days we shall be celebrating the second anniversary of the signing of the Armistice. We can now see that at that time we were too hopeful as to the period it would take to restore normal conditions, and were mistaken in thinking the readjustment necessary after the disorganization caused by the conflict would be completed before this. We in Canada, of course, suffered very little destruction in property, and in consequence seem to be regaining more systematic and stable conditions with less disturbance than most countries.

The deposits of the Canadian public in the chartered banks of Canada show an increase for the year of $70,000,000, but the bank loans in Canada have increased by $360,000,000. This justifies the banks in their present policy in restricting loans. You are doubtless aware that for the past four or five years the Canadian banks have supplied their customers with the necessary funds to conduct their business with little, if any, increase in discount rates, and our customers at the present time are discounting their bills at lower rates than can be obtained in Great Britain or the United States. We are sure that the Canadian public must value the steady money market they have enjoyed all through these troublesome times.

The period of falling prices has begun and provided the drop is gradual and not violent, our people should be able to meet the changing conditions without difficulty. Most of our manufacturing and trading firms have prospered so well during the past few years that they are in a good financial condition to meet a period of readjustment without embarrassment.

While the farmer may have to be content with a smaller price for his produce this year, the very bountiful crops all over the country should give him as great a return in money as last year. The extraordinary advance in the markets of the world in the price of pulp and paper is altogether to the advantage of Canada.

Exchange on New York still runs heavily against Canada and exchange on London greatly against Great Britain. As England has been in the past the largest market for our exports, the fall in the value of the pound sterling as represented in Canadian dollars has made it more difficult to sell in England. The balance of trade, which a year ago was running in our favor, has now turned against Canada, the year ending 30th September showing $80,000,000 excess imports over exports as against $383,000,000 excess exports over imports last year. Until there is a better balance between imports and exports exchange rates will be abnormal.

Canada needs more population, most of which must come through immigration. This should be carefully selected and no better means of getting a good class of immigrants can be found than the recommendation of those who know the country and advise their friends and acquaintances to move here. In this connection the visits of the British Press Congress and of the Chambers of Commerce of the Empire should be most helpful. Our visitors during the year included leaders of industry, commerce and letters in Great Britain, India, Australia and the other colonies, many of whom visited points all over Canada. All the speakers expressed their pleasure at the wonderful development seen throughout the country and we feel sure on returning home will speak well of its prospects.

The Government very wisely has increased taxation until it is apparently now sufficient to meet the national outlay without necessitating the issue of new loans. This should make the present War and Victory Bonds, which we have been recommending to you for some years in our annual address, very desirable investments, and we advise their purchase at the present attractive prices, which we do not think are likely to last very long.

The President then invited discussion, but nothing being said, he moved the adoption of the Annual Report, which was seconded by the Vice-President, Mr. S. H. Ewing, and unanimously adopted.

It was then moved by Mr. Alfred Piddington, seconded by Mr. Charles E. Spragge, and resolved, that Messrs. Lemuel Cushing and Charles A. Hodgson be continued in their office as Auditors of the Bank for another year. This was unanimously adopted.

It was moved by Mr. W. B. Blackader, and seconded by Mr. Arthur Browning, and resolved, that the Secretary be instructed to cast one ballot for the re-election of the Directors, which was unanimously carried.

Messrs. Charles E. Spragge and Alfred Piddington then presented the report of the Scrutineers, as follows:—

Montreal, 2nd November, 1920.

To the General Manager, The Molsons Bank:

Sir:—We have the honour to report that at the Annual Meeting of the Shareholders of The Molsons Bank, held this day, the following gentlemen were re-elected to the Board of Directors: Wm. M. Birks, W. A. Black, S. H. Ewing, Wm. Molson Macpherson, F. W. Molson, J. M. McIntyre, John W. Ross.

A vote of thanks of the Shareholders to the President, Vice-President, Directors, General Manager, and officers of the Bank, was then moved by Mr. S. W. Ewing, seconded by Mr. Walter Molson, and unanimously adopted.

The President, Mr. Wm. Molson Macpherson, in returning thanks on behalf of himself and the Directors, referred in complimentary terms to the work of the General Manager and his staff. He remarked that on the shoulders of bank officers generally had fallen and must fall a good deal of the work to be done in the period of reconstruction. He stated that it gave satisfaction to the Board of Directors to know that the Bank had for a great many years taken its full share in the development of the country and that it is in a strong position to continue to do so.

The General Manager, Mr. Edward C. Pratt, thanked the Shareholders for their expression of confidence and mentioned that the officers of the Bank were grateful for the increased remuneration granted to them by the Board of Directors during the past three years. In reply to this, Mr. Arthur Browning said the Shareholders were pleased to learn that the staff had been liberally dealt with. He hoped that the Board of Directors would bear in mind the desire of the Shareholders to see a bonus paid to them whenever the profits of the Bank would warrant it.

The meeting then terminated.

At a subsequent meeting of the Directors Mr. William Molson Macpherson was re-elected President and Mr. S. H. Ewing Vice-President, for the ensuing year.

WILL A GOLD BOOM HELP?

Gold Supply Affects Prices, But Would Not Adjust Supply and Demand for Commodities

By A. B. Barker

FIGURING on the era of unemployment believed by many to be at hand, some of the London and New York papers are predicting a gold boom. They think that as work grows scarce there will be a movement of men to the mining camps for work, which will result in an increased output of gold, and with increased activity in mining, there would be always the possibility of new discoveries. This it is hoped will provide a broader basis for the present paper currency, and so help deflation.

In the past, however, any material increase in the production of gold has had the effect of raising the prices of commodities. Gold is a commodity as well as a measure of value, and as a commodity is subject to the natural law of trade; as the supply increases its exchange value decreases, when measured in terms of commodities in general. For monetary purposes gold is used in the shape of coins, which, by law, contain a certain specified weight of the metal of a certain fineness, according to the denomination of the coin. The value of the coin consists in the certified weight of metal contained therein. Prices are measured in these coins, and when the value of gold, measured in commodities, decreases, it takes more of these coins to exchange for these commodities, or, as it is usually expressed, prices rise. There is no reason to believe that the result would be any different now than in the past, and a big gold production would merely increase the prices of food and clothing; in fact, of any commodity dealt in. The relative values of the different commodities, compared with each other, would not change on this account, but their price measured in gold would increase.

Goods, Not Gold, Wanted

What is wanted is not more gold, but more goods to replace those destroyed in the war, and until this is accomplished deflation will be retarded.

Before the war our surplus of foodstuffs and raw materials went to Europe, and we received goods in exchange, not directly, but the proceeds none the less were received by us in goods. Trade in modern times is rarely direct. Ours was to Europe chiefly and from the United States. What Europe owed us on trade balance, and also for the proceeds of loans to the Dominion and provincial governments, municipalities, and corporations, we spent in the United States for goods. We shipped the goods to Great Britain and transferred to the United States the debt in our favor owing by Great Britain. By this transfer the debt owing to the United States for goods shipped to Canada was cancelled. Money was not used and the settlement was arranged by the transfer of credits, the real transaction, however, so far as we were concerned, was an exchange of goods for goods.

International Settlement

During the war we shipped large quantities of supplies of all kinds. Part of this was paid for as before, that is, we used the proceeds to purchase goods in the United States, and part was sold on credit, and is eventually to be paid for in goods, shipped up direct or sold to some country, and the credit made available to us so that we can pay it to some other country for goods. All our borrowings abroad would under normal conditions have been eventually paid for by the shipment of goods, and by the transfer of much of the evidences of these debts in the shape of Canadian securities of various kinds, during and since the war, this movement was accelerated. The difficulty now is that the countries to whom we sent our surplus in former years are unable to ship goods in exchange, and the problem is how to supply our old customers and wait until they are in a position to produce what we want in exchange. International finance has complicated the matter to some extent, but in the final analysis the problem is as stated, and on the successful solution depends chiefly the question of the deflation of currency and the prosperity of the country and the people.

TAX ARREARS IN ALBERTA

Alberta's treasury is being swelled this fall by the receipts of tax arrears following the application of the tax arrears act which requires payment of all taxes in the province up to the end of last year, failing which the lands or properties will be sold for taxes. Hon. C. R. Mitchell, provincial treasurer, has announced that the effect of the advertising all land in arrears for sale during the next two months has been payment of such arrears in a growing volume. Although considerable sub-divided properties outside cities and towns are apparently to be allowed to go to the auction block for arrears, Mr. Mitchell says nearly all outstanding accounts against farm lands are being paid to avoid the sale, and the total collection of the province in this manner is already large. The provincial treasurer refers to the fact that many of these arrears have been standing for several years, and the deficits which have had to be met by the government in annual accounting were the result of the non-payment of taxes due. This year the situation promises to be greatly improved both as regards payments of current taxes and the collection of arrears.

Preliminary work on the development of the Bridge River power site near Lillooet, B.C., is being carried on. The development will entail an expenditure of $30,000,000; the head will be 1,600 feet and 400,000 horse-power will be available.

Finances of British Columbia Municipalities

Reduction in Tax Arrears a Favorable Feature—Revenue and Expenditure Account Shows Surplus as Compared with Deficits of Previous Years—Sinking Funds Need Adjusting — Shortage has Grown to Large Figure— In Utilities Electric Light Makes Satisfactory Showing, but Waterworks and Sundries Have Fallen Behind

STATISTICS of the finances of British Columbia municipalities for the year ended December 31, 1919, have just been issued by Robert Baird, inspector. In commenting on the report Mr. Baird makes the following remarks:—

"The report is of particular interest in view of the fact that in the year 1919 the first serious effort was made to clear up the large amount of arrears of taxes outstanding, much of which was on account of the extent of the accumulation rapidly becoming uncollectable. The amending act of 1919 re-enacted in whole the taxation and tax-collection provisions of the "Municipal Act," and provided for a compulsory annual tax sale and also for the obtaining of a tax sale title without delay and at very little cost. The full result of this policy will not be seen from the figures of the first year of which we have complete record; the arrears of taxes show a decrease, the decrease being from $14,631,216 at the end of 1918, to $12,094,121 at the end of 1919. The figures submitted also show that the moneys actually received exceed the expenditures by $1,119,670. For a number of years previous the expenditures had steadily exceeded the receipts, in the year 1918 the excess being $1,884,475.

"Sinking funds still show an alarming shortage, being $5,289,012, as compared with $5,206,093 at the end of the previous year, but from an examination of the comparative statement shown under the heading of sinking funds, it will be seen that in a very large number of the municipalities there has been a satisfactory recovery."

Tax Arrears

As Mr. Baird has pointed out, the item of tax arrears is the most important consideration. It is interesting, therefore, to note the development of that account since 1914:—

	Cities.	Districts.	Totals.
1914	$ 3,879,775	$2,114,454	$ 5,994,230
1915	6,845,741	2,520,634	9,366,375
1916	8,964,834	2,890,942	11,855,777
1917	10,642,651	3,037,476	13,680,127
1918	11,551,567	3,079,648	14,631,216
1919	9,996,200	2,097,920	12,094,121

Sinking Funds

Having apparently satisfactorily disposed of the tax arrears problem, some move should be taken to adjust the sinking fund shortage situation. The only cities to show surpluses in this regard, for the year ended December 31, 1919, were: Alberni, Cranbrook, Fernie, North Vancouver, Port Alberni, Prince Rupert and Trail. The districts were: Coquitlam, Delta, Esquimalt, North Cowichan, Oak Bay, Point Grey and Spallumcheen. That these surpluses were small in comparison with the shortages will be seen from the following figures, which show the conditions of the sinking funds of cities and districts combined, as compared with the previous year:—

	1919.	1918.
Cash	$ 2,009,108	$ 1,924,907
Invested	11,844,740	9,580,337
Total	13,853,849	11,505,244
Sinking fund required	18,958,720	16,669,546
Short	5,289,012	5,206,093
Surplus	184,140	41,791

In his report for 1918, Inspector Baird remarked of the poor sinking fund investments, particularly in regard to mortgages, and spoke of these as doubtful assets. A comparison of the distribution of the investments shows that the account mentioned has not improved; but a substantial increase in holdings of Dominion of Canada bonds is a favorable feature:—

	1919.	1918.
Dominion of Canada war bonds	$7,007,512	$4,977,209
Mortgage	278,704	273,320
Debentures of the municipalities	4,558,523	4,329,807

Total debenture debt of the cities at the end of 1919 was $72,581,126, while the total debt was $79,800,504, as compared with $73,164,612 and $82,388,002 at the end of the previous year. Total debt of the districts amounted to $24,496,152, and the debenture debt $22,160,488, as compared with $23,912,456 and $21,855,497. On the whole there was some improvement.

Assessments and Exemptions

Assessments increased substantially for the year under review, but exemptions showed reductions. The following figures give a comparison of the details:—

Total cities and districts.	1919.	1918.
Value of taxable land	$363,508,519	$366,004,371
Value of taxable improvements	194,430,709	181,358,225
Total taxable property	557,939,288	547,362,596
Exemptions	37,072,096	39,495,172
Population	374,740	374,980
Area in acres	945,008	945,208

Public Utilities

As details of the operations of utilities in 1918 are not available, a comparison with that year is not possible. As compared with 1917, 1919 figures do not appear very satisfactory. The electric light account showed good improvement, but waterworks and sundries fell behind considerably. The following are the figures for 1919:—

Electric light.	Total revenue.	Profit.	Loss.
Cities	$ 410,163	$ 50,421	$ 22,032
Districts	26,118	......	3,959
Waterworks.			
Cities	1,038,674	104,858	128,213
Districts	252,384	1,822	219,791
*Sundries.			
All municipalities	582,896	25,061	50,946

For 1917 the figures, in the same order as above, are:—

Electric light.	Total revenue.	Profit.	Loss.
Cities	$ 316,586	$ 26,653	$ 21,933
Districts	22,392	1,772	357
Waterworks.			
Cities	978,696	112,908	129,403
Districts	206,486	528	220,692
*Sundries.			
All municipalities	345,577	3,090	64,169

---

*Including water, light, telephones, irrigation and street railway.

Receipts and Expenditures

As pointed out by Inspector Baird in his résumé, a favorable showing was made in receipts and expenditures, the former amounting to $18,815,692 and the latter $17,696,022, a surplus of $1,119,670. In previous years the situation had not been so favorable.

COLONIAL LOAN PREFERENCE STOCK REDEMPTION

The redemption of one-half the outstanding preference shares of the Colonial Investment and Loan Co., which was approved at a special meeting of shareholders held on September 14, has been postponed from October 1 to November 30; this has been necessary owing to the fact that sufficient members of the Treasury Board have not been present at Ottawa to hold a meeting to bring into force the amendment to the company's act of incorporation passed at the last session of parliament. A new meeting of the shareholders is accordingly called for November 19 to approve of a new by-law.

EMPLOYMENT CONDITIONS NOT SO SATISFACTORY

The Employment Service of the Department of Labor reports that returns from the Dominion and Provincial Offices of the Employment Service of Canada for the week ended October 16 show a decrease in placements when compared with the returns for the previous week. The offices reported that they had made 8,754 references to regular positions, and that 7,534 placements were effected. This is a decrease of 437 as compared with the returns for the previous week when 7,971 placements were reported, and an increase of 1,095 when compared with the corresponding week of last year. In addition 1,721 casual jobs were supplied during the week as compared with 1,717 during the week ended October 9.

During the week 9,454 applicants were registered, of whom 8,277 were men and 1,177 were women. This represents a decrease of 311 in registration when compared with 9,765 applications reported during the preceding week. The number of vacancies notified by employers to the service during the week totalled 8,686, of which 7,566 were for men and 1,789 were women. When compared with the 9,890 vacancies of the preceding week this is a decrease of 1,204. Of the placements in regular employment, 6,821 were of men and 713 were of women.

LARGE RESERVES HAVE HELPED BANKS

One of the principal reasons for the success of our Canadian chartered banks is the result of the foresight of the bank managers in the days when most of our large institutions were established. They realized that permanency could be achieved only by putting aside ample reserves so that bad years could be faced without disaster. This meant that in days when money yielded large returns, when even mortgages yielded 10 per cent. or more, shareholders had to be satisfied with 6 to 8 per cent. while reserves were being built up out of the undivided profits.

The Molsons Bank, whose 65th annual meeting of shareholders has just been held, and which has had an eminently successful year, is a good instance of this. From 1856 to 1888 dividends ranged from 5 per cent. to 8 per cent., and thence to 1900 exceeded 8 per cent. only nine times when 1 per cent. bonus had been paid. The reserve fund had by then grown to $2,050,000 while the capital was $2,466,040. Since then the reserve has grown to $5,000,000, while the capital is only $4,000,000, and now shareholders are receiving the reward due to their sacrifices and are drawing 12 per cent., equal to less than 6 per cent. on their combined capital and reinvested savings. The banking capital now available for business purposes in Canada's banks—and which is so badly needed too—has been provided to the extent of almost 50 per cent. by the undivided profits of shareholders without which our banks would not have been able to maintain their low rates on discounts (lower at present than those in Great Britain and in the United States). The Canadian public thus are benefiting now from the wise forethought of the founders of Canada's banking system.

UNION INSURANCE SOCIETY OF CANTON

Results of the operations of the Union Insurance Society of Canton, Limited, during the year 1919 were highly satisfactory, as evidenced by the annual report for that year. The working account shows the net premium income as £1,609,640, compared with £1,533,573 for the previous year. The 1918 working account, which, after deduction of interim dividend and bonus, showed a balance of £691,062. This was distributed as follows: Final dividend, £78,800; bonus dividend to shareholders, £98,500; addition to reinsurance fund, £150,000; addition to building reserve fund, £30,000; addition to equalization of dividend fund, £50,000; carried forward to underwriting suspense account to close the account for 1918, £283,762.

J. A. Plummer, chairman, in his report to shareholders at the annual meeting, spoke of the growth of the company. He quoted the 1913 premium income as £450,000, as against last year's figure of £1,609,640. A comparison of the balance sheet is further evidence of the growing strength of the company. Total assets at December 31st, 1919, were £6,200,010, as against £4,835,084 at the end of the previous year. This advance is due largely to the company's increased holdings of investment securities.

Under the management of Chas. R. Drayton the Canadian business made unusual progress. Net cash received for fire premiums amounted to $401,962, as against $289,329 for the previous year. Other classes of business, which include automobile, hail and inland transportation, also showed largely increased development. Net cash received for all classes of business last year totalled $439,076, while in 1918 the figure was $302,202.

ACTUARIAL SOCIETY SEMI-ANNUAL MEETING

The fall meeting of the Actuarial Society of America was held in Richmond, Va., October 28th and 29th. A. B. Wood, who was recently elected a member of the executive, was one of the speakers. About one hundred members attended. Wm. A. Hutcheson, vice-president and actuary of the Mutual Life, in his presidential address, reviewed the "Evolution of Life Insurance." In a paper on "Actual Deaths in the Mutual Life Insurance Company of New York, Compared with the Expected by Three Standards," Mr. Hutcheson also gave the experience of the Mutual Life for the policies issued in the United States and Canada in the years 1907 to 1917, inclusive, carried up to the policy anniversaries in 1918. These policies were all annual dividend policies. The mortality was compared with the mortality as shown by the Medico-Actuarial Table, and also with that of the American Men Table, with the result that the actual mortality was 78.7 per cent. of the expected by the Medico-Actuarial Table and 84.6 per cent. of the expected by the American Men Table, these figures being by amounts. By policies the percentages were somewhat less. Attention was called to the fact that, since the experience ended with the anniversaries of the policies in 1918, it covers little war experience and none of the influenza period, except in those cases where the experience extended into the last few months of 1918.

The bulk of the business was written between ages 20 and 50. The experience covered over $1,300,000,000 of insurance issued. The exposures were over $5,000,000,000 for one year. Attention was called to the fact that if the experience were divided into the first five years and sixth to eleventh years, each would show almost exactly the same percentage of the expected mortality by the American Men Table as the total, the variation being only one-tenth of one per cent.; also, that if the first year were separated from the others, the ratio of the actual to the expected mortality for that year would differ only by one per cent. of that of the total experience.

The paper was completed by a series of tables giving in detail the results of the experience.

BOND ISSUE WAS LEGALLY AUTHORIZED

Holder of First Mortgage Bonds Must Comply with Decision of Other Bondholders, if He Wishes to Retain His Security

ACTION taken by a bondholder of the Canada Stove and Foundry Company, attacking the validity of an issue of bonds made by the company in 1918, failed in the Superior Court of Quebec province, according to a judgment handed out recently. The plaintiff, Peter Z. Bonneville, had purchased some of the company's first mortgage bonds issued in 1916. In 1918 a reorganization of the company became necessary, and a meeting of the bondholders was held at which a resolution was passed authorizing the company to create $750,000 of six per cent. prior lien bonds, and $1,000,000 of six per cent. second mortgage income bonds, the latter bonds being exchangeable for the original first mortgage bonds of the company.

Holder Refused to Exchange

The plaintiff refused to exchange his bonds, and in October, 1918, took the present action, asking that the proceedings at the bondholders' meeting be declared illegal, and that the prior lien bond issue be annulled. On December 3rd, 1919, a winding-up order was granted against the company, and Paul L. Turgeon, liquidator, was subsequently authorized to contest the action.

The judgment holds that the rights of holders of original first mortgage bonds were confined to receiving from the trustee in exchange for their bonds an equal amount par value of second mortgage income bonds, and that, under the terms of the trust deed creating the original first mortgage bonds, the plaintiff had no right to institute the present action. It is also declared that the company was not insolvent at the date upon which the new bond issue was created, and that the bondholders had power to authorize the creation of such prior lien bonds. The plaintiff's action was accordingly dismissed with costs.

CANADA NATIONAL FIRE CASE

An interesting insurance case has just been decided before the Court, the Canada National Fire Insurance Co., of Winnipeg, having sued Albert Wesley Woodard for $13,727 damages. It appears that Mr. Woodard was at one time branch manager for the Canada National in Vancouver. Owing to dissatisfaction on his part, he left the company, but was reappointed, according to his sworn statement as a recording agent, but to secure this appointment he was obliged to sign an agreement—one clause of which was that if he left the company he would not solicit business from, or interfere with, the clients of the insurance company. In January, 1919, he did leave the service, and it was contended that he did canvass the policyholders of the Canada National, and it (the company) is alleged to have lost, during the year, in this way, over $5,000 in premiums. Mr. Woodard claimed that the action of the company, subsequent to his signing the agreement, warranted him in believing that the said agreement was of no effect.

Mr. Woodard further referred to conversations with the officials of the company in regard to this matter, but the Court did not allow these conversations to go in as evidence. Justice Macdonald gave judgment to the effect that the written agreement signed by Mr. Woodard was legally binding upon him, and he allowed the injunction to restrain Mr. Woodard from interfering in the company's business in the manner indicated, and awarded the company damages.

Canadian Debentures Corporation, Ltd., have removed their offices from 8 King St. W., Toronto, to 36 King St. E. W. R. Fleming is manager.

SHOULD TRUSTEE MAKE INCOME RETURN?

Whether a trust company can be required by the city assessment department to make a return, showing income payable to beneficiaries, was discussed in the Toronto Court of Revision on November 2nd. George Hearst, on behalf of the department, said:—

"The position is that the department have found that large estates have not been assessed on their prospective income. It is our purpose to assess beneficiaries who reside in the municipality. We send these beneficiaries income schedules, and they come back, saying, 'We have no income.' We are told to go to the trust companies, who are the trustees, for the information. Mr. Watson, of the Toronto General Trusts, says to us: 'If you get a letter from the beneficiaries, we will give you the information.' Now, we contend the Act says these corporations should give the department the information. We have come to the court, and you have said the department should get the information. The Appellate Court says the estate is subject to assessment in the municipality where the testator died. All we want is that the corporations should assist us. Every corporation has to file a statement of the dividends, and we contend we are entitled to know whether such dividends are assessable against the corporation or any beneficiary in the municipality."

Another point emphasized by the department was that where the income goes to capital instead of being distributed it should be assessed.

CASE ON ALBERTA SOLDIERS' RELIEF ACT

The Alberta Chancery Court has just held that a mortgagor cannot stay foreclosure proceedings by the transfer of his interest to a soldier. William J. Corkrum, in March, 1915, commenced an action against Donald Hope for the recovery of money due under a mortgage. Since that time, the action has been pending before the court. In the meantime the plaintiff died, and the defendant's son enlisted. In October, 1919, Percy C. Hope, the son, claimed to have an interest in the property, and the court stayed the action under the Soldiers' Relief Act, although Percy Hope was not a party to the action.

In June, 1920, Percy was added as a defendant. The plaintiff appealed from three orders of the court, and Justice Scott has now given judgment allowing the appeal with costs, and setting aside the orders appealed from. The judge held that Percy C. Hope was not a necessary party to the action, and was not entitled to be made a party defendant, merely for the purpose of obtaining a stay of proceedings under the Soldiers' Relief Act.

"To hold, for instance, that after proceedings had been taken under a mortgage the mortgagor may fraudulently or otherwise transfer his equity of redemption to a soldier, and that the latter as such would thereupon be entitled to stay the proceedings would open a wide door for fraud, as it would provide an effectual means of obtaining a stay of proceedings in every mortgage action.

"In my view, the nature of the possession referred to in the act is actual possession, which is something more than the constructive possession which one tenant in common may be entitled to claim by reason of the actual possession of the property by another tenant in common.

"I entertain a strong suspicion that the application to make Percy C. Hope a party to the action was made entirely in the interest of his father, Donald Hope, and solely for the purpose of enabling him to stay the proceedings in the action and thus enable him to retain possession of the property.

"It was under his instructions that the application was made, his son having left for South America (where he now resides), some months before it was made. It is true that the father claims to be acting under power of attorney from the son, given in March, 1918, but it appears that he resided in Calgary after his discharge for about a year, during which he does not appear to have sought to be made a party."

News of Industrial Development in Canada

Power Shortage in Ontario not yet Relieved, but Negotiations are Under Way—Armour Company Leaving Canada—Flour Mill Established at Charlottetown—Steel Industry not Affected by Depression, Says Authority—Dominion Shipbuilding Plant to be Operated—Prince Rupert Drydock Company Suspends Operations

NEGOTIATIONS between the Ontario government and the Electrical Development Co. for the relief of the power shortage, which is crippling Ontario industries, are still pending. A proposition was submitted by the company last week, but was rejected by the government. The proposition contained the following conditions:—

"If the government will take or cause to be taken such action that during the period of generation of power in excess of 125,000 h.p. (peak load) under our proposition (a) we will be put in the same position as if the Act of 1920 had not been enacted, and (b) the existing injunction order will be suspended on proper terms, and (c) we will be put in the same position as if the Act of 1917, and the order-in-council of June 27, 1918, had not been passed, and (d) we will not be subject to any claim based upon alleged exceeding of our license under our contract with the Park Commission:

"(1) We will, from time to time, as demand requires, generate power in excess of 125,000 h.p. (peak load), up to the capacity to which we are advised our plant can, from time to time, be safely and properly operated. (We estimate this to mean, at the present time, with all units in commission, a possible commercial output of 15,000 h.p. in excess of 125,000 h.p. (peak load).

"(2) We will supply such power generated in excess of 125,000 h.p. (peak load), from time to time, at market or current contract prices, on usual conditions, to any customers who apply and are prepared to pay for it, and can take it, under operating conditions which we are advised are safe and proper, from our distribution system or connections with it, provided by the customers.

Premier Drury, in his reply to these conditions, said the specific value of this power has been set by a commission of judges at $9 per horse-power. Understanding from the company, however, that its case was not represented before that commission, he offered to reappoint it to decide again on a fair price. The premier also took objection to the manner of distribution. He suggested that the company deliver in the same manner as it did the 13,500 horse-power which it delivered to the hydro up to October 15.

From the standpoint of the hydro engineers, the chief drawback to the offer is its stipulation that the relief be given by the company taking over a number of big hydro power contracts. The hydro commission makes the same suggestion as Premier Drury in this regard.

Armour Company Closing

On November 8 announcement was made from Chicago of the closing of the Canadian business of Armour and Co., the large packing company, including the plant at Hamilton, Ont., and selling agencies at St. John, N.B., Sydney, N.S., Hamilton, Ont., Montreal, Que., and Toronto. A statement given out at Hamilton last week by J. W. Duvall, general manager there, explains the situation:—

"With the export market practically gone and with hogs at prohibitive figures, the closing of the Hamilton plant of Armour and Co. has been made imperative. We hope to be able to resume operations when conditions become favorable for conducting the plant on a basis which makes earnings possible.

"While the lack of an export market and the high price of hogs are the immediate causes for cessation of operations, there is another underlying handicap to the success of packing operations at Hamilton. Due to the small margins on which we operate, large volumes are essential in our business, and the production of hogs in the Hamilton territory has not been sufficient to enable volume operation. We have always felt and we still believe that this territory can produce good hogs in abundance, but it is not being done now. Our plant has been operated for a long time on a basis far short of its capacity, and this has greatly increased the overhead expense which each animal necessarily has to bear. That made it impossible for us to compete with plants more favored as to volume. It is the part of good business, therefore, to close the plant.

"Cessation of operations is being brought about gradually as stocks are cleared out. We look forward to the time when we can resume operations here and be more than ever a factor in the industrial life of Canada."

Charlottetown Flour Mill

A new flour mill has been established at Charlottetown, Prince Edward Island, and is now working at full capacity. This mill has a capacity of 150 barrels of flour per day and will be able not only to take care of all the wheat grown in the province but will import largely from the western provinces, thus manufacturing at home a large proportion of the wheat now imported, and giving employment to Island labor. It is the intention to produce two brands of flour, namely, Gold Bond and Garden City. The former will be milled from No. 1 western wheat and will be a high grade patent; the later will be a blend of Island and western wheat, both brands having a distinct flavor.

The promoters of this new industrial undertaking are: B. D. Howatt, president; Isaac Carter, vice-president; H. M. Davison, C. H. Chandler, and B. W. LePage, secretary-treasurer.

Iron and Steel

A quarterly report by the Lake Superior Corporation contains satisfactory statements of production and of railway conditions. The output of coke, pig iron and steel ingots for the three months ending September 30 reveals a large increase over the figures for the corresponding quarter a year ago. The shipments of iron and steel are also much higher, being 142,246 tons, compared with 48,229. Unfilled orders on September 30, including pig iron and steel, for delivery in the last quarter of 1920, were 200,000 tons. "A satisfactory tonnage is offering for delivery in the first quarter of 1921," says the report. "The output of Lake Superior coal and of limestone shows an increase, while that of Cannelton coal is lower. The coal companies operations have been curtailed on account of car shortage."

The plate mill of the Dominion Iron and Steel Co., at Sydney, N.S., last month surpassed all former records in output, turning out 4,900 tons. The previous record was slightly over 4,500 tons. Whether the plate mill will be kept in operation all winter or not depends on orders from the Canadian government.

The rail mill at the steel plant, which closed some weeks ago for lack of orders to keep it in operation, is to resume work at once on the manufacture of a small order of billets. The order which the company has received will keep the mill in operation for about two weeks. Future operations depend on whether or not further orders are received.

According to authoritative reports, the Dominion Bridge Co., and its subsidiary the Dominion Engineering Co., are operating to capacity in every department, and orders now on the books are sufficient to ensure continuation of these conditions for many months to come. The principal drawback experienced by the company is no longer the difficulty of obtaining orders, but the difficulty of obtaining supplies of sheets and bars and various iron and steel products re-

quisite for the manufacture of the orders taken by the company. Lack of transportation facilities is apparently responsible for some of this shortage. In this connection it is interesting to note that Canadian iron and steel mills are too busy to supply all the requirements of the company, so that supplies have to be imported in part from outside. In the matter of labor, the situation is improving somewhat, but the supply is still on the short side.

The fact that Canadian steel mills are very busy is further emphasized in a statement by S. J. Waddie, president of the Canadian Drawn Steel Co., Hamilton, that his company has sufficient orders on hand to insure uninterrupted operations for a long time to come. It is his opinion that the steel industry will not likely be affected to anything like the same degree as other lines of industry might be. "We could get much more work to do if we could only get the raw material," he said.

Shipbuilding Plant Resumes

It is understood that the plant of the insolvent Dominion Shipbuilding Co. will be utilized by the Henry Hope Co., of Peterboro, Ont., to complete some contracts for the Dominion government. When the Dominion Shipbuilding Co. went into liquidation last August there were on hand two unfinished government boats. The Henry Hope Co. will finish these, and in the original shipyards, of course.

While this plant is to be opened, announcement is received to the effect that the Prince Rupert Drydock and Engineering Co. has suspended operations. The company was constructing under the government program two vessels of the 8,100-ton type so that the Dominion's shipbuilding program will receive a temporary setback. The government, however, is fully protected from loss by guarantee bonds. Inability to meet its debt is given as the reason for the suspension of the shipbuilding company.

FOUR INSURANCE LICENSES ISSUED LAST WEEK

All Were Provincial, And Three Authorized Extension of Scope—Insurance Agency Changes Its Name

AUTHORIZATION has been granted to the Beaver Fire Insurance Co. to transact in the province of Quebec the business of fire insurance. R. J. Dale, Coristine Bldg., Montreal, is the chief agent for the province.

In addition to this, two companies, already licensed to transact business in the province of Quebec, have had their scope extended. The Northern Assurance Co. may now write burglary insurance, in addition to numerous other classes, while the National Benefit Assurance Co., Ltd., has been authorized to transact accident and sickness insurance, in addition to fire business which it already writes.

The London and Lancashire Guarantee and Accident Co. of Canada, has been licensed to write burglary insurance and insurance against loss or damage occasioned by larceny, theft, or stealing from the person by violence, threat, holdup, or otherwise, in British Columbia, in addition to other classes of business which it is already transacting in the province.

Carson and Williams, Bros., Ltd., prominent Canadian insurance agents, have changed their name to Carson, Williams and Willcox, Ltd., to give more prominence to the position in the company of W. J. Willcox. Mr. Willcox has been in actuality a member of the company for the past nine years, being located at Winnipeg, and having charge of the Winnipeg, Regina and Calgary offices.

Cramer and Co., Ltd., insurance investment and estate agents, have removed their offices from the Canada Life Bldg. to 530 Seymour St., Vancouver, B.C. The growth of their business necessitated larger and more conveniently located premises. The company represents the Imperial Guarantee and Accident Insurance Co. of Canada, the Century Insurance Co. of Edinburgh, Scotland, and the Equitable Fire and Marine Insurance Co. of Providence, R.I.

NEW INCORPORATIONS

Kilgour Bros., Ltd., Toronto, $2,500,000—International Screencraft Co., Ltd., Sault Ste. Marie, $1,500,000—Ormes Steamship Co., Ltd., Montreal, $1,000,000

1870 —— OUR GOLDEN JUBILEE —— 1920

Two Hundred Million Dollars

This year the Mutual Life Assurance Company of Canada celebrates its golden jubilee by reaching the two hundred million dollar mark. This point in the expansion of The Mutual Life has been reached more quickly than any of its most ardent friends would have believed possible five years ago. But the reason is not "far to seek." During the Great War and the fatal epidemic which followed in its train The Mutual Life paid out in relief of the families bereaved no less than two million, three hundred thousand dollars ***in addition to ordinary claims.*** The benefits of life insurance were thus so clearly demonstrated that an immense demand resulted and the business of The Mutual has developed as much during the last five years as during the preceding forty-five years. The Canadian people suddenly realized the absolute necessity for life insurance and naturally turned to a company well-known, well-established and financially impregnable.

The Mutual Life Assurance Co. of Canada

Waterloo Ontario

After the Harvest

protect the gains of another abundant year by the safeguard of Life Insurance.

A Life Policy gives PERMANENCE to prosperity. It guarantees the welfare of dependent ones.

Life Insurance is not expensive. A little money and good health are the requisites. You may have the money next year—but the good health may have gone So arrange your protection now—and arrange it in the Company issuing Policies that cost least and return the highest Profits.

News of Municipal Finance

Calgary's Position Criticized by Civic Commissioner—Australian Tax Collection System Suggested for Victoria — Negligent Bookkeeping in Eastview Causes Vexing Situation — Toronto Finance Commissioner Sounds Note of Warning Regarding City's Capital Obligations

Lethbridge, Alta.—From January 1 to the end of October, 1920, collections of current taxes amounted to $375,268, or 66.16 of the total levy. Last year the figure was $315,248, or 65.43 of the total levy.

Hamilton, Ont.—A good showing is revealed in the report of W. A. Kerr, collector of taxes. The report shows that the estimated tax collection for 1920 was $3,424,159, and the amount actually collected to the end of October was $3,283,636. The collection for Homeside amounted to $71,706.

Winnipeg, Man.—According to figures made public in the city last week, Winnipeg ratepayers contributed $15,378,943 to the school board from 1895 to 1920, or 19 per cent. of the $79,006,949 taxes raised in the same period. The school outlay increased from $94,000 in 1895 to $2,175,700 this year. The population increased in these years from 34,954 to 192,571, the property exemptions from $4,424,330 to $40,971,930, the land assessment from $11,730,250 to $144,332,700, and the assessment on buildings from $7,030,700 to $92,637,710.

General taxes increased from $521,603 to $7,637,935, including special assessments. In these totals the taxes for municipal purposes increased from $292,839 to $3,977,594 and the business taxes from $60,869 to $431,915. Patriotic levies aggregating $1,265,500 were paid from 1916 to 1919, inclusive.

Toronto, Ont.—Finance Commissioner Ross has sounded a note of warning regarding the city's capital obligations. Mr. Ross says that although the city has been able to dispose of bonds approximating $2,250,000 this year, there still remains the large sum of $13,367,117 to be marketed. He points out that after the latter amount has been issued, the city's borrowing margin will be reduced to $5,500,000. The only relief in sight lies in the fact that next year bonds of $4,780,000 will mature and be paid off.

He further calls attention to the fact that the city is committed to immense obligation in the near future, in connection with the acquisition of the Toronto Railway system and the necessary extension and changes that must follow in order to provide an adequate transportation system for the entire city. In addition, $8,568,861 is required in connection with the hydro radial enterprises already authorized. Other contingent liabilities, the amount of which cannot be estimated at present, are in connection with the waterfront viaduct and the city's share of the harbor improvements. "In view of these things," says Mr. Ross, "it would seem imperative that no further capital commitments be considered until such time as the amount of the present commitments is materially reduced."

Eastview, Ont.—An audit of the town's books has just been completed. This audit was taken following the dismissal last July of A. Guilbault, tax collector, who, it was alleged, had been negligent in his duties, and short in his funds. The auditors' report shows the town to be solvent, there being a surplus of assets over liabilities of $2,637. The net debenture debt amounts to $160,239, less cash in sinking fund of $7,591. The shortage of the tax collector as at July 20 last was $259, less $250, deposited after that date.

Apparently, negligent bookkeeping has been the cause of all this trouble. There had been a number of unauthorized cheques issued by the tax collector, that is to say, without the accounts having first been passed by the council, aggregating close to $50,000. The report states that the tax collector's rolls had not been balanced from year to year. If they had been the deficiency would have been discovered. In addition, there is apparently something lax with regard to the collection of taxes, as the audit shows that the total amount available for tax collections on the assessment for 1919 was $43,989, and of this there was an amount of $34,751 not collected.

There is no suggestion in the report that there has been anything savoring of dishonesty in the financial administration of the town, but it is made plain that there has been much negligence, particularly with regard to bookkeeping, which has resulted in the affairs of the town being in a very muddled condition.

Victoria, B.C.—As in the case of many other western cities, the municipality is confronted with the reverted land problem. W. G. Cameron, reverted land commissioner, has stated that he has been unable to get much further than the outside fringe of the situation, and that he has been unable to devise any policy to recommend for the disposal of the land that has been accumulated to the credit of the city as the result of tax sales.

"As we look back, it is easy to see where we made mistakes," said Mr. Cameron, "but it is a very different matter to set things right. It is now patent to everyone who has looked into conditions that the city embarked upon too much local improvement work simultaneously, and did so without keeping sufficiently close attention to the relation between estimates and actual cost. The other big mistake was the postponement of tax sales and the lack of effort to induce prompt payment of taxes. Then, of course, the city was handicapped to some extent by the Moratorium Act, War Relief Act and similar measures which delayed payments. In the case of local improvement work, instead of the individuals being responsible for payments, it was the corporation that had to bear the load."

Mr. Cameron said that application of the Australian system along modified lines might help to solve the problem, but he doubted whether it could be introduced at this time without creating a lot of trouble and giving rise to legal complications. In Australia property owners are expected to meet their tax payments promptly, and if they fail to do so, the matter is at once taken to court and judgment given against the owner, if the debt to the municipality can be clearly established and the owner is solvent. There is practically no such thing as a tax sale, because the taxpayers toe the mark all the time and naturally follow the tendency of not speculating or buying more than actual requirements unless they are sufficiently well fixed financially to carry the load for an indefinite period. The municipal authorities in Australia do not concern themselves so much with the property as with the individual. The taxpayer, knowing the consequences of getting into debt with the city, pays promptly and makes it his business to keep out of the courts. If he defaults in his taxes it is no matter of his own choice whether he lets the property go. The municipality doesn't bother about his property. It takes his money.

Calgary, Alta.—In the course of an address before the Dominion Labor party in Calgary last week on the problem of municipal taxation, the past and present system of the city was the subject of severe criticism by Commissioner Samis. "The difference between what the city of Calgary is paying annually, and what it should pay if the term of debentures was what it should be, is $200,000," declared the commissioner. He went on to say that the extension of the term of several classes of debentures and the borrowing of money against the land that has come into the possession of the city would go far to the solution of the problem.

"We owe $1,500,000 to a bonding house in New York, which is the first charge against our unpaid taxes," continued Mr. Samis. "We owe the sinking fund $2,500,000, the fund having been short-changed as a result of our being unable to collect taxes after the boom. We have land assessed at

$5,000,000 from previous sales, and expect to get another $1,000,000 from the next, making a total of $6,000,000. There is no reason why we should not bond that land. We don't have to pay out much more than $100,000 a year."

With regard to the suggestion of some members of the council to shorten the term of debentures to five years, Mr. Samis said: "They would ruin the city. With our present population of 75,000 and the development we may expect in ten years' bonding of the land, it would be well worth while." He cited the Center Street bridge on which $6,000 a year is paid to sinking fund on thirty-year debentures, as an example of a too short term. Engineers stated that the bridge would last one hundred years. He would not suggest so long a term, but would point out that the sinking fund on a hundred years' debentures would be only $500. Waterworks debentures, not for thirty years, would be for sixty years.

In connection with the city's present indebtedness on unprofitable extensions of utilities, the commissioner stated that this is due to influential persons, who during Calgary's early development, wanted to get into the gambling game in real estate. "It was most unfortunate that more of these absurd schemes had not been turned down. Street railway extensions for the benefit of the owners of subdivisions were the primary trouble, because wherever the street railway goes eventually the other utilities have to be put."

The matter with the city, said the speaker, is that it was laid out by the C.P.R., and that a great deal of railway land was exempt from taxation. If it had not been for this, and for the stringing out of the utilities which resulted, the bonded indebtedness of $4,000,000 on the waterworks would have been $1,000,000 less. Interest and sinking fund has now to be paid on that unnecessary capitalization.

Government and Municipal Bond Market

Nova Scotia and Toronto Received Good Prices for Their Securities—Former Issue Will be Sold Across the Line—Ontario Coming on the Market Next Week—Windsor Bonds Are Disposed Of

THERE was a great deal of activity in the government and municipal bond market during the past week. Two large issues, namely, the city of Toronto and the province of Nova Scotia, were taken up, and in addition many other municipal sales were made.

The price received by the city of Toronto, which was on a basis of about 6.55 per cent., was considered a good one, and Finance Commissioner Ross was entirely satisfied, taking into consideration the condition of the market.

Nova Scotia received a good price for its securities, the basis being about 5.63 per cent. This is a much better rate than the province received previously this year, and apparently indicates that the market in the United States for our bonds has improved, as all the issues but one were disposed of by the province across the line.

Coming Offerings

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Langenburg, Sask.	$ 9,500	8	15-years	......
Ontario	5,000,000	6	7-years	Nov. 15

York Township, Ont.	8,765.10	6	5-instal.	Nov. 15
Etobicoke Twp., Ont.	25,000	6½	30-instal.	Nov. 15
Pembroke, Ont.	47,000	6	10 & 30-inst.	Nov. 24
Freeman Twp., Ont.	10,000	7	20-instal.	Nov. 27
Sault Ste. Marie, Ont., S.S. B.	85,000	6	......	Nov. 30

York Township, Ont.—Offers are being asked until November 15, 1920, for $8,765.10 6 per cent. 5-instalment debentures.

Etobicoke Township, Ont.—Tenders will be received until November 15, 1920, 10 o'clock, for $25,000 6½ per cent., 30-instalment debentures..

Pembroke, Ont.—The town is asking for bids until November 24, 1920, for the purchase of $33,000 6 per cent. 10-instalment debentures, and $14,000 6 per cent. 30-instalment debentures. (See advertisement on page 25 of this issue.)

Sault Ste. Marie, Ont.—The Separate School Board is asking for tenders on $85,000 6 per cent. debentures until November 30, 1920. (See advertisement on page 25 of this issue.)

Debenture Notes

Brantford, Ont.—The Brantford Scale Company is asking the city to guarantee its bonds to the extent of $80,000.

Mimico, Ont.—The council has given first reading to a by-law to issue debentures to the amount of $23,000 for school purposes.

Windsor, Ont.—Providing the city council approves, ratepayers will be asked to vote on a by-law in January next, authorizing the borrowing of $175,000 for a new police station.

Cochrane, Alta.—The Board of Public Utilities Commissioners has given its approval of the issue of $4,000 debentures for electric light and sidewalk purposes.

Paris, Ont.—Early in December, ratepayers will be asked to approve of guaranteeing the bonds of the Macfarlane Engineering Company to the extent of $40,000.

St. Thomas, Ont.—Members of the city council, the board of trade and the trades and labor council have endorsed a proposition to raise $200,000 for water purposes. Ratepayers will be asked to give their approval.

Lethbridge, Alta.—Prospectus for the Lethbridge Northern Irrigation project is now being prepared by an expert of an eastern bond house, and is expected to be ready within a week. Then tender forms will be distributed to bond houses in the United States and Canada.

Calgary, Alta.—The city is considering the issue of $600,000 bonds for the installation of a gas pipe line. Should the council approve such action, ratepayers will be asked to vote on the matter at the December elections, following which the Public Utilities Commission must give its approval.

Windsor, Ont.—The city council will be requested by the finance committee at its next meeting to authorize the preparation of a by-law for submission to the ratepayers at the municipal elections in January respecting the plan of Essex Utilities Commission to take over Windsor and Walkerville waterworks for a joint system to serve all the border municipalities. The project, it is estimated, will involve an ultimate expenditure of approximately $1,800,000.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from October 23 to 30, 1920: Proswita S.D., $1,500 8 per cent. 10-instalments. Rural Telephones—8 per cent. 15-years annuity: Whitewood St. Hubert, $15,450; Atwater, $2,100; Tipperary, $1,600.

Bond Sales

Moosomin, Sask.—The town has sold $5,338.72 7 per cent. 20-year debentures to local citizens at par. The money will be used for cement sidewalks.

Niagara Falls, Ont.—W. A. Mackenzie and Company have been awarded $153,955 5 per cent. 10 and 20-instalment debentures at a price of 90.03, which is on about a 6.60 per cent. basis.

Sarnia, Ont.—The Dominion Securities Corporation have purchased an issue of $164,981.87 5½ and 6 per cent. deben-

---

*These two syndicates also bid for half of each maturity. In the case of the 5 and 10-year bonds payable in New York the offer was 102.435. In the case of the 10 and 20-year bonds payable in Canada the price was 92.50.

Windsor, Ont.—W. A. Mackenzie and R. A. Daly and Company have purchased $377,547 5½ and 6 per cent. bonds, which mature from 1921 and 1960, inclusive. The proceeds of the issue will be used for various purposes. It is understood that there were several bids for the securities, although no prices have been announced.

Oshawa, Ont.—A. E. Ames and Company have been awarded $78,743.88 6 per cent. 15-instalment debentures at 94.199, which is on about a 6.94 per cent. basis. Tenders received were as follows:—

A. E. Ames and Co., 94.199; Wood, Gundy and Co., 93.90; Dominion Securities Corp., 93.588; United Financial Corp., Ltd., 93.56; Æmilius Jarvis and Co., 93.53; N. A. McDonald and Co., 92.76.

Toronto, Ont.—The city's $2,853,000 6 per cent. bonds have been sold to a syndicate of Toronto dealers at 94.317, which is on a basis of about 6.55 per cent. The securities are for various maturities, but the average is 17½ years. Four tenders were received as follows:—

Dominion Securities Corporation, R. A. Daly and Company, W. A. Mackenzie and Company, Harris, Forbes and Company, Inc., and the National City Co., Ltd.	94.317
*A. E. Ames and Company and Wood, Gundy and Company	93.239
A. Jarvis and Company	93.21
United Financial Corporation, Ltd., and R. C. Matthews and Company	90.60

---

*In addition to this bid an offer was made for $1,834,000 at 93.239 and an option on the balance at 94.450.

Smith's Falls, Ont.—Tenders will be received until November 22, 1920, for the purchase of $9,200 6½ per cent. 20-instalment debentures, the proceeds of which will be used for hydro-electric purposes. J. A. Lewis, town clerk.

MUNICIPALITIES FEELING SHORTAGE OF CAPITAL

Defaults Have Seriously Affected Their Ability to Borrow—Settlement in Case of Humboldt

(Special to *The Monetary Times.*)

Saskatoon, Sask., Nov. 8, 1920.

QUITE recently some developments have been taking place in the municipal situation in Saskatchewan which are of more than ordinary importance. The outstanding one is, of course, the enquiry into the affairs of Humboldt by the Local Government Board. It may be worth noting here that the business of this body is steadily growing, and is of a varied character.

By the outsider it is looked upon as the responsible supervisor of capital expenditure in municipalities. Every new school, electric light plant or skating rink or other public undertaking, the carrying out of which by a municipal or school authority involves going to outside markets for capital, must first have the consent of this body. The importance of this prerogative of the board is certainly not appreciated by the public generally in Saskatchewan, nor that of any other province of the Dominion, except those units of the general public who have been approached by the bond salesman with a view to becoming a holder of Saskatchewan municipal or school bonds. Of course the bond dealers appreciate the importance of the board, and they represent to prospective buyers of Saskatchewan municipal, school and telephone debentures that the money they represent is expended under the board's supervision. The Act creating the board charges it to do so.

To buyers of bonds it is, therefore, represented, and properly so, that Saskatchewan bonds are safe purchases, because the affairs of the borrowing bodies are kept within the limits of safety by the board. And when it is possible to make this statement the market for the said bonds should be appreciably widened. For some reason, however, this obviously sane policy, under which the capital expenditures of municipal and school authorities are carefully supervised, has not resulted in the creation of a ready market for Saskatchewan city and town school and municipal debentures.

Poor Sale for Bonds Now

That so little demand exists for these debentures is one of the serious developments in local affairs here. Within the past few days a town school districts' officers deplored the fact that, even on a basis of 10 per cent., they could not get an offer for their bonds. Saskatoon itself, a city that has put its financial affairs into such order as to compare favorably with any other city of the province, has its own difficulties in marketing securities, although its desires in the way of borrowing received from the Local Government Board severe checks. The volume of rural school debentures that would go to market if there was one big enough is very large. It is presumed, however, that the Local Government Board has fixed the limit of 8 per cent. to the borrowers as the maximum. Buyers, however, are not rushing to buy these securities on even that basis, and in consequence the volume available is difficult to measure.

Many school districts are being organized, and the aggregate of their needs must be very large. But the spout through which these bonds get to the public is under the careful control of the Local Government Board. The same applies to telephones. Rural exchanges are growing in number, and they are as valuable in bringing the people into touch with each other, and thereby obliterating that strangeness which makes nation-building more difficult, as are the public schools. But 8 per cent. is not now attractive to the buyers of school and telephone bonds. Nor does any rate of interest prove attractive in the case of Saskatchewan municipal and school bonds. Naturally, the question is being asked why these things should be.

To this question the public are beginning to look for an answer from the Local Government Board. Why is it that

Stock Prices Break on Canadian Exchanges—Atlantic Sugar and Papers Suffer Heavy Losses — Some Slight Rallies at the Close — Wayagamack Shareholders Plan Capital Reorganization—Winnipeg Electric Railway to Increase Authorized Capital

THE break in stock prices on the Canadian exchanges this week did not come altogether as a surprise, although such drastic changes were not expected. Ever since last August stocks have pursued an uneven downward trend, and business and other financial developments during the past month added to this movement. The largest losses last week were sustained by Atlantic Sugar and the paper issues.

Towards the close of November 10, however, the markets showed an improved tone. Many stocks advanced a few points, but none entirely retrieved their losses. Several influences combined to alter the situation, which had become to look very gloomy. The support of the markets by Canadian bankers was, no, doubt, one of these. Then a recovery in Wall Street helped to improve the sentiment. A smart advance in the price of Canadian wheat on news of British buying and the recovery of sterling in New York were also other important developments.

Just what the outlook of the markets is, nobody has been bold enough to predict. It is certain, however, that their condition is such as to necessitate careful moving on the part of speculators for some time to come. Business adjustment has by no means been completed yet, and until it has, there can be no definite movement in stock prices.

Liquidation which accompanied the decline last week was heavy, as will be seen from the following figures:—

	Montreal.		Toronto.	
	Listed stocks.	Bonds.	Listed stocks.	Bonds.
Thursday	14,616	$ 9,100	1,142	$ 9,500

	126,472	$171,000	11,166	$163,600

The figures for the previous week were: Montreal, listed stocks, 54,443; bonds, $131,412; Toronto, listed stocks, 7,320; bonds, $146,400.

The Frontenac Moulding and Glass Co., Ltd., Kingston, Ont., incorporated under the laws of the Dominion with a capital of $250,000, has been authorized to increase this capital to $325,000, by the creation of 750 new shares of $100 each.

Harvey Knitting Co., Ltd., Woodstock, Ont., incorporated under the laws of the province of Ontario, is decreasing its capital from $1,500,000 to $1,280,500, by the cancellation of 1,861 shares of preferred stock and 334 shares of common stock, all of a par value of $100.

Winnipeg Electric Railway

A special general meeting of the Winnipeg Electric Railway Company is called for December 4 for the purpose of ratifying and approving a by-law of the directors increasing the common capital stock of the company to $11,000,000 from the present authorized amount of $10,000,000.

Shareholders will also be asked to ratify and approve a by-law amending the by-law authorizing the issue of $3,000,000 7 per cent. cumulative preferred stock by making provision for giving voting powers to the holders of such preferred stock, and by providing that no further issue of preferred stock in excess of $3,000,000 shall be authorized unless the authority is obtained of the holders of such preferred stock, and by providing that no further issue of preferred stock in excess of $3,000,000 shall be authorized unless the authority is obtained of the holders of two-thirds in amount of the preferred stock issued and outstanding.

The $3,000,000 7 per cent. preferred stock mentioned was purchased some time ago and is now being underwritten by Nesbitt, Thomson and Company.

Wayagamack Reorganization Plans

A circular has been sent to shareholders calling a meeting for December 9, to ratify proposals which have been made by directors in regard to capital reorganization. The circular reads in part as follows:—

"Your directors after serious consideration have come to the conclusion that the capital of your company should be reorganized by the conversion of the present outstanding 50,000 common shares of the par value of $100 each into 100,000 common shares without nominal or par value, each shareholder to receive two shares of such new capital stock without nominal or par value for each one share then held by them.

"Your directors are further of opinion that the authorized capital stock of the company should be increased by an additional 150,000 common shares without nominal or par value, of which 50,000 of such shares should be issued at an early date and offered ratably to the then shareholders of the company on favorable terms to provide for the cost of new extension recently made and new machinery recently purchased, and also to provide additional working capital for the company's requirements. The remaining 100,000 common shares without nominal or par value will only be issued when it may become necessary or advisable in the company's interests."

Maritime Provinces Support Protective Tariff

Farmers Present Arguments for Tariff Reduction at Most of Hearings, However—Statement by Thomas Cantley on Coal and Steel Industries—Sessions in Charlottetown, Halifax, St. John and Moncton

HEARINGS of the tariff commission were renewed in Charlottetown, P.E.I., on November 4. On November 6 and 8 the commission was in Halifax, on November 9 in St. John, and on November 10 in Moncton. From the latter city it left for Quebec province.

Prince Edward Island is chiefly agricultural, in fact, it was pointed out that only 2 per cent. of the population are engaged in manufacturing. The evidence was therefore favorable to lower duties. The case for the farmers was presented by Hon. Walter M. Lea, commissioner of agriculture; M. H. MacGregor, J. A. Dewar, M.P.P., of New Perth, president of the United Farmers of the Province, and Edgar G. Godding, of Murray Harbor, president of the Central Farmers' Institute. Mr. Dewar submitted a written memorial. The others gave verbal testimony.

Agriculture received the most attention from the commission, the chairman asking many questions, and there was an interesting discussion between the commissioner of agriculture and himself. Mr. Lea declared that it was possible to increase the annual earning power of the island farms, which he estimated at thirty million dollars, to double that amount by more intensive cultivation and the use of more fertilizers. Mr. Lea said that as mixed farming prevails on the island a great variety of agricultural implements were required. The duty on these should be reduced, in order to increase production. As the island has very few manufacturers, there is no opportunity of encouraging home industries, as goods have to be purchased elsewhere. The manufacturers of Canada largely get the benefit of the present tariff, not the government.

Senator MacLean presented a memorial from seven starch manufacturers. The memorial said that the mills had a capacity of ten thousand tons, that they are not operating now because the farmers will not supply potatoes at the price offered—60 cents per hundred pounds—and that the starch industry on the island was in danger of being wiped out owing to cheap Japanese starch being dumped into Canada at a price below the cost of potatoes here. The prohibition of Japanese starch, it was urged, might be considered by the commission.

Coal and Steel Industries

"A specific duty of $1 per ton on all coal would so stimulate production and distribution as to make Canada within 10 years independent of all outside sources, and add enormously to the wealth of the Dominion," said Col. Thomas Cantley, chairman of the Nova Scotia Steel and Coal Co., addressing the commission in Sydney on November 6. "The effect would be widespread, giving a long column of long haul business to the Canadian National and other Canadian railways, while the annual food requirements of the mining population, say $35,000,000, would all go to the farmers of Canada. Clothing and all the other necessaries of life required by these miners, assorted labor and families would be supplied by Canadian manufacturers. The adverse trade balance with the United States would be materially reduced, with all the advantages accruing to Canada from such a condition. If the Nova Scotia coal companies granted the increased wages recommended by the Royal Commission, the cost of coal would be increased $1.50 a ton."

Dealing with the steel industry, Col. Cantley said: "Nova Scotia blast furnaces and associated steel plants are wholly dependent upon Wabana, Newfoundland, ore, a considerable portion of which is won from submarine areas at a point one and a half or two miles from the surface hoisting plants. This ore, freighted by sea to North Sydney and Sydney, is subject to an export tax levied by the Newfoundland government. The ore averages about 50 per cent. metallic iron and is used wholly in the blast furnaces of the Scotia and Dominion companies without the admixture of other ores, the product being pig iron, conveyed in a fluid state to basic open-hearth furnaces for conversion into steel ingots.

In conclusion, Col. Cantley appealed for "a revised tariff which would provide, by way of increased duties and the total abolition of the free list steel items, a substantial amount of protection to the coal, iron and steel industry of Nova Scotia, which has contributed so largely to the development and wealth of Canada, with but a very small return to shareholders."

Varied Views in Halifax

Groups of representatives of the manufacturers, the fishing interests, the farmers, and the retail and wholesale merchants presented stated cases to the commissioners in Halifax. Nova Scotian farmers, represented by D. L. Taggart, president of the United Farmers of the Province, expressed themselves as being in favor of a substantial reduction in tariff on articles necessary to agriculturists. Mr. Taggart attributed the "languishing" of the agricultural industry and the depopulation of farms in part indirectly to a protective tariff which favored certain industries, enabling them to offer better wages and shorter hours than did the farms.

W. D. Piercey read the manufacturers' brief, which opened with the direct assertion that "the manufacturers (of Halifax and other parts of Nova Scotia), as a class, believe it to be in their interests, in the interests of the working men, of the consumers and the nation as a whole that a policy of protection, such as has been enforced since 1879, should continue to be the policy followed by the government of Canada."

A. H. Brittain, of Montreal, vice-president and general manager of the Maritime Fish Corporation, urged the case of the fishing interests. "The best interests of the Canadian consumers, as well as those of the fishermen, will be served by the continuance of the present duty on fresh fish. It will enable us to develop plans for marketing so as to make fresh fish available at reasonable prices to practically all communities in Canada," reads an extract from Mr. Brittain's brief.

New Brunswick Hearings

In St. John, on Tuesday, representatives of several New Brunswick industries, including the fisheries, presented pleas for the maintenance of the present tariff, urging that in many cases large capital investments would be wiped out by the influx of United States surplus goods placed on the markets of Canada at lower-than-cost prices to drive Canadian industries to the wall. It was held that this could be done in many cases despite the Canadian dumping laws. Representatives of the farmers were also heard. These put forward the tariff planks in the United Farmers' party platform, urging the reduction or elimination of duties on implements of cultivation and necessaries of life.

W. S. Fisher, on behalf of the manufacturers of New Brunswick, presented a statement in favor of continuation of a policy of adequate protection in Canada. It opened with the assertion that, to provide a home market for the agricultural products of the province, which, being the products of mixed farming, were not so readily exportable as the grains of the west, it was necessary there should be industrial expansion in the province. So, too, it was set forth that the natural resources here furnished scope for activity for many citizens, but to secure the capital for development had always been difficult and would be more so if there was a likelihood of a departure from the policy of adequate protection.

Corporation Finance

Bell Telephone Hearing is Resumed—Company's Application For Increased Rates Meet With Much Opposition—Kerr Lake Production is Lower—Reserves of Ore at Cobalt Property Becoming Exhausted—Increased Gas Rates for Quebec Railway and Light Company is Recommended

Quebec Railway, Light, Heat and Power Co.—The civic finance committee of Quebec has recommended to the city council that the company be authorized to increase the gas rate from $1.25 per thousand cubic feet to $1.75, the increase to date from November 11, and under certain conditions.

Cockshutt Plough Co.—One change was made in the officers of the company in Brantford on November 10th at the annual meeting, E. A. Mott being added. The directors are: Col. H. Cockshutt, George Wedlake, G. K. Wedlake, Sir Augustus Nanton, E. A. Mott, Sir Lomer Gouin, H. W. Hutchinson, James Adams, F. Perry. The statements presented were reported as very satisfactory to the shareholders.

Kerr Lake Mines, Ltd.—Due to the gradual exhaustion of the reserves of both high-grade and low-grade ore at the Cobalt property, the amount of silver produced during the year ended August 31, 1920, was considerably less than during the previous year, and the cost of production was higher. The mine is now producing each month a relatively small amount of silver, and no definite estimate can be made as to how long this will continue. During the year under review gross production amounted to 956,049.92 ounces of silver, 42,654 pounds of cobalt and 34 pounds of mercury. These figures also include 88,598 ounces of silver on hand at August 31, according to inventory. Last year the result was 1,482,649.40 ounces of silver, 90,586.42 pounds of cobalt, and 137.5 pounds of mercury. Inventory showed 154,682 ounces of silver on hand.

The income account shows the balance transferred to the balance sheet as $916,089, as compared with $22,152 last year. The account shows no dividend payments, however, while last year payments totalled $600,000. Dividends received from the Kerr Lake Mining Co. are stated as $1,000,000, as compared with $653,000 a year ago. Total assets of the company amounted to $3,377,641, while at August 31, 1919, the figure was $3,039,591.

Bell Telephone Company of Canada, Ltd.—From September 21 to 23 last, the company presented its case for increased rates before the Dominion Board of Railway Commissioners at Ottawa. Now the board is hearing the other side of the story. The first hearing against the company's application was held at Hamilton on November 4. It was the chief complaint that the company had not supplied sufficient data.

One of the chief witnesses was J. B. Williams, of the Hamilton Chamber of Commerce. The board was reminded by Mr. Williams that the company in applying for an increase was ignoring a previous order of the board that no permanent increase should be made until normal conditions were restored. Mr. Williams read a lengthy statement in which he showed that the Chamber of Commerce had met with repeated failure in trying to get information from the company as to its cost of operation in Hamilton, cost of maintenance in Hamilton, number of local business calls and residential calls. Other information the chamber felt the company should give concerned the actual expense of operation, actual revenue under present rates, estimated revenue under proposed rates applying to a representative private branch exchange, having, say, ten trunk lines, necessity for the increase in wages granted on May 1, 1920, what increase was granted? why was a larger increase granted in Hamilton than elsewhere, actual cost of installing a telephone ready for service, and lastly, on the present Hamilton business, what does the company estimate its revenue would be under the proposed rates?

On virtually only one point did the company commit itself, and that concerned its estimated increase of $130,000 in revenue in Hamilton were the new rates to become effective. As against this estimate, however, Eric Bower, assistant city treasurer, gave it as his opinion that the rates on which the company had based its increase would really produce a revenue of $370,000 per annum, instead of $130,000.

The second hearing against the application for increased rates was held in Toronto on November 5, and at this the company's proposition met with decided opposition. On the whole, the majority of the representatives stated that if the commissioners reach the conclusion that the Telephone Company was entitled to receive any more money it should be fixed on the basis of a flat rate. On the other hand, the spokesmen representing the various ratepayers' associations contended that, in view of the apparent general decline of the prices of various commodities, the company should not be be permitted to increase the rates. The evidence which the traffic departments of the Toronto Board of Trade and the Canadian Manufacturers' Association has been gathering was not submitted, counsel stating that it would be ready for submission at the final hearing of the investigation at Ottawa in a few weeks hence. H. W. Shapley appeared for the Bankers' Association, and was granted permission to file at a later date a tabulated statement of the proposed rates as it affected the banks.

Mayor Church, speaking as chief magistrate of the city, emphasized the fact that all prices had reached their utmost peak, and are now receding, adding that the time was opportune when the people should be furnished with better service and decreased rates, instead of having to contest an application for higher rates. In his opinion the whole matter was merely one of accounting. The mayor then suggested that the Bell Telephone Company should be asked to supply answers to the following questions: Cost of operation and maintenance in Toronto; number of business and residential calls in Toronto; actual cost of operation; actual revenue under present rates; estimated revenue under proposed rates; applying to a representative branch exchange having ten lines; necessity for the increase of wages granted May 1, 1920; what increase was granted; why a larger increase given in Toronto than in other points of the system; book value of Bell plant in Toronto; actual cost of installation of a telephone ready for service; on the present Toronto basis, what does the telephone company estimate the revenue would be under proposed rates?

The session in Montreal on November 10th was of short duration. It was announced that the date of the final sessions at Ottawa for the discussion of the whole matter, on which their eventual order will be based, would not be fixed until it was known when the reports of the experts engaged by the Union of Municipalities, who are opposing the company's application, would be ready. These reports, the board was informed, could not be ready for at least six weeks.

Another matter of almost equal importance was settled at the session, namely, when Chairman S. J. McLean announced that there would be no retroactive measures, but that any increases, if granted, would date from the issuing of the order of the board, but would have no retroactive effect. This led to a request by counsel for the Bell Telephone Company that proceedings should be hastened, since they claimed that under present rates the company was losing $200,000 a month.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended November 5th:—

McKinley-Darragh, 86,321; Bailey Mine, 87,116; La Rose Mine, 109,972; Nipissing Mine, 325,766. Total, 609,075. The total since January 1st is 23,870,695 pounds, or 11,935.3 tons.

MUNICIPALITIES FEELING SHORTAGE OF CAPITAL

(Continued from page 44)

the rural schools must wait, and lonely settlers' children must go without elementary education—or must be content with the promise of it—at a time when the government is finding money to lend to individual farmers at 6½ per cent., and when farmers are at the same time making vigorous demands on private lenders to get money at 8 per cent. In too many cases the farmers make no bones about offering more than 8 per cent. These facts are but a few of many that might be enumerated that are creating a questioning attitude of the public mind.

While in this humor the citizen is prone to lend his ear and attention to such incidents as the enquiry at Humboldt, conducted by the Local Government Board. That town's debt is about half a million, and it is now some years since it paid interest and principal coupons maturing. Its water and electrc light plants are sources of loss, and the capital expenditure on them was authorized by the Local Government Board. This was not fully admitted when the point was raised by the representatives of the bondholders at the investigation, but there is no gainsaying the fact that the major portion of the capital in the utilities in question was expended and obtained under the board's direction. What course it will now take after an investigation, made on the initiative of the bondholders, is the subject of conjecture.

Humboldt in Bad Position

The position at Humboldt is a serious one. The tax rate is 67 mills, and even at that there is a bare surplus, not nearly equal to ordinary as well as uncontrollable expenditure in the form of interest and principal payments. Annual deficits on utilities are increasing as a result of declining plant efficiency, and water is being pumped at great cost, which the citizens decline to use except for flushing and fire purposes. The problem presented is a difficult one, but on its solution very much depends, not only to Humboldt, but to the whole of Saskatchewan's municipalities. If the bondholders of that town are to bear the loss, it is feared that the present awkward situation in the market for municipal securities will be accentuated, and the board, looked upon as the guardian of municipal credit by the bond buyers, will find itself bereft of its chief value as a factor in reducing the cost of capital so much needed for local development purposes. Humboldt is the first occasion, so it is generally believed here, on which the board has had to deal with trouble arising from expenditures authorized by it. Whatever action it takes will, therefore, establish an important precedent. Its chairman, the Hon. G. W. Bell, is regarded here as being resourceful and capable, and doubtless will evolve some plan by which the Humboldt citizens may get back to solvency, speaking of them as a municipal corporation. In their private affairs there is obviously a state of health, if the travellers' reports may be relied upon. There is some basis of hope in this condition.

If Humboldt was the only Saskatchewan town in trouble the problem before the Local Government Board would not be so difficult. But there are others, and what is done in respect of one may become the precedent by which the settlement of other town troubles will be guided. On the result of enquiries now under way the restoration of municipal credit will depend. It is this aspect of the question that is not very well understood. The Local Government Board is now in the very important position of being the arbiter of the situation. It is in its power to reconstruct muncipal credit or to let it drift without a rudder, and thus create a condition that may for some generations leave on the municipal and school districts the burden of interest rates higher than would be the case if the bondholders' confidence could be restored.

The Provincial Savings and Trust Co., of Winnipeg, is applying to the Manitoba government for permission to adopt the name "Netherlands Trust Co. of Canada."

WAYAGAMACK PULP AND PAPER COMPANY, LIMITED

NOTICE

Notice is hereby given that a Special General Meeting of the Shareholders of **Wayagamack Pulp and Paper Company, Limited,** will be held at the Company's office in the City of Three Rivers on Thursday, the 9th day of December next, at the hour of one o'clock in the afternoon, for the following purposes, namely:—

(a) To consider, and, if deemed advisable, to pass a resolution authorizing the Directors of the Company to apply to the Secretary of State of Canada for Supplementary Letters Patent amending and varying the provisions of the Letters Patent incorporating the Company relative to its capital stock by converting the present outstanding capital stock of the Company, namely, 50,000 Common shares of the par value of $100 each into 100,000 Common shares without nominal or par value;

(b) To consider, and, if deemed advisable, to pass a resolution ratifying and confirming the following By-law enacted by the Directors of the Company:—

"By-Law No. 21"

"A By-law to increase the capital stock of the Company.

"**Whereas** it has been decided to make application to the Secretary of State of Canada for Supplementary Letters Patent converting the present outstanding Common capital stock of the Company, namely, 50,000 shares of the par value of $100 each into 100,000 Common shares without nominal or par value;

"**And whereas**, for the due carrying out of the objects of the Company it has been deemed requisite to increase the Common capital stock of the Company when converted as aforesaid by an additional 150,000 Common shares without nominal or par value, thereby making the total authorized capital stock of the Company 250,000 Common shares without nominal or par value;

"**Now, therefore, be it**, and it is hereby enacted as By-law No. 21 of the By-laws of **Wayagamack Pulp and Paper Company, Limited:**—

"That the Common capital stock of the Company, when converted from 50,000 shares of the par value of $100 each into 100,000 Common shares without nominal or par value, be then increased from 100,000 Common shares without nominal or par value to 250,000 Common shares without nominal or par value."

(c) To consider, and, if deemed advisable, to pass a resolution ratifying and confirming By-law No. 22 enacted by the Directors of the Company changing the head office of the Company from the City of Montreal to the City of Three Rivers.

By Order of the Board.

E. L. WILSON,
Secretary.

Three Rivers, Que., 28th October, 1920. 285

289 P.O. BOX 65, OTTAWA, CANADA

RECENT FIRES

Black Donald Mine Co. at Calabogie, Ont., $30,000—Icehouse in Montreal Destroyed, $20,000—Barn at Carberry, Man., Suffered Loss of $10,000

Bridgeport, N.S.—November 6—Barn owned by Archio McLennan was destroyed by fire.

Calabogie, Ont.—November 10—The large warehouse and packing-room belonging to the Black Donald Mine Co. was destroyed by fire. The loss is about $30,000, partly covered by insurance.

Carberry, Man.—November 1—The large barn on the farm of John Graham was destroyed by fire. The loss is estimated at $10,000, partly covered by insurance.

Glace Bay, N.S.—November 1—A tenement building on Victoria Street, owned by Duncan Morrison, was considerably damaged by fire. The loss is $2,000, partly covered by insurance. A building, owned by Rod Morrison, was damaged by fire. The loss is placed at $3,000.

Kaladar, Ont.—November 3—Residence of James Young was destroyed by fire. One fatality.

Kitchener, Ont.—November 5—A small frame building on Joseph Street, occupied by Fred Walters, was destroyed by fire.

Montreal, Que.—November 5—Icehouse, belonging to Joseph Malo, between Grant Lane and Joachim Lane, off Dufresne Street, was destroyed by fire. The loss is estimated at $20,000.

November 8—G.N.W. Telegraph Chamber, 6 St. Sacrament Street, was damaged by fire.

Mount Vernon, Ont.—November 4—The barns of Jack McKenzie were totally destroyed by fire, following a spark from a threshing engine. The loss is partly covered by insurance.

Oakwood, Ont.—November 9—Pedwell's lumber yard and the residence of Mr. Pedwell were destroyed by fire. The total loss is $50,000, with insurance of $20,000.

Quebec, Que.—November 5—Damage estimated at $2,000 was caused by fire to a two-story brick building owned by Mr. Drolet at the corner of St. Valier and St. Germain Streets. The fire is believed to have been caused by a cigarette butt.

St. Anne de Beaupre, Que.—November 9—Barn, owned by Augustin Pare, was destroyed by fire. One fatality.

Smithville, Ont.—November 4—Residence of William Jennings, a farmer residing in Caistor township, was destroyed by fire. Three fatalities.

Toronto, Ont.—November 5—Fire of unknown origin at the rear of 8 and 10 Hanson Street destroyed the garage belonging to Kilner and Barber. The loss is $3,000.

ADDITIONAL INFORMATION CONCERNING FIRES

Cobalt, Ont.—October 23—Shaft-house and head frame of the La Rose Mines was damaged by fire. The loss was $3,000. and there was insurance in the following companies: Norwich Union Fire, Guardian Assurance Co., Liverpool and London and Globe.

Doon, Ont.—September 22—Warehouse and contents of the Doon Twines, Ltd., and the Floradale flax mills were destroyed by fire. The loss is $30,000, with insurance in the following companies: British General, Caledonian, Springfield, Sun, Union of Canton, Union Assurance Society, British Crown, Century, Delaware Underwriters, General, Guardian, Home, New York Underwriters, Northern, Phenix of Paris, Queen, Rochester Underwriters, Yorkshire.

The total on the building of Doon Twines was $4,000 on schedule. On the stock there was $3,000 on schedule and the following specific amounts placed with the first six of the companies mentioned above, respectively: $1,500, $2,000, $2,[illegible]00, $1,000, $3,000, $2,500, a total of $15,500. There was also $1,500 on the stock of the flax mill, making a total of $24,000 in all.

FIRE INSURANCE AGENTS TO HOLD MEETING

Proposals of Provincial Superintendents Arouse Interest at Coast—Organizations in British Columbia Developing Rapidly

(Special to *The Monetary Times.*)

Vancouver, November 6, 1920.

THE report of the conference of provincial insurance superintendents which appeared in *The Monetary Times* has been read with wide interest by the insurance men in this province, and has been the chief topic for comment at all insurance meetings of late, and as a consequence, deferred action in the direction of seeking protection for insurance agents has been stimulated.

The report referred to was partly, at least, responsible for the Fire Insurance Agents Association's decision to hold a conference of all insurance agents in the province, probably in January, for the purpose of discussing questions of general interest to British Columbia Fire Insurance Agents. The agenda will be a long one, and one of the principal questions will be the advisability of asking the provincial legislature, on behalf of the fire insurance agents of this province for special legislation in their interests.

Must Regard Agents' Interests

As Geo. L. Schetky, president of the Vancouver Fire Insurance Agents' Association expressed it in his address to the members at their regular monthly meeting, "It is the duty of the government to protect the interests of the assured, the company and the agents, and the association should strive to see that, while the first two were protected, the interests of the third party in the transaction was not neglected."

Mr. Schetky, who might be said to be the father of the conference movement, desired to have the same set of bylaws and constitution for all insurance agents' associations in the province. There are now associations in Vancouver, Victoria, New Westminster, Kamloops and Nelson. It is desired that all other important centres in the province will also fall in line, that the fire agents of the province may speak when the time comes as one organization.

In Vancouver the association is very strong, there being 107 volunteer members out of 109 first and second agents in the city. (The city agents are to be eliminated.) In Victoria and New Westminster the proportion of association to non-association members is almost as marked.

The agents of companies who are not members of the board, that is, the British Columbia Fire Underwriters' Association, are, of course, not eligible, and at present no intercourse is held with them in insurance transactions. Whether this rule will be eliminated, time alone will show; in any event, as before stated, it is altogether likely that in a few months at least, the same rules and regulations for fire agents representing board companies will prevail throughout the province.

Automobile Underwriters' Association

J. B. Laidlaw, president of the Canadian Automobile Underwriters' Association was in Vancouver this week and took occasion to visit the officers and many of the members of the British Columbia Automobile Underwriters' Association. A number of companies have recently joined this association, and it now has 63 on its mailing list.

In British Columbia the rates have been fixed so low as to give little encouragement to non-board companies. On the other hand the only hazard which appears to be becoming more hazardous is theft as the city increases in size, the curse of "joy-riding" falls more and more heavily upon it. The police, however, have promised to do all in their power to check the evil while the police magistrates of late have been handing out some pretty stiff sentences to venturesome youths and booze runners who are proven guilty of borrowing other people's machines without the owners' consent.

Commodity Prices and Security Values

Price Declines Which Have Brought Bear Market in Stocks Have Improved Tone of Bond Market—Heavy Losses Registered By Speculative Securities on Canadian Exchanges—Bond Prices Are Firm in Canada and Show Advances in New York

WHICH way is the market going? was the question of foremost interest in brokerage circles during the past summer. The developments of the past few weeks have removed the feeling of uncertainty. Stock prices are going down, keeping pace with the fall in commodity prices, which must mean slow business and smaller profits. Bonds, on the other hand, which carry a fixed interest return are showing a tendency to strengthen as speculative issues lose favour and possibilities of market appreciation in stocks disappear.

Commodity prices have been falling steadily since last June, without a doubt, while the past two or three weeks have witnessed a more pronounced downward movement, but as far as Canada is concerned, an upturn in the bond market has not yet become greatly apparent. In this regard, however, it must be remembered that there has been practically no market here for any securities but municipals, so that to trace a definite movement is rather difficult. In the past few months practically all provincial bonds went to United States investors, while railroad and corporation securities were largely disposed of across the line. The control of the Victory bond market also eliminated another valuable index of conditions. Figures prepared by *The Monetary Times*, however, throw some light on the situation.

The movement of Dominion of Canada War Loan prices on the Canadian stock exchanges since July last, is shown in the following statement:—

	July, High.	Last Week, High.	Low.
Dominion of Canada 1925..	96	92¼	91¾
Dominion of Canada 1931..	93	90½	89⅞
Dominion of Canada 1937..	97	94⅜	94

Municipal Prices Not Strengthened

Municipal prices show no particular strengthening tendency, as indicated by the rates of Ontario transactions, figures of which are as follows:—

Counties.	Amount.	Rate %	Interest basis.
June—			
Renfrew	$100,000	5½	...
Renfrew	150,000	5	6.47
Carleton	190,000	6	6.38
August—			
Carleton	$150,000	6	6.70
Prescott & Russell ..	200,000	5½	6.70

Etobicoke Tp.	25,000	6½	6.60

Prices of utility and industrial bonds as quoted on the Canadian exchanges since July last, do not reflect any upward movement in that section of the market. There were some fluctuations, both up and down, but none were of any consequence. The following figures show the trend:

	July, High.	Last Week, High.	Last Week, Low.
Asbestos	78	75	75
Bell Telephone	90¾	91	91
Canada Cement	92	91½	91½
Cedar Rapids	84	87	86½
Dominion Cotton	97½	96	96
Dominion Textile	95	..	..
Quebec Railway	63½	60	58
Rio Janeiro	73	73	62
Spanish River	97½	..	..
Steel of Canada	..	93	93
Wayagamack	84	80	79½

While there has been very little change in the Canadian bond market up to the present, it is confidently expected that the upward trend of prices is close at hand, but there can be no big movement until all restrictions are removed, and the market is allowed to follow its own course.

In contrast to the Canadian bond market is the American market. Since last summer there has been a sharp upward movement in prices of all securities. In comparing the Canadian and American markets, however, three points must be taken into consideration: The American market is broader than here; the market has not in any way been restricted, but has been allowed to follow its own course; and business readjustment has been more abrupt. The accom-

THE TREND OF STOCK PRICES

The black line shows the closing average price of fifty stocks, half industrials and half railroads. The black area shows for each week the highest and lowest daily average price of the twenty-five industrials and the white area the corresponding figures for twenty-five rails.

panying chart, prepared by A. B. Leach and Co., New York, gives a comprehensive review of the movement of commodity and security prices in the United States during the past few years.

A more detailed movement of bond prices during the past year is given in the accompanying chart, showing the average of forty listed issues, and which was prepared by the New York *Annalist*.

Stock Prices Suffer

It is the economic law that stock prices move downward with commodity prices. It is not necessary to make any explanations here, as this subject has been discussed widely ever since business readjustment set in. It is evident, however, that both the United States and Canada agree on this point. The large losses sustained by some Canadian stock issues during the past two weeks, followed a steady decline, which had been in progress since July last. The break was inevitable, and it is the opinion in some quarters that the market has not yet reached the bottom. The following figures illustrate the movement of prices:—

The situation in Wall Street is outlined in the chart on page 6, which was compiled by the New York *Annalist*.

NICKEL PRODUCTION DECREASED

A reduction of 25 per cent. is announced in the monthly production of the International Nickel Co., or from 4,000 to 3,000 tons of nickel matte per month. About three hundred men are affected, but none of the regular force of employees of the company will be let out. One furnace is to be closed down. An impaired nickel market caused by general depression of business in the United States is given as the cause of the cut. The reduction in operations brings production to about a pre-war basis of 1912 and 1913. The highest peak reached in war years was 6,600 tons of matte a month.

LOCAL SELLING PLANNED AT COAST

Five Million Provincial Loan, and Perhaps One of Vancouver and Victoria, to be Offered

(Staff Correspondence.)

Vancouver, November 18th, 1920.

AMIDST ideal weather the capital city of British Columbia is daily receiving a large influx of tourists and winter residents from the prairies and other places. British Columbia is in the thick of an election campaign, and cabinet ministers in Victoria from premier down were not to be found around the government buildings, but were out campaigning in their various constituencies. December first being the deciding day.

The Monetary Times was fortunate in finding Hon. John Hart, provincial treasurer, in his office, and had a brief interview with him. Outside the domestic loan of five million dollars which he proposes to float in British Columbia about the end of the year through the Bond Dealers' Association, there was not much of special interest from a financial point of view. The city of Victoria is contemplating the idea of a domestic loan in the near future and has called in members of the British Columbia Bond Dealers' Association to discuss the matter. With these propositions before them, and the probability that Vancouver will adopt a similar plan to raise two million dollars, the British Columbia bond dealers will undoubtedly have an active period in the next two or three months.

A Vigorous Campaign

Regarding the government loan in conversation with A. C. Flumerfelt, the president of the British Columbia Bond Dealers, he stated that they had plans all completed to put on a quick, sharp campaign bringing the full forces of the bond dealers to bear on this issue, and that these plans would be carried out in the event of the present government being sustained. No doubt, similar plans in regard to Victoria and Vancouver city loans would be adopted, the idea being to give the investors of the province, who made such a splendid showing in the last two Victory loan campaigns, an opportunity to invest in their own securities, to be used in the development of their own communities. Business in Victoria is on a substantial basis and among its residents are many men of means.

NUMBER OF AUTOMOBILES IN CANADA

In a recent report to the Department of Commerce, Washington, United States Consul Felix S. S. Johnson, at Kingston, Ont., states that automobile registrations in Canada in 1919 aggregated 341,396—practically five times the number in 1914. Prince Edward Island made the largest proportionate growth in registrations (3,019 per cent.), whereas Ontario showed the greatest actual increase (113,080 more registrations), as between these two years. The returns by provinces for the past six years were:—

	Number of Motor Vehicles Registered					
Provinces	1914	1915	1916	1917	1918	1919
Prince Edward Island	31	34	50	303	639	967
Nova Scotia	1,324	1,841	3.012	5,350	8,100	10,290

TOO MUCH BUSINESS GOES ABROAD

Contention of Deputy Minister of Trade and Commerce in Annual Report—Income Tax Penalties—Unlicensed Insurance

(Special to *The Monetary Times.*)

Ottawa, November 18, 1920.

CANADIAN firms who have passed business inquiries on to firms in the United States are critically handled in the annual report of F. C. T. O'Hara, Deputy Minister of Trade and Commerce, made public on Tuesday. Mr. O'Hara makes a strong plea for building up Canada's foreign trade through Canadian channels. "The only skeleton in Canada's foreign trade closet," he says, "is the dependence of Canadian firms upon foreign intermediate commission houses and foreign channels. Every possible effort should be made to ship Canadian goods through Canadian channels from Canadian seaports to foreign markets to which the goods are destined. The great increase of Canada's merchant marine will go a long way in assisting this object. Canadian export trade should be independent. It would assist in building up Canadian seaports and direct overseas connections.

Imports are Heavy

"Canada imports every day goods made under foreign flags from Canadian raw materials. The Canadian purchaser pays the wages and the profits of the foreign manufacture, also the transportation costs of both raw material and finished goods. In resources and variety of raw materials, in sites and power for factories, in transportation and situation with regard to the world's markets, Canada is unrivalled."

Mr. O'Hara then takes up the point of Canadian firms passing on business to firms outside Canada. "Not infrequently," Mr. O'Hara says, "cases are brought to the attention of the department of Canadian firms, before whom the department has placed information as to purchases desired abroad, who have referred such inquiries to firms in the United States. In such cases the department has removed the names of such firms from its lists of Canadian export firms so that no further information will be furnished them." Complaints have also reached the department from foreign buyers that upon their placing an order with certain Canadian manufacturers to purchase goods manufactured by them they have been referred to agencies in the United States informed that such United States agencies handle all their foreign business. In some cases foreign purchasers have thereupon refused to place an order.

Heavier Income Tax Penalties

A hundred and fifty thousand Canadians, perhaps more, will pay the Federal income tax this year, and it is expected to bring in at least thirty-five million dollars. A closer system of checking up and the imposition of penalties are producing results, but a point emphasized is that next year the penalties will be almost staggering. It will be a very expensive thing to make a return that proves to be false. Next year, when returns are made in respect of 1920 income, the new provision of the act will be operative. For example, a person who makes a return showing an income to three thousand where really it was ten thousand will be liable to pay the government the whole seven thousand deficiency plus the tax on the ten thousand, besides, he or she will be prosecuted for the act of making a false return. Experience has demonstrated the need of heavy penalties, and they are being made stiffer each year.

Overseas Trade Office to be Closed

It is expected that during the visit of Sir George Foster, Minister of Trade and Commerce, to London, there will be a decision as to the closing of the overseas office of the Canadian Trade Commission. There is stated to be at present some overlapping in the work conducted by W. C. Noxon, who is conducting that office, and that carried on by Harrison Watson, Canadian Trade Commissioner. A change in the method of handling overseas trade matters in London has been predicted for some time, and the minister is expected to work out an arrangement to this effect while he is overseas.

Unlicensed Life Insurance

A warning to physicians against making examinations for unlicensed life insurance companies is contained in a circular issued on November 16 by the Insurance Department. It reads:—

"It has been brought to the attention of the department that life insurance business is being solicited in Canada through the mails by life insurance companies with head offices in the United States, but unlicensed in Canada.

"In the case of at least one of these companies it is stated that the practice of the company is to advise prospects in Canada of the names of physicians whose examinations will be accepted by the company, and to send the prospect a cheque to cover the medical fee for examination by one of these physicians. When the examination has been made the medical report is forwarded by the physician to the company.

"The Insurance Act and the provisions of the Criminal Code respecting insurance provide that no foreign company shall inspect any risk or otherwise carry on any business of insurance in Canada without a license under the act. It is also provided that every person who, in Canada, inspects any risk or otherwise transacts any business of insurance except on behalf of a company licensed in Canada is liable for a first offence to a penalty of not more than $50 nor less than $20, and for a second or subsequent offence to a penalty of not more than $100 nor less than $50. In default of payment imprisonment for terms varying from one month to six months is provided for.

"The department is of the opinion that physicians in Canada making examinations under the conditions above mentioned are violating the statutes referred to and rendering themselves liable to the prescribed penalties.

"The public is also warned that insurance placed in unlicensed companies is not protected by assets of these companies in Canada. There is, therefore, no security in Canada which can be attached in the event of such a company failing to meet its obligations under its policies."

BANKERS' ASSOCIATION ANNUAL MEETING

The annual meeting of the Canadian Bankers' Association was held in Toronto on November 11th. A wide range of subjects was discussed, covering the important developments of the past year. C. A. Bogert, who was last year elected president, is now the senior general manager among Canadian bankers, having occupied his present position since 1906. The officers for the coming year, who were all reelected, are as follows: Honorary presidents, Sir Edmund Walker, Sir George Burn, Sir H. V. Meredith, E. L. Pease; president, C. A. Bogert; vice-presidents, Sir Frederick Williams-Taylor, Sir John Aird, H. A. Richardson, C. E. Neill. Executive council—Thomas F. How, E. C. Pratt, N. Lavoie, D. C. Macarow, Tancrede Bienvenu, H. B. Shaw, J. P. Bell, C. H. Easson, Beaudry Leman, W. Moffat, J. Cooper Mason, A. H. Walker, H. O. Powell. Secretary-treasurer, Henry T. Ross.

Harris, Read and Co., bond dealers, Regina, Sask., have opened a branch office at 432 Pender St., Vancouver, B.C. S. W. Harris, who has been in the bond business in western Canada for a number of years, will manage the new office.

The Canadian Pacific Lumber Company's properties at Port Moody, Alberni and the Kootenay, B.C., and other places, comprising mill sites, freehold properties, leasehold and water records, timber limits and timber licenses were sold on October [illegible] for the sum of $780,000. The buyer was Eric Hamber of the London and Canadian Investment Co.

THE RESPONSE OF BANK SHAREHOLDERS

If more capital is to be attracted to the banking business, the new stock must be offered to the shareholders on at least as attractive terms as those offered by the new issues already made this year. As none of these were subscribed in full, the conclusion is that the prices were if anything too high. Nevertheless there was a substantial margin between the selling prices and the market prices of the different stocks, as the following figures regarding recent issues show:—

Bank	Ratio of new stock to old	Price	Market price
Hamilton	1 to 4	$150	$190
Royal	1 to 5	150	221
Montreal	1 to 10	150	208
Merchants	1 to 4	150	189
Provinciale	1 to 2	120	...

New stock which was issued by the Bank of Hamilton this year to the amount of $1,000,000, and which was offered to shareholders at 150 per share on a basis of one to four, has been almost entirely allotted. The remainder is being offered at the regular market price, but no tenders are being called as the quantity is so limited.

The Royal Bank of Canada called for tenders until November 15, 1920, for approximately 4,000 shares of stock, which represents the unaccepted allotments and the fractional shares of the $3,400,000 issue made this year, which, under the terms of the Bank Act, could not be allotted.

Tenders closed on October 25 for unallotted and fractional shares of the $2,000,000 issue of stock made by the Bank of Montreal this year. The number of shares offered approximated 5,800.

The Merchants Bank is not yet in a position to make a statement regarding its issue, as the shareholders living abroad are being given an opportunity to subscribe.

These facts refute the criticism that a melon was cut for the bank shareholders. The present scarcity of capital is not the fault of the banks, but is a condition which they must face if they would secure new capital.

HANDS ACROSS THE SEA

Born within the British Empire, Canada has drawn her life from the home land and from the colonies to the south which early declared their independence of the mother country. Her population is made up chiefly of those who have come across the sea or who have been born under the American flag. In finance and industry she has likewise drawn on both countries. Economic conditions necessarily modelled the industries of this country after those to the south, but for financial assistance we have depended chiefly on Great Britain. Our financial relations have been peculiarly fortunate, for with the two greatest money markets of the world open to us we have been able to resort to the one which was in the best position to lend. Prior to the war this was always Great Britain, but since 1914 most of our borrowings have been across the line. As a field for the profitable investment of capital, both these countries have never found Canada's doors closed.

The position of Canada as a link between Great Britain and the United States was emphasized at a meeting of the Canadian Club in New York on November 12. Arthur Knowlson, the president, Sir Auckland Geddes, British Ambassador in Washington, Dr. James W. Robertson, chairman of the Canadian Red Cross Committee, and Dr. Henry Van Dyke, formerly United States Ambassador to Holland, dealt with different aspects of this happy relation.

"To secure the peace and the spirit which are essential," said Sir Auckland Geddes, "I firmly and truly believe that there must be, as the very foundation of our effort, close co-operation between all the English-speaking nations, and, indeed, between all the nations which draw their idea of government from that old mother of freedom—England. It is a good thing for the world that one of the great Dominions which constitute the British Empire is here in North America side by side and cheek by cheek with the United States. Canada and the United States, with their long-drawn common frontier which for a hundred years and more has known no act of international hostility, can understand and sympathize with one another as they face in succession common problems and common difficulties, and Canada as one of the great partners in the British commonwealth of nations can also understand and sympathize with Britain and Australia, New Zealand, South Africa, India and their smaller partners as they face common problems and difficulties.

"Canada now has, by force of circumstances, a peculiar duty and a peculiar privilege thrust upon her—to be the interpreter of America to the Britons and of the Britons to America. Geographically free from the turmoil of Europe, but sharer from their beginning to their end in Europe's struggles, it was Canada that pointed the way to trans-Atlantic co-operation in war and peace. Her great deeds, her great achievements predestine her to be a leader in securing cordiality between her partners and her neighbor. She can do what no other can. Beyond misunderstanding or possibility of successful misrepresentations, she can speak to America and to Britain and her partners about the world. Hers is the responsibility and hers, if she succeeds in establishing a world friendship of the English-speakers, will be the glory. We know she will succeed. Nations, like men, can be judged by their records, and is a nation like Canada going to fail?"

CHAIN STORES A SPECULATION

PIGGLY WIGGLY STORES, INC., have notified the Chicago Stock Exchange that dividends are suspended on its class A stock, which is entitled to $4 per annum cumulative, on account of violent fluctuations in prices, rapid expansion of business, and desirability of building up a strong cash reserve. This is one of many of the chain store enterprises which have sprung up in the United States during the past few years. The phenomenal success of Woolworth's, Childs', the United Cigar Stores and other corporations which were early in the field of specialized retailing on a large scale was followed by riot of chain store financing, based on the successes of predecessors rather than on the intrinsic merits of the new concerns. While the chain store business continues to grow along with general expansion, experience shows that here as in other lines the large scale enterprise has its limitations. Individuality has its value as well as standardization, and there is a large section of the buying public which is willing to pay specially for it.

Canadian investors should be careful of stock flotations of this kind. One organization, the L. R. Steele Corporation, has been actively canvassing the public on this side for the sale of its stock. Some of the employees have had successful experience in the chain store business, but as it is not yet a going concern the stock of the company is highly speculative. The achievements of the past are no guarantee of success in the future, much less when the achievements are those of other concerns. Satisfactory information is not given as to the investments so far made or as to the records of the two or three stores already in operation. Thus far the main achievement of the L. R. Steele Corporation is the building up of an immense organization, the L. R. Steele Service Corporation, for the sale of its stock. Several years of successful operation are necessary before such a company is justified in paying dividends.

BUSINESS AGAIN MEANS SALESMANSHIP

SELLING goods and services was almost forgotten in the period of scarcity which prevailed until recently. Business can no longer be secured so easily, however. This was emphasized by C. S. Hoben, manager in Montreal for the Ford Motor Co., at a meeting of the Travelers' Club, of the Travelers' Insurance Co. of Hartford, recently. Mr. Hoben pointed out that the insurance salesman could benefit by experience in other lines, and recommended systematic sales campaigns. In conclusion he said:—

"I believe we are on the eve of returning to the conditions existing before the war, at least we are on the return to a better condition to that existing for some few years just passed. In my opinion we are face to face with the time when we should all take a personal inventory. Let us see how many of the actually good bets we have overlooked in our mad rush to keep pace with the terrifice speed of the last five years. Let us find out if we have overlooked a possible sale to a friend or prospect merely because we saw a "liver" one, at least who appeared easier and a quicker sale. Let us find out if our personal service to our customer to our house, and lastly to ourselves, has been all it should have been. Let us ascertain by rehearsal the abilities we once possessed to create desire by arousing interest.

"Let us forget the line of least resistance where we have practised it, the path of easy travel, and instead let the great fraternity of salesmanship, the largest and greatest profession on earth, be actually the first to take off its coat, roll up its sleeves and commence to make the wheels of industry groan with the amount of our endeavors. We are all alike in our respective part, and where we have shared the joys of great success let us now, when the world is at the threshold of a new era, share our due portion of the burden, for I assure you we of the selling forces in this world have a mighty and important mission to perform which should begin to-day."

An "Ernest Hydro" has been discovered among the residents of Iroquois Falls, Ont. There must have been at least one Ernest among the Hydro family to have built it up to its present proportions.

* * * * *

Cuba now has a moratorium, effective until December 1, and some of the local banks are in difficulty. Under this moratorium the depositor cannot withdraw more than 10 per cent. of his deposit. The fact that the branches of Canadian banks did not take advantage of the moratorium until some days after the local banks will add greatly to their prestige in the south, and is a further proof of the strength of a system which permits banking to be conducted on a widely extended scale.

* * * * *

A survey of present prices of raw products, compared with the high prices ruling during the recent period of extravagance and inflation, shows the following results:—

Wheat	$2.25	against	$3.05	
Sugar	7-8c.	against	23	cents
Cotton	22½c.	against	42	cents
Copper	15c.	against	35.74	cents
Hides	22c.	against	53	cents
Rubber	25c.	against	95	cents

* * * * *

"Under public ownership," says general manager H. H. Couzens of the Toronto Street Railway Commission, "the object is service. Three elements are to be considered. There is the taxpayer, who, if anything goes wrong, will have to put his hand into his pocket, the patrons of the road, and those who operate it. No road under public ownership should be run for one section, but operated for the good of all." The logical sequence of Mr. Couzens' remarks is that patrons and employees, as well as owners, should be represented in control and management.

RESULT OF PAPER SHORTAGE

Waiter: "Your bill amounts to 4s. 7½d."

Parson: "How do you make that out? It only comes to 4s. 6d."

Waiter: "You've had two mutton chops at 1s. 6d. each, two threepenny cigars, and one shilling's worth of vegetables and——"

Parson: "That's all I have had."

Waiter: "And three halfpence for the paper to write the bill on."

PERSONAL NOTES

Sir H. Montagu Allan, president of the Merchants Bank of Canada, was elected to the directorate of the Guarantee Company of North America at a meeting in Montreal last week.

Lorne C. Webster, a director of the Nova Scotia Steel and Coal Company, and vice-president of the Quebec Railway, Light, Heat and Power Company, has returned to Montreal after spending some time in Japan.

H. R. Tudhope, a member of the investment house of A. E. Ames and Company, Toronto and Montreal, has been elected a member of the Montreal Stock Exchange. The seat taken over by Mr. Tudhope was formerly held by Thornton, Davidson and Company.

Theo. Feilden, editor-in-chief of the "Empire Mail," a noted British publication, is just completing an extensive tour of Canada in connection with his work as director-general of the Imperial Trade Propaganda Association, and in preparation for the launching of a special Canadian number of his publication.

M. F. Christie has been elected to the directorate of the Great-West Life Assurance Company to succeed the late P. C. McIntyre. Mr. Christie is well-known in Winnipeg, having been a resident of that city since 1882. He is managing director of the G. F. Stephens' Paint Company, and director of the Winnipeg General Hospital. He was formerly president of the Winnipeg Board of Trade, and is a past president of the Canadian Manufacturers Association.

Kenneth J. Dunstan, western division manager of the Bell Telephone Company of Canada, has been made a vice-president of the company. It is officially announced that the appointment is a recognition of the necessity of having in Toronto a representative of the executive who will give attention to matters of policy and be free from operating duties. He is succeeded as division manager by A. T. Smith, who is at present division superintendent. Mr. Dunstan has given his full business career to the Bell Telephone Company and is very widely known He is a past president of the Board of Trade, and is an afficer of the Red Cross Society and a prominent member of the Masonic order.

F. G. B. Allan has been appointed general manager of the Pressed Metals Company of Canada, Limited, and American Bushings Corporation, succeeding J. W. Leighton Mr. Leighton is now chief engineer and supervisor of works, and will devote the major portion of his time to the development of the companies' patented bushings and tube processes. Mr. Allan, who is a Toronto man, is the son of the late Hon. G. W. Allan.

Thomas Bradshaw, formerly finance commissioner for the city of Toronto, and for the past few months financial adviser to the Massey-Harris Company, Limited, Toronto, has been appointed general manager of the company, succeeding Thomas Findley, previously president and general manager, who has resigned from the latter position. Mr. Bradshaw will be assisted by C. L. Wisner as assistant general manager in charge of sales, and by Geo. Valentine as assistant general manager in charge of manufacturing.

R. M. Pearson was recently appointed to succeed the late W. J. Ptolemy, as deputy provincial treasurer of Manitoba. Previous to his appointment Mr. Pearson was not in any way connected with the treasury department or the government of the province. He is a barrister by profession, of five years standing, and just before he took over his new office he was practicing law in Winnipeg with the legal firm of Hudson, Ormond, Spice and Symington. He served overseas, being for a time warrant officer in the second battalion of Canadian infantry. Manitoba's financial operations have been greatly enlarged during the past few years. In 1916 its expenditure was $6,147,780, in 1917 $6.860.355, in 1918 $7,307,727, and in 1919 $8,544,790. Its debt is about $44,000,000. The enlarged operations are due in part to the operation of farm loans and rural credits.

EIGHTEEN CENTS MORE FOR 1919 WHEAT

Realizing that producers are anxious to know, as early as possible, the full value of their participation certificates, the Canadian Wheat Board has made a careful audit of its accounts up to a recent date. The result indicates that it can pay on the final dividend 18 cents, making a total of 48 cents. This will make the prices, basis No. 1 Northern in store Fort William, $2.63, or an average price throughout the year at points of shipment in Manitoba, Saskatchewan and Alberta, of $2.50 per bushel.

The board has already distributed, on the interim dividend, about $38,000,000, and payment of the balance of approximately $28,000,000 will, it is hoped, be commenced about the middle of November and completed before the end of the year. Over $60,000,000 of the foregoing will be distributed among the producers in the three prairie provinces, the balance in eastern Canada and British Columbia. The interim payment was 30 cents per bushel, but at the time interim payments were commenced it was announced that the participation certificates would be worth at least around 40 cents.

Though no official announcement has been made of amounts handled, the amount being paid on participation certificate would indicate that it was about $130,000,000.

Capt. G. S. Rothwell, formerly manager of the stock department of Burdick Brothers, Ltd., Vancouver, B.C., has severed his connection with that company and has opened offices at 338 Granville St., in the same city, where he will conduct a brokerage, bond and insurance business under the name of Rothwell and Co.

THE
EXCHANGE RATE

VIII.—What Controls It?

WE have attempted to show in this series the principal causes of variations in exchange rates.

In order to reduce the problem to its simplest form, we have not mentioned several factors which, in spite of adverse trade balances, had considerable influence in maintaining the value of our dollar abroad during pre-war days.

One of these was the great volume of Canadian securities (such as bonds of the Dominion and Provincial Governments, Municipalities and Companies), sold annually in other countries. The proceeds of these sales created balances to our credit abroad just as though we had exported an equal value of merchandise. At the present time our sales of securities abroad amount to far less than formerly owing to the "tightness" of money and the high interest rates demanded.

Another factor of importance, the influence of which it is difficult to estimate, is the amount of foreign money brought into Canada by immigrants and tourists.

An adverse Exchange Rate, especially one so great as ours with the United States, taxes heavily all users of imported goods. The greater the excess in the value of imports over exports, the higher the Exchange Rate is likely to become.

Those who import luxuries because they can afford to pay the additional tax, therefore, help to maintain the rate or even to raise it still further. Thus the price of imported necessities is increased to all, including many consumers who can ill afford the extra burden.

In our final article we shall summarize the methods by which the exchange rate may be brought back to normal.

Quebec Supports Tariff for its Manufactures

Four Chief Cities Favour Protection, and Even Farmers Believe in Building up Home Market—Sessions at St. John and Moncton, N.B., and at Quebec, Sherbrooke, Three Rivers and Montreal

OCCUPYING the second position among the Canadian provinces, from the standpoint of manufacturing, and the leading position in some lines, Quebec province has submitted to the Tariff Commission evidence which is, on the whole, favorable to protection. A good deal of evidence has been collected since the commission left Moncton on November 10. On November 11 it sat in Quebec, on November 12 in Sherbrooke, on November 13 in Three Rivers, and on November 15 in Montreal.

The remaining sessions of the commission are scheduled as follows: November 25, Kingston; November 26, Hamilton; November 29, London; November 30, Windsor; December 1, Toronto. A special meeting will later be held in Ottawa.

The statement presented in St. John on November 9 by W. S. Fisher referred to the "tremendous geographical handicap" in seeking to weld in Canada a small body of people into a national unit, under one central government, stretching over so vast a territory with great natural barriers. It was said that the barriers "running north and south have the tendency to make trade and interest flow in the same direction—namely, across the national border, to intermingle with the large bodies of people immediately adjoining our little groups scattered across the continent."

Interdependence in exchange of commodities was set out as a vital interest in the matter of a common national ideal. It was also asserted that unless something was done to remedy the serious condition created by recent freight advances, in the way of substantial reductions in the long-haul rates, any protection that the tariff would otherwise afford would in many instances be absolutely wiped out as against manufacturers in such large centres as Chicago, St. Paul, Minneapolis, Spokane, Portland, Seattle, etc., "who can ship to points all along our territory at almost a negligible freight rate."

Reference to alteration in tariffs in Europe in order to retain more of their home markets for their own industries and to the declared probability of a higher tariff wall in the United States with the Republicans in power was made, and it was stated in conclusion that "with the likelihood of our greatest competitors acting in this manner it would surely be folly for Canada to grant less protection to her industries than will enable them to expand, pay fair wages to their workmen, and to enable them to retain the major portion of our home market."

J. W. Walker, mayor of Marysville, a cotton factory employee, said the reduction of the tariff would practically wipe out the town. He also said 180 families occupied homes owned by the company, paying $6 a month, as compared with $16 paid in Fredericton just across the river.

W. S. Poole, vice-president of the United Farmers of New Brunswick, and president of the United Farmers' Co-operative Co. of St. Stephen, read the tariff plank in the farmers' platform. He said it was reported that the Marysville cotton concern was making as high as 315 per cent. profit during the past year. He thought the duty on wearing apparel, farm machinery, etc., should be reduced. Revenue could be raised to replace the duties lost, he said, by direct taxation on unimproved values, graduated income tax, and other means as outlined in the farmers' platform.

Moncton Dependent on Tariff

Great hardship might be inflicted on the workmen of this city were the tariff to be changed, J. L. Macdonald, speaking on behalf of Moncton manufacturers, argued before the Tariff Commission, when it met in that city on Wednesday. Mr. Macdonald said most of the workmen in Moncton factories owned their own homes, in which were invested their entire savings, and unlike those in larger cities, who rented theirs. If changes were made in the tariff these men might be thrown out of work and their plight would be a serious one. He added:—

"In the province of New Brunswick we have potential power in our waterfalls in hundreds of thousands of horsepower waiting to be harnessed, and right alongside rich mineral deposits. Capital in enormous amounts is required to develop these, and will not be forthcoming if the people controlling it are in any doubt as to the continuation of the policy of adequate protection. The United States, with a population of over twelve times that of Canada, finds it necessary to maintain a tariff very much higher than ever, and under the Republican party recently elected increases to it are certain to be made. The finest product of Canada is the sober, industrious and highly-endowed Canadian people. That Canada, and especially so these maritime provinces, does not provide enough remunerative employment for its own people, and that thousands are yearly obliged to cross the line in search of opportunity denied them at home, is a national tragedy and one that must never be lost sight of by our legislators."

Quebec Strongly Protectionist

Enquiries by United States firms desirous of establishing manufacturing plants in Quebec were advanced as evidence of the advantage of protection by O. H. Cote, industrial commissioner of the Board of Trade, before the commission in Quebec. Mr. Cote said the American firms interesting themselves in Quebec were connected with the following interests: Asbestos, glass, motor cars, storage batteries, silk, knitting and tractors, etc.

Mayor Samson, citing official statistics, showed the tremendous development of Quebec under protection within the last twenty years and the immense increase in the amount of capital invested in Quebec industries. There were, he said, besides the 72,500 people directly dependent upon the development and continuance of the industries in Quebec, merchants, professional men and others also dependent indirectly upon those industries. Anything that would curtail the demand for products manufactured in Quebec city would have a serious effect upon all classes in the community, said the mayor. The mayor favored, as Sir Lomer Gouin stated at the annual convention of the shoe manufacturers in this city some time ago, "a tariff that would keep industries going, labor men working for good wages, and the most deserving of all Quebec citizens, the good farmers—content and prosperous."

J. H. Fortier spoke at some length of the exodus from Quebec to the United States in the past, when there were no industries to attract the surplus of the rural populations. It was only through the adoption by the government of a national protective tariff, said Mr. Fortier, that such exodus was stopped.

Sherbrooke a Manufacturing Centre

The city, local manufacturers and the Board of Trade were represented at the session in Sherbrooke. In the absense of the mayor, who is not in the city, pro-Mayor Tetrault presented the brief on behalf of the city, in which it is pointed out that Sherbrooke owes its phenomenal growth in the past few years to the number of manufacturers located here. This is the means of supplying a great part of the population with employment and generally improving conditions. The markets owe their success in turn to the fortunate working conditions that prevail. It is pointed out that the customs tariff is responsible for much of this industrial

BANK BRANCH NOTES

The following is a list of branches of Canadian banks which have been opened recently:—

Winnipeg (Portage Av. and Kennedy St.)	Dominion Bank
Hamilton (Main & Sherman)	Royal Bank of Canada
West Summerland, B.C.	Dominion Bank
Castries (St. Lucia)	Royal Bank of Canada

Twenty-six branches were opened and seven closed during the month of October. The following new branches have not already been mentioned in *The Monetary Times*: Charlemagne, Que., Provinciale; Chartierville, Que., Provinciale; Contrecoeur, Que., Hochelaga; Glen Sandfield, Ont., Hochelaga; Lakefield, Ont., Sterling; Lamaline, Nfld., Nova Scotia; Manitoba Agricultural College, Man., Royal; Monteith, Ont., Imperial; Montreal, St. Catherine and Wolfe Streets, Molsons; Rawdon, Que., Hochelaga; St. Antoine de Padoue, Que., Provinciale; St. Camille de Wolfe, Que., Provinciale; St. Gabriel de Rimouski, Que., Hochelaga; St. George Est. Beauce, Que., Hochelaga; Thistletown, Ont., Nova Scotia; Toronto, Cherry and Villiers Sts., Montreal.

The following branches were closed: Gilroy, Sask., Union; Grassey Lake, Alta., Union; Hilda, Alta., Standard; Loyalist, Alta., Union; Riviere de Madeleine, Que., Nationale; Rustico, P.E.I., Royal.

The branches opened were distributed among the following banks: Royal, 4; Merchants, 1; Sterling, 2; Provinciale, 5; Hochelaga, 5; Dominion, 1; Commerce, 2; Nova Scotia, 2; Imperial, 2; Molsons, 1; Montreal, 1.

NEW BUILDING OF THE CANADIAN BANK OF COMMERCE IN MONCTON, N.B.

RAILROAD EARNINGS

The following is the approximate gross earnings of Canada's transcontinental railways for the first week in November:

Canadian Pacific Railway.

	1920.	1919.	Inc. or dec.
November 7	$5,723,000	$3,821,000	+ $1,902,000

Canadian National Railways.

November 7	$2,770,758	$1,987,622	+ $ 783,136

Grand Trunk Railway.

November 7	$2,385,604	$1,931,520	+ $ 454,084

CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co., during the week ended November 12, 1920, in provinces, as compared with those of previous weeks and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1919.
Nov. 12	12	14	0	0	4	3	0	15	0	48	14
Nov. 5	9	6	1	0	0	2	1	0	0	19	11
Oct. 29	7	14	0	4	1	2	0	1	0	29	18
Oct. 22	1	8	1	3	2	1	1	2	0	19	..

Bradstreet's report business failures in Canada for the month of October as follows, with comparisons:—

	No.	Assets.	Liabilities.
October, 1920	84	$692,694	$1,361,680
October, 1919	59	263,084	763,684

The same tendency as exhibited in previous reports, reveals itself in the above statement—namely, that the total of liabilities has not increased in proportion to the increase in the number of failures. This, it is pointed out, would seem to indicate an increase in strain among the smaller class of traders, due to refusal of buyers to come into the market freely.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended November 18, compared with the corresponding week last year:—

	Week ending Nov. 18, '20.	Week ending Nov. 20, '19.		Changes.
Montreal	$157,124,938	$166,627,836	—	$ 9,502,898
Toronto	110,895,763	109,660,177	+	1,235,586

Are You a Trustee?

If so, you may be interested to learn that this Corporation also acts as agent for personal Trustees, taking charge of the administration of estates for them and performs such duties as keeping estate funds fully employed in high-class investments, collection of revenue, cutting coupons, management of real estate, rendering statements and remitting balances to beneficiaries at regular intervals, keeping securities in Safety Deposit Vaults, etc. Many Trustees find this the most satisfactory way for them to administer an estate—by turning it over to us as their agent and at the same time retaining the responsibility imposed on them under the Will.

How the Manufacturer Can Get Into Export Field

First Step is Appointment of Export Manager, Who Should Study Field Carefully—Personal Visits to Foreign Markets—Assistance of Government Trade Commissioners—Advertising in Export Trade Publications—Arrangements With Export Commission Houses

By COL. C. R. HILL,
Managing Director, Hill and Co., Ltd., Toronto

(This is the second of a series of articles on Practical Exporting, the first of which was published in The Monetary Times of November 12, 1920.)

THERE are advantages and disadvantages in any one system of developing export business and what might appeal to the heads of one business would not suit another manufacturer for reasons of finance, unsuitability of staff, policy in sales, or class of goods manufactured. The object of this article is therefore to suggest various ways and means from which executives may make a decision on policy whether the manufacturing firm is old and wealthy or a new "one-man" concern.

Obviously, the first step for any manufacturer is to appoint an export manager. At the initial stages of a decision to form an export department, the first consideration will be expense and the second the calibre of available personnel. As pointed out in the first article of this series, the development of export markets is not a rapid process and the first year's efforts will not likely prove profitable if a heavy expense is undertaken to provide an export staff before actual orders demand it. However, a bright man of initiative, with executive and organization possibilities, should be definitely assigned the responsibilities of export manager and be given time and opportunity to study his duties. The selection will, of course, be dependent on the size of the firm, the eventual possibilities of export sales of a particular line, and the individual characteristics of the existing staff. In the case of a very small partnership, one of the partners might take on the work, while in a bigger office organization, the sales manager or his chief assistant might be selected. For some months at least, the export manager could devote only part time to his export duties, but if the firm's policy is a whole-hearted one and they can afford to do so, the export manager should be given ample time to study his subject and work out his plans. Subsequently, he will be kept busy in looking after actual orders.

Assuming that the export manager has been selected, we now proceed to review the various means at his disposal for developing his foreign markets, leaving the question of his technical education to subsequent articles in this series.

Through Personal Visits to Foreign Markets

Dealing first with firms that are sufficiently wealthy to justify an initial travelling expense item of $10,000, the ideal way to investigate possibilities of sales abroad is to send a highly competent man (presumaby the export manager) on a trip around the world. The language difficulty is not insurmountable although a working knowledge of French at least would prove very useful as an alternative to English. Of course, it is safer to stay with a language one knows accurately than attempt to make statements and promises in a foreign tongue and subsequently find that ridiculous misunderstandings have arisen. So far as Canadian travellers are concerned, they will always find that the offices and advice of the Canadian or British trade commissioners are at their disposal in practically all centres they wish to visit, and local qualified interpreters are not expensive.

By a visit "on the ground," the Canadian export manager can accurately check up the competition in his line both as regards quality and price. He should, of course, have full supplies and literature with him and be armed with sufficient authority to make up delivered prices, set discounts, make contracts for agencies and deliveries, promise to meet local requirements in design, packing, etc.

Should Help the General Agent

The time required in each country is problematical, but, assuming that the initial investigation into sales possibilities is satisfactory, it will prove worth while to spend several weeks. The most important work from an organization standpoint is the settlement of policy on the merits of a salaried branch office staff and warehouse versus the appointment of a general agent or territorial representation. If agencies are decided on, it is not sufficient to make an appointment, sign a contract and move on. The Canadian representative who understands the peculiar merits of his goods should spend time in company with the agent getting acquainted with his customers and helping him to make sales, assisting in the preparation and possibly payment of initial advertising, etc. Having thus firmly established his company's business in one country, he can report full details to his headquarters and proceed with his journey.

This system of personal visits to foreign countries is the most ideal way, when the expense can be afforded, if only for the future benefits of established friendship between export manager and foreign agent, but above all, the export manager has broadened his mind, gathered the viewpoints of others in his line of business, picked up valuable suggestions and increased his value to his firm by at least 100 per cent.

And yet there is nothing perfect in an initial visit. The appointed agent may become less enthusiastic with the departure of his Canadian visitor and sales results may be extremely disappointing. Again, with all the energy and good intentions in the world, conditions may arise after the Canadian's departure which temporarily prevent sales. New competition may appear, exchange may upset prices, a general buying depression may come over the market; any or all of a dozen things may render the expense of the personal visit a more or less financial loss. So much for the advantages and disadvantages of foreign visiting.

Medium of Government Trade Commissioners

If any Canadian manufacturer will write to the Commercial Intelligence Branch, Department of Trade and Commerce, Ottawa, he will receive free the "Weekly Bulletin," and be placed on the mailing list for future issues. Besides publishing reports on the possibilities for Canadian exports in various countries, and trade inquiries for specific articles from foreign buyers, the bulletin furnishes the names and addresses of the Canadian trade commissioners and Canadian commercial agents comprising our own staffs in the Argentine, Australia, Brazil, British West Indies, China, Cuba, France, Holland, Belgium, Italy, Japan, New Zealand, South Africa and the United Kingdom. In addition is published the addresses of British consulates whose offices have been instructed by the British Foreign Office to answer inquiries from and give information to Canadians who wish to consult them in reference to trade matters.

The duties of the Canadian trade commissioners are many, but their principal one is well defined—i.e., to do their utmost to promote the export of Canadian products and manufactured articles. It may therefore be taken for granted by every Canadian manufacturer that he has a strong and capable friend in every country where our own commissioners operate, and, shall we say, a sympathetic acquaintance in the British consulates which are world spread.

Accumulate an Estate

Are you tempted to dispose of your Victory Loan Bonds in trade for speculative securities?

Before doing so, look into the advantages of a LIVING TRUST agreement with the Union Trust Company, Limited. You may use your bonds as a nucleus, and thus ensure your Wife's and Kiddies' comfort and happiness.

Write for our booklet "Living Trusts."

Commissioner Cannot Make Sales

To make the best use of the Canadian trade commissioners, our manufacturers should write, all of them sending samples, price lists, catalogues, particulars of packing, weights, measurements, etc., stating fully by letter just what policy they would like to adopt. At the same time, they should ask for all the suggestions the commissioner can offer as to the best methods of getting into the particular market under review. On request, the commissioner will use his best judgment to find a suitable general agent or territorial agents. This will be done of course without prejudice and the commissioner is not liable for the subsequent success or failure of the agent in making sales or for his financial responsibility. Furthermore, the commissioner cannot be expected to actually go to buyers and make sales although that will probably be the result of his original efforts to develop a connection for the manufacturer.

By watching the Weekly Bulletin it will be noticed that the Canadian trade commissioners pay visits to Canada from time to time and, while here, are indefatigable in their efforts to personally meet as many manufacturers as possible and tell them of conditions in their land while learning the manufacturer's point of view here.

By the trade commissioner service, the government has done its share in providing a practical channel by which the Canadian manufacturer may seek foreign markets. However, as previously pointed out, the commissioners are not sales agents and only provide an important step on the way towards getting into the export field.

Through Advertising

Several Canadian manufacturers are firm believers in the merits of introducing their lines abroad by advertising in export and foreign publications referring buyers to the export manager at the company's head office. No one doubts the merits of well placed and strongly worded advertisements. It is not the purpose of this article to suggest the names of suitable publications. Newly appointed export managers can best find out by consulting the advertising managers of the bigger exporting manufacturers or by taking the confidential advice of the trade commissioners.

The merits of this plan of seeking foreign fields is that it brings the buyer directly in touch with the export manager. The demerits are that it is a costly experiment and somewhat cold blooded inasmuch as it eliminates the personal equation and the benefits of salesmen's visits. However, such advertising in conjunction with the personal efforts of foreign branches or agents is excellent.

Through Export Commission Houses

Most merchandising problems are met as they come up. In the days of Queen Elizabeth, the English manufacturer sought foreign markets for his goods through the medium of trading and commission houses which owned or chartered ships. This system proved satisfactory and the export commission houses extended their branches and foreign connections to provide the maximum trade channel required by the manufacturer. As time went on the foreign sales and the work of ocean carriage became separated and has continued so.

In the United States, export commission houses are very numerous. The head offices are found principally in New York but their branches and connections extend around the globe. In Canada, the principle is newer as our real export work is in its infancy. Nevertheless the medium is a well established one even here and offers the Canadian manufacturer yet another channel for seeking foreign markets.

It is probable that no two export commission houses operate on the same basis certainly not on the same percentage of remuneration for all commodities. But they are all ready to push the export sales of a manufacturer at a minimum of expense to the latter and it may be assumed that the foreign branches and associate offices will do their best to find local markets in their respective countries for any Canadian commodity which can be submitted to them in good shape. These foreign offices are familiar with the competition or will soon find it out by trial. It may be argued that one house cannot sell leather goods, foodstuffs and pianos to advantage but the big commission and trading companies have proved that they have done so for many years by the simple expedient of operating different departments.

The benefit to the manufacturer in utilizing the services of an export commission house is that he concentrates his efforts with one Canadian office and ceases to worry over the technicalities of foreign trade and embarrassments of foreign language. Their branch houses and foreign associates become his agents—as long as they "make good."

The demerits of this system is that there is no way of closely checking up the export commission house agents to see if they are making a maximum effort, but this is difficult with any agents abroad, even those appointed by the personal visits of the export manager.

UNION OF ALBERTA MUNICIPALITIES

Assessment and Taxation Discussed by President Marshall—Mayor Hardie, of Lethbridge, Favors Western Union

THE 16th annual convention of the Union of Alberta Municipalities was held in Lethbridge, Alta., November 9-11. The president, Mayor Marshall, of Calgary, laid emphasis on two points. Of the two, an appeal for greater latitude in taxation matters, or in the now famous remark of Mayor Hardie, "More Home Rule for Cities," was the more important. The second was that a travelling secretary be appointed to visit the various municipalities, give any assistance necessary, and keep the organization alive generally.

There was nothing more important in the mind of Mayor Marshall than the question of assessment and taxation. The municipalities were about to come into possession of a vast amount of property by reason of the operation of the Tax Recovery Act, and he hoped that this point would be considered at some length by the convention. A broadening of the powers of taxation was necessary, said the president. The municipalities at present were more or less hemmed in by provincial legislation, and in their efforts to remedy this they had been none too successful in getting the sympathetic ear of the government, who were likewise confronted by the problem of financing.

A. J. H. Donahue, of Edmonton, president of the Alberta Association of Municipal Districts, urged that a committee be appointed to deal with problems of a common interest such as public health, taxation, etc. Their municipalities had "fallen heir to miles and miles of subdivisions" which they wanted to see thrown back to acreage. In this problem they asked for co-operation from the Union of Alberta Municipalities in meeting this important question.

More Freedom for Cities

Mayor Hardie read a paper on "City Home Rule," which strongly urged broader powers for the cities. "We must have a wider range of taxation," he said. In his paper Mayor Hardie pointed out that the annual levy for the budget in all the cities of Alberta is becoming a very serious and heavy burden on the ratepayers, because of the fact that the live tax roll is gradually narrowing down to a smaller number each year by reason of vacant lots falling to the city, and from year to year, unless some fillip of increase in population which will build homes, the reduction of the live tax roll will be accelerated because more vacant lots will come to the city due to the increased rate caused by the former delinquencies or relinquishment of vacant lots. To meet this grave state of affairs now hanging over the heads of every city in the province, Mayor Hardie believed the government should immediately grant the cities the right of home rule

in civic matters, enabling them to levy taxes as the councils of the various municipalities may see fit.

That, though he felt there was the need, perhaps, of a uniform city charter in Alberta, he was opposed to the creation of independent cities cut off entirely from a government check, was the opinion of Hon. C. R. Mitchell, in an address. He told the convention, however, that so long as he occupied the responsible position of minister of municipal affairs, the cities and towns would receive an attentive and sympathetic hearing. Mr. Mitchell referred first to the question of increased powers for the cities. He did not believe they ought to be given the right to impose taxes at will and to please their fancy, and there must be some uniformity, he said, for it is not sound business to allow cities to become absolutely independent and cut off from all government restriction.

If the province controlled her natural resources and received the money accruing from them, then they would be in a better position to discuss the retention by the cities of certain channels of taxation which are now controlled by the province. The natural resources belonged to the provinces of the west and the government would welcome any support that the municipalities might render in praying the federal government to transfer them. "Alberta, notwithstanding the fact that she does not control her resources, does more for her municipalities than any other province in Canada, except Saskatchewan," averred the minister. The stumbling blocks to the bringing into force of a satisfactory standardized city charter, as he viewed the situation, were two in number, first, the different methods of government, and second, the different forms of taxation.

Rental Tax Discussed

Medicine Hat's rental tax, though strongly criticized by most of the delegates, was upheld by Mayor Brown and City Assessor Simpson. The latter summarized its merits as follows:—

(1) Its equitability, for the reason that householders are taxed in proportion to their ability to pay. For example, a person who can afford to rent a house at $30 per month, pays a tax of $5 per month, while the working man living in a house at $15 per month pays $1.50 a month.

(2) It is imposed on all occupants of houses, owners and tenants alike.

(3) It includes a certain class of people which does not pay direct taxes any other way excepting indirectly through the landlord.

(4) It is inexpensively and easily collected, there is practically no loss, and a substantial amount is received monthly into the coffers of the city. It was shown in the paper that the revenue derived from this source averaged about $4,600 a month, and that to the end of October of this year 87 per cent. of the levy made to that date has been collected.

Commissioner Sann's, of Calgary, spoke on "Treatment of Vacant Land Taken in by Cities and Municipalities," and maintained that the financing of cities, particularly new eastern cities, is very largely a question of geography. By means of a diagram he showed that public works and public utilities had been scattered over altogether too much of Calgary's 40 square miles, that they cost $700,000 per square mile to construct and $70,000 per square mile to operate and maintain. Therefore, he argued, no more square miles should be financed than the actual requirements of population demanded. He said that the city should refuse to sell the lands on the outer areas but rather should handle them on perpetual lease. The cities could thus control their own town planning and development, instead of being controlled by private speculators.

Commissioner Meech, of Lethbridge, spoke of "Some Factors in the Origin and Life and Growth of Towns and Cities and Their Effect on Values." He said in part: "As taxation is one of the items that property has to carry, economical government is an asset. And over expenditures, with its attendant annual charge and upkeep, affect property values. The result of expenditures of this kind, particularly during periods of depression, results in owners giving up their properties at tax sales and leaving their burden to be borne by those who still retain ownership. The remedies for such conditions would appear to lie in widening the basis of taxation to offer a relief in the matter of taxation on real estate or insufficient growth in population to take care of the debt."

Resolutions Passed

A resolution was passed asking the government to consider the question of municipal taxation. The resolution read:—

"That this convention instruct the president-elect of the Union of Alberta Municipalities for 1921 to appoint a special committee of five with instructions to lay before the government of the province of Alberta the importance of some new act governing the municipalities of the larger size (cities in general), and that this committee impress upon the government the gravity of conditions which we as a convention see confronting such municipalities, and that in our opinion the government would be well-advised and we request our committee to request that a commission be authorized and appointed by the government at the next session of the legislature to study and recommend what policy shall be pursued and what acts or amendments to existing acts shall be introduced to deal with this whole subject, the idea of the commission to gather such information from such sources as the legislature or the government would consider advisable."

Other resolutions were:—

That there be increased grants to hospitals and training schools for nurses.

That the city council petition the provincial government to assume full responsibility of financing the hospitals in the province by placing a mill rate levy against all of the assessable land in the province, both city and country, and that such hospitals be made free to all its residents. Patients from other provinces to be accepted only upon such provinces undertaking to bear the full cost of caring for such patients.

That the present school grant from the provincial government is totally inadequate, and that it be doubled.

That the provincial government be petitioned to the effect that each city and town be allowed 50 per cent. of the revenue at present derived from licenses from automobiles.

That 50 per cent. of the police court fines now paid to the government be retained by the municipalities.

That legislation be introduced to make compulsory for a tax certificate to be filed with the registrar in order to secure a registration of a transfer.

Endorsing the various irrigation projects in the province.

Endorsing the suggestion that the four western provinces of Canada organize a Western Canada Union of Municipalities, and the incoming executive be authorized to initiate negotiations with the Unions of Municipalities of Manitoba, Saskatchewan and British Columbia, and take the necessary steps that will tend to bring about such an affiliation.

Asking for an investigation of other systems of taxation and sources of revenue.

Officers Elected

Calgary was selected as the meeting place next year. The election of officers resulted as follows:—

Hon. president, Mayor Marshall, Calgary; president, Commissioner M. Freeman, Lethbridge; first vice-president, Dr. Chrystal, M.D., Carstairs; second vice-president, Mayor J. W. Clarke, Edmonton; secretary-treasurer, J. D. Saunders, Camrose (re-elected).

Legislative committee, Com. Freeman, Sec. Saunders, Mayor Hardie (Lethbridge), Alderman Abbott (Edmonton), Secretary Carnegie (Bassano).

Executive committee, Com. Freeman, Secretary Saunders, Ald. Adams (Calgary), Ald. Rice Shepard (Edmonton), Secretary Wm. Robertson (Nanton), Secretary Fulton (Halkirk), Secretary Dunn (Beverley), Secretary Brown (Macleod), and Coun. Campbell (Viking).

BUILDING PERMITS AGAIN DECLINE IN SEPTEMBER

As Compared with a Year Ago, Total Shows Big Falling Off—Ontario Registered the Largest Decrease

BUILDING permits issued in fifty-six cities showed a decline during September as compared with the preceding month, the total value of building permits falling from $9,439,807 in August to $8,921,374 in September, a decrease of $518,433, or 5.5 per cent. Prince Edward Island, Nova Scotia, Quebec, Alberta and British Columbia registered increases in this comparison, while in New Brunswick, Ontario, Manitoba and Saskatchewan there were reductions, that of $639,635 in the last-named being the most pronounced.

As compared with the figures for the corresponding month in 1919, there was a decrease of $4,382,458, or almost 33 per cent. in the permits issued, the value for September, 1919, having been $13,303,832. The following are the details as prepared by the Department of Labor:—

DEPARTMENT OF LABOUR FIGURES CITY	August, 1920	September 1920	September 1919

DOMINION DEBT REDUCED TWO MILLIONS

October Financial Statement Indicates Healthy Condition—Revenues Continue to Expand

A DECREASE of more than $2,500,000 in the net debt of the Dominion in October, as compared with an increase of $22,000,000 in September and $43,238,000 in October a year ago, would seem to indicate that the country's finances are in a healthy condition. Revenue continues to expand largely, although the October total was about $500,000 below the previous month. Ordinary revenue also showed an increase of more than $10,000,000 for the month, but, as compared with a year ago, a decline of a similar amount is recorded. Expenditure on capital account is being rapidly reduced.

The following are the details as submitted by the Finance Department:—

PUBLIC DEBT			1919	1920
LIABILITIES			$ cts.	$ cts.
FUNDED DEBT—

JURISDICTION ON INCOME TAX CASES

County Judge Holds that Local Magistrate Has No Power to Fine for False Returns—Act Specifies Exchequer Court

IN the Carleton County Court at Ottawa on November 14, Judge Gunn decided that no justice of the peace or magistrate has jurisdiction to try cases where false Dominion income tax returns are alleged. The case was an appeal brought by Dr. Gordon Booth against a conviction registered against him last October in the police court, whereby he was found guilty of having made false income tax returns to the Dominion Income Tax Department for the years 1917, 1918 and 1919, and was condemned to pay $3,000.

Penalties are Heavy

The judgment concludes as follows: "I am opposed to the conviction made in support of this conviction that the War Income Tax Act imposing, as it does, the making of returns extending in number to hundreds of thousands, makes it lawful for the minister of finance of any authorized official of that department to lay a complaint against any or all of those returns containing a false statement of the income of any taxpayer and subjects him to the judgment of any magistrate or justice of the peace to determine his liability for $10,000 or six months' imprisonment, or both, in such a decision, until I hear it clearly stated so in that act, and as it stands, parliament having given expressly all jurisdiction to the Exchequer Court, I do not appreciate the attempt here made to institute proceedings before a provincial authority of inferior jurisdiction, as it means and leads to far-reaching convictions not reasonably within the consideration.

"There have been so many annaal amendments to the income act that any returns made in 1917 and 1918, no matter how correct then, could be false now as 'income' was by these amendments given an extended meaning, and the defendant might well say truthfully that the returns of 1917 and 1918 are not correct but false—and still be guiltless of the penalty. In any case I am clearly of the opinion that the injection of the words 'on summary conviction' in subsection 2 of section 9 does not clearly and expressly confer jurisdiction on any magistrate or justice of the peace to convict any person of any penalty laid by the Income War Tax Act.

"In any event, if I am in error in holding that the deputy police magistrate had no jurisdiction to hear and determine the information and complaint, I am, as judge of the fact and law, of opinion that the information and conviction contains no ground for complaint against the Income War Tax Act."

WRIT AGAINST OTTAWA SEPARATE SCHOOLS

Acting on behalf of the Bank of Nova Scotia, Chas. S. Smith, manager of the Wellington Street branch in Ottawa, has made an application to the courts for leave to issue a writ of execution of a judgment obtained in the Supreme Court of Ontario on October 24th, 1918, by the Bank of Ottawa, whereby it was entitled to recover from the board of trustees of the Separate School of Ottawa the sum of $77,800. The Bank of Nova Scotia seeks to recover the amount of the judgment, together with costs, and the interest which has accrued since the date of its promulgation, pointing out that its right to do so is vested in the agreement reached on April 30th, 1919, whereby the Bank of Ottawa sold and transferred all its assets to the Bank of Nova Scotia.

The judgment obtained by the Bank of Ottawa in 1918 followed the dismissal of the appeal taken to the Privy Council by the Separate School Board against an adverse judgment rendered by the school, whereby the School Board was debarred from recovering from the Quebec Bank, Bank of Ottawa and the ex-members of the Government School Commission a sum aggregating $170,000, consisting of the sinking fund of the schools, amounting to $42,000, seized by the Bank of Ottawa; $80,000 held by the Quebec Bank, and moneys spent by the School Commission.

SUIT FOR $400,000 AGAINST BANKS

George A. Carpenter, of Wolfeboro, N.H., in a bill filed in a Boston court against the Merchants National Bank and the Beacon Trust Company, seeks to have the banks restrained from demanding payment on two notes for $200,000 each, or from disposing of the mortgage given to secure them or the mortgage notes. An order of notice, returnable November 11th, was issued. Carpenter's contentions follow:—

On April 7th, 1914, he borrowed $400,000 of the banks on their own order, giving a note payable in seven years, with interest at 4½ per cent. Each bank loaned half the amount. He gave a note, secured by a mortgage on real estate at Washington and Winter Streets. Both note and mortgage were given to Arthur B. Nash, of Weymouth, an employee of the Beacon Trust Company, as nominee of both banks. When the loan was made he also made out two notes for $200,000 each, he alleges, one to each bank, but without consideration, and merely as accommodation and for the convenience of the banks to enable the latter to participate equally in the security.

It was agreed, he alleges, that the notes were not to be regarded as independent obligations, but merely as evidence of the share of each bank in the loan. The notes to the banks were made payable October 7th, 1914, and were renewed from time to time, and since 1916 have taken the form of demand notes. Plaintiff alleges he has paid $150,000 on the principal debt and interest, and is able to meet the balance. He says that because he refused to pay a higher rate of interest than that stipulated in the note for $400,000, the banks, acting in concert, have wrongfully demanded payment on each $200,000 note, and suit has been threatened.

SUPREME COURT NOW HEARING APPEALS

The Supreme Court of Canada is now sitting on several important cases on appeal from provincial courts. On October 14th judgment was reserved in the British Columbia appeal of the Corporation of the District of Surrey vs. Caine. The next case heard was the Standard Bank vs. McCrossan, another case from the Court of Appeal of British Columbia. The action was one brought by the bank upon a guarantee in the usual bank form agreed to by the defendant to an amount of $5,000. McCrossan stated that he signed the guarantee subject to the condition that it could not be used unless and until certain other notes had first been paid, which had not taken place. Judgment by the British Columbia Court of Appeal was in McCrossan's favor and the bank is now appealing.

BIG STEEL SUIT NOW BEFORE COURT

Three million dollars is at stake in a case just brought before the Exchequer Court in Ottawa. Because Hon. J. D. Reid, Minister of Railways, directed the Dominion Iron and Steel Co. to divert its organization from the making of shell steel to the manufacture of steel rails, the company demands that under the compensatory clause of the War Measure Act it shall have made good to it the additional profits it would have made on shell steel but for Dr. Reid's order. The order-in-council through which Dr. Reid made his order effective stated that the minister would himself set the price later after finding out the cost of production. The price set later was $65 a ton, and the dispute is whether the order-in-council or the compensatory clause of the War Measure Act governs.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended November 12th:—

Nipissing Mine, 67,238; Beaver Mine, 60,000; McKinley-Darragh, 85,696; Coniagas, 168,977. Total, 382,011. The total since January 1st is 24,252,706 pounds, or 12,126.3 tons.

News of Industrial Development in Canada

Textile Industry is not Depressed, State Authorities—Business is Brisk and the Outlook is Bright—Woollen Mill to be Established in Alberta Next Spring—Some New Developments in the Pulp and Paper Field—Plate Glass Manufactory for Hamilton

IN contrast to the situation in the United States, the textile industry in Canada is in a highly satisfactory condition and the outlook is equally bright, according to two authorities, in an interview in Montreal recently. Reports have been current in some quarters, particularly in stock market circles, to the effect that the cotton companies have for some time past been receiving large cancellations of orders and have been discharging many employees from the mills as the result of the lack of demand for their products. These rumors are emphatically denied. One of the officials remarked:—

"We are neither getting nor accepting cancellations and all our mills are working to capacity. Several of them, in fact, have been put on night shifts in order to catch up with the business already booked, which is of sufficient magnitude to keep us busy at top production for months to come. Our travellers have just started out for the usual spring business and, although it is yet too early to gauge the demand for textile products for 1921 delivery, the outlook is entirely satisfactory. Our new schedules went into effect November 1 and are moderately under existing ones and we are confident that the new prices will be well received by the trade generally.

"As to discharging help in large numbers, there is absolutely no truth in this. We have been able, however, to cull out some of our inefficient workers, engaged during the war period, when we were unable to pick and choose in this respect, but these have been replaced by experienced hands. Only recently, in fact, we brought out some eighty skilled operators from the English cotton districts in order to facilitate greater production at our mills and in the effort to lower costs. There has been no reduction in the wages paid our workers and there is no present indication that one will be put into effect."

A statement made recently in *The Monetary Times* is borne out by this remark. Depression of the textile industry in Britain and New England is causing workers to look for employment in this country, and some manufacturers are only too willing to take them on, because of their high qualifications.

Woollen Mill for Alberta

A syndicate of Scottish woollen manufacturers intends installing an up-to-date woollen mill either in Calgary or Edmonton in the spring of 1921, according to an announcement made by John A. Collins, of Edmonton, last week. Mr. Collins stated that he had just closed a deal whereby the British syndicate have purchased the full equipment and machinery of the woollen mill at Midnapore. This mill at Midnapore has not been in operation for the last seven years. The location of the new mills has not yet been definitely decided, but it will be installed in either Calgary or Edmonton. It will mean an investment of a considerable sum of money, the exact amount Mr. Collins was not ready to make public. At the present time there are no woollen mills west of the great lakes.

Pulp and Paper

Several interesting announcements concerning the pulp and paper industry in Canada have been made during the past week. According to a dispatch from Cornwall, Ont., a strong American company operating at Buffalo, N.Y., Skowhegan, Mich., and Pennyan, N.Y., under the name of the Niagara Wall Board Co., is establishing a branch of their business in Cornwall. A new Canadian company, the name of which will be the Cornwall Pulp and Paper Co., is being incorporated and the mill premises of Ross and Co. have been leased with an option to purchase. E. E. Emigh, of Richmond, Va., will be in charge at Cornwall, and is already on the ground. Arrangements are under way for water supply from the canal through the Department of Railways, and the street railway company have been asked to put in a siding. The company manufactures groundwood and turns out heavy paper specialties such as wall board, beaver board, etc. The plans of the new enterprise contemplate continuous operation with a staff of about thirty and an annual wage roll of about fifty thousand dollars. As soon as the buildings can be put in shape and necessary equipment installed, manufacturing operations will commence.

The Ontario government has made an agreement with the Spruce Falls Pulp and Paper Co., Kapuskasing, Ont., whereby, in return for the power privileges of the falls, the government will keep 900 acres of the land and will build near Kapuskasing a model town, to be named Spruce Falls, for the employees of the company. The government will issue debentures for houses up to $400,000 as under the Housing Act.

A. C. McIntyre, president of Clarke Bros., Ltd., Bear River, N.S., has announced that his company has concluded the purchase of the large building at Glenn Falls, N.S., formerly used by the Ford Motor Co., of Canada, and owned by Hon. William Pugsley, Lieutenant-Governor of New Brunswick. The building, which is one of the most modern structures of its kind in Canada, with railway connection, is to be used by the new owners for the manufacture of fibre shipping cases. The pulp will be brought from the large plant of the Clarke Bros. Paper Mills, Ltd., at Bear River, across the Bay of Fundy, landed at this port and taken to the Glenn Falls plant by motor truck, and there manufactured into paper board and boxes. The machinery will be installed by January, and the manufacturing will be well under way by the 1st of May. Then 20 men and girls will be employed. In addition to this industry, the company is to build a paper mill at the Glenn Falls site, for the manufacture of heavier grades of paper, and this mill, the construction of which will be started in the spring, will employ one hundred more hands.

The Northern Foundry & Machine Co.'s plant, Sault Ste. Marie, Ont., is again busy on the manufacture of pulp mill machinery. During the war they turned out shrapnel and high explosive shells, and when the armistice was signed, they helped to replace some of the shipping that was destroyed by the enemy. Now that the shipping trade has somewhat subsided, they are making rapid strides on pulp mill machinery. Before the war the chief activity was on machines for mills in the vicinity, but now their sphere of activity has been extended greatly.

Hamilton Plate Glass Manufactory

Negotiations have been completed for the establishment of the plant of the Canadian Libby-Owen Sheet Glass Co., Ltd., at Hamilton, Ont. The new company is capitalized at $1,600,000, and when the plant is completed between 200 and 300 skilled workers will be employed. The company will manufacture plate glass by a process known as the Libbey-Owen. It is stated that there are only two other plants of this kind in the world—the parent company in Charleston, West Virginia, and a plant that has recently been opened in Japan. The directors expect that if the Canadian market is properly developed they will be enable to double their plant within a short time. John W. Hobbs, of Toronto, will be the managing director.

The Sarnia, Ont., flax mill employees have started a new schedule of hours, working three hours' overtime each day. This has been found necessary owing to the receipt of a large order which will keep the plant busy until next

spring. During the past summer a staff of 50 has been employed, and now that the flax pulling has been completed, 34 workers will be given steady employment on the big contract which has just been received.

The Canadian Whiting Co., Ltd., which was recently incorporated at St. Jerome, Que., with a capital of $200,000. has its plant at Laurel, Que., on the Canadian National Railway line. Installation of machinery will be completed by about January 15, 1921, and in the meantime the company is filling orders with raw material until such time as it can refine the material.

Advices from Philadelphia state that the head office of the Pennsylvania Railway in that city has issued an official denial of a report that plans have been partly consummated for a gigantic transportation and industrial development scheme in Canada by the railway in conjunction with a number of large Canadian corporations. The project was said to include the construction of a new international bridge over the Detroit River by which the United States railway would enter Canada.

Looking for Belting Plant

F. B. McIlroy, president and general manager of the McIlroy Belting and Hose Co., of Hammond, Indiana, makers of Rubberite canvas belting, visited the Border Cities, Ontario, last week, in search of a Canadian branch factory. He has not yet arrived at any definite conclusion.

Kelly and Driver intend to erect a moulding factory at Kingston, Ont. The city is asked to provide a site and grant exemption from taxation for ten years.

The Macfarlane Engineering Co., which is at present operating at Paris, Ont., has asked the municipality to guarantee its bonds to the extent of $40,000. Ratepayers will be asked to vote on the proposition in December.

See and Smith, Toronto, makers of Ford automobile bodies, will erect a building suitable for the expansion of their business.

La Papeterie du Saguenay, Ltd., recently incorporated with a capital of $500,000 and head office at Quebec, Que., announce that a mill will shortly be constructed.

NEW INCORPORATIONS

British-American Finance Corporation, Ltd., $1,500,000—Brantford Computing Scales, Ltd., $1,000,000—Forged Steel Specialties Co., Ltd., $500,000

Dominion charters have been granted to the following companies, with head office and authorized capital as indicated:—

Cremerie de l'Economie, Ltd., Montreal, $100,000; Non-Explosive Corp. of Canada, Ltd., Toronto, $150,000; Forged Steel Specialties Co., Ltd., Montreal, $500,000; Central Finance, Ltd., Toronto, $500,000; Forged Steel Products Co., Ltd., Montreal, $500,000; Moto Meter Co. of Canada, Ltd., Hamilton, $25,000; G. Walter Green Co., Ltd., Peterboro', $200,000; Banking Service Corp., Ltd., Toronto, $100,000; United Retail Stores Candy Co., Ltd., Toronto, $1,000; Dominion Foreign Exchange Co., Ltd., Montreal, $100,000; Davenegle Ltd., Montreal, $500,000; British-American Finance Corp., Ltd., Toronto, $1,500,000; Brantford Computing Scales, Ltd., Brantford, $1,000,000; Flexible Shaft Co., Ltd., Toronto, $10,000, Canadian Piston Ring Co., Ltd. Montreal, $75,000; Robert W. Rowe, Ltd., Montreal, $30,000.

Provincial Charters

Provincial charters announced during the past week have been as follows:—

British Columbia.—Lakelse Hot Springs, Ltd., Prince Rupert, $200,000; Hing Mee Co., Ltd., Vancouver, $10,000; R S Tax Co., Ltd., Victoria, $50,000; Canadian Base Minerals, Ltd., Vancouver, $50,000; C. H. C. Payne and Co., Ltd., Victoria, $10,000; Prince Rupert Packers, Ltd., Prince Rupert, $50,000; Canadian Mower Improvement Co., Ltd., Vancouver, $50,000; Provincial Piling Co., Ltd., Victoria, $20,000

Ontario.—Langley, Harris and Co., Ltd., Toronto, $200,000; Kingston Hotel Co., Ltd., Kingston, $300,000; Phi Kappa Pi Buildings, Ltd., Toronto, $40,000; Kingston Agencies, Ltd., Kingston, $50,000; Automobile Used Parts Co., Ltd., Toronto, $40,000; the Hanover Amusement Club, Ltd., Hanover, $40,000; Penn-Canada Fire Brick Co., Ltd., Toronto, $40,000; Phi Delta Phi, Ltd., Toronto, $40,000.

New Brunswick.—St. John Transportation, Ltd., St. John, $10,000.

ZENITH COMPANIES' STOCK OFFERING

Stock in the Zenith Companies, Inc., of Minneapolis, is being offered in Canada by the James J. Craig Co., the underwriters, who have offices in Winnipeg and Toronto. The Zenith Companies, Inc., is a holding company, authorized by its charter to own and operate through stock ownership a number of insurance companies, so as to eliminate as far as possible the item of overhead expense and reduce the cost of the operations to a minimum.

At the present time the Zenith Companies owns the Merchants Life and Casualty Company, of Minneapolis, Minnesota, with a premium income of over $250,000 a year; the Merchants Casualty Company, of Winnipeg, Canada, which has a premium income of $500,000 a year; the Union Fire and Casualty Company, of Winnipeg, which has a premium income of about $300,000 a year.

The Merchants Casualty and the Union Fire and Casualty are operating all over the Dominion of Canada, and the Merchants Life and Casualty, of Minneapolis, is operating at the present time in seventeen central western states. It is the purpose of the board of directors of the Zenith Companies, Inc., according to a statement made by James J. Craig to *The Monetary Times*, to develop the Canadian business of the company very substantially, and the system which they intend pursuing is to increase the capital of the Union Fire and Casualty so that it will be able to take on the large lines of insurance which have been going to foreign companies operating in the Dominion of Canada.

S. D. Works, the president, was formerly insurance commissioner of the State of Minnesota, and has been identified with large insurance activities a great many years. A. E. Ham, of Winnipeg, Manitoba, was formerly the insurance commissioner of the province of Manitoba.

The agreement of the Zenith Companies is that any moneys raised in Canada will be used for the development of the Canadian end of the Zenith Companies' business, but no money will be taken out of Canada, but that all will be used for the purpose for which it was raised.

A financial statement of the company as at May 10th, 1920, shows assets totalling $1,321,252, made up of: Cash, $15,468; bills receivable, $298,783; Merchants Casualty stock, $350,000; Union Casualty stock, $300,000; Merchants Life and Casualty stock $350,000; real estate, $2,000; and stocks at market value, $5,000. Liabilities are: Unpaid balance, Merchants Casualty Co., $169,028; bills payable, $26,746; accounts payable, $2,983; capital stock (issued), $461,400; capital stock (subscribed but not issued), $214,200; surplus, $147,794.

The shares are offered at $100 per $50 share, which accounts for the fact that a large surplus is shown after underwriting expenses have been paid.

SUIT OVER MURRAY-KAY STOCK

J. Samuel Cooke is plaintiff in an action entered in Toronto against W. T. Bradshaw, W. Parkyn Murray and John B. Kay to compel specific performance of an alleged agreement of December 8th, 1910, for the purchase, in certain events which have subsequently happened, fifty shares of Murray-Kay Co. for $5,000. The plaintiff claims this sum, with interest from 11th May, 1916.

1870 —— OUR GOLDEN JUBILEE —— 1920

Two Hundred Million Dollars

This year the Mutual Life Assurance Company of Canada celebrates its golden jubilee by reaching the two hundred million dollar mark. This point in the expansion of The Mutual Life has been reached more quickly than any of its most ardent friends would have believed possible five years ago. But the reason is not "far to seek." During the Great War and the fatal epidemic which followed in its train The Mutual Life paid out in relief of the families bereaved no less than two million, three hundred thousand dollars ***in addition to ordinary claims.*** The benefits of life insurance were thus so clearly demonstrated that an immense demand resulted and the business of The Mutual has developed as much during the last five years as during the preceding forty-five years. The Canadian people suddenly realized the absolute necessity for life insurance and naturally turned to a company well-known, well-established and financially impregnable.

The Mutual Life Assurance Co. of Canada

News of Municipal Finance

Vancouver is Experiencing Taxation Troubles—Some Suggestions are Advanced—Latchford is Recovering After Being Nearly Extinct — Winnipeg Hydro-Electric Surplus Much Greater — Calgary's Revenue Explained By Percentages — Guelph Assessment Increased

Peterboro', Ont.—Fares on the Peterboro' Street Railway on December 1st will be raised to seven cents, or four tickets for 25 cents, following the decision of the Board of Railway Commissioners to that effect. A deficit of $20,799 for the railway at the end of August, 1920, is reported.

Edmonton, Alta.—Fully 60 per cent. of this year's current taxes have been collected in the last ten months, says City Comptroller D. Mitchell in his quarterly report to the city council. Including collections for October, the city has taken in approximately $3,365,924, of which $2,559,129 were 1920 taxes. On a proportionate basis, expenditures have been kept well within the estimates, says the comptroller.

Guelph, Ont.—The assessment figures for 1920, as compiled by Assessment Commissioner Hastings, show that the total assessment is $13,330,675, an increase of $961,860 over last year. The advance is general all over the city, and Mr. Hastings states that, even with this increase, he has not raised the assessment in proportion to the prices at which real estate is being sold. There has also been an increase in the population of 890, bringing the total population of the city up to 17,922. Including College Heights, the population is considerably over 19,000.

Calgary, Alta.—A number of charts have been prepared by W. C. Wood, city comptroller, showing the distribution of civic revenue in 1920, with comparisons. Under the heading of "Where It Comes From," the following percentages are shown: General revenue—General taxes, 48.94, 1919, 47.329; business tax, 3.07, 1919, 2.92; sundry revenue, 4.57, 1919, 5.99; provincial war tax, .80, 1919, .99; special levy, uncollectable taxes, .84, 1919, 1.02. Utilities—Electric light and power, 13.12, 1919, 11.85; market and weighing scales, .24, 1919, .20; paving, 1.29, 1919, 1.89; street railway, 14.12, 1919, 13.02; waterworks, 6.55, 1919, 7.201. Local improvement taxes—Property tax, 6.46, 1919, 7.58. Total, $6,656,995.

Under the heading of "Where It Goes," it is shown that money expended on utilities increased 1.135 per cent., while above, receipts show an increase of about 1.159 per cent. The surplus on general government is estimated at .02 per cent., as against .002 last year.

Winnipeg, Man.—The city's Hydro-Electric system surplus increased 318 per cent. during the year ended September 30th, according to the official statement of the city light and power department, issued recently. The surplus was $213,077 as compared with $67,411 at the corresponding date in 1919. September receipts aggregated $111,510, as against expenses of $122,700, leaving a deficit for the month of $11,196. Department officials forecast that books for October will record a large surplus now that more demands are made on current as nights become longer.

Assets of the system are $14,185,535. Of this amount, property and plant are valued at $9,710,794; sinking fund investments, $913,086; treasury securities, $1,474,000; investment of depreciation reserve, $401,007; cash in bank, $1,238,863; accrued interest on investments, $10,352; accounts receivable, stores, consumers' wiring and installation and sundry current assets, $433,813. Prepaid insurance is $2,617. Among the capital liabilities are city of Winnipeg consolidated stock, $6,912,000, and city of Winnipeg debentures, $1,999,000. The depreciation reserve is placed at $1,536,259, investments with sinking fund trustees, $913,085, and annual levies accrued, $113,965.

Latchford, Ont.—After being almost extinct for some time, Latchford, a northern Ontario town, is on the way to recovery. In the early days of the T. and N.O., and when Elk Lake, Gowganda and Matachewan were attracting considerable attention, Latchford also drew attention. It was at the junction of the T. and N.O. Railway and the Montreal River. It was here that all the freight for up the river was transferred from the trains and placed on the boats. This brought prosperity to Latchford, and it grew quite rapidly. The T. and N.O. hit it a fatal blow, however, It acceded to the demand for the extension of the railway into Elk Lake.

When the town went under it had a bonded indebtedness of about $7,000. This was not met. It seemed that the only chance was to seize the town. After the town went under, however, the schools were kept going, but even this at last succumbed, and the result was that some fifty odd children had no facilities for education. Dr. J. B. McDougall, the assistant chief inspector of schools, was informed of the situation, and he first took the matter up at Toronto. There was no precedent in history to go by, so he paid a visit to Latchford. He insisted that the school be opened, promising that the cost would be looked after in some way. Then he secured the attention of some of the interested men in the town, and finally he was able to prevail on them to resurrect the municipal machinery. This they have just done. A new mayor, Hugh McNeil, has been named, with Messrs. Michael and Cameron, chairman and secretary of the School Board. The town's indebtedness will be taken up, and the bondholders may be assured that soon steps will be taken to meet the interest, and it is likely that the new council will start a sinking fund for the redemption of the bonds.

Vancouver, B.C.—Like other cities in British Columbia, Vancouver is experiencing considerable trouble regarding taxation matters. In a recent editorial the Vancouver *Sun* speaks of the situation as becoming serious and suggests some methods of revision. The editorial says in part:—

"The monetary situation of the city cannot, as yet, be fairly described as serious, but it will begin to verge in that direction unless something is done pretty soon. The problems involved cannot be permanently solved by persistently pretending that they do not exist. The trouble began several years ago, and had its root in the regrettable policy of postponing tax sales, with the inevitable outcome that municipal finance became subordinate to municipal politics, and enormous arrears were allowed to accumulate. The difficulty was accentuated by the removal of the taxation from improvements and the placing of it altogether on land—a method whose inherent weakness became evident as soon as land values began to decline.

"Vancouver has acted on the principle that 'the art of taxation consists in plucking the goose so as to get the maximum amount of feathers with the least possible squawking.' This plan worked all right until the property-owners banded themselves together for mutual protection. Now it will not work any longer. But the question of how the city got into its present fix is entirely secondary to the question of how it is going to get out. For this purpose, has anything yet been proposed fairer than the business tax? This might be based upon the assessed capital value of the real estate occupied, as in Ontario. If this is not considered satisfactory, try the Winnipeg plan of basing it on the assessed annual rental value of the premises. Either plan, or a combination thereof, will have the fundamental virtue that it will raise the money needed.

"In taxation matters, Vancouver is at a disadvantage, in that an exceptionally large proportion of those whose incomes are earned within the city reside beyond its limits. The suburban municipalities are in reality residential quarters of Greater Vancouver, but are beyond the tax jurisdiction of the city council. Unless there is an amalgamation, this difficulty will tend to become more accentuated with lapse of time. The suburbs will grow and the city become more and more a business section."

Government and Municipal Bond Market

Ontario Makes Another Five Million Dollar Loan—Securities Go to the United States—Moose Jaw Sells Bonds for Disposal Across the Line, but Has to Pay More than Seven Per Cent. for Its Money—Several other Municipal Issues

THERE was again considerable activity in the government and municipal bond market during the past week, but it cannot be said that there was any great strengthening in prices. Parry Sound paid a pretty stiff figure for its money, but that was only to be expected, in view of the location of the town.

The principal event of the week was the sale of $5,000,000 Ontario securities. These bonds are now being offered in the United States to yield 6.80 per cent. Finance Commissioner Ross, of Toronto, in commenting on this sale in comparison with the deal which was negotiated by the city last week, speaks of the gambling by the province on exchange. The province, however, had no other alternative. All the provinces which have made loans in the United States this year have been gambling on exchange, but as there has been practically no market here for their securities except at rates which were altogether out of the question, they were justified in taking such a course, provided, however, that they can show that their borrowings were absolutely necessary.

Moose Jaw sold $100,000 for disposal in the United States, but even at that the city had to pay more than 7 per cent. for its money. It is understood that an offer was made for bonds payable in Canada, but was considered too high.

Coming Offerings

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Smith's Falls, Ont. ..	$ 9,200	6½	20-instal.	Nov. 22
Pembroke, Ont.	47,000	6	10 & 30-inst.	Nov. 24
Freeman Twp., Ont..	10,000	7	20-instal.	Nov. 27
Sault Ste. Marie, Ont., S.S. B.	85,000	6	......	Nov. 30

Nottawasaga Tp., Ont.—Tenders will be received until November 25, 1920, for the purchase of $14,500 6 per cent. school debentures, payable January 1, 1921-40, at Bank of Toronto, Stayner, Ont. The securities are guaranteed by the township of Nottawasaga, County of Simcoe. A. Campbell, R.R. No. 1, Smithdale, Ont.

Debenture Notes

Amherst, N.S.—All tenders have been rejected on the $40,000 6 per cent. 30-instalment debentures.

Milton, Ont.—Town Clerk Hemstreet has been instructed to prepare a by-law for the issue of $8,000 debentures for cement sidewalks.

Glace Bay, N.S.—Ratepayers have authorized the issue of $6,000 debentures, the proceeds of which will be used to purchase electric meters.

Calgary, Alta.—A recommendation of the finance committee to borrow $265,000 to capitalize over expenditures, largely on capital account, has been passed by the council.

Edmonton, Alta.—Five money by-laws totalling $1,025,000, which are to be submitted to ratepayers at the December elections, have been approved by the council.

Toronto, Ont.—The council has agreed to issue debentures to the amount of $150,000, without the vote of the people, for the proposed "pure food building" for the Canadian National Exhibition.

London, Ont.—At the January elections, citizens will be asked to vote on five debenture by-laws as follows: City's railway to the lake, $257,000; Springbank improvement; motor bus reserve fund; grants to childrens' hospital and home for incurables.

Winnipeg, Man.—The school board has authorized the sale of $800,000 worth of bonds to cover expenses which have been incurred in construction work during the past year. The bonds to be sold consist of a portion of the $1,500,000 issue voted by the ratepayers last May.

Kapuskasing, Ont.—In connection with the Spruce Falls Pulp and Paper Co., a new town is to be built in the vicinity, under the name of Spruce Falls, and electricity will be supplied by the paper company from its power plant, and the Ontario government will issue $400,000 housing debentures to take care of the construction of dwellings.

Saskatoon, Sask.—City Treasurer Oliver advises *The Monetary Times* that the Local Government Board has given its consent to sell to the sinking fund $52,200 City of Saskatoon 20-year 6½ per cent., debentures at a price of 93.64. The debentures will mature on July 1, 1940. The sale will not be made to the sinking fund until the debenture account is in need of the proceeds.

Nova Scotia.—The list of bids on the province's bond issue which was wired to *The Monetary Times*, and which was published in these columns last week, stated the offer of the Canadian Debentures Corporation and C. H. Burgess and Co. as being 101.97 for the 10-year securities payable in the United States. Confirmation of the list by mail shows that this bid should have been 101.07.

London, Ont.—Improvements involving a total expenditure of $1,117,000 will be inaugurated by the city next year, providing the legislature gives its assent and the ratepayers are agreeable. Some of the issues are being sent direct to the legislature via the London bill, and others will be voted on in the municipal elections. No consideration is yet made for the board of education, which will ask for approximately $750,000.

Ottawa, Ont.—The necessary permission has been given the city solicitor by the board of control to advertise immediately, notice of the application by the city to raise funds to purchase the Ottawa Electric Railway. Application is also being made to the provincial government for authority to raise money for construction of new mains and sewers amounting to $100,000, installation of meters $40,000, and installation of fire hydrants $20,000.

Alberta.—The next irrigation project to come before the provincial legislature will probably be the South Macleod district. According to George Skelding, M.L.A., for Macleod, about 160,000 acres will be involved in this project, and the construction cost of the scheme will be far less than the Lethbridge Northern. The South Macleod lands will be bonded at about $20 an acre, while the assessment on the Lethbridge Northern averages approximately $50 an acre. In the Lethbridge Northern the water requires to be drawn from the south side by means of a huge viaduct, turned across the river to the north, after which the main canal for a few miles will be an expensive undertaking, the preliminary costs in the first stages of the contract amounting to over one million dollars.

Edmonton, Alta.—The city has been receiving inquiries for its securities, but as no bonds are to be placed on the market until after January 1, the finance committee recommended that all offers be rejected. A bond house on the coast has offered 83.09 for $1,475,000 of 5½ per cent. bonds, due October 1, 1929. If the interest rate was changed to 6 per cent., 86.49 was offered. If the city favored selling these bonds in the form of three-year 6 per cent. notes, for $1,250,000, the firm offered 98.25 and interest. For $37,782 and $19,257 of

Victory Bonds and the Average Man

Freedom from care and convenient interest collection are the principal factors that should govern the choice of investment by the average man.

No other security possseses these qualities in a greater degree than Victory Bonds, while the interest return, which ranges from 5.67% to 6.55%, is the highest that has ever been obtainable from securities of the Dominion.

Write for our pamphlet entitled "Some Victory Bond Questions and Answers." It will interest you.

INVESTMENT - SERVICE

Bonds Will Advance

One reason is the passing of extreme speculation in commodities and stocks and the tendency of conservative investors to strengthen their Bond holdings.

Another is the fact that the next long swing in money rates will be down, and, conversely, the next long swing in Bond values will be up.

For safety and profit, buy Bonds and fixed interest securities *now*.

Write and we will recommend attractive purchases.

Government and Municipal Bonds

42 King St. West
TORONTO -:- CANADA

5 per cent. city bonds due on July 1, 1927, the company would give 84.01 and interest; and a price of 90.06 if the interest rate was 6 per cent. On $71,919 5 per cent. bonds, due in 1925, the company offered 89.17 with 93.62 at an interest rate of 6 per cent. An offer of 98.25 was made on $1,499,080 of unsold and unhypothecated debentures, providing that the city issued three-year 6 per cent. notes against them.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from November 1 to 10, 1920:—

Schools—Honey Bank, $1,500 8 per cent. 10-instalments; Westlea, $4,200 8 per cent. 10-years annuity; Idlewilde, $5,000 8 per cent. 10-years annuity.

Town of Alameda, $6,500 8 per cent. 10-years, for curling rink.

Village of Fillmore, $3,000 8 per cent. 10-instalment, for curling rink.

Saskatchewan.—The following is a list of debentures reported sold from November 1 to 10, 1920:—

Schools—Kylemore, $5,500 8 per cent. 15-instalments, and Three Hills, $4,300 8 per cent. 10-instalments, to Waterman-Waterbury Co.; Reinfold, $1,500 8 per cent. 10-instalments, Royal Loan and Savings Co., Brantford, Ont. Yellow Creek, $5,000 8 per cent. 10-instalments Hill Holl, $4,000 8 per cent. 10-instalments, Honora, $3,300 8 per cent. 10-instalments, St. Florence, $4,800 8 per cent. 10-instalments, all to the Waterman-Waterbury Co.

Village of Bulyea, $600 8 per cent. 10-year, D. S. McElroy, Bulyea.

Chester R.M., $9,500 8 per cent. 10-years, International Loan Co., Winnipeg.

Bond Sales

Lachine, Que.—Versailles, Vidricaire and Boulais have purchased $175,000 6 per cent. 10-year school bonds.

Hanover, Ont.—The town has sold through a local broker, A. Hamel, about $45,000 6 per cent. debentures, which mature from 1 to 20 years.

York Tp., Ont.—A small issue of $8,765 6 per cent. 5-instalment debentures has been purchased by A. Jarvis and Co., at 97.80, which is on about a 6.80 per cent. basis. Other offers were: A. E. Ames and Co., 96.966; R. C. Matthews and Co., 96.50; Canadian Debentures Corporation, 96.09.

Fredericton, N.B.—The sale of the city's $166,000 debentures to local citizens is meeting with a good response, according to G. R. Perkins, clerk and treasurer, in a letter to *The Monetary Times*. Up to the end of October, within a few days of the initial offering, $20,000 had been disposed of.

Eastview, Ont.—Turner, Spragge and Co., have purchased $11,218 6 per cent. 20-instalment debentures and $13,835 7 per cent. 20-year straight-term debentures.

Moose Jaw, Sask.—Wood, Gundy and Co. have purchased $100,000 6 per cent. 10-year bonds at a price of 92.25, at which rate the city pays more than 7 per cent. for its money. The securitites are payable in both Canada and the United States. It is understood that another offer was received for the bonds payable in Canada only, but this was rejected.

Saskatchewan.—The following is a list of debentures reported sold from October 23rd to 30th, 1920:—

Rural Telephones.—Beaver Hills, $23,500 15-years 8 per cent., Willowmoor, $1,500 15-years 8 per cent.; W. L. McKinnon, Regina. Seaforth, $4,250 15-years 8 per cent.; Wood, Gundy and Co., Saskatoon. Stoney Coulee, $3,000 15-years 7½ per cent.; H. Huttle, Springside.

School Districts.—St. Jerome, $3,800 10-years 8 per cent., Southdean, $2,500 10-years 8 per cent.; Waterman Waterbury Co., Regina. Elrose, $5,500 10-years 8 per cent.; Monarch Life Insurance Co., Winnipeg, Man. Prairie Lawn, $1,000 10 years 8 per cent.; Walter Martin, Weyburn. Punnichy, $2,000 10-years 8 per cent.; Atkinson Hall, Wynot.

Minitonas, Man.—J. A Thompson and Company have purchased $50,000 6 per cent. 30-year debentures. The securities are for good roads purposes and are guaranteed by the province. The interest cost to the municipality was slightly over 7 per cent.

Etobicoke Tp., Ont.—Brent, Noxon and Co. have been awarded $25,000 6½ per cent. 30-instalment debentures at a price of 98.93, which is on a 6.60 per cent. basis. Tenders received were as follows:—

Brent, Noxon and Co.	$24,733
A. E. Ames and Co.	24,720
United Financial Corp., Ltd.	24,695
Wood, Gundy and Co.	24,657
C. H. Burgess and Co.	24,642
Macneill, Graham and Co.	24,511

Parry Sound, Ont.—N. A. Macdonald and Co. have purchased $75,000 6 per cent. 30-instalment debentures at 84.67, which is on about a 7.70 per cent. basis, and $18,745 6 per cent. 15-instalment debentures at 90.68, which is on about a 7.55 per cent. basis. A. E. Ames and Co. bid 85.15 on both issues. In addition, Wood, Gundy and Co. asked for an option on the whole amount at 89, while C. H. Burgess and Co. asked for option on the 30-instalment issue at 86.

Renfrew County, Ont.—The county has sold to Wood, Gundy and Co. $150,000 6 per cent. 20-instalment debentures at a price of 94.87, which is on a basis of about 6.65 per cent. Bids received were as follows:—

Wood, Gundy and Co.	94.87
C. H. Burgess and Co.	94.71
Canadian Debentures Corp.	94.21
R. A. Daly & Co., and W. A. Mackenzie & Co.	93.56
R. C. Matthews and Co.	93.52
A. E. Ames and Co.	93.493
United Financial Corp., Ltd.	93.33
Turner, Spragge and Co.	93.33
J. F. Stewart and Co.	93.257
N. A. Macdonald and Co.	92.07

Ontario.—A syndicate composed of Wood, Gundy and Co., A. E. Ames and Co., R. C. Matthews and Co., and the Illinois Trust and Savings Co., purchased this week $5,000,000 6 per cent. 7-year bonds, which are payable in the United States and Canada, at a price of 104.533, which is on about a 5.22 per cent. basis. Six tenders were received as follows:—

Wood, Gundy & Co., A. E. Ames & Co., R. C. Matthews & Co., and the Illinois Trust & Savings Bank	104.533
Canada Bond Corp., A. B. Leach & Co., Hornblower & Weeks, Redmond & Co., Paine, Webber & Co., Carstens & Earles, and Wells-Dickey Co.	104.22
A. Jarvis & Co., Halsey, Stuart & Co., and the First National Co.	103.17
W. A. Mackenzie & Co., Continental Trust & Savings Co., First Trust & Savings Bank, Blythe, Witter & Co., and Wm. R. Compton & Co.	103.14
Harris, Forbes & Co., and the National City Co.	102.367
Dominion Securities Corp., and Wm. A. Read & Co.	101.417

Manitoba.—The province has disposed of $750,000 6 per cent. 10 year debentures to Wells-Dickey Co., and the Minnesota Loan and Trust Co. at a price of 102.72, which is on about a 5.65 per cent. basis. "Taking into account the period of the loan, the successful bid seems to be a trifle more advantageous than any sale that has been recently reported and would indicate steady improvement in market conditions in the United States for this class of security," said Hon. Edward Brown, provincial treasurer to *The Monetary Times*. The following tenders were received by the province:—

Wells-Dickey Co. and the Minnesota Loan & Trust Co.	102.72
Baird & Botterell, representing the National City Co.	102.48
Harris, Forbes & Co., Incorp.	102.43
Canadian & General Securities Co., representing Halsey, Stuart & Co.	101.31
Wood, Gundy & Co.	101.125
W. A. Mackenzie & Co. and R. A. Daly & Co.	100.73
J. A. Thomson & Co., for A. E. Ames & Co.	99.595

The proceeds of the above issue will be used for telephone extension.

Another Exhibition of Declining Values on the Canadian Exchanges—Selling Movement is Less Pronounced, However—Dominion Power Bonds Offered in the United States—United Grain Growers to Increase Capital by Three Millions

THE past week witnessed another exhibition of declining values on the Canadian stock exchanges, in which Atlantic Sugar and the papers were the features. The prices movement was not altogther downward, however, there being rallies in several issues, which tended to bring about a better feeling, although at no time was the sentiment really bullish. Whatever hopefulness or confidence was brought about by these rallies, however, was destroyed when, towards the close on November 17th, sharp reaction set in, and recoveries made by some issues, particularly in Montreal, were wiped out and substituted by further losses. This reaction was largely due to a break in Wall Street, indicating that the Canadian markets are not operating altogether independent of New York.

The selling movement which was in evidence last week was less pronounced, and by November 17th trading had become greatly reduced. The following figures illustrate this:—

	Montreal.		Toronto.	
	Listed stocks.	Bonds.	Listed stocks.	Bonds.
Thursday	16,314	$ 47,600	1,844	$ 42,700
Friday	18,844	32,200	3,246	30,100
Saturday	12,847	2,800	2,086	11,000
Monday	15,339	20,300	2,918	30,900
Tuesday	8,452	35,600	7,339	8,500
Wednesday	9,974	34,400	1,773	20,200
Totals	81,770	$172,900	19,206	$143,400

The figures for the previous week were: Montreal, listed stocks, 126,472; bonds, $171,000; Toronto, listed stocks, 11,166; bonds, $163,600.

Dominion Power Bonds

Harris, Forbes and Company, Incorperated, are offering in the United States $600,000 5 per cent. gold bonds, due, serially, from April 1st, 1921, to April 1st, 1932, of the Dominion Power and Transmission Co., Ltd., Hamilton, Ont. The securities are offered at prices according to the various maturities to yield 8, 8⅛ and 8¼ per cent.

H. P. Briggs, Ontario representative of Harris, Forbes and Company, points out that in September, 1899, the Harris organization first brought out $750,000 Hamilton Electric Light and Cataract Power Company first mortgage sinking fund 5 per cent. bonds, due October 1st, 1929, and that this issue promptly sold at 104 and interest to yield 4¾ per cent. A comparison with the present interest yield shows how the price of capital has changed during the past twenty years.

An offering of $50,000 8 per cent. cumulative preferred stock of the Atlantic Milling Company, Ltd., is being made by H. M. Bradford, Halifax, N.S., at par, with a bonus of 25 per cent. common stock. Shares are in denominations of $10 each. The capital of the company, including the present issue, is as follows: Preferred stock, $94,000; common stock, $41,500. There is no bonded indebtedness.

Capitalization Increases

The following companies, which are incorporated under Dominion charters, have been authorized to increase their capitalization to the amounts stated by the issue of new shares of $100 par value:—

	Former capital stock.	Increased to
Barrett Co., Ltd., Toronto, Ont.	$500,000	$3,000,000
Howland and Waltz Co., Ltd.	100,000	500,000
Galena-Signal Oil Co. of Canada	500,000	1,000,000

The Marshay Lumber Company, Ltd., which operates under an Ontario charter, has been authorized to increase its capital from $50,000 to $1,000,000 by the creation of 9,500 new shares of $100 each.

A by-law to increase the capitalization of the United Grain Growers, Ltd., from twelve to fifteen million dollars is one of the important matters to be introduced at the annual convention of that organization, which is being held in Calgary, November 25th and 26th.

Capitalization Changes

Scythes and Company, Ltd., Toronto, Ont., have been authorized to increase their capital stock from $250,000 to $1,000,000 by the creation of 7,500 new shares of $100 each, and to convert the present 1,750 common shares into preference shares.

Supplementary letters patent have been issued to Kenworthy Bros., of Canada, Ltd., converting the business from a private to a public company, and authorizing an increase of capital to 2,000 common shares without nominal or par value, and 1,500 preference shares of $100 par value.

The protracted negotiations between the Saskatchewan and the Dominion governments for the refund to the province of money advanced by it to meet the interest falling due on the provincially guaranteed bonds of the Grand Trunk Pacific Railway lines have been completed, a cheque for $862,252 being turned over by the Dominion government to Hon. C. A. Dunning, provincial treasurer.

Earnings

Past and Present

It sometimes happens that large current earnings give a misleading idea as to the value of a Company's securities. The Investor seeking information as to how earnings have averaged over a period of years on the stock he is considering, will find this, together with other valuable facts, in our Analysis of Canadian stocks.

This invaluable collection of data enables the Investor to size up accurately the comparative position of the leading Canadian issues.

A copy will be mailed free on application.

QUEBEC SUPPORTS TARIFF FOR ITS MANUFACTURES

(Continued from page 14)

growth and prosperity, and it is stated that any difference in the fiscal policy would mean injury to the manufactures situated here.

The Board of Trade presented a resolution adopted at a recent meeting which voiced the same opinion, emphasizing the fact that a large number of United States concerns were situated here because of the existing tariff regulations, and stating that the continuance of adequate protection was considered to be in the best interests of the city.

In addition to these, a number of other briefs were presented by industrial and commercial establishments couched in similar terms.

Good Representation at Three Rivers

The evidence in Three Rivers was also strongly protectionist, though the farmers were also represented. The local Board of Trade, represented by Mr. Burrill, its president, registered in favor of a protective tariff as the best means to protect Canadian industries. Mr. Eugene Tremblay, in the name of the employees of the Wabasso Cotton Company, of Three Rivers, said that any reduction of the tariff would be prejudicial to the company, and, consequently, prejudicial to the employees. He favors the maintenance of the present tariff law.

The directors of the Shawinigan Cotton Company said that the textile industry had no actual protection on account of the depreciation of the pound sterling, and they ask for a more severe tariff. "Any interference with the present tariff would not only seriously jeopardize the success of the company, but would at once stop any further developments," said William G. Aird, manager. The company up to the present has not paid any dividends, Mr. Aird added. It has on its payroll about 450 employees, and is paying annually $500,000 in wages. The mill supplies coarse cotton yarns to the knitters throughout the country. According to the customs tariff there is a duty of 17½ per cent. as against Great Britain and 25 per cent. as against the United States. At the present time, owing to the depreciated value of the pound sterling, there is practically no protection as against the English manufacturer. The company is arranging for the doubling of its plant. When the latter is fully completed it will give employment to approximately 1,000 persons and will pay annually $1,000,000 in wages. Manager Aird submitted that no recommendation be made tending toward a reduction of the tariff in connection with this industry.

Maurice Garceau, a farmer residing in the neighborhood of Three Rivers, said that the Three Rivers industries, on account of the great number of men in their employ, afford the best market to the dairy trade, and any extension of the local industries made possible by a protective tariff would serve best the interests of the farmers' community. Consequently, he favors the maintenance of the present tariff.

Mr. Eugene Tremblay, one of the employees of the Wabasso Cotton Company, said that the employees of this company are mostly owners of their homes in this city, and that they are satisfied with what they have. He added that most of the employees of the Wabasso would be in a serious situation if the company was forced to close its doors on account of a reduction of tariff, because they were not competent to follow another trade. In the name of his co-workers he protested against any reduction of tariff that would jeopardize the interests of the Wabasso company and their own future.

Montreal's Shoe Manufacturing

T. H. Rieder, president of the Ames, Holden, McCready Co., Montreal, said that the profits made during the last three years "either have been or will be dissipated during the present year." Under examination he said that his company had made a profit of five per cent. on its turnover, and had paid eight per cent. on its preferred stock, which represented the invested stock. The common stock represented goodwill and no dividend had ever been paid on it. He did not give any figures as to the amounts put in reserve. He emphasized the contentions made by Mr. Palmer as to the inability of Canadians to compete on even terms with the United States manufacturers by describing the Endicott works in New York, which he had recently gone over. There was a separate factory devoted to each type of boot and shoe required, and in that way a volume and a saving in overhead costs could be attained which were impossible in the smaller factories of Canada.

In a long memorandum placed before the commission by Mr. Palmer for the whole trade it was stated that in 1918 there were in Canada 161 establishments manufacturing 14,087,268 pairs of leather boots and shoes, valued at $46,387,665, paying wages of $9,599,967 to the thousands of employees, and having a total capital investment of $33,274,753. He claimed that the industry, which had been in a languishing condition prior to 1905, revived when the tariff on fine shoes was raised from 25 to 30 per cent. in the 1906-07 revision. The progress had been steady, and to-day Canadian manufacturers were producing footwear equal to the best that could be imported, with the exception of certain ultra-fine luxury shoes. Domestic competition was keen, and along with tanners and other industries depending upon it for a market, 25,000 persons were employed. Every Canadian soldier in the late war wore Canadian-made boots.

In the Montreal district alone there were 53 factories producing 46 per cent. of all the leather footwear made in the Dominion. Ontario, with the same number of factories, made 31 per cent., and Quebec City and vicinity, with 32 factories, made 18 per cent., while 16 factories in the maritime provinces and elsewhere made 5 per cent.

The session in Montreal on Monday dealt chiefly with the boot and shoe industry. The manufacturers urged that the present tariff be maintained, as otherwise American goods would flood the Canadian market.

Score Luxury Tax

Loud complaint was launched against the luxury taxes instituted at the last session of parliament. All those who spoke claimed that these taxes were responsible for a considerable share of the present unemployment, but the public simply refused to buy shoes on which they would pay the taxes, and in consequence the country was overstocked with a class of shoes for which there had previously been a large demand.

The Textile Industry

On Tuesday the textile industry was discussed at length, J. F. Frame, K.C., appearing to represent Manitoba and Saskatchewan. He requested that information which had been compiled through questionnaires by the Board of Commerce be made public, and this Sir Henry Drayton promised to have done.

Long statements were made by Sir Charles Gordon on behalf of the Dominion Textiles Co., and by A. O. Dawson, of Canadian Cottons, Ltd., giving a variety of information with regard to the cotton business, but the Regina lawyer indicated that he had not yet got the information which will convince himself or his principals that a case has been made out.

A. H. Clement, president of the United Farmers of Quebec, presented a document in French setting forth that "to-day the farmer population of the province was less than in 1881." He attributed this to migration to the towns and cities. The memorandum further set forth that there was a migration from this province of thousands of farmers to Vermont, Maine and New Hampshire, all being farmers anxious to get better conditions, a better market, and cheaper agricultural implements and other supplies. To prevent this the United Farmers proposed an abolition of duties on agricultural implements and other machines farmers had to use. The price of agricultural implements had almost doubled within five years. The suggestion was made that a direct tax be placed on undeveloped natural resources and lands held for speculation, a further income tax based on degrees of wealth, increase in succession duties and a tax on the profits of industrial corporations.

Corporation Finance

Port Arthur Shipbuilding Company Hopes to Build Up Better Business by Entering Other Classes of Manufacture—Dominion Park Company of Montreal Has Good Year—London Street Railway Employees May Strike—Surplus is Too Small to Pay Increased Wage Demand

Demerara Electric Co., Ltd.—September earnings of the company were as follows:—

	Gross.	Net.
Railroad	$10,817	$1,453
Light and power	10,828	1,770
Miscellaneous	.....	683
		$6,906

Trinidad Electric Co., Ltd.—Earnings of the company for September were as follows:—

	Gross.	Net.
Railroad	$19,334	$ 5,788
Light and power	15,291	3,638
Ice and refrigeration	8,485	3,649
Miscellaneous	.....	4
		$13,079

London Street Railway.—Employees have received from the Ontario Railway Board a report on the financial results of operation for the month of October. It showed that, after paying the guaranteed maximum wage of 48 cents an hour, and after meeting bond redemption and other charges which the board deems inescapable, a surplus of only $17.36 remains for division among the members of the union. The bonus, reckoned in cents per hour, is down to decimal fractions and the men's demand for 52 cents is not met. Employees will not recede from their demand for 52 cents, and unless some arrangements are made within the next few days a strike will no doubt ensue.

Nipissing Mining Company.—According to the regular monthly report by Hugh Park, manager, the company, during the month of October, mined ore of an estimated value of $184,578 and shipped bullion and residue from Nipissing and custom ores of an estimated net value of $316,475. The price of silver is figured at 82 cents, a decline of nine cents per ounce from the September statement.

The following is a summary of production for October: Washing plant, $70,270; low grade mill, $114,308. Total, $184,578. These figures compare with a total of $225,100 during the preceding month. The decline was due to power shortage, a condition which was only temporary.

Winnipeg Street Railway Company.—As announced in these columns last week, a special meeting of shareholders is called for December 4th to authorize an increase in the common capital and to deal with details in connection with the issue of $3,000,000 7 per cent. cumulative preferred stock. With regard to the preference stock it is announced that the new money will be used, when received, to pay outstanding indebtedness of the company. What this is, is indicated by the figures in the annual statement of the company at the close of last year, when the following items appeared: Notes at banks, $2,560,000; accounts payable, $563,501; due to the city, $146,395; taxes to city and province, $530,716; other liabilities, $210,585; bond interest, due January 1st, $125,000.

The outstanding common stock, debenture stock and bonds of the company at the close of last year, were set forth as follows: Common stock, $9,000,000; debenture stock, $4,380,000; bonded debt, etc., $5,750,000. It was also shown that the company had outstanding gold notes of $750,000, due on January 15th next, which are not a part of the current obligation, for which provision must be made in the issue of the new preference shares.

Port Arthur Shipbuilding Company.—Further particulars of the company's operations for the year ended June 30th, 1920, have come to hand, and, as the company was one of these companies originally included in the British Empire Steel Corporation, but was finally excluded, it is interesting to indulge in more detail. The company experienced a reduction in gross earnings from $517,563 to $301,214, due to a decrease in volume of business. The falling off in work has been in ships for new construction, business from drydock and repair work being very satisfactory, showing an increase of 80 per cent. over last year. A falling off in the building of ships has been general, affecting all the shipyards in Canada. The chief causes have been the international exchange situation, which has operated against Canadian yards securing contracts from European countries requiring tonnage and the cessation of building by the Canadian government.

Of ships, construction of which was commenced last year, the company completed and delivered four freight steamships of 3,100 dead weight tons each and launched two freight steamships of approximately 4,500 dead weight tons each, which were completed and delivered, one in September and one in October. All of these ships are for the Canadian government merchant marine fleet. New ship construction commenced this period consists of one freight steamship of approximately 4,000 dead weight tons for the Canadian government and one freight steamship of about 3,000 dead weight tons.

The report also says: "In view of the present situation in regard to ship construction, your directors have deemed it advisable to authorize the company to enter upon other work than shipbuilding to which your plant is adaptable. Work has already been commenced upon a contract for twenty compressed-air mine shovels for one company, and negotiations with other companies requiring this class of machine have advanced to a point where other contracts seem assured. The undertaking of other suitable work, including the manufacture of pulp machinery and digesters, is also contemplated. If nothing unforeseen arises to interfere with plans at present under consideration, which appear, as far as investigation has gone, to be entirely feasible, developments along these lines may, within a short time, result in an amount of business equal to, if not greater, than the falling off in new construction, and this at very small additional capital expenditure." In regard to the manufacture of pulp and paper machinery, the company's policy was outlined in these columns a few weeks ago.

During the year the company redeemed $126,500 par value of preferred stock and retired $60,000 par value of mortgage bonds. Capital expendtiures made this year have been for ordinary additions and betterments only, including the installation of some improved machinery, and amounted to $94,846. A recent appraisal of the company's permanent assets, book value of which is $2,091,522, shows the present net cash value to be $3,250,000.

A comparison of the balance sheet discloses some interesting changes:—

	1920.	1919.
Total assets	$5,982,162	$6,154,902
Cash, accounts receivable and merchandise inventory	1,088,960	930,963
Construction work in progress	1,974,027	1,952,698
Land, buildings, etc.	2,091,522	2,203,618
Victory bonds	......	235,131
Total liabilities	5,001,741	5,360,847
Surplus	980,421	794,055
Acceptances, accounts payable and accrued	166,274	316,107
Advances on construction contracts	1,801,910	1,921,025
Bonded debt	450,000	510,000
Preferred stock	665,200	791,700

Dominion Park Company, Ltd.—Gross earnings of the company for the year ended October 31st, 1920, amounted

DIVIDEND NOTICES

BANK OF MONTREAL

Notice is hereby given that a Dividend of Three Per Cent. upon the paid-up Capital Stock of this Institution has been declared for the current quarter, payable on and after Wednesday, the First Day of December next, to shareholders of record of 31st October, 1920. Also a Bonus of Two Per Cent. for the year ending 31st October, 1920.

By order of the Board.
FREDERICK WILLIAMS-TAYLOR,
General Manager.
Montreal, 19th October, 1920. 262

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 135

Notice is hereby given that a dividend of Three per cent. upon the capital stock of this Bank, being at the rate of twelve per cent. per annum, has been declared for the quarter ending 30th November next, together with a bonus of one per cent., and that the same will be payable at the Bank and its Branches on and after Wednesday, 1st December, 1920. The Transfer Books of the Bank will be closed from the 16th November to 30th November next, both days inclusive.

By Order of the Board,
JOHN AIRD,
General Manager.
Toronto, 15th October, 1920. 260

THE OGILVIE FLOUR MILLS COMPANY, LIMITED

DIVIDEND NOTICE

Notice is hereby given that a quarterly dividend of one and three-quarters per cent. has been declared on the Preferred Stock of the Ogilvie Flour Mills Company, Limited, payable Wednesday, the first day of December, 1920, to Shareholders of record at the close of business Monday, the twenty-second day of November, 1920.

By Order of the Board.
G. A. MORRIS,
Secretary-Treasurer.
Montreal, November 11, 1920. 290

DIVIDEND NOTICE

CANADIAN GENERAL ELECTRIC CO., LIMITED

COMMON STOCK DIVIDEND NO. 86

Notice is hereby given that a Quarterly Dividend of two per cent. for the three months ending the thirty-first day of December, 1920, being at the rate of eight per cent. per annum, has been declared on the Common Stock of the Company.

The above Dividend is payable on and after the first day of January, 1921, to Shareholders of record at the close of business on the fifteenth day of December, 1920.

By Order of the Board.
W. H. NESBITT,
Secretary.
Toronto, November 15, 1920. 291

DEBENTURES FOR SALE

DEBENTURES FOR SALE

TOWN OF PEMBROKE

Tenders will be received by the undersigned, marked "Tenders for Debentures" on the outside, up to 3 p.m., Wednesday, November 24th, 1920, for the following:—

$33,000.00 General Debentures, ten-year, instalment, with interest at six (6) per cent. Principal and interest payable the First day of December in each year at the Bank of Nova Scotia, Pembroke.

$14,000.00 Public School Debentures, thirty-year, instalment, with interest at six (6) per cent. Principal and interest payable on the 30th day of October in each year at the Bank of Nova Scotia, Pembroke.

The highest or any tender not necessarily accepted.

S. L. BIGGS,
286 Clerk-Treasurer.

OLDFIELD, KIRBY & GARDNER
INVESTMENT BROKERS

INVESTMENT CORPORATION OF CANADA, LTD.
London Office: 4 Great Winchester St., E.C.

to $341,054, an increase of $42,624 over the previous period. Operating costs during the season, however, were in excess of those of last year, the 1920 total of $294,786 exceeding that of 1919 by upwards of $57,000. After all deductions, including bond interest and provision for income tax, there remained a balance of $37,900 to add to surplus account, which, after the payment of the usual 6 per cent. dividend, was increased to $210,083, as at October 31st last, compared with $196,064 at the end of the former twelve-monthly period.

The balance sheet portion of the statement shows that the company's financial position has been strengthened in order to provide for the retiring at maturity at the end of the current year the $74,000 bonds presently outstanding. During the period covered by the report under review some $7,000 of these were retired, reducing the amount outstanding to the figure already noted. "This," says the president, J. Herbert Redpath, referring to the retiring of the balance, "will do away with all fixed charges for the future and leave the company's property entirely in the hands of the shareholders."

In making provision for this development, government war loan bonds held by the company were reduced from $67,015 a year ago to $20,140 at the end of October, this reduction being accompanied by an increase of nearly $36,000 in cash assets.

Watt and Watt, members of the Montreal and Toronto Stock Exchanges, have moved their Toronto office to 6 and 8 Jordan St.

The Ontario government has received a cheque from the International Nickel Co. for $504,000. It is for this year's taxes and arrears of 1918 and 1919, about which there was a dispute, the courts deciding in favor of the province.

RECENT FIRES

Adams Bros., Winnipeg, Had a Loss of $400,000—Robinson Ice Cream Co., Hamilton, and St. Anne's Parish Hall, Quebec, Were Heavy Losses

Bancroft, Ont.—November 16—The town hall was destroyed by fire. The loss is covered by insurance.

Belleville, Ont.—November 16—Fire, which started in the Palace Theatre on Front Street, damaged several adjoining buildings. The loss is estimated at $25,000.

Bridgeburg, Ont.—November 16—Store of Peter Grueff, located at the shipyards, was destroyed by fire. The loss is estimated at $9,000.

Fairbank, Ont.—November 9—The lumber yard of Ashforth Pedwell was destroyed, resulting in a loss of $50,000, covered by insurance to the extent of $30,000.

Gladstone, Man.—November 23—A theatre and a photographic studio were damaged by fire. The loss is $10,000.

Hamilton, Ont.—November 13—Sparks from machinery did $150,000 damage to the two-story brick plant of the Robinson Ice Cream Co. on McNab Street North. Insurance of $50,000 was carried.

Kincardine, Ont.—November 12—The evaporator at the corner of Huron Terrace and Harbor Street, later spreading to the Royal Hotel. The total loss is $20,000.

Montreal, Que.—November 10—The one-story frame building of Cohen Bros., bottle exchange, 109 St. Timothee Street, was partially destroyed by fire.

Ottawa, Ont.—November 15—St. Anne's Parish Hall was totally destroyed by fire. The loss is estimated at $150,000, and is partly covered by insurance.

Quyon, Que.—November 15—Boland store on Main Street was destroyed by fire. The fire is believed to have been due to an overheated stovepipe. The loss is estimated at $6,000.

Richmond, Ont.—November 11—Chopping mill, owned by Clayton and Godbey, was damaged to the extent of $8,000.

St. Johns, Nfld.—November 15—The store occupied by Simon Levitz, on Water Street, was destroyed by fire. The contents were valued at $38,000, and the insurance of $18,000 was in the following companies: Hartford, National and Acadia.

St. Lambert, Que.—November 10—St. Lambert police and fire station were destroyed by fire, which is thought to be incendiary. The damage is estimated at $20,000.

Sudbury, Ont.—November 9—About $17,000 damage was done by fire which totally destroyed Bargnesi's butcher shop and the private residence of Paul Gravelle on Regent Street. The loss is partially covered by insurance.

Toronto, Ont.—November 15—Barns of Miss Cochrane, York township, containing the season's crop and twenty-four head of cattle and three horses, were destroyed by fire.

Warsaw, Ont.—November 17—A frame house, belonging to Mrs. Andrew Lerush, of Lakeside, was destroyed by fire.

Winnipeg, Man.—November 10—The leather goods warehouse of Adams Bros, on Market Street, was damaged to the extent of $400,000. The loss is entirely covered by insurance.

November 13—Fire is reported to have done $15,000 damage to the Anthes Foundry, Saskatchewan Avenue. An overheated pipe in the dipping-room of the plant is believed to have been the cause.

ADDITIONAL INFORMATION CONCERNING FIRES

Brandon, Man.—October 29—The winter fair buildings, occupied by the Canadian Mounted Police, suffered a loss of $80,000, with insurance of $97,500. The cause of the fire is not known.

Hamilton, Ont.—October 18—A building occupied by the Hamilton Lamp Co., 144 York Street, was damaged by fire. The damage to the building was $4,210 and $2,214 to the contents. The insurance of $8,500 on building was in the following companies: Commercial Union, Atlas, North British and Mercantile. The insurance on contents was $15,000 in the Atlas, Scottish Union, Acadia, Fidelity, Phœnix, British Colonial and London Guarantee. The cause of the fire is unknown. The damage to the H. O. Co., York Street, is $2,000, with insurance on stock and machinery in the following companies: Economical, $2,500; Gore, $1,500; Commercial Union, $3,500; Perth, $1,500; Merchants, $1,500; Atlas, $4,000; St. Paul, $1,500; Fidelity-Phenix, $2,000; Acadia, $1,000; St. Lawrence, $1,000; North British Mercantile, $5,000; Commercial Union, $4,000; Globe Indemnity, $1,000; Commercial Union, $1,250; British America, $2,450; Gore, $1,000; St. Paul, $1,000; London Guarantee, $2,500. Total, $38,200.

The McClary Manufacturing Co. had $61,000 of insurance on building and stock in the Fidelity Underwriters.

Manitoba.—During the month of September there were 124 fires reported. The loss from these fires was $133,849, with insurance of 436,417. The following were the class of structure damaged: Dwellings 33, farm buildings 42, apartment buildings 4, hotels 3, stores 2, and garage 1. The causes were: Lightning 26, smoking 16, chimneys 12, matches 10, bush fires 9, spontaneous combustion 3.

Quebec, Que.—November 5—The building at the corner of St. Valier and St. Germain Street suffered a loss of $1,200, with insurance of $3,500. The cause of the fire is unknown.

Tillsonburg, Ont.—October 13—The oatmeal mill and elevator of the Canadian Cereal and Flour Mills. Co., Ltd., was destroyed by fire. The loss is $120,000 with insurance on building as follows:—

Queen, $8,291; Strathcona, $2,500; Norwich Union, $1,645; Millers and Manufacturing, $20,500; Hand-in-Hand, $20,500; Wellington, $5,000; Commercial Union, $5,000; Mercantile, $15,000; Continental, $5,000; Norwich Union, $5,000; Ocean, $13,895; Norwich Union, $5,000; London Mutual, $8,000; London Guarantee, $5,000; London Lloyds, $65,000; Continental, $4,000; L. L. and Globe, $15,000; Guardian, $10,000; Royal, $8,921; Employers Liability, $8,865; St. Lawrence Underwriters, $2,959; Royal, $9,883; London Assurance, $7,116. Total, $251,449.

The stock was insured in the following companies:—

Guardian, $10,000; Imperial Underwriters, $10,000; Globe Rutgers, $5,000; Occidental, $2,500; Monarch, $5,000; Strathcona, $2,500; London Guarantee, $5,000; Nationale, $2,000; Mount Royal, $8,000; N. B. and Mercantile, $10,000; London Assurance, $5,000; Mount Royal, $7,500; Hand-in-Hand, $15,000; Nationale, $2,000; Commercial Union, $17,500; L. L. and Globe, $15,000; N. B. and Mercantile, $5,000; Pacific Coast, $2,500; Century, $2,500; Hand-in-Hand, $5,000; Royal, $10,000; Employers Liability, $2,500; Continental, $5,000; Royal, $10,000; Royal, $7,500; Hudson Bay, $10,000; London Guarantee, $5,000; North Empire, $10,000; British Colonial, $10,000; Strathcona, $5,000; North Empire, $5,000; Guardian, $5,000; Occidental, $5,000; Queensland, $15,000; Monarch, $2,500; Globe Rutgers, $10,000; L. L. and Globe, $5,000; London Assurance, $5,000; Guardian, $15,000; North America, $19,000; Globe Rutgers, $5,000. Total, $303,500.

Toronto, Ont.—November 1—Building and contents belonging to S. F. Bowser Co., Ltd., was destroyed by fire. The fire was caused by short-circuit extension drop-light. The loss is $3,000, with insurance in the following companies on the building and contents: London and Lancashire, $20,000; Norwich, $20,000; Western, $20,000; Ætna, $20,000; Home, $20,000; British American, $20,000; Employers, $20,000; Sun, $40,000; Hartford, $20,000; Boston Manufacturers Mutual, $70,000; Arkwright, $60,000; Paper Mill, $10,000; Worcester Manufacturers, $20,000; Fall River Manufacturers, $20,000; Fireman's, $20,000. Total, $400,000.

Vancouver, B.C.—The chief of the fire department of Vancouver states that during the month of October there were 66 alarms. The total loss was $18,600, of which amount $17,655 was covered by insurance. The following shows the cause of fires: Bush fires 2, chimney fires 20, defective chimneys 2, electrical origin 4, incendiary 1, spontaneous combustion 1.

Supporting Foreign Agents of Manufacturers

Provisional Contract With Agent Should Give Sufficient Time to Show Results—Some Considerations in Framing a Long-Term Contract—Quotations Should be Cost, Insurance and Freight—Longer Term of Settlement Required—Foreign Business Too Often Sacrificed to Fill Domestic Orders

By COL. C. R. HILL
Managing Director, Hill and Co., Ltd., Toronto

(This is the third of a series of articles on Practical Exporting, the first of which was published in The Monetary Times of November 12, 1920)

ASSUMING that the Canadian manufacturer has definitely decided to give a foreign agent an opportunity to represent him in the agent's local territory, there are many things to be considered by him before he can feel that he has offered his products in that territory on a satisfactory basis.

Contracts

From the manufacturer's standpoint, the question of making and signing an agency contract is of no less importance than to the agent himself. In the first place, any contract should be on a term basis to give the agent the protection he requires, but the first contract should be a provisional one, terminable in a given time if sales results are not forthcoming. It is suggested that a minimum of six months and a maximum of twelve should be the time limit for the original provisional contract. Such time limit should be from the date the agent is actually in possession of samples, prices, catalogues, discounts and all the data necessary for him to commence a sales campaign. Otherwise, a considerable part of the time limit may be consumed in getting the "munitions of war" on the ground.

In considering the time limit, thought should be given to the sales season in the agent's country. For instance, if samples of straw hats arrive late in the spring the agent cannot be expected to book orders until buying commences for the second following summer.

The justification for a long-term exclusive contract is obviously governed by sales made during the short-term provisional contract. Just what such sales might be can only be decided upon by the manufacturer when he studies the agent's reports, the competition and the population of the country. Furthermore, the first six to twelve months' work on the part of the agent is largely of the missionary type, and even a few trial orders in that period will correspond very favorably with big orders three years later.

Provision for Long-Term Contract

Assuming that the manufacturer approves of a certain agent, the long-term contract should embody various clauses for the agent's protection, a few of which are suggested:—

(a) One clause should state the term of the contract, preferably irrevocable for three years, except by mutual consent, with the additional provision that it be automatically continued for two-year periods, provided that annual sales for a specified amount result. Such a clause justifies the agent in organizing his territory, employing sales staff, advertising, etc.

(b) Another clause should state that all enquiries from the agent's territory will be referred to him, and that he will be protected on commissions on all sales made to his territory, regardless of any orders that may be received direct from buyers.

(c) Another clause should specify to what extent the manufacturer is prepared to supply free samples and literature to the agent or his customers, and how much the manufacturer will contribute towards advertising expenses.

(d) Another clause which the agent should be entitled to is payment of part-commissions on bona fide orders from A1 buyers, but which for several reasons (not the fault of the agent or of the manufacturer's factory troubles) cannot be filled. From the manufacturer's standpoint, this is undoubtedly a penalty clause, but as long as he leaves the impression with the agent that he can fill orders, the agent continues to spend time and money to obtain them, and is entitled to at least part of his remuneration.

The Export Manager's Work

No manufacturer of small articles would think of sending out salesmen who were not equipped with samples, price lists and order forms. If he has catalogues, these are also provided to customers, but the same equipment for an Ontario salesman will not do for the South African agent, and it is the duty of the export manager to prepare the literature for his foreign agents in such a way as to meet the requirements at Cape Town, Havre, Calcutta or Yokohama, as the case may be.

Probably the most important thing required by a foreign agent is prices made up, c.i.f. at his nearest ocean port. It will be readily appreciated that a factory price at an inland Canadian town means nothing at all to a buyer in Paris, France. The agent naturally studies the subject of ocean rates, but knows nothing of Canadian railway rates, and, at the best, can only give very approximate quotations to his prospective customers, with the result that he wastes his time. The Parisian buyer immediately tells him that his English, American and other competitors quote delivered prices at French ports, and until he is prepared to do the same he need not call. The points to be considered in making up delivered prices at foreign ports will be taken up in a later article of this series, with ample illustrations.

Longer Term for Settlement

The next point with regard to prices is the question of terms of settlement. Just as the manufacturer quotes a discount for 30 days and higher for 10 days' payment on domestic sales, so he must consider longer term settlements to get into foreign markets in competition with his English and American brethren. In nearly all distant markets the buying terms are anywhere from 60 days to 120 days after sight, but the general rule is 90 days. Therefore, the export price list should take into consideration "loss of interest." This is easily adjusted by adding 2 per cent. to the prices which would otherwise be figured for a domestic basis. The manufacturer is, of course, not out his cash for 90 days on his export business, as he always draws immediately against his customer, with documents attached, and requests his bank to discount the draft.

The next thing the manufacturer should consider is the generous provision to the agent of samples and literature. It is only an aggravation to an agent 4,000 miles from the factory to receive inadequate supplies. It is perhaps better not to send one large consignment to him and wait six months before submitting another. The transportation risks are such that continual small lots are more likely to fill the requirements.

Another thing that helps the agent financially and morally is to have the manufacturer advertise at the latter's expense and, of course, include the agent's name and address in the advertising. As a matter of policy it will always be preferable to leave the advertising policy in the hands of the agent for his own territory and simply specify the extent of expense which the manufacturer is prepared to meet.

Foreign Orders Must Have Equal Treatment

The last and not least important duty of the manufacturer is to promptly and satisfactorily fill the foreign orders as the agent sends them in. The natural tendency of a manufacturer is to give preference to his domestic orders and to neglect overseas orders when Canadian business is brisk enough to take care of his output. It is easy enough to find good excuses for this practice, but it is a very short-sighted policy. First, because domestic business has its ups and downs, and during the "downs" the export business helps to keep a plant in full operation. Second, because foreign buyers will not consent to play second fiddle and be given their supplies erratically. Third, because the foreign agent has a claim on the manufacturer for active support in building up the trade in his territory. Great Britain is "great" because the manufacturers there set aside a proportion of their output for export business and for centuries have stuck to that policy.

It has been stated that the manufacturer should fill export orders "satisfactorily" as well as promptly. This means,

(a) Accurate preparation of export documents;
(b) Packing and marking;
(c) Shipping according to order.

Care Regarding Details

The export manager will learn some details as to the preparation of export documents in a later article, while the importance of packing and marking will also receive special attention in detail. In this article we will, therefore, only mention the importance of shipping "according to order." It is not pleasant to criticize one's neighbors or business rivals. However, our American neighbors will not object to one's drawing attention to the very severe criticism published occasionally in the States by Americans who have returned from abroad on the subject of American manufacturers filling export orders on a very liberal interpretation to suit themselves. For instance, an order for brown serge may have a blue serge of the same weight and texture substituted in good faith, but blue may be an unsaleable color in the country receiving it. Again, an order from Peru may specify that packages must not exceed 100 lbs. The manufacturer may consider this an unnecessary waste of labor and material, but the buyer probably has his ultimate market in the mountains accessible only by mule loads. Therefore, a manufacturer must trust the buyer to know what he wants and how he wants it, and fill his orders in that spirit.

Codes

There are many excellent codes published, but none of them help abbreviations in ordering specific articles by cable when the products are constantly changing as in textiles, or are almost infinite in their variety as in hardware. It is going to help the foreign agent considerably, therefore, if the export manager will provide each article and each variety of such article with a private code word of five letters when he originally offers it on the export market. There is not much work in this, nor does it require any great strain on the imagination. Words with three vowels and two consonants are best. For instance, in submitting a line of four different kinds of overalls, each with four sizes, sixteen code words are wanted and can start BACED, CIDOF, DUFAG, and so on, using the vowels and consonants in rotating order. The merit of using five letters is, of course, to meet the cable charges which allow ten letters to one word. Besides economy, such words work in well with the five latter codes such as Bentley's and the new Western Union.

FRATERNAL SOCIETIES' ONTARIO BUSINESS DECREASED

Assets in Ontario Grew Almost $2,000,000 in 1919, However —Comparison of Two Years' Business

THE amount of friendly societies' business in Ontario at the end of 1919 was $137,677,643, compared with $139,369,363 at the end of 1918. In comparison with the figures as at December 31, 1918, the report of the Ontario Registrar of Friendly Societies for 1919 which has just been issued, shows the following:—

	Dec. 31, 1918	Dec. 31, 1919
Total membership in Ontario	230,023	172,111
Amt. of ins. in force in Ont.	$ 139,369,363	$ 137,677,643
No. of cert. in force anywhere	861,278	862,182
Amt. ins. in force anywhere	$1,021,501,203	$1,016,014,619
No. claims matured in Ontario	2,748	2,286
Amt. ins. benefits paid in Ont.	$ 2,589,567	$ 2,518,536
Amt. disability benefits paid in Ont. including pensions and gratuties	$ 169,778	$ 151,919
Assets in Ontario	$ 18,481,738	$ 20,236,236
Liabilities in Ontario	$ 545,936	$ 399,553
Total assets anywhere	$ 58,270,140	$ 59,958,458
Total liabilities anywhere ...	$ 4,955,440	$ 3,191,901

The totals of sick and funeral benefits, compared with last year, are as follows:—

	Dec. 31, 1918	Dec. 31, 1919
Number of members	173,625	183,596
Deaths during year	4,097	3,087
Amount paid for funeral benefits .	$ 204,773	$ 184,206
Number of members sick	34,992	32,126
Number of weeks sickness	171,974	166,789
Amount paid for sick benefits	$ 705,835	$ 698,334
Amount paid for medical attendance	$ 93,540	$ 103,624
Amount paid for special relief	$ 44,334	$ 36,265
Assets	$3,979,788	$4,300,787
Liabilities	$ 120,904	$ 103,600

In presenting his report Superintendent Gray says:—

"Before the war friendly societies were in a transition stage, both in regard to membership and financial status. An uncertainty in the public mind as to the permanency of the basis on which the insurance structure of the societies rested resulted in an annual decrease in the number of new members secured. Then the war and the influenza epidemics added disturbing influences. Some of the societies have met the situation by a readjustment of their rates, which placed the insurance fund on a basis actuarially sound, and these are now on the clear road to a development which will render a larger and better service than ever before. Others, however, have failed to meet the demands of their situation, and for them the future is still uncertain.

"It should be said that the executive officers of the societies, almost without exception, have realized for some years the necessity of a readjustment of their insurance structure and the fact that postponement of the process merely added to existing difficulties. But in those instances where readjustments were defeated the general and controlling membership, having in mind the apparent present prosperity of their orders, have been willing to gamble on the present assets outlasting their individual need for protection, and they refuse to see the liabilities of the order mounting to the point of danger to all. Putting the case bluntly, the organized selfishness of the general membership has been willing to sacrifice the future of the order and the protection of new members to serve its own immediate purposes. This force has overpowered the leadership which the executives endeavored to give.

"This situation made necessary the intervention of the legislature for the protection of new and prospective members and of the public generally.

Ontario Law Rendered Ineffective

"In 1916 an amendment to the Ontario Insurance Act prescribed a compulsory valuation of outstanding insurance certificates of all societies as of the 31st December, 1917, to be followed by a series of triennial valuations of the insurance certificates. Provision was made for action by the department if any society failed to maintain its financial position from valuation to valuation. These amendments are contained in chapter 36 of the statutes of 1916.

"Unfortunately, the addition of section 78 (*i*) has rendered entirely ineffective whatever virtue was contained in the preceding sections providing for action by the department by making their application contingent on the voluntary adoption of these provisions by the society before a fixed date. No society adopted the prescription of the legislative physician. The second of these valuations, made as of 31st December, 1920, will be due on or before the 30th June, 1921, and as the law now stands the department will be powerless to take any action, whatever condition may be disclosed by the valuations.

"In order that this situation may be met both in the interests of the societies and of the public, and in order that friendly societies generally may regain a large measure of public confidence and prospective members be properly safeguarded in insuring therein, it is desirable that the Insurance Act be further amended, first, to make provision for more effective valuations and reports of financial status than at present exist; and second, to prescribe regulations by which all registered friendly societies will attain full actuarial solvency within a reasonable time. The leaders of friendly societies generally recognize the necessity of this course of action, and, it is believed, will co-operate in securing it.

Separation of Insurance Funds

"Attention of the societies and of the public requires to be drawn to a condition which now exists in some societies reporting to this department. Where it has proved impossible to effect immediate readjustments of rates to an approved actuarial basis some societies have adopted new rates applicable to new members joining after a fixed date and to old members voluntarily transferring to the new class. These rates are represented to the new members to be 'adequate rates.' In some cases, however, it has not been made clear either in the constitution or practice of the society whether the funds received from the new members are to be preserved for the absolute protection of the new members or not. In some cases new members may be misled into believing that by the differentiation in rates their position is being made secure as against the claims of old or other members, when, in fact, they are only contributing to a general insurance fund which possibly may not meet all the claims which will accrue against it under a continuation of the same policy. All societies which charge different rates to different classes of members must examine their rules and practice to make certain that the protection afforded to different classes is in accord with their representations to, and the understanding of, new and prospective members.

Foreign Friendly Societies

"In 1919, an act was passed by parliament in amendment to the Dominion Insurance Act, which made special provision for fraternal societies and their attaining actuarial solvency. In this connection the legislation will be a valuable precedent for Ontario. An incident, however, of this act, which had a far-reaching effect, was that fraternal

TABLE I.—LIFE INSURANCE OR BENEFITS IN THE NATURE THEREOF.

societies were made subject to the general provisions of the Dominion act affecting 'companies.' This includes, among others, section 11, which provides that:—

"11. It shall not be lawful for
- (*a*) Any Canadian company; or
- (*b*) Any alien, whether a naturalized person or a foreign company within Canada, to solicit or accept any risk or to insure or deliver any receipt or policy of insurance, etc., . . . unless under a license from the minister granted pursuant to the provisions of this Act.

"The effect of this has been to require foreign friendly societies formerly licensed by Ontario to secure a license from the Dominion Department of Insurance, whether their operations were to be carried on throughout the Dominion or in Ontario only. In pursuance of this provision, the Maccabees, the Knights of Pythias, and the Royal Arcanum have surrendered their Ontario licenses and, having obtained a license at Ottawa, are now registered in Ontario as Dominion licensees."

SASKATCHEWAN'S DEBT THIRTY-EIGHT MILLIONS

SASKATCHEWAN'S debt at the end of April was $38,000,000, leaving a surplus of $37,614,037 of assets over liabilities, according to the public accounts for the year ended April 30, 1920. This debt includes treasury bills and farm loan debentures outstanding. It does not include the contingent liabilities, chiefly railway guarantees, amounting to $32,955,355.

The statement of revenue and expenditure for the year is as follows:—

REVENUE

Balance brought forward from 1918-19		$ 1,640,932
Dominion subsidy	$1,753,075	
School lands (revenue other than principal moneys)	901,764	
Treasury	3,475,723

AUTOMOBILE UNDERWRITERS MEET IN OTTAWA

Motor Union May Join Association—Statistics of Canadian Municipalities—Double Income Tax Assessments Explained

(Staff Correspondence.)

Ottawa, Nov. 25, 1920.

THE annual meeting of the Canadian Automobile Underwriters' Association is being held here to-day, the executive council having held a meeting yesterday. John B. Laidlaw, president, is in the chair. Frederick Williams, manager for Canada of the Motor Union Insurance Co., Ltd., which company is not a member of the Automobile Underwriters' Association, was present and outlined a plan for regulating this business in Canada. There was, he said, in an interview with *The Monetary Times*, a likelihood of his company linking up with the association if a common ground could be obtained.

Municipal Statistics Prepared

The Dominion Bureau of Statistics has completed some figures for the fifty-three cities of Canada having a population of 10,000 or over for the year 1919, showing area, population, debt, assets, revenue, expenditure, and the extent of the waterworks, police and fire protection systems. These figures are to be published shortly in pamphlet form. J. R. Munro, head of the financial division of the Bureau, said, in an interview with *The Monetary Times*, that a more condensed summary of this kind may be issued annually in future if it was thought to be of sufficient value.

Soldier Settlers Repaying Loans

More than one million dollars has been received in repayments of loans made by the Soldier Settlement Board, according to interim reports from branch offices of the board throughout the Dominion, and the expectations that this figure will be considerably exceeded. It is announced that war veterans placed on farm land in Ontario under the Soldier Settlement Board have made payments of principal and interest due November 1 amounting to $220,772. The amount due on that date was $222,675. Seventy per cent. of the 1,148 soldier-farmers, whose payments were due, promptly met their obligations, amounting to $125,045, and the balance was made up by eighty-five settlers, who paid off their entire loans, or a considerable portion of them, in advance. These figures are as of November 14.

Income Assessment

Officials of the Dominion Taxation Office have issued an explanation of how it happened that some people apparently were called upon to pay two income tax assessments. Delay in the making of assessments for two separate years made the paying of the tax, in some cases, come closely together. The explanation issued is as follows:—

"The first assessments for Dominion Income Tax for the year 1918 were made in November, 1919. The making of assessments for 1918 continued through December, 1919, and the early months of 1920, some assessments being paid in April, 1920. In many cases investigation to obtain income returns of persons who should have filed returns in March, 1919, occasioned delay in getting the assessments issued. Assessments for the year 1919 are now being made, and some persons who paid the 1918 tax in April, 1920, may be required to pay 1919 now. Returns for the year 1920 are required to be made on or before April 30, 1921, and with the return 25 per cent. of the tax due thereon."

Canadian pulp and paper exports during October reached a total value of $16,706,005, compared with $11,863,578 for the corresponding month last year, a gain of $4,842,427. The countries of destination were: Paper—United Kingdom, $408,182; United States, $6,167,488; other countries, $1,552,284. Pulp—United Kingdom, $583,343; United States, $7,447,528; other countries, $546,880.

THE CAMPAIGN IN THE WEST

JUDGING by the movements of our national party leaders, the political centre of gravity of Canada is now in the west. Moreover, the main issue seems to be the tariff, which not so long ago was to be taken out of politics. The fact that the tariff is the main issue is probably the explanation of the attention which is being received by the west, for it is felt that the attitude of the latter will to an important degree determine public opinion on this national issue. If the west remains firm in its belief in free trade or a lower tariff, some reductions can scarcely be avoided. On the other hand, if it can be won over to the premier's cause of "moderate" protection, a high tariff may be expected for many years to come.

Premier Meighen returned to Ottawa on November 21 after a rapid and successful campaign in the west. In thirty days he addressed thirty meetings attended by 75,000 electors, covering five provinces and traversing 8,000 miles. The response to his appeal was greater than had been expected. Hon. MacKenzie King, leader of the Liberal party, preceded the premier, and Hon. T. A. Crerar, leader of the Progressive party, has also been speaking at various points in the west. Mr. Crerar's views are well known, however, embodying as they do the main planks for which the west stands, and while he always receives an enthusiastic reception, there was more interest evinced in the premier's meetings. The Liberal leader's attitude is not so clearly understood, and he has always to combat the prejudice due to the failure of the Liberal government returned in 1896 to bring about a substantial tariff reduction at that time. Larger audiences turned out to hear the premier in Winnipeg, Calgary, Moose Jaw and other places than had attended the meetings of the Liberal leader.

The government has unquestionably gained strength as a result of the premier's tour. The loss of a seat at a by-election in Ontario is offset by their success at a by-election in British Columbia. The relative positions of the parties is still a matter of uncertainty, however, which is increased by the fundamental changes which are taking place in the industries of the country at the present time. The fall in prices and the accompanying depression in business may in fact save the government from a difficult situation on the tariff issue, for this situation would be accentuated by any reduction in the customs duties. A movement for lower tariff and a consequent reduction in the prices of imported goods was bound to meet with some favor in a time of activity and rising prices. Now, however, the difficulty is to maintain business in the face of falling prices, and the question of employment has supplanted the cost of living in respect of political possibilities. When parliament meets about January 20, however, the tariff will no doubt be one of the leading subjects for discussion, although it is not expected that there will be a large program of other financial legislation.

THE LIFE COMPANIES' EXPERIENCE

LIFE insurance companies are writing more new business this year than ever before. One leading agency wrote more business in the first two weeks of November than in any two weeks previously. This is an encouraging sign, in the face of uncertain employment and wages. Nevertheless it must be noted that the rate of increase has fallen off. There are a few companies, in fact, which will have difficulty in writing more business this year than in 1919.

Last year's growth was of course exceptional. The gross new business issued and paid for in cash in Canada amounted to $524,543,629, as compared with $313,251,556 in 1918. The net death claims incurred amounted to $16,927,345, of which $785,331 or 4.64 per cent. was due to war and $2,995,228 or 17.69 per cent. to the influenza epidemic in the early part of the year. The death rate among insured lives during 1919 is computed at 8.3 per thousand, rather lower than the 8.6 of 1914. During the last six years, 1918 had the highest death rate—14.1 per thousand.

The income of the Canadian life companies in 1919 was $88,631,182 and their disbursements $60,947,459. Out of every $100 income there was expended in disbursements in respect of assurance and annuity contracts, $43.41; in general expenses, $22.67; in taxes, $1.24; in dividends to shareholders, 63 cents; otherwise, 82 cents, leaving $31.23 to be carried to reserve.

Net amount of risks in force increased during the year from $1,394,823,308 to $1,712,062,023, and the reserves have increased from $291,035,397 in 1918 to $321,027,592 in 1919.

THE FALLING PRICE OF WHEAT

EFFORTS of the organized farmers to maintain the price of wheat at a high level are foredoomed to failure. It is not likely that any one commodity, and least of all one for which there is such a wide market as there is for wheat, can be manipulated by the producers in this way. Only a fraction of the farmers on this continent are organized, and even if these could agree to hold up the supply, there would be some who would by force of financial circumstances be obliged to realize on their product. It is probable that the farmers of Canada, who have so strongly urged that natural forces be permitted to fix the price of all classes of goods in this country, will quickly realize the futility of any attempt of this kind.

The farmers were among the first to benefit by the rising price movement. There is nothing unusual, therefore, in the fact that the prices of farm produce have been among the first to fall. The rapidity of the downward movement has, however, been somewhat startling. Prices of a few classes of farm produce during the past few months reached their 1914 level. This means that the income of the farmer is greatly reduced, while he must still pay the high prices for the manufactured goods he buys. These in return will come down, but in the meantime the farmer is in the position in which the city worker found himself during the past few years, when the price of goods was going up much more quickly than were his earnings. The high level of income and prosperity established in the country through war conditions was only a temporary condition, but it is likely that many farmers thought it represented a real forward movement on the part of the rural section.

It will be a long time yet ere average prices reach the 1914 level. Until recently it was a common remark that they could never do so, but the rapidity of the fall during the past few months has removed this confidence in higher prices as a permanent condition. It is probable that the spectacular movements in some lines will be followed by similar changes in other lines, constituting a fairly steady decline in average prices.

ASSESSMENT EXEMPTIONS STILL INCREASING

ONE of the main causes of municipalities' financial difficulties is the freedom with which exemption from assessment has been granted to industrial, religious and educational institutions. While all cities have a substantial exemption list, Montreal is the most conspicuous example because of the great amount of property owned by religious corporations in that city. Assessments which have just been completed for that city show a gross total of $889,544,067, from which the immense sum of $225,190,483 is to be deducted for exemptions, leaving a net assessment of $664,353,584. The amount exempted is greater than the previous year by $676,612.

There are, of course, always arguments which can be presented for exemption of properties such as the above. The plea of public service is one which can readily be advanced. But the public service of the industry, the school or the church does not compare with the public service of the taxpayer, who must meet the shortcomings of institutions which are not self-supporting because they do not pay their share of the cost of running a city. Municipal finance would be sounder and municipal taxation would be more equitable if there were no exemptions of private property whatever the purpose to which it is applied. There are none of these institutions which are not private in the sense that they serve a special class, which consequently benefits by the amount of taxes from which the property is exempted. The patrons of a municipal waterworks, electric light or street railway service have just as good a claim to the free use of these works as have the owners of property to the free use of the numerous facilities for which no fee is exacted from the consumer.

CENTRAL RAILWAY METHODS CRITICIZED

Deliberate tampering with books, and juggling of accounts, was found by Dr. Charles Morse, registrar of the Exchequer Court, in his examination of the affairs of the Central Railway Company of Canada. Claims filed against the defendant company amounted to something like $3,000,000, while the moneys paid into court were $93,170 by the Dominion government as the purchase price of rails belonging to the defendant railway company and used during the war, and a further amount of $21,250 from the sale of the steamer "Empress," which operates on the Ottawa River, and the property known as the Queen's Wharf property in Ottawa.

The chief claim against the company was made by Charles N. Armstrong, of Montreal, president of the company, who asked $109,947 as remuneration for services rendered and expenses incurred on behalf of the company from 1911 to 1917.

The report of the registrar is a denunciation of the methods employed in the administration of this company. Armstrong, says the report, received monies on behalf of the company and seems to have helped himself to them. A debit entry of $229,999 was changed in the company's books to a credit entry for the same amount. Concerning this, the registrar says: "I doubt if the deliberate tampering with the books of the company by Blagg (accountant for the Ottawa River Navigation Co.) at the instance and in the interests of Armstrong has any parallel in the history of corporations in Canada. Armstrong's claim for priority is refused, as also is the claim of Senator Domville for $20,000.

NEW COAL COMPANY IS ACTIVE

Welton-Henderson, Ltd., the new coal corporation which was recently formed to carry on mining operations at Minto, N.B., are preparing to materially increase their output. The company are now operating two shifts, and will soon have a third under way. Their present output is about 50 tons daily, and by early in the new year it is expected to have the quantity increased to between 125 and 150 tons daily, and to make further increases later on. Miners' houses are being built and the development generally pushed along.

Contracts which the company have with the Fraser Companies, Ltd., take their entire output. At their Edmundston pulp plant the Frasers are now using upwards of 150 tons of coal daily, it is said, and the quantity will be further increased when the extensions of the plant there are completed early in 1921. At a meeting held recently officers of the new corporation were elected as follows: President, Harvey Welton, Minto; vice-president, Archibald Fraser, Fredericton; general manager and secretary-treasurer, John Henderson, Minto. Mr. Henderson, the general manager, was formerly manager of the Minto Coal Company, and it was largely due to his efforts that that company became the leading producers of coal in the Minto area.

The British American Bond Corporation, Limited, due to growing business, has moved to quarters recently vacated by the Whalen Pulp and Paper Co., on the top floor of the Merchants Bank Bldg., corner of Pender and Granville Sts., Vancouver, B.C.

PERSONAL NOTES

J. W. Norcross, president of the Canada Steamship Lines, Limited, has returned to Montreal, after spending several months in Britain and on the continent. "General conditions there are still very disturbing," states Mr. Norcross, "the return to a more normal state being retarded by an unrest in labor circles."

John O'Grady, of the Great-West Life Assurance Company, has been elected vice-president of the Winnipeg Life Underwriters' Association, and will naturally succeed to the presidency next year. Mr. O'Grady has been for several years treasurer of the association. H. M. M Meiklejohn, inspector for the Sovereign Life Assurance Company, has been elected treasurer, in succession to Mr. O'Grady.

Alex. McDonald, of Winnipeg, has been appointed freight rate expert to the Saskatchewan government. He will co-operate with the boards of trade in the province to prepare from time to time cases in relation to any discrimination which may exist in freight rates. He will also investigate the equalization of rates east and west, and other transportation matters, in the interest of Saskatchewan shippers of the general public.

John F. Mackay, who recently resigned as secretary-treasurer of the Willys-Overland, Limited, Toronto, has become vice-president and general manager of the John Morrow Screw and Nut Company, Ingersoll, Ont., and vice-president of the Ingersoll File Company, Limited. Mr. Mackay takes up his residence in Ingersoll about December 1. Previous to becoming identified with the Willys-Overland Company, he was for fifteen years business manager and treasurer of the Toronto Globe, his previous newspaper training in Western Ontario and Montreal having fitted him for the success he attained there and subsequently in the industrial undertakings with which he has been identified. Mr. Mackay has been a member of the Conservation Commission of Canada since its organization by the government of Sir Wilfrid Laurier in 1909.

Francis Gordon Osler, of Osler and Hammond, Toronto, son of Sir Edmund Osler, president of the Dominion Bank, has been appointed to succeed his father on the directorate of the Steel Company of Canada. Mr. Osler is also vice-president of the Canada Saskatchewan Land Company; director, Canada Permanent Mortgage Corporation; director, Canadian General Electric Company, and a director of the Manufacturers Life Assurance Company

John B. Noble, of the Terminal Agencies, Limited, Vancouver, B.C., has been appointed secretary of the British Columbia Fire Underwriters' Association, in succession to Walter L. Foster, who resigned some time ago on account of ill health. Mr. Noble was at one time connected with the Toronto Board of Underwriters and then subsequently was moved to the Winnipeg board, following which for several years he was secretary of the Vancouver Island Fire Underwriters' Association.

Russell D. Bell, of the Montreal investment house of Greenshields and Company, has returned to Canada after spending several weeks overseas. Mr. Bell stated that the conditions in Britain were rather unsatisfactory. "The country," he said, "is going through much the same economic process as is working on this side of the Atlantic. The period of deflation, while not yet as advanced as in either Canada or the United States, is well under way. The banking institutions have been tightening up and are pressing their clients to reduce their borrowings through the reducton of inventories and in other effective ways. So far, the retailer has been little affected by this policy of the lending institutions, although manufacturers and wholesalers have been hit hard in many instances."

D. J. McDougald was recently elected president of the Eastern and Western Land Corporation to succeed the late Thomas Long. Mr. McDougald, who was previously a director of the corporation, is head of the financial house of D. J. McDougald and Co., Toronto. He is also a director of the Trust and Guarantee Co., Ltd., and president of the Pine Lake Lumber Co., Ltd. Mr. McDougald is well-known in Ontario financial circles, having taken an active part in 1918 and 1919 Victory Loans. The Eastern and Western Land Corporation is one of the pioneer land and colonization organizations of Saskatchewan, and has its head office at Toronto.

OBITUARIES

A. S. Goodeve, a member of the Dominion Board of Railway Commissioners, died in Toronto on November 22.

Peter H. Sims, vice-president of the Dominion Life Assurance Company, and at one time secretary of the British-America Fire Insurance Company, died of pneumonia at the residence of his son, Kitchener, Ont., on November 21. Mr. Sims was born 76 years ago in the township of Wellesley, county of Waterloo, Ont. He was the son of Rev. Jas. Sims, Baptist minister, and first superintendent of education in Waterloo county. In his early days Mr. Sims taught school, after which he entered the Waterloo Mutual Fire Insurance Company. With others in 1875 he founded the Mercantile Fire Insurance Company, becoming its manager, which position he held for 17 years. In 1892 he went to Toronto to become the secretary of the British-America Fire Insurance Company, which position he held until 1912, when he retired. With others he founded the Dominion Life Assurance Company, of Waterloo, becoming vice-president, which position he held until his death. He was the last of a small group of insurance men of Waterloo who were the founders of the life and fire companies of that town.

THE EXCHANGE RATE

IX.—What Controls It?

IN the previous numbers of this series we have endeavoured to explain the various factors bearing on the exchange value abroad of our dollar. We will now summarize the methods by which this value may be restored.

By increasing Canadian production we can supply our domestic requirements and enlarge our surplus for export. This, if accompanied by a drastic decrease in our imports, especially of luxuries, will go far to adjust our trade balance.

As exchange becomes favorable to us, gold will flow in more freely, the reserves against paper currency will regain their former sound basis and the restrictions on the export of gold will be removed. The great stabilizing factor in exchange fluctuations will therefore be restored.

There are two further matters of equally great importance; the first, that so far as possible we cease to purchase luxuries, even those of domestic manufacture, and divert the sums thus saved to productive enterprises, either by direct investment or by depositing the money in the bank; the second, that we must all strive to work at our greatest capacity, not shirking, but taking pride in achieving a full output, whether we are doing manual or mental work.

The personal advantages of accumulating savings are so obvious that they need not be repeated here.

If this series has achieved its object, the national importance of industry and thrift to ensure the prosperity of Canada and to re-establish the value of the Canadian dollar throughout the world will be clear to you.

Will you do your share?

ONE HUNDRED AND THREE YEARS OF SERVICE

Canada's Oldest Financial Institution Closes Another Successful Year—A Statement to Inspire Business Confidence

At a time when the business community of Canada needs the most confidence, the annual report of the Bank of Montreal comes as a decided encouragement. During its one hundred and three years of operation, the Dominion's oldest financial institution, due to the excellent appraisement of banking and commerce by its executive, has been enabled to meet all conditions. It has displayed its ability to meet extraordinary requirements arising from the war, and is now using that same ability to take care of the readjustment.

As early as December, 1916, Sir Frederick Williams-Taylor, general manager of the bank, was advising the preparation for peace and the inevitable readjustment, indicating the wonderful foresight which is common among our banking executives and which has proved so valuable in the past. The concluding remarks of Sir Frederick in his annual address for that year still stand out prominently, and are applicable to present conditions. He said: "Our future actions in national development should be considered now. The importance of the problems of the situation must be impressed upon those who are living in what may be termed the paradise of the unwise. Sane optimism and self-confidence are admirable qualities and should be the order of the day. There is a point where optimism loses its value and the danger of over-confidence begins. That is the point to avoid." In this statement businessmen should find a very valuable motto.

Present Position Compared

A comparison of this year's figures with 1919 is not sufficient to give the true light of the situation, but the showing of the principal accounts of the bank when the war was at its height makes more plain the transposition of conditions. The figures are as follows:—

	Oct. 31, 1920.	Oct. 31, 1919.	Oct. 31, 1917.
Capital stock	$ 22,000,000	$ 20,000,000	$ 16,000,000
Reserve	22,000,000	20,000,000	16,000,000
Due to Dominion government	17,657,119	....	13,638,962
Deposits not bearing interest	111,739,215	129,946,641	71,114,641
Deposits bearing interest	322,578,613	312,655,964	246,011,786
Due to banks in Canada	2,863,393	2,110,833	4,147,482
Due to banks abroad	1,381,644	4,122,490	496,621
Acceptances under letters of credit	7,836,991	4,895,505	3,335,499
Gold and sub. coin	25,187,389	24,742,654	20,592,891
Dominion notes	48,199,032	49,865,151	30,760,233
Deposits in gold reserve	21,200,000	25,200,000	14,500,000
Due from banks abroad	15,202,365	13,856,808	16,629,089
Call loans in Canada	1,944,383	2,583,910	....
Call loans abroad	95,017,883	78,255,625	100,610,214
Dominion and provincial government securities	14,863,954	63,981,255	28,573,322
Railway and other bonds	4,542,070	8,517,835	12,571,625
Canadian municipal and other securities	36,749,430	47,041,359	33,455,254
Notes of other banks	3,367,578	2,744,153	1,491,676
Cheques on other banks	22,872,419	21,189,104	17,111,090
Current loans in Canada	223,495,472	164,182,581	97,607,401
Current loans elsewhere	17,619,853	15,903,424	10,045,811
Loans to municipalities	14,785,686	15,092,718	11,415,383
Bank premises	5,500,000	5,500,000	1,000,000
Note circulation	42,367,310	43,922,844	29,308,086
Total assets	560,150,812	515,301,809	10[illegible],980,236

From the above figures, it will be seen that the outstanding feature is the great increase in current loans. This is an illustration of how the bank has been able to take care of the unusually large proportion of the increased requirements of the merchants and manufacturers of the country.

At the same time there has been a striking reduction in the accounts which reflect the special business which the bank undertook during the war period on behalf of the Imperial and Dominion governments. As a result, the holdings of Dominion and provincial government securities have been reduced to $14,863,954, compared with $63,984,255, at the end of the previous year. Canadian municipal securities and British, foreign and colonial securities have also substantially declined. Presumably, the bank has liquidated such holdings in order to use the money more advantageously in this country.

Profits Greatly Increased

Turning to the shareholder's side of the statement, shows equally favorable results, as the following figures will illustrate:—

	1920.	1919.	1917.
Profits	$4,033,995	$3,314,227	$2,477,969
Stock premium	1,000,000	3,500,000	....
	$5,033,995	$6,814,227	$2,477,969
Previous balance	1,812,854	1,901,613	1,414,423
Total	$6,846,850	$8,715,840	$3,892,392
Less:			
Dividends	2,960,000	2,372,250	1,920,000
To rest	2,000,000	4,000,000	....
War tax	210,000	190,986	160,000
Patriotic	....	39,750	47,500
Bank premises	425,000	300,000	100,000
Total deductions	$5,595,000	$6,902,986	$2,227,500
Balance forward	1,251,850	1,812,854	1,664,892
Total	$6,846,850	$8,715,840	$3,892,392

CANADA PERMANENT DEBENTURES SOLD

The Canada Permanent Mortgage Corporation had debentures of £234,000 due this week in London. Nine-tenths of this amount was replaced at 6 per cent. through Edinburgh agents, which is the same rate as offered by the city of Edinburgh. The debentures bear a nominal interest rate of 6 per cent.

UNDERWRITERS LABORATORIES OF CANADA

The Underwriters Laboratories of Canada has been incorporated in Montreal, and is understood to be a branch of the Chicago Laboratories. The purpose of the organization is "to establish and maintain laboratories and an inspection service for the examination and testing of appliances and devices, and to enter into contracts with the owners and manufacturers of such appliances and devices respecting the recommendation thereof to insurance organizations and others."

BONDS FOR LUXURY TAX COLLECTION

Under an Act to amend the Special War Revenue Act, 1915, the excise tax regulations require, in connection with the collection of the luxury tax from manufacturers, that the manufacturers of certain enumerated articles shall "furnish the collector of inland revenue with one of the following forms of security in a sum represented by the manufacturers' tax on the estimated maximum production of such article manufactured during any one month of the fiscal year which the bond or other security is intended to cover:—

1. The bond of an approved guarantee company.
2. The guarantee of a chartered Canadian bank, signed by the general manager and approved by the department.
3. War loan bonds.

And such bonds shall be conditioned for the payment of the manufacturer's tax on such articles manufactured; the payment of all penalties incurred; and generally shall bind the manufacturers to a faithful and complete observance of the regulations which are or may be established under the authority of the Act."

Obviously, the security required is one that guarantees a financial obligation and a faithful adherence to the regulations of the department. Writing to *The Monetary Times* on this point, Henry E. Rawlings, president of the Guarantee Company of North America, suggests the action of the department in making it optional for the manufacturer to obtain from a bank an undertaking, which, to my mind, in many instances, the bank would be unwilling to "*voluntarily*" accord, and which, under the interpretation of the Insurance Act, is clearly an undertaking restricted to companies transacting guarantee insurance.

AN ALLIANCE FOR LIFE

Many of the large Corporations and Business Houses who bank exclusively with this institution have done so since their beginning.

Their banking connection is for life—yet the only bonds that bind them to this bank are the ties of service, progressiveness, promptness and sound advice.

399 Branches in Canada, extending from the Atlantic to the Pacific
New York Agency: 63 and 65 Wall Street: W. M. Ramsay and C. J. Crookall, Agents
London, England, Office, 53 Cornhill: J. B. Donnelly, D.S.O., Manager
Bankers in Great Britain: The London Joint City & Midland Bank, Limited, The Royal Bank of Scotland

BANK BRANCH NOTES

The following is a list of branches of Canadian banks which have been opened recently:—

Armdale, N.S.	Bank of Nova Scotia
Toronto (Dupont & Clinton Streets)	Bank of Nova Scotia
New Toronto, Ont.	Dominion Bank of Canada

Staff changes are announced by the Bank of Montreal as follows: E. R. T. Huestis, manager at Paspebiac, Que., appointed manager at Grand Falls, N.B.; J. J. Irwon appointed acting manager at New Denver, B.C.; E. E. L. Dewdney, manager at New Denver, B.C., appointed manager at Rossland, B.C.; A. H. Trueman, manager at Grand Falls, N.B., appointed manager at Shediac, N.B.; G. Lawson appointed manager at Yarmouth, N.S.

Extensive enlargements both of personnel and premises are now under way at the branch of the Canadian Bank of Commerce, at Calgary, Alta. As soon as the alterations, which are now being made, are completed, this bank will occupy the entire three floors of the building in which it is now situated at the southwest corner of Eighth Ave. and Centre St. This change has been brought about by the splitting of the western superintendency into two divisions.

RAILROAD EARNINGS

The following is the approximate gross earnings of Canada's transcontinental railways for the first two weeks in November:—

Canadian Pacific Railway.

	1920.	1919.	Inc. or dec.
November 7	$5,723,000	$3,821,000	+ $1,902,000
November 14	5,677,000	4,083,000	+ 1,594,000

Canadian National Railways.

November 7	$2,770,758	$1,987,622	+ $ 783,136
November 14	2,880,563	2,000,035	+ 880,528

Grand Trunk Railway.

November 7	$2,385,604	$1,931,520	+ $ 454,084
November 14	2,523,463	2,003,287	520,176

CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co., during the week ended November 19, 1920, in provinces, as compared with those of previous weeks and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1919.
Nov. 19	5	7	0	3	3	4	0	1	0	23	21
Nov. 12	12	14	0	0	4	3	0	15	0	48	14
Nov. 5	9	6	1	0	0	2	1	0	0	19	11
Oct. 29	7	14	0	4	1	2	0	1	0	29	18

EXCHANGE QUOTATIONS

Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates as follows:—

	Buyers.	Sellers.	Counter.
N.Y. funds	13¾ pm	13 15-16 pm	....
Mont. funds	Par.	Par.	⅛ to ¼
Sterling—			
Demand	$3.9650	$3.9750	..
Cable transfers	3.9750	3.9850	...

Rates in New York, sterling demand, $3.48½.

MERCHANTS BANK MAKES GOOD SHOWING

The half-yearly statement of the Merchants Bank of Canada, covering the period ending October 31, 1920, reflects a healthy growth in that institution. Capital and reserve have been substantially increased to meet the advance in business, while the loans and deposits accounts reflect how great that increase in business has been. The principal figures, with comparisons, are as follows:—

	1920.	1919.
Capital	$ 9,955,970	$ 8,341,535
Reserve	8,400,000	7,000,000
Undivided profits	260,774	574,043
Circulation	17,707,977	15,827,373
Deposits	170,634,061	166,006,015
Letters of credit	2,491,664	757,606
Gold, Dominion notes and credit balances	30,630,351	25,642,136
Central gold reserves	7,500,000	8,000,000
Government and municipal securities	21,114,908	36,240,352
Other securities	3,837,377	3,870,611
Call loans in Canada	8,254,586	6,843,017
Call loans abroad	4,179,236	3,418,846
Current loans	120,515,463	102,346,564
Current loans abroad	1,340,428	329,334
Loans to municipalities	4,635,381	3,578,382
Bank premises	3,192,734	5,663,251
Real estate	602,748	911,291
Mortgages	705,567	528,177
Circulation deposit	450,000	377,000
Total assets	$209,450,448	$198,506,572

WEEKLY BANK CLEARINGS

The following are the Bank Clearings for the week ended November 25, compared with the corresponding week last year:—

	Week ended Nov. 25, '20.	Week ended Nov. 27, '19.		Changes.
Montreal	$137,068,361	$140,688,057	—	$ 3,619,696
Toronto	121,899,842	93,148,987	+	28,750,855
Winnipeg	90,472,939	64,810,262	+	25,662,677
Vancouver	16,834,655	13,375,017	+	3,459,638
Ottawa	14,282,693	....		....
Calgary	10,283,692	10,111,482	+	172,210
Hamilton	6,994,265	6,702,200	+	292,065
Quebec	7,875,656	5,911,160	+	1,964,496
Edmonton	5,455,275	5,919,713	—	464,438
Halifax	4,194,884	4,666,919	—	472,035
London	3,471,559	3,510,867	—	39,308
Regina	5,501,266	5,276,136	+	225,130
St. John	3,075,714	3,190,883	—	115,169
Victoria	2,618,292	2,393,789	+	224,503
Saskatoon	2,647,999	2,587,106	+	60,893
Moose Jaw	2,335,479	2,151,943	+	183,536
Brantford	1,275,001	1,020,385	+	254,616

Are You a Trustee?

IF so, you may be interested to learn that this Corporation also acts as agent for personal Trustees, taking charge of the administration of estates for them and performs such duties as keeping estate funds fully employed in high-class investments, collection of revenue, cutting coupons, management of real estate, rendering statements and remitting balances to beneficiaries at regular intervals, keeping securities in Safety Deposit Vaults, etc. Many Trustees find this the most satisfactory way for them to administer an estate—by turning it over to us as their agent and at the same time retaining the responsibility imposed on them under the Will.

ASSOCIATION OF LIFE AGENCY OFFICERS

General Manager of Great West Life Speaks on Relations of Agency Manager to Head Office and Agents

AMONG the speakers at the fourth annual meeting of the Association of Life Agency Officers, held in Chicago, November 10 and 11, were C. C. Ferguson, general manager of the Great West Life Assurance Company, Winnipeg, and James C. Tory, general manager of agencies, Sun Life Insurance Company, Montreal. Mr. Ferguson's subject was "Branch Managers, General Agents and Agents," while Mr. Tory discussed "To What Extent Should The Home Office Serve the Branch Office in the Selection of the Local Agent?"

Branch Manager Must Be Loyal

Mr. Ferguson said in part:—

"The manager's first duty is that of loyalty. He stands for his company in his particular territory and he must correctly interpret and express his company's ideals. I say that he must do so. If he does not approve of those ideals, he must step out. He must be willing and competent to co-operate, to work in harness. If he is a man of originality and initiative, he will frequently see opportunities for improving methods and conditions of work, but he must be patient in having his suggestions adopted. The world moves slowly and he should remember that the head office officials should have greater opportunities of seeing all sides of a question than he has. However, no live executive will discourage suggestions or recommendations.

"The branch manager's main responsibility is of course to produce business. His territory is usually too large for him adequately to fulfill that responsibility himself and so I will assume that he is expected under his company's system to devote the major portion of his time in creation and development of an organization. To be successful in this, there is obviously required an unusual degree of personality, tact, industry and enthusiasm. A nervous, never-satisfied energy is needed to urge the men on from one accomplishment to another. Above all he must have a capacity for leadership and a personality to attract and enthuse others.

"The branch manager's sense of duty towards his agents must not blind him to his responsibility towards his company. There is a great temptation for the manager to constitute himself as the advocate of the agents, with the idea of obtaining for them all the benefits and remuneration he can squeeze from the head office. I will gladly admit that it is his duty to do everything in his power to see that due remuneration is paid for services given, but I think it is also his duty to protect the company's funds against improper demands where real service is not rendered.

Sympathetic Towards Agents

"Towards the agents the branch manager's attitude should above all be sympathetic. He should know the frequent discouragements under which they work. I believe the successful life agent is almost always temperamental. He is enthused by success and depressed by failure. On the one hand, he needs a kind restraint to keep him from extravagance in money or deed, on the other hand a sort of friendly sympathy and advicé from one who knows the lessons of philosophy will often revive his courage and teach him to regard his present misfortunes as but the doorstone to future accomplishments.

"Obviously the new agent without previous experience in the business needs careful handling. There are some with natural aptitude who succeed from the start but for the most part they require sympathetic assistance. To this end the more experienced agents can co-operate most effectually with the branch manager, and this important aid to organization should never be neglected."

Directors of the Royal Bank of Canada have voted a Christmas bonus of 20 per cent. to each member of the entire staff of the bank and its branches.

SOME SUGGESTIONS TO FIRE INSURANCE AGENTS

Notice of Loss Must be Sent to Company Promptly—How Adjustment is Made

JAMES MITCHELL, manager of the city department of the Kern Agencies, Ltd., Moose Jaw, Sask., gives some pointers to agents regarding settling losses, in the October *Kernal*. "The average agent," he says, "in the course of a year does not have many fire losses to handle and in consequence is perhaps a little dubious as to how to proceed in case the fire fiend visits one of his policyholders.

"I would here venture the opinion that not many agents have thoroughly studied or even read, word for word, the conditions printed on every policy issued and I believe it would be a very great help to the agent if he would thoroughly post himself on all the conditions found in the Saskatchewan Statutory Conditions. These conditions carry a wealth of information for the agent and will be found invaluable when canvassing some prospect. It is up to the agent to explain to the prospect just what he can and cannot do if he wants to receive payment from an insurance company in case of loss. I would particularly call attention to Section 20 of the Statutory Conditions, subsections (a), (b), (c), (d), and also Sections 21, 22, 23 and 24.

"I will now give you a few pointed facts that should be followed when a loss occurs.

Notify Companies

"Notify every company interested at once, giving policy number, name of assured, the day and hour when the loss occurred and its cause as nearly as can be determined. If there is a total destruction of the property tell the company, if only a partial loss, tell the company, together with an estimate. I have known of adjusters being sent out on expensive trips where the expenses were greatly in excess of the claim and simply because the company did not have sufficient information to properly judge the amount of the loss.

"If the loss is small you may get immediate instructions to repair the damage which will save time, trouble and loss of business to the client. The client will appreciate this service and it might be the means of helping you to land some difficult prospect.

Securing Adjustment

"Have the assured separate as far as possible the damaged from the undamaged property and exhibit for the examination of the adjuster all that remains of the damaged property. The damaged goods may have a market value and should therefore be put in the best possible condition, saved from further damage. If the insurance is in excess of the loss the expenses are a charge against the company. If the insurance is less than the loss your client is saving money. Save the property in any event. This is only doing what is right and is only carrying out the conditions, which the assured has agreed to do in accepting the policy.

"Having given due attention to the salvage, make a detailed statement of the loss, classifying each article under the items of the insurance policy. The statement that "the loss is greater than the insurance" may be true, but it will not be accepted by the adjuster, he must have facts and figures. Where possible have books of account, stock sheets and invoices ready for the inspection of the adjuster.

"Do not let your client have the mistaken impression that any reputable insurance company sends out an adjuster to cut down a legitimate claim below the actual loss, and that he (the client) must make a fictitious and exorbitant claim in order to get a just settlement. This unfortunate mistake has put more claimants under suspicion of having "sold out to the insurance company," caused more disagreements and so called "hold ups" than any other one thing.

"An honest claim, carefully made and presented in good faith, will be met by the reputable insurance company in the most liberal spirit possible."

You Should Make a New Will—if

you have married; your family has increased;
members of your family have married—or died;
your own circumstances have materially changed. (Some men make a new will every year.)

In any case, your estate and heirs should have the exact knowledge, business organization, experience, financial responsibilities and permanency of the UNION TRUST COMPANY, which is sure to attend whenever your estate affairs need attention.

CANADA A FORTUNATE NATION

But Must Follow Sound British Financial Policy—The International Financial Conference

"AS a result of my observations of the conference and my knowledge of Canadian affairs, I am convinced that Canada is the most fortunate land on the face of the earth." Such was the remark of J. H. Gundy, of Wood, Gundy and Co., in an address on the "International Financial Conference at Brussels," before the Canadian Club in Toronto on November 22. "We have lots to do, there are tremendous resources to develop, and we must prepare for a tremendous population, but we must follow the sound British financial policy. It is not so much cheap money that we want as sound money and enough sound money. It is better for the man who wants to borrow money to get it at 8 per cent. rather than be told that the rate is 6 per cent., but that there isn't any available. In the western provinces there isn't enough money to assist the farmers to develop their land and purchase the necessary implements. The money is leaking out of Canada because it is dearer in other countries. Let us pay for it and keep it. Let us have high rates rather than low ones and keep the money in the country."

Belligerent Currencies Increased

After outlining the purpose of the conference and other details, Mr. Gundy went on to say: "As a result it was shown that the internal debt of the belligerent countries of Europe is 155 billion, whereas before the war it was only seventeen billions. The external debt is 11 billions to the United States and eight billions to Great Britain. Of the 11 billions 4½ is owed by England and three by France, which in French currency represents nine billion. Annual expenditures have increased from 500 per cent. to 1,500 per cent., and this represents from one-fifth to two-fifths of the total income of all the people of these countries. France has the highest percentage while Great Britain is the only one able to collect enough money to meet expenditures. Every other country is going behind tremendously every year.

"Since the war the currencies of the different countries have correspondingly increased; Great Britain from 214 billion to 536 billion, or 256 per cent.; France from 10 to 38 billions; Belgium from 1¼ to 4¾ billions; and Germany from six billion marks to fifty billion. The condition in Germany now is that if a man owed $100 at the outbreak of war he could pay it off for $4 in gold now. The conditions in the neutral countries and the new states is similar, and some of these states have no national currency and others have six national currencies. Thus confusion and blockade of trade exists on account of the financial conditions. The neutrals had a flood of gold during the war, owing to increased trade, but now they are facing tremendous deficits. It will be a very difficult matter for Switzerland and Spain to raise sufficient money to meet their indebtedness.

Borrowing Must Stop

"The measures adopted to meet conditions were not new or remarkable. Vice-president Brand, of the United States, who had studied the question very thoroughly, stated that the only thing to be done was to cut to the bone all expenditures, cut out all extravagant administration, dismiss officials, cut out military expenditures—it was shown that out of every $5 expended $1 was for military purposes—the governments must abandon all unproductive expenditures—some were using money in reducing the cost of bread, coal and public services, such as railways, but it was proven that by doing this the governments were increasing the expenditure and not helping the working man—and the governments were also advised to reduce and postpone productive expenditures. The position in Europe is that there are many productive things that would be desirable, but they must be postponed until a more favorable season. There must also be increased taxation. All the countries represented at the conference unanimously endorsed these suggestions and went back to put them in force.

"Another question before the conference was that of currency and exchange, the inflation of currency and the fluctuation of exchange. The inflation was caused by the war when every country found it necessary to issue more currency and get away from the gold basis to meet the expenses of the war. They kept on after the war to meet the deficits of the governments. This made trade unstable and in cases impossible. Inflation must stop and loans and credits must stop except for the most vital and necessary cases. Borrowing by governments and municipalities must cease and every possible effort made to increase the wealth of the countries by greater production, harder work, longer hours and greater taxation. We must try to collect and accumulate some of the wealth destroyed during the war."

Government Control Rejected

Mr. Gundy then outlined various other discussions which had taken place and continued:—

"It was also decided that government control of industries and finance is basically wrong and the suggestions that an international bank, an international loan and an international currency be established were thrown into the waste-basket as it was thought they would lead to inflation, too much credit and currency at a time when it is necessary to deflate.

"England has got back her foreign trade and is now on a firm basis. She is paying her way and retiring her debt substantially, far above any other European country. France is improving very rapidly. Her exports in 1913 wer 79 per cent. of her imports, and in 1918 the percentage had dropped to 22 per cent. Since then it has rapidly increased until in September last it was 81 per cent. above the basis that it was before the war. The losses that France encountered in Russia are to be regretted, but I have great respect for the courage, energy and patience of the French people, and I expect that France will soon occupy a proud position in Europe."

As regards to Germany Mr. Gundy said: "The machinery of trade is demoralized and we are justified in feeling that it will be a long time before Germany can come back."

BRITISH CANADIAN TRUST, LIMITED

A successful year was experienced by the British Canadian Trust, Ltd., as indicated by the annual report for the year ended August 31, 1920. Net revenue amounted to £15,695, and the dividend was increased from 6 to 7 per cent. The balance carried forward was £5,648, as compared with £3,015 last year. The net revenue includes an exceptional profit on exchange of £5,007 on revenue remittances received in ordinary course from Canada and the United States. In addition, a substantial balance of profit has been credited direct to the contingent fund, which now amounts to £20,000, arising from exchange on capital remittances to Britain and from certain realizations of investments carried out during the year. The present amount at the credit of the contingent fund approximately meets the depreciation that has arisen on the company's investment, in common with those of similar companies, following the adverse conditions of the past few years of financial stringency and disturbance.

The total capital of the company amounts to £250,000. Assets total £509,352, of which investments represent £497,199.

There has been approximately $3,000,000 spent on the roads of Nova Scotia this year. The organization which handled this was brought to a very effective state during the season. Next year, with such organization, with more money, more experience and more equipment, there should be even a greater amount of work done, according to the road engineers.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

Canada's Trade Position is Reversed

October Statement Shows a Favorable Balance of Twenty-Five Millions—Result of Excellent Harvest Makes Its Appearance — Large Increase in Exports of Agricultural Products Responsible for Healthy Showing

FOR the first time in many months a favorable trade balance is shown in the monthly statement. For the month of October, according to the figures of the Department of Customs, exports totalled $129,348,220, an increase of about $25,000,000 over the previous month, while imports were $105,770,037, a decrease of about $9,500,000 as compared with September.

An increase of about $37,000,000 in exports of agricultural and vegetable products was responsible for this healthy showing. As was predicted, Canada's excellent harvest this year would largely reduce the adverse trade balance, which has been growing steadily since the crop movement of 1919. Last month's report is the first sign of the turning of the tide, and subsequent statements should show still greater improvements.

Turning to other sections of the statement, there were declines in exports of wood, wood products and paper, while the value of animals and animal products sent out of the country was also lower. Under imports, the principal decreases for the month were in agricultural and vegetable products and fibres and textiles. As compared with October, 1919, the statement presents a very satisfactory appearance.

Details are as follows:—

PUBLICATIONS RECEIVED

Hydro-Electric Development in Ontario.—By E. B. Biggar. The Biggar Press, Ltd., Toronto. 202 pages, with index.

This book carries the sub-title, "A History of Water-Power Administration under the Hydro-Electric Power Commission of Ontario." It deals with the geographical, engineering and economic aspects of what is now the greatest power system in the world. Mr. Biggar is well known in Canada as author of "The Canadian Railway Problem" and as a former editor of *The Canadian Engineer*.

Labor's Crisis.—By Sigmund Mendelsohn. Macmillan Company of Canada. 171 pages; $1.65.

The question of labor reform is taken up by this employer from the employer's point of view. He analyzes labor's propositions to remedy the existing unrest, argues that the labor scarcity is not entirely due to decrease in the number of laborers, and suggests many effects of the unrest itself on production and labor. It is a thoughtful study by a keen, open-minded employer, contributing to one of the most important discussions of the day.

Speculation and the Chicago Board of Trade.—By James E. Boyle, Ph.D., Extension Professor of Rural Economy, College of Agriculture, Cornell University. Macmillan Company of Canada, Ltd. 277 pages, with index; $2.75.

Mr. Boyle describes the work of the Chicago Board of Trade in relation to the marketing of the grain crop. The book, as he points out in his introduction, is really a report on the Chicago Board of Trade. His chapter headings are: Fundamental Economic Functions of a Market; Chicago as a Grain Market; the Chicago Board of Trade Viewed as a Piece of Marketing Machinery, Structure and Organization; Operation and Functions, Sixty Years of Activity; the Chicago Board of Trade and the Problem of Speculation.

Bank Credit.—By Chester A. Phillips, Ph.D., Professor of Economics in Dartmouth College and Professor of Banking and Finance in the Amos Tuck School of Administration and Finance. Macmillan Company of Canada, Ltd. 374 pages, with index; $4.50.

This is a book for banker and merchant, explaining commercial credit and giving a detailed analysis of mercantile credit, the interpretation of credit statements and the evaluation of different items. From the bank's point of view, such an exposition is of great importance; it gives a basis for judgment as to the value of mercantile paper that is offered to it. From the merchant's point of view it is equally valuable, enabling him to understand what principles the bank applies in analyzing his statement.

Some Aspects of Banking Theory.—By W. H. Steiner, B.S., A.M., assistant director, Division of Analysis and Research, Federal Reserve Board of the United States. Published by W. D. Grey, New York. 158 pages; paper-bound, $1.30; cloth-bound, $1.75.

As an advanced study of some banking problems, it is an excellent contribution to the literature on the subject. The chapter titles of the book are as follows: The Evolution of Banking; Banking in the Present Economic Order; Commercial Banking; Some Further Aspects of Commercial Banking; Investment Banking; Operation of the Banking System.

RAILWAY TO FLIN FLON

Authority to proceed immediately with a survey for a railroad into the Flin Flon mine district, north of The Pas, was given to the Canadian National Railway by Premier T. C. Norris, minister of railways for Manitoba, following a meeting of the provincial cabinet on November 2. The survey will include an estimated cost of constructing a railway which will be submitted to the legislature at the next session. The survey will be completed in three months.

GOVERNMENT CURRENCY

Circulation of Dominion notes increased $17,000,000 in October, in accord with the heavy demand for currency, which is usual at this time of the year, and which results from the crop movement. Holdings of gold, however, were not increased; in fact, there was a slight decrease of about $20,000. Dominion notes outstanding against deposits of approved securities are shown as $166,715,125, as compared with $149,620,125 previously, indicating that the new currency is backed by approved securities. Details of the October specie statement are as follows:—

Provincial	$ 27,743 25

DOMINION GOVERNMENT SAVINGS BANKS

Withdrawals from the Dominion Government savings banks in October exceeded deposits by about $25,000. The showing for the month, however, was better than in September, inasmuch as deposits increased $18,000, while withdrawals were reduced $3,000. The following are the September details:—

INTERPRETATION OF CLAUSE IN A MORTGAGE

Manitoba Court of Appeal is Divided on Clause for Acceleration of Payment of Principal

IN a reference before the Manitoba Court of Appeal in August last, in Re Crossen Metal Works, Ltd., the court was equally divided over the interpretation and application of a clause in a mortgage, which clause following a proper attornment clause was as follows: "And further that if I shall make default in payment of any part of the said principal or interest at any day or time hereinbefore limited for the payment thereof it shall and may be lawful for them and I do hereby grant full power and license to the mortgagee to enter, seize and distrain upon the said lands or any part thereof and by distress warrant to recover by way of rent reserved as in the case of a demise of the said lands as much of said principal and interest as shall from time to time be or remain in arrear and unpaid, together with all costs, charges and expenses attending such levy or distress as in like case of distress for rent."

Facts of the Case.

The facts of the case as stated by the Court were: "The Winnipeg Steel Granary and Culvert Co., Ltd. (incorporated under the Manitoba Companies Act), on March 1, 1919, mortgaged its premises situated in St. Boniface, Man., to William J. Crossen, to secure a loan of $50,000, payable on January 11, 1924, with interest at 6% per annum, payable yearly on January 11. In April, 1919, the name of the company was changed by an order-in-council to "Crossen Metal Works, Ltd." On January 11, 1920, an instalment of interest to the amount of $3,000 fell due and was not paid. On March 6, the mortgagee gave notice to the mortgagor that, because of default in payment of the interest, he declared the whole amount of principal due under the acceleration provision in the mortgage. Payment not being made the mortgagee distrained under the clauses in the mortgage for $53,000, and his bailiff took an inventory of the goods and chattels.

A petition was filed to wind up the company under the Dominion Winding Up Act, and a winding up order was made. On April 27, 1920, the plaintiff turned over the goods distrained to the liquidator in compliance with an order made by the Master of the Court, which order provided that such delivery should be without prejudice to the rights, powers, etc., of the mortgagee. A case was stated upon an agreed statement of facts to ascertain the rights of the mortgagee. The Master made an order upholding the right of the mortgagee to distrain for the full amount of the principal and interest secured by the mortgage. On appeal Galt, J., confined the mortgagee's power of distress to the interest in arrears. From this last order the appeal was brought."

Judgment of Court

In substance, Chief Justice Perdue and Justice Cameron held that this clause was merely a device to obtain for the mortgagee further security, and assuming the legality of such a provision it should be very strictly construed, and that it did not refer to principal, the time for payment of which had been accelerated by the act of the mortgagee under an acceleration clause in the mortgage. That the mortgagee by his own act in accelerating the payment of principal could not create a new right of distress, and the mortgagee's right to distress was limited to the interest in arrear, and also that the clause came within the provisions of the Bills of Sale and Chattel Mortgage Act.

Justices Fullerton and Dennistoun held that the clause should be given full effect, and that the mortgagee had a collateral license to distrain for arrears of interest and principal apart entirely from the existence of any tenancy, and that the clause did not fall within sec. 7 of the Bills of Exchange and Chattel Mortgage Act.

BAUER COMPANY RETAINS TRADE MARKS

Judgment was given by Justice Audette in the Exchequer Court of Canada on November 6 in the case of the Bauer Chemical Company v. the Sanatogen Company of Canada and William W. Barry, the finding being in favor of the Bauer Chemical Company. The case was the first that has been tried since the enactment of the law involving the rights to trade marks covering the sale of German products sold in Canada, and it confirms the claims of the plaintiffs, an American company, to rights sold to them by the American Trade Custodian.

In England the Official Controller seized the business of the branch established by the Berlin firm of Bauer and Company, voided their trade marks, and forfeited and sold their business. In the United States, after entering the war, the American branch of this Berlin firm, incorporated into a company, was also forfeited and sold to the plaintiffs in the case just concluded. The judgment points out that, although the Canadian government passed a number of orders-in-council under the War Measures Act respecting trading with the enemy, no enactment can be found depriving the plaintiffs in this case of the ownership of the trade marks in dispute.

WHEN IS A POLICY CANCELLED?

The Globe Indemnity Co. was held liable for $1,000 under an accident insurance policy on the life of G. W. Stewart, of Smith's Falls, Ont., by the Quebec Superior Court on November 13. The question was as to whether the policy had been cancelled. On May 5, 1919, Stewart had written to the Montreal office asking that the policy be cancelled; a copy of the letter was sent to their Toronto agent, who wrote to Stewart saying he would see him about it in about ten days. On May 27 Stewart was killed. Justice Surveyor said in giving judgment against the company:—

"This was the first intimation given to Stewart that his letter of May 5 had been received; but it did not cancel the policy; on the contrary, it left him under the impression that such cancellation could not take place unless he surrendered his policy to the company. It called for a renewal of his request to cancel. It did not enclose the unearned premium, which defendant knew it would receive in due course from the Canadian Pacific Railway Co., Stewart's employer. It indicated reluctance on defendant's part to let the cancellation take place. The natural result of such a letter would be to induce Stewart to reconsider his decision; and as a matter of fact he did not return the policy for cancellation, and plaintiff's statement, made under oath at the trial, that her husband had decided, on the strength of such letter, not to press his request for cancellation, is amply corroborated. Such being the case, Stewart did not attempt to insure himself elsewhere, relying for indemnity upon the policy already issued to him.

"Moreover, the defendant company did not outwardly treat the policy as cancelled until after Stewart's death, namely, on May 27, 1919. As to the interpretation of provision 10 of the policy, the Court considers that in cases of doubt it must be interpreted in favor of the insured (Desjardins vs. The Great West Life Insurance Co., 23 R.L., N.S., 398)."

Justice Surveyor also pointed out that provision 10 stated that the policy-holder might at any time cancel the policy and be entitled to receive "on cancellation" the premium paid, less the usual short rate charged for the period the policy had been in force. These words indicated, the Judge said, that cancellation did not actually take place until the company accepted it by refunding the unearned premium, which it did not attempt to do until after Stewart's death. "The fact of withholding an official acknowledgment of Stewart's notice of cancellation until after the company received his premium from his employer." His Lordship added, "shows the defendant's intention not to treat the policy as cancelled until then."

News of Industrial Development in Canada

Large Steel Industry to be Established at the Coast—Capitalized at Fifteen Millions—To be Backed Chiefly by British Money—No Market for Canadian Steel Plates in Britain, Says Agent of Marine Department—Large Fraser Companies' Deal Still Pending—Wabasso Textile Mills to be Enlarged

CRYSTALLIZING the efforts of years, the Coast Range Steel, Ltd., has been incorporated with a capitalization of $15,000,000, to establish an iron and steel industry in British Columbia. This is the first definite course to be taken by any company, although iron and steel prospects have been discussed in British Columbia for almost a score of years. Henry J. Landahl may be said to be the principal, but he has had active associates in Fred. T. Conadon, J. D. Kearns, John Steta and Major Montagu Moore, in whose names the company is incorporated. Mr. Landahl has worked on the scheme for years since coming out of the Klondike, where he had met Mr. Conadon, and he was able to bring about a materialization of his efforts when the British Columbia government at its last session decided to give $3 a ton bounty on pig iron.

British capital has been interested and it is proposed to spend $50,000,000 to carry out present plans. C. T. Williams and Francis Perry, mining engineers of London, Eng., have been in Vancouver for some weeks to determine the adequacy of raw material, but their report will not be available for two or three months. It may be said that there is no doubt of the existence of plenty of certain grades of ore to warrant the incorporation of the company and the taking of preliminary steps in the establishment of the industry. The proposition has been placed before prominent Vancouver citizens at different times, and those familiar with its possibilities have accorded it support. Messrs. Landahl and Conadon visited London about three months ago, and the examination by British engineers is the result of that visit.

The matter has been discussed with the provincial government, which has signed an agreement to pay the bounty, as specified in its legislation, and which will accord the project every support. No particularly large local financial interests are connected with the scheme, the principal backing being British capital, which, if the report of the engineers is favorable, will be unlimited, it is said. As yet there is no talk of proposed location of this industry. If established it will doubtless be on the mainland, as many other industries closely follow steel, and while coal and other raw materials are to be found on Vancouver Island, transportation and other advantages are in favor of the mainland. Credit is due those interested in having brought the project so far ahead. With the completion of satisfactory investigations they hope to start actual construction within six months. R. B. BENNETT, Vancouver. (Special to *The Monetary Times*.)

No Steel Market in Britain

Cable advices from G. H. Flood, purchasing and contract agent of the Marine Department of the Canadian government, who is in England looking into the market for Canadian steel plates, indicate that Canada will be able to dispose of but few of these plates in the Mother Country. The government entered into a contract with the Dominion Iron and Steel Co to take a portion of the product of the Sydney plant and dispose of it. Consequently, the government is now trying to dispose of a portion of the 1921 output of the Dominion Iron and Steel Co.'s plant, but Mr. Flood states that German and Belgian competition in the steel markets of Great Britain is now an appreciable factor, and that Canada will meet with strong competition.

For some time past it has been said that the lack of orders was threatening the operations of steel plants in Canada. This is confirmed in the fact that four hundred steel workers are being laid off at the Sydney Mines, N.S., plant of the Nova Scotia Steel and Coal Co. It is stated that the restoration of normal conditions will depend entirely upon the success of the company in placing future orders for steel products.

Dominion Steel Closes Plant

When 125 railroad employees of the Dominion Steel Corporation served an ultimatum on the management on November 22, demanding a settlement of their wage differences before five o'clock the company replied by closing down the various mills at noon and ordering the banking of the blast furnaces. For the past two years the railroaders employed within the steel plant have been contending for the scale awarded all other railroaders in Canada following the McAdoo award in the United States.

The company has succeeded in getting men other than those employed on the railways to take over and run these locomotives, and so has found a means of combatting a situation which otherwise would close the plant entirely, throw 4,000 men out of work, and at the same time wreak destruction amounting to many thousands of dollars in the furnaces which, if not properly banked and allowed to cool down slowly, would crack, fall in and become useless.

Pulp and Paper

Additions now being made to the plant of the Abitibi Power and Paper Co. at Iroquois Falls, Ont., and which will be completed early in the coming summer, are calculated to almost double the capacity of the plant. The Abitibi's big scheme of expansion entails the installation of additional hydro-electric generating equipment, and which will bring the total electric energy up to approximately 19,000 h.p.

A transaction involving the purchase of the New Brunswick Railway Co.'s timber lands for approximately $11,000,000, which was to have been completed by the Fraser Companies, Ltd., recently, has not yet been closed. Archibald Fraser has said that the consumation of the deal had been postponed and added that no big deals are being put through just now. For continuing the option which they have on the New Brunswick Railway Co.'s lands the Fraser interests have been paying $25,000 a month for some time now.

Enlarge Wabasso Plant

Plans have been made by the Wabasso Cottons Co. for the enlargement of its mills at Three Rivers, Que. Work of extending the plant will be begun shortly and a number of looms will be increased from 7,500 to 10,000, an increase of 33 per cent.

A further proposal alludes to an addition for the future, including additional spinning mills, which will double the capacity of the mills as they stand next year. The second addition, however, would not be undertaken until the situation is more clearly defined. The statement is made that the company has steadily refused large orders; and it was in order to meet this situation that the management long since ordered the new machinery which is to be in operation before the middle of next year.

This is another indication that the textile industry in Canada has not yet been greatly affected by the business depression.

London's Industrial Prospects

About $2,000,000 worth of industrial and commercial building is assured for London, Ont., next year. Part of this work is to be commenced this fall, but the greater proportion will be carried out next year. The buildings for which plans are already completed or are being made include

the new million-dollar hotel, the Ruggles Truck Co., the Service Truck Co., the Rawley Drug Co., Beatty Bros.' new factory, and the Simmons Bed Co. factory, which it is planned to erect on Adelaide Street. The contracts for some of this construction have been let for some time. In other instances the plans are being completed that tenders may be called shortly. Thus the work which has not yet been started will be hastened early next spring.

Three companies, the names of which have not yet been announced, are looking over western Ontario with a view of locating branch factories. It is understood that one of the firms manufacture hardware, tools, etc., and the other two, automobile accessories.

A company under the name of the Tropical Food and Chemical Co., which will manufacture various products from cocoanuts, has been incorporated with a capital of $1,000,000, and will locate its plant at Kitchener, Ont.

Elcaya Co., of New York, manufacturers of toilet articles, will shortly open a branch factory at Aylmer, Ont. For the past two years the company has been operating a branch at Montreal, Que.

Miscellaneous Notes of Industry

Paulin and Chambers, of Winnipeg, one of the largest biscuit manufacturers in Western Canada, has decided to locate in Regina, Sask. The company is taking over the warehouse of the Prairie Biscuit Co. on Fifth Ave.

On account of the big slump in the shoe trade, the Milton Shoe factory, Milton, Ont., has been forced to close down for a while.

The "Canadian Harvester," product of the Port Arthur Shipbuilding Co., was launched on November 20.

The plant of the Denby Motor Truck Co., Chatham, Ont., has passed into the hands of J. T. Wood and Son, Brussels, Ont., who will move their knitting factory to Chatham.

NEW INCORPORATIONS

Interlocking Cord Tire and Belt Co., Ltd., $1,500,000—Pendennis Gold Mining and Reduction Co., Ltd., $1,000,000—Ottawa Nukol Co., Ltd., $1,000,000—Burkell's, Ltd., $1,000,000

Dominion charters have been granted to the following companies, with head office and authorized capital as indicated:—

Belanger, Freres and Cie., Ltd., Hull, $100,000; Fur Traders, Ltd., Ottawa, $25,000; S. Rosenthal, Ltd., Montreal, $49,000; Perkins Ladd Electric, Ltd., Montreal, $75,000; Manufacturers Trading and Holding Co., Ltd., Toronto, $250,000; St. Lambert Manufacturing Co., Ltd., Montreal, $100,000; Lammers and Masse, Ltd., Montreal, $200,000; Baymac Tire and Rubber Co., Ltd., Grimsby, $150,000; Mattawa Investment Co., Ltd., Montreal, $250,000; Jones Motor Sales, Ltd., Ottawa, $40,000; Engineering Sales and Service Co., Ltd., Montreal, $50,000.

Provincial Charters

Provincial charters announced during the past week have been as follows:—

British Columbia.—Kilpatrick Moryson Motor Co., Ltd., Victoria, $30,000; Van Norman Lumber Co., Ltd., Victoria, $10,000; North Island Logging Co., Ltd., $200,000; Mara Estate, Ltd., Victoria, $10,000.

Manitoba.—Rosedale Pharmacy, Ltd., Winnipeg, $20,000; Pickles, Ltd., St. Boniface, $15,000; Continental Cigar Stores, Ltd., Winnipeg, $500,000; Pendennis Gold Mining and Reduction Co., Ltd., Winnipeg, $1,000,000; Bulloch-Townsley Land Co., Ltd., Winnipeg, $250,000; Van Allen Flax Products, Ltd., Winnipeg, $30,000.

New Brunswick.—Commercial Press, Ltd., Chatham, $9,000; Semi Ready St. John, Ltd., St. John, $20,000.

Ontario.—Mutual Totalizer Co., Ltd., Toronto, $100,000; Modern Implements, Ltd., Walkerville, $100,000; Ottawa Nukol Co., Ltd., Ottawa, $1,000,000; Jobson Industrial Films, Ltd., Toronto, $100,000; Inventors Syndicate, Ltd., Toronto, $300,000; Geo. M. Robertson Knitting Co., Ltd., Toronto, $40,000; Life Protection Association of Canada, Ltd., Toronto, $400,000.

Quebec.—Cremerie Ætna, Ltd., Montreal, $49,000; H. Massicotte and Freres, Ltd., Cap de la Madeleine, $20,000; W. Levesque, Ltd., Bagotville, $20,000; Sovereign Lime Works, Ltd., Montreal, $20,000; Pioneer Children's Wear Manufacturing Co., Ltd., Montreal, $20,000.

Saskatchewan.—Theatrical Club, of Moose Jaw, Ltd., Moose Jaw, $10,000; Monarch Investment Co., Ltd., Regina, $100,000; Saskatoon Grain Co., Ltd., Saskatoon, $100,000; Keystone Oil Co. (Peace River), Ltd., Saskatoon, $200,000; Sodium Sulphate Co. of Saskatchewan, Ltd., Regina, $500,000.

INSURANCE NOTES

Certificate of registration has been granted to the T. Eaton Life Assurance Co., permitting the writing of life insurance in the province of Manitoba.

Jos. Cornell, who for the past five years has been superintendent of the British-American Assurance Co., with office at Winnipeg, Man., has accepted an appointment with the Canada National Fire Insurance Co. as superintendent for British Columbia, with headquarters at Vancouver.

Bell-Irving, Creery and Co., Ltd., Vancouver, B.C., insurance and financial brokers, have taken over the business formerly carried on by H. Bell-Irving and Co., Ltd.

The Agricultural Insurance Company, organized last spring by Saskatchewan farmers, and owned and operated entirely by them, is making rapid progress, and its experience up to the present has been most gratifying. The company has already over one thousand farmer shareholders, its purpose being to provide a means by which farmers of Saskatchewan can do their own business with their own money.

A private bill, incorporating the Midwest Fidelity and Guarantee Co., Ltd., with head office at Regina, was read a second time in the Saskatchewan legislature last week. The petitioners for the bill are Orville F. Seeker, Edmund Simon and John Lorn McDougall. The capital stock mentioned in the bill is $500,000, divided into 5,000 shares of $100 each. The purpose of the company is to carry on the business of life insurance in Saskatchewan.

The Northwestern Mutual Fire Association, of Seattle, Wash., has been granted a registration certificate, authorizing it to write business of fire insurance in Manitoba.

The United States Fidelity and Guaranty Company has been licensed to transact in British Columbia the business of robbery insurance in addition to guarantee, accident, sickness, burglary, plate glass and steam boiler insurance, for which it has already been licensed.

Two companies have been registered for the transaction of life insurance in the province of Ontario, namely, the T. Eaton Life Assurance Company and the Knights of Pythias. The latter mentioned organization, which is a fraternal benefit society, has also been registered to transact sickness insurance.

LIFE INSURANCE SERVICE

THE ultimate success of a Life Insurance Company depends largely upon what its policyholders think of the service they receive. The Continental Life has long since passed this test, and earned a high reputation for paying claims promptly. 1920 will likely prove the best year in the Company's history. Write for booklet. **"Our Best Advertisers."** For Manager's positions in Ontario, apply with references, stating experience, etc., to **S. S. WEAVER, Eastern Superintendent, at Head Office**

1870 —— OUR GOLDEN JUBILEE —— 1920

Two Hundred Million Dollars

This year the Mutual Life Assurance Company of Canada colebrates its golden jubilee by reaching the two hundred million dollar mark. This point in the expansion of The Mutual Life has been reached more quickly than any of its most ardent friends would have believed possible five years ago. But the reason is not "far to seek." During the Great War and the fatal epidemic which followed in its train The Mutual Life paid out in relief of the families bereaved no less than two million, three hundred thousand dollars ***in addition to ordinary claims.*** The benefits of life insurance were thus so clearly demonstrated that an immense demand resulted and the business of The Mutual has developed as much during the last five years as during the preceding forty-five years. The Canadian people suddenly realized the absolute necessity for life insurance and naturally turned to a company well-known, well-established and financially impregnable.

The Mutual Life Assurance Co. of Canada
Waterloo Ontario

THE POPULAR VERDICT

It is sometimes advisable to "follow the crowd"—to accept the popular verdict.

In respect to Life Insurance, for example, it is clear that very strong reasons must have influenced the numerous persons whose applications for protection have, for thirteen successive years, given the Great-West Life the largest Canadian Business of all the Canadian Companies.

Low rates—high profits—liberal policy conditions—have been the reasons.

Ask for information, and for pamphlet showing *Profits* the Great-West Life policyholders are receiving.

News of Municipal Finance

Assessment Commissioner Forman of Toronto Takes Strong Stand Against Any Move Towards Single Tax—Motion to Exempt Buildings Improvements and Business Assessment is Rejected—Provincial Relief for British Columbia Municipalities, as Solution of Taxation Problem, is Receiving Much Attention

A REPORT has been issued by James C. Forman, Toronto assessment commissioner, regarding the proposed exemption of buildings and improvements, business assessment and income, in which he takes a strong stand against any movement towards single tax. While the statements of Mr. Forman were meant chiefly for local interest, their significance is much broader, inasmuch as they touch on a topic which has been the subject of much controversy during the past few years, and which has been the cause of the unenviable financial position of so many western municipalities. Mr. Forman introduces his report with the following remarks:—

"Under Chapter 64, 10-11 George V., 1920, the council of a city, with the assent of the qualified ratepayers, as required by the Municipal Act, may pass a by-law exempting from taxation for all purposes, including school, not less than 10 per cent., or more than 25 per cent. annually of the assessed value of buildings and improvements, business assessment and income, which, after a period of four years, with an annual exemption of 25 per cent., would result in the abolition of these classes of assessment. The proposition is fraught with danger to the future development of Toronto, by reason of lack of revenue from just bases for taxation purposes. The result of the by-law, if carried in its entirety, will make land the only basis of taxation. Its final result will be to have an extraordinarily high tax rate and an ever increasing one. It is recognized by leading authorities on taxation that the real basis of taxation in urban municipalities is 'ability to pay.' Without this principle, many millions of dollars of wealth escape just taxation. Taxation on land only has already proven, after many years of trial, to be a failure in the cities of western Canada."

To back up these statements Mr. Forman has explained to some length the position of a number of western cities. In Alberta he cites Edmonton and Calgary. Both of these municipalities are now experiencing considerable trouble with regard to their tax arrears. Tax sales, which are held annually, and which are supposed to help the situation, are proving more or less a failure, and large blocks of land are becoming the property of the city, with consequent loss of revenue. In British Columbia, Vancouver and Victoria are given as examples. Both cities are now seriously considering new revenue sources. Alderman Sargent, chairman of the finance committee of Victoria, in commenting on the recent tax sale held by the city, makes the remark that "it has conclusively proved that taxation of land has been overdone." Mr. Sargent's opinion was covered fully in a recent issue of *The Monetary Times*. Regina, Moose Jaw and Saskatoon are also exemplified.

Land Assessment and Tax Rates

The report gives figures showing how the land assessment has decreased since 1914, and how the tax rate has risen. The following summary illustrates the instability of relying on revenue from taxation on land only:—

	Land assessment.		Tax rate (mills).	
	1914.	1919.	1914.	1919.
Edmonton	$191,283,970	$62,471,850	17.5	35.3
Calgary . .	119,842,255	57,039,421	20.75	35.25
Regina .	62,636,535	31,124,650	13.00	36.50
Moose Jaw	55,234,596	14,887,533	17.50	34.70
Saskatoon	54,461,350	25,651,015	17.55	35.00

Mr. Forman then illustrates Winnipeg. He says: "Winnipeg, with its population of over 200,000, has not deviated, since 1910, from its assessment of buildings and improvements at 66⅔ per cent. of their value, notwithstanding the wonderfully rapid growth in its buildings and improvements, the assessment rolls showing in 1910, $48,934,150, and in 1914, $81,708,450, or over $32,700,000 increase, and this on a two-thirds valuation of such buildings and improvements in a period of four years."

In conclusion the report remarks: "I think it is fair to say that the expenses of the municipality will increase yearly, and it is likewise fair to say that the increase in land assessment cannot be sufficient to take care of the increasing cost of civic government. Were land the only basis of taxation, the tax rate would be more than doubled, and as municipal expenses increase, the rate must still further increase. Why should buildings and improvements be entirely exempt? Their very presence accounts for a large proportion of the tax rate, such as the cost of police protection, fire protection, schools, parks, free libraries, street cleaning, lighting, etc., all of which are necessary needs to the civic life.

Motion Rejected

The motion to exempt 25 per cent. of the assessed value of buildings, income and business, which was put forth by Ald. Honeyford, was rejected by the city council, following a lengthy debate, in which the above report received consideration. But Ald. Plewman's resolution to apply a graded exemption on dwellings assessed for not more than $4,000 will be voted on at the January elections. This latter proposition is the same as that which was carried by a large majority last January, but could not be applied because the question was not in the language of a clause of the assessment act.

Ald. Plewman, in opposing the single tax scheme of his colleague, said the burden of taxation fell heavily on the poorer classes. Under the plan proposed by himself a real benefit would be given the smaller taxpayers, as their taxes would be actually reduced, while those of the wealthy would be increased proportionally. He quoted statistics in support of this contention. The Dominion Bank at the corner of King and Yonge Streets, which now paid $60,611.25 in taxes on the land and building, would only pay an extra $820.75 per annum under the Honeyford scheme, while under his own scheme the bank would have to pay $3,434.63 more. On the business assessment the bank would effect a saving of $2,588 per annum under the Honeyford plan, but under the alternative plan it would have to contribute another $1,103.27 per annum.

Montreal, Que.—According to figures prepared by P. Collins, assistant city treasurer, out of the total revenue from realty taxes for the current year, amounting to $15,000,000, the sum of $7,968,736 had been collected up to November 1. Mr. Collins further anticipated the collection of another $1,250,000 on this account by January 1 next, making a total approximately of $9,250,000. Referring to the $7,968,736 collected up to the beginning of the current month, Mr. Collins remarked that it is about equal to the amount collected last year during the corresponding period. "The average daily collections on the realty tax," said Mr. Collins, "are now about $40,000, and we expect to collect from November to January 1 another $1,250,000 in realty taxes. This will equal the amount collected last year, which was fairly satisfactory. Interest at 6 per cent. has been charged on these accounts since October 1, and on December 1 the rate will be increased to 7 per cent."

The statement was made by the assistant city treasurer that the amount collected in interest, on taxes and arrears paid since January 1, is $274,926. Mr. Collins said: "We

have collected on the 1919 arrears of taxes since January to November, 1920, $2,416,927. In the same period we have also collected on the 1918 arrears of taxes $1,582,427."

As regards these water and business taxes from August 1 to November 1, for the current year, the city had collected $2,596,000, which amount included the collections during the rush days preceding September 1, when the corporation allowed the usual discounts. Collections on these latter taxes are now at the rate of $10,000 a day, and of the total amount collectible, $3,500,000, he expected there would be less than 7 per cent. of the amount remaining unpaid on January 1.

Victoria, B.C.—The principal topic in British Columbia at the present, with regard to municipal finance, is that of taxation. The press is devoting considerable space to the situation, and some very reasonable suggestions have been put forth. One point that has been discussed more than others is that of provincial relief. This subject has been used extensively as an argument by candidates for the provincial legislature, but apart from that it should be considered as a possible solution of a serious problem. The "Victoria Colonist," in a recent editorial, outlines the situation in a very interesting manner:—

"Property of a total assessed value of $4,670,645 is now held by Victoria as a result of the last two tax sales. Between now and October of 1921, it is possible that some of this property will be redeemed by its former owners, but, on account of the heavy taxes involved, the propects are not bright of the city being relieved of any percentage worth while of this incumbrance. The land that can be assessed in this city for the 1921 taxes has thus decreased in value by upwards of $4,500,000. This means that if this decrease were the only consideration involved, the tax rate for the coming year would have to be increased by nearly four mills in order to provide a revenue equal to that produced during 1920. There are, however, other considerations, including the circumstances which led to the tax rate being kept at a reduced figure last spring in the hope that during the present year the provincial government would come to the relief of municipalities. This hope has failed to materialize.

"Victoria's sinking funds now have a shortage of somewhere in the neighborhood of $2,000,000. So far as there is any knowledge, these funds are in a worse position to-day than they were twelve months ago, and it would seem that the moneys derived through payments of arrears of taxes on the instalment plan, and those accruing through tax sales, have not been devoted, as they should have been, to reducing the deficiencies in sinking funds. During 1921 an effort will have to be made to begin to make good the shortage. That is one reason why, in addition to securing revenue for administration purposes and to meet the interest on bonded indebtedness, further revenue will be required to build up the fund necessary to meet liabilities when they fall due. This will mean there must be an increase in the tax rate, over and above that which is inevitable because of so much land becoming non-assessable.

"No municipal problem looms larger than that of taxation at this time. It is a matter which closely affects Victoria's credit, and the only possible readjustment of the situation lies in provincial aid. We have pointed out before that the immediate plan to be favored should be a per capita grant to municipalities. Subsequently, there should be a thorough investigation into the possibilities of a redistribution of taxation, as between municipalities and the province. It is desirable to get down to a basis where the governments of each will be able to bear their financial burdens, and, indeed, the welfare of the entire province is bound up in a solution being found."

Government and Municipal Bond Market

Very Little Activity During Past Week—Saskatchewan Domestic Loan Has Not Been Very Successful—Alberta's Local Selling Progressing Slowly—Alberta School Debentures Are on the Market

THE activity which has been prevalent in the government and municipal bond market during the past two months appears to have somewhat subsided, and very little is slated for the future.

Saskatchewan's farm loan debentures campaign has just about been brought to a conclusion, but very little has been heard of the result. According to bond dealers here, however, the issue has not met with a very good reception. There is very little surplus money in the west just now, owing to the fact that many farmers have still large stocks of their products on hand, and those that have sold out have done so at prices very much lower than was formerly expected. Then again, as one bond dealer points out, if the farmer wishes to borrow money he has to pay 6, 7, and perhaps 8 per cent., so that it is not likely that he is going to lend very much of his surplus funds at 5 per cent.

Alberta's domestic loan is progressing slowly, subscriptions now nearing the $500,000 mark. It is understood that a new advertising campaign is to be put on shortly to dispose of the other half million.

Victoria, B.C., last week discussed with local bond dealers the advisability of making a loan to meet the initial payment on the Johnson Street Bridge and the bank overdraft. Both these accounts will have to be met shortly, but it is understood that bond dealers do not favor a bond issue.

The Irrigation Loan

It is now more than a month ago that farmers passed favorably on issuing $5,400,000 debentures for the Lethbridge Northern irrigation district, but the securities have not yet been placed on the market. According to Secretary Dunning, enquiries have been received from Vancouver, Winnipeg and Toronto concerning the issue, but it is understood that no offers have yet been made.

It is the opinion that it will be some time before the bonds are placed, as the market for that kind of security is not very receptive just now, either here or in the United States.

Coming Offerings

The following is a list of debentures offered for sale, particulars of which have been given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Freeman Twp., Ont..	$ 10,000	7	20-instal.	Nov. 27
Oakville, Ont.	110,000	6½	20-years	Nov. 29
Hamilton, Ont.	260,227.16	5	Various	Nov. 29
Sault Ste. Marie, Ont., S.S. B.	85,000	6	......	Nov. 30

Oakville, Ont.—Tenders will be received until November 29, 1920, for the purchase of the following 6½ per cent. 20-year debentures: $45,000 for waterworks, $35,000 for public school, $16,000 for highway, $15,000 for fire hall. P. A. Bath, town clerk.

Hamilton, Ont.—Tenders will be received until November 29, 1920, for the purchase of the following debentures: $66,275.68 5 per cent., 9-instalments; $48,487.87 5 per cent., 19-instalments; $145,463.61 5 per cent., 19-instalments. Total,

Victory Bonds and the Average Man

Freedom from care and convenient interest collection are the principal factors that should govern the choice of investment by the average man.

No other security possseses these qualities in a greater degree than Victory Bonds, while the interest return, which ranges from 5.67% to 6.55%, is the highest that has ever been obtainable from securities of the Dominion.

Write for our pamphlet entitled "Some Victory Bond Questions and Answers." It will interest you.

TORONTO -:- CANADA

$260,277.16. The securities are dated March 1, 1920. The original issues were for 10 and 20-instalments, but one instalment of each has already been sold.

Alberta.—School debentures to the value of about $200,000 are in the market, the Department of Education being prepared to offer that amount of local school district securities to private buyers. Though the outside bond market is at present in an unsatisfactory condition, a considerable activity is reported in the way of individual sales to small investors, and it is from this quarter that the department expects the chief demand for further debenture issues. The bonds are selling at par at 8 per cent.

Debenture Notes

Roseisle, Man.—Ratepayers have given their approval of borrowing $20,000 for school purposes.

Daly R.M., Man.—On December 22 next voting will take place on a by-law to raise $141,338 by way of debenture issue for good roads.

East Kildonan, Man.—On December 4 ratepayers will be asked to vote on a by-law, authorizing the issue of $15,000 debentures for a fire hall.

Hamilton, Ont.—The city engineer has asked the city council to submit a by-law to ratepayers, authorizing the raising of $400,000 for a new reservoir.

Montreal, Que.—Commissioner Marcil has given notice of a motion to borrow $10,000,000 in anticipation of the revenue to be realized from all sources in 1921.

Hamilton, Ont.—A by-law asking the ratepayers to vote $5,762,990 for civic gas plant will be prepared for submission in January. The Board of Control has decided to issue 30-year debentures bearing interest at the rate of 6 per cent. if the by-law is passed.

Edmonton, Alta.—Formal approval has been given to the following proposed expenditures, and on December 13 ratepayers will be asked to give their sanction: $10,000, paving; $20,000, incinerator; $600,000, telephone extensions; $375,000, power plant; $20,000, addition to market building.

Bond Sales

Smith's Falls, Ont.—Harris, Forbes and Co., Inc., have purchased $9,200 6½ per cent. 20-instalment debentures at a price of 98.37.

Shawinigan Falls, Que.—An issue of $211,500 5½ per cent. 5-year debentures has been sold to the Municipal Debentures Corporation, Versailles, Vidricaire and Boulais and Credit Canadien, Inc., at a price of 95.

CANADIAN NORTHERN RAILWAY BORROWS IN NEW YORK

Purchase of $25,000,000 20-year 7 per cent. bonds of the Canadian Northern Railway, guaranteed unconditionally as to principal and interest by the Canadian government, is announced by William A. Reid and Co. The bonds are dated December 1, 1920, maturing December 1, 1940, and are being offered at par.

Associated with William A. Reid and Co. in the public offering are the National City Co., the Guaranty Trust Co., Lee, Higginson and Co., the Bankers' Trust Co., and Blair and Co., Inc., all of New York, and the Continental Trust and Savings Bank of Chicago. The present transaction constitutes the second large piece of Canadian railroad financing conducted in the New York market this fall, an issue of $25,000,000 Grand Trunk Railway 20-year 7's having been offered early in October and over-subscribed in a few hours.

The final hearing of the express rates case, sittings upon which have been held throughout the country by the Dominion Railway Commission, will take place in Ottawa on Wednesday, December 1.

ANOTHER ONTARIO LOAN?

Several reports were in circulation this week regarding another loan by the province of Ontario. It is understood that some bond dealers were in conference at the parliament buildings regarding this matter, but as yet nothing definite has been given out. The province has a great deal of new financing to do in the future, so that it is reasonable to expect a new bond issue at any time.

LOAN COMPANIES MUST PREPARE STATEMENTS

The Ontario Department of Insurance has drafted a form in which loan companies must publish their annual statements. A letter sent out by Mr. V. Evan Gray, registrar of loan corporations, contains a copy of the form and instructions.

A copy of the company's annual statement on the prescribed form must be sent to every shareholder and debenture holder resident in Canada, and every depositor of the corporation whose deposits exceed $100. The form has been drafted by a joint committee from the companies and from the department.

BOND HOUSE OPENS SEATTLE BRANCH

Arrangements have been concluded by the British-American Bond Corporation, Ltd., Vancouver and Victoria, B.C., for the opening of a branch at Seattle, U.S.A., in the L. C. Smith Building, to take care of the company's Washington business. The increasing demand for high-grade Canadian provincial and municipal securities has necessitated the opening of an office so that the company may keep its American clientele advised as to the possibilities of investments in the securities handled.

For the present the Seattle office will be under the supervision of Mr. A. C. Flumerfelt and Mr. J. H. Talling, who will be working in conjunction with the firm's American correspondents, the Seattle National Bank.

BANKERS' TUTORIAL CLASSES

Last winter's session of tuterial classes, held under the auspices of the Toronto Bankers' Educational Association, met with such pronounced success that the 1920-21 session just opened has been looked forward to with enthusiasm. The new session, which opened the week beginning October 11, consists of two terms of ten weeks each, the autumn session occupying the period from October 11 to December 18, and the spring session beginning January 31 and ending April 16. These classes are open to all officers of Toronto banks who support the association, and those who wish to devote some of their spare time to study have the option of selecting one of four courses.

The first item of the provisional syllabus covering this winter's study is "Canadian History and Government," the tutor for this course being W. Stewart Wallace. Mr. Wallace's method will be to retrace the history of constitutional government from the present to the past, as he believes this order of study will be more beneficial to bank officers than the conventional treatment which proceeds according to chronology. "International Trade" is the subject of the second course, with H. E. Manning as tutor. The development of trade will be traced from mediaeval times and the main theories and problems of modern international trade considered. Under the tutorship of Harold Foster, the third course is on "Company and Commercial Law," under two headings (a) Mercantile Law and (b) Municipal Law. A fourth course, on "Economic Geography and Commercial Development," has also been arranged for under the direction of C. N. Cochrance, the tutorial secretary.

CORPORATION SECURITIES MARKET

Slightly Better Appearance Presented by Canadian Stocks—Trading Again Diminished—Saraguay Preferred Shares Redeemed

A SLIGHTLY better appearance was presented by Canadian stocks during the week ended November 24, but there was no indication that liquidation has entirely spent itself, or that prices are on the upgrade. The market is still somewhat uncertain and traders are in a waiting attitude. Canadian commodity values have depreciated rapidly, but the drop has not been nearly so severe as in the United States, so that a further decline here would make itself felt in the stock market.

Then again, the money situation is still unrelieved. In the United States last week there was an appearance of easier money, the call rate ruling chiefly at 6 per cent., and going as low as 5 per cent., while the federal reserve bank statement showed a substantial advance in gold reserve. There has been no such indication here, however.

Trading has again been reduced to very small proportions, as illustrated by the following figures:—

	Montreal		Toronto	
	Listed stocks	bonds	Listed stocks	bonds
Thursday	8,393	$ 21,100	1,736	$10,600
Friday	8,349	16,800	1,341	16,300
Saturday	7,488	4,500	1,585	4,600
Monday	5,195	40,800	645	7,900
Tuesday	6,799	21,400	2,012	13,400
Wednesday	4,998	11,700	1,329	13,100
Totals	41,222	$116,300	8,648	$65,900

The figures for the previous week were: Montreal, listed stocks, 81,770; bonds, $172,900; Toronto, listed stocks, 19,206; bonds, $143,400.

Firm Unlisted Market

A. J. Pattison, Jr., and Co., members of Toronto and Montreal Stock Exchanges, in commenting on the market for the past week, called attention to the fact that while the markets of Montreal, Toronto and New York were steadily declining, the unlisted stocks, with but few exceptions, held firm. There appears to be a growing desire on the part of the holders of theatre shares to dispose of their stock in a gradually receding market. A strong demand developed for bonds of the better industrial class. Offerings which have been on the market for weeks and which were thought to be nigh in price, have been absorbed.

Saraguay Preferred Shares Redeemed

The Montreal Public Service Corporation has redeemed at par all the outstanding preferred shares issued in 1911 by the Saraguay Electric and Water Co., and at the same time has paid off the accumulated dividends on the 6 per cent. preferred stock up to November, 1920. The total payment amounted to over $237,000, and thus the Montreal Public Service Corporation is relieved of a substantial indebtedness.

This corporation, which was founded in 1908, is a consolidation of the Saraguay Electric and Water Co., the Dominion Light, Heat and Power Co., and the St. Paul Electric Light and Power Co. It owns the distribution system of the Canadian Light and Power Co., and operates, under lease, the plant and distribution system of the Central Heat, Light and Power Co.

In 1912, when the general consolidation above referred to, took place, the company was serving about 5,000 customers, while at present the company is now serving nearly 14,000 customers. The company has a contract with the Montreal Tramways Co. for a period of 50 years dating from November 2nd, 1915, to furnish electric power to the Tramways Co., and under this contract the company is now furnishing a total of over 10,000 h.p. to six different substations on the Island of Montreal. The company also furnishes the street lighting in several wards.

Dividends and Bonuses

Excellent earnings of the Dominion Glass Co., for many months past, have enabled the directors to increase the dividend on common shares from 4 to 6 per cent.

A bonus of 5 per cent., has been declared by the Woods Manufacturing Co. This has been a usual event ever since December, 1918.

The Imperial Oil, Ltd., has declared an extra dividend of $1.50 per share, to be paid in Victory bonds, as well as the regular quarterly dividend of 75 cents. The bonus will be paid out of the 1934 Dominion of Canada Victory bond issue (fractions to be adjusted in cash) on December 18 to shareholders of record December 15. The regular dividend of 75 cents per share will be payable on November 30 to shareholders of record November 23. The par value of Imperial shares is now $25, and the total disbursements to shareholders this year would, therefore, be $4.50, or equivalent to 18 per cent.

Following the meeting of the directors of the Quebec Railway, Light, Heat and Power Co., at Montreal on November 23, announcement was definitely made that the bond interest for the second time this year will be paid on the due date—in this instance December 1—instead of delaying payment as formerly.

Shareholders of Sherwin-Williams Co., of Canada, Ltd., have been advised that the common stock of the company has for the first time since its issue been placed on a dividend basis. The initial disbursement of 1½ per cent. for the quarter ended November 30 will be made on December 31 next to shareholders of record of December 15. This announcement was made following the issue of an excellent annual statement, figures of which are shown elsewhere in this issue.

The Imperial Bank of Canada announces the organization of a new business, publicity and service department, with J. McNeil, who has been inspector for several years, in charge as manager. This department aims to improve the service for the bank's customers, and among other things will issue a monthly letter on the business outlook, etc.

ADVICE

UNWISE investments can oftentimes be avoided by seeking the advice and judgment of those expert in gauging the trend of financial affairs.

There is no difficulty in securing such advice from us—advice that is based on the matured experience of men who have devoted years to the study of every phase of investment finance.

In all cases where financial advice is sought we can place at your disposal the service of an organization competent to guide you with wisdom and forethought.

Every reasonable precaution is taken to ensure our clients against diminishment of values, by frequent analysis of conditions governing individual investments.

MAY WE ADVISE YOU?

OLD MOLYBDENUM CASE SETTLED

The case of Stewart *et al* vs. the Molybdenum Mining and Reduction Co., Ltd., involving the ownership of the conundrum claim on the company's property, has just been settled by the British Columbia Supreme Court, by dismissing the action. Chief Justice Hunter says in his judgment:—

"In this case I have had the advantage of a complete and careful argument by both the learned counsel engaged, and it was my intention to go fully into the points raised, but circumstances have combined to prevent my doing so, and I must, therefore, content myself with merely stating my conclusions.

"I think that the plaintiff Hayes had no right of action against the company. As to the other plaintiff, I am of the opinion that the Conundrum claim lapsed on June 13, 1915, and was not revived by the Exemption Act, 1915. The Conundrum ground was re-located and recorded by Riel and his associates, who conveyed to the company, but the plaintiff rests his action mainly on the agreement of August 19, 1915, by which the co-owners of the Conundrum and Hayes, the owner of the Blackwell, agreed to sell those claims for $35,000 to Riel.

"It is said that the company is bound by its terms on the ground that it had notice of it, but it was not a party to it nor did it have express notice of it, and I find that neither the Stilwells nor the company ever recognized anything more than a moral obligation to pay to the purchase price if it came out of the ground. Moreover, it appears to me that the action of Riel, in locating and dealing with the new claims, was acquiesced in by the plaintiff, and this view is strongly corroborated by the giving of the subsequent agreement to Riel pending the litigation. At any rate, the plaintiff stood by while large sums of money were expended on the ground without notifying either the Stilwells or the company that he had any claim against them or it, and the principle applies that if a man is silent when in fairness he ought to speak he must remain silent when in fairness he ought not to speak."

Condensed Advertisements

"Positions Wanted," 3c per word · all other condensed advertisements 5c. per word. Minimum charge for any condensed advertisement, 65c per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

DEBENTURES FOR SALE

TENDERS FOR PULPWOOD AND TIMBER LIMIT

Tenders will be received by the undersigned up to and including the 18th day of December, 1920, for the right to cut forest products on an area in the English River Water Shed.

Tenderers shall state the amount of lump sum cash bonus they are prepared to pay, which sum shall be in addition to the rates of Crown Dues fixed by Order in Council dated 27th day of March, 1920.

Parties making tender will be required to deposit a marked cheque payable to the treasurer of the Province of Ontario for the entire amount of the lump sum bonus specified above, which lump sum shall be forfeited to the Crown if the successful tenderer does not enter into an agreement as provided in conditions of sale.

The highest or any tender not necessarily accepted.

General terms and conditions of sale may be had by applying to the undersigned.

BENIAH BOWMAN,
Minister of Lands and Forests.

Toronto, September 24th, 1920.

Sherwin-Williams Had Fine Year—Atlantic Sugar Shareholders to Vote on New Financing Plans—Holt Renfrew Sales Increase—Satisfactory Improvement in Winnipeg Railway Earnings

Quebec Railway, Light, Heat and Power Co.—The finance committee of the city of Quebec has passed favorably on the application of the company to increase its gas rates from $1.25 per thousand cubic feet to $1.75.

Holt, Renfrew and Co., Ltd.—Total sales during the nine months ended October 31, 1920, amounted to $2,506,768, an increase of $211,950, or, approximately 9 per cent. over those for the corresponding period last year. The greatest increase was reported in Montreal, where business grew by some 22 per cent. The outlook for the balance of the company's fiscal year, which ends on January 31 next, is stated to be entirely satisfactory, the demand for Christmas goods already being in evidence and well up to that of last year.

Winnipeg Electric Railway Co.—A very satisfactory improvement is shown in the earnings' statement of the company for the nine months ended September, 1920. The figures are as follows:—

	1920.	1919.	Increase.
Gross earnings	$3,796,337	$2,912,851	30.33%
Operating expenses ...	2,852,966	2,386,534	19.5 %
Net earnings	$ 943,371	$ 526,317	79.2 %

The company received new fares and gas rates which only took effect on September 1, so that the above figures do not reflect the improvement which will take place owing to these advances.

In these columns last week figures of the company's bonded indebtedness were quoted. The fact that the $750,000 gold notes outstanding were part of the total bonded debt of $5,750,000 was not distinguished, while it was also omitted that $289,000 of 5 per cent. first mortgage bonds are held by sinking fund trustees.

Atlantic Sugar Refineries, Ltd.—Following a meeting of the directors of the company in Montreal on November 24, it was announced that a special meeting of shareholders would take place on December 1. At this meeting the position of the company would, so far as possible, be laid before the stockholders, who would be asked to ratify several new by-laws passed by the board, enabling the latter to proceed with new financing plans necessary by reason of the demoralization which has existed for some time past in the raw sugar market.

By-laws to be passed upon are: (a) To borrow money on the credit of the company; (b) to limit or increase the amount to be borrowed; (c) to issue the bonds, debentures, debenture stocks, or other securities of the company for sums not less than $100 each, and to pledge or sell the same for such sums and at such prices as may be deemed expedient; (d) to hypothecate, mortgage or pledge the real or personal property of the company, or both, to secure such bonds, debentures, debenture stocks, or other securities and any money borrowed for the purpose of the company.

Another item is: "Also for the purpose of considering and, if thought fit, of sanctioning and confirming by-law G passed by the directors on the 24th day of November, 1920, being a by-law to authorize the directors to exercise the borrowing powers of the company and to grant securities."

Sherwin-Williams Co. of Canada, Ltd.—The annual report for the twelve months ended August 31 last discloses earnings of $1,281,328, compared with $990,919 a year ago, and $1,162,951, the 1918 figures, which formerly constituted the best year in the company's career. After all deductions, including depreciation, bond interest, dividends on preferred stock and provision for government taxes, there remained available for application on the $4,000,000 common shares outstanding an amount of $733,909, against $350,769 last year and $586,584 in the preceding period. The 1920 showing in this respect is equal to 18.3 per cent., compared with 8.7 per cent. in 1919 and 14.7 in 1918.

The net earnings of the year, together with the surplus carried over from the 1919 period, brought the total surplus up to $3,417,961, which, with the special reserve of $100,000 shown in the statement, is equal to, approximately, 88 per cent. on the total common stock capitalization of the enterprise.

The balance sheet shows that current assets exceeded liabilities of a similar classification by $3,401,379, compared with $3,583,766 at the end of the 1919 period and $2,924,463 in 1918. The slight reduction in respect to the above was due almost entirely to the cutting down of inventories, which at $2,403,944 were lower by almost $540,000 than in the 1919 showing. Other changes in the balance sheet includes the reduction by rather over $600,000 in property assets, this reduction being due to the exclusion of those of Lewis Berger and Sons, Ltd., now carried under the heading of "Investments." The latter are given at $2,750,216, or more than double the amounts shown in the statement of last year. Reserves and surplus now amount to the sum of $4,269,451, a gain in the year of $723,421, and represent almost 50 per cent. of the entire funded debt and capitalization.

BRITISH COLUMBIA BOARDS OF TRADE

The second meeting of the Associated Boards of Trade of South-east British Columbia took place in Fernie on October 27th. This body is formed of the boards of trade of the towns of Fernie, Cranbrook, Creston, Windermere and Golden, but, owing to unforeseen difficulties, the boards of Creston and Golden were not represented at the meeting.

Several resolutions dealing with improvement of roads, the extension of telephone connections and asking the government to lend financial aid to irrigation projects, which would bring into cultivation the large areas now lying waste in the Kootenay valley, were favorably disposed of. Speaking upon the question of irrigation, R. Randolph Bruce strongly urged that united action should be taken, asking the provincial government to take up the proposed irrigation of these lands, and gave the convention valuable information regarding the possibilities of the district resulting from the installation of an adequate irrigation system. This would require such an outlay of money as to put it beyond the reach of private enterprise, but by lending its financial credit the province would be in line to receive ample returns for such aid, and the district would be brought within the producing list of lands, and the increase in population and the production of agricultural and dairy supplies would return many times the value of the moneys expended.

Another resolution, coming from the Windermere board, asked the provincial government to come to the aid of those settlers who had been induced to settle upon the lands in the Baynes Lake district by aiding in laying water from the Elk River upon those lands where any failure that had been experienced was because of the lack of sufficient water and not from any climatic or soil difficulties.

The private company which had undertaken that enterprise was unable to finance so large a proposition, and in consequence the district had been given a black eye, wholly undeserved, which had been a detriment to the district in general. This resolution, as well as that asking financial aid from the province, was unanimously endorsed by the convention.

Next year's meeting will be held in Cranbrook.

DIVIDEND NOTICES

BANK OF MONTREAL

Notice is hereby given that a Dividend of **Three Per Cent.** upon the paid-up Capital Stock of this Institution has been declared for the current quarter, payable on and after **Wednesday, the First Day of December** next, to shareholders of record of 31st October, 1920. Also a **Bonus of Two Per Cent.** for the year ending 31st October, 1920.

By order of the Board.
FREDERICK WILLIAMS-TAYLOR,
General Manager.
Montreal, 19th October, 1920. 262

DIVIDEND

IMPERIAL OIL, LIMITED

Notice is hereby given that a dividend payable in fifteen-year 5½ per cent. Gold Bonds of the Dominion of Canada, 1919-1934, at the rate per share of $1.50 at par of said Bonds (fractions to be adjusted in cash), has been declared by the Directors of Imperial Oil, Limited, and that same will be payable in respect of shares specified in any Share Warrant of the Company within three days after Coupon Serial Number 6 of such Share Warrant has been presented and delivered at **The Royal Bank of Canada, Church Street Branch, Toronto, Ontario,** such presentation and delivery to be made on or after the 16th day of December, 1920.

Payments to holders of shares of record and fully paid up at the close of business on the 15th day of December, 1920 (and whose shares are represented by Share Certificates) will be made on or after the 18th day of December, 1920.

The Books of the Company for the transfer of shares will be closed from the close of business on the 15th day of December, 1920, to the close of business on the 18th day of December, 1920.

BY ORDER OF THE BOARD. 295

DIVIDEND

IMPERIAL OIL, LIMITED

Notice is hereby given that a dividend of seventy-five cents (75c.) per share in Canadian funds has been declared by the Directors of Imperial Oil, Limited, and that the same will be payable in respect of shares specified in any share Warrant of the Company within three days after the Coupon Serial Number Five of such share warrant has been presented and delivered to The Royal Bank of Canada, Toronto, Ontario, or at the office of Imperial Oil, Limited, Toronto, Ontario, such presentation and delivery to be made on or after the 30th day of November, 1920.

Payment to Shareholders of record and fully paid up at the close of business on the twenty-third day of November, 1920 (and whose shares are represented by Share Certificates) will be made on or after the 30th day of November, 1920.

Shares subscribed for in accordance with the Company's circular of January 12th, 1920, will rank for the above dividend pro rata in the proportion which the amount paid up on such shares from time to time bears to the full price at which such shares were issued, viz., seventy-five dollars ($75.00) per share, but no dividend will be actually paid by the Company to subscribers until their shares shall have been fully paid for and Share Certificates issued therefor.

The Books of the Company for the transfer of shares will be closed from the close of business on the 23rd day of November, 1920, to the close of business on the 30th day of November, 1920.

BY ORDER OF THE BOARD. 294

UNION BANK OF CANADA

DIVIDEND No. 135

Notice is hereby given that a dividend at the rate of 10% per annum upon the Paid-up Capital Stock of the Union Bank of Canada has been declared for the current quarter, and that the same will be payable at its Banking House in the City of Winnipeg, and also its branches, on and after the First day of December, 1920, to shareholders of record at the close of business on the 15th day of November next.

The Transfer Books will be closed from the 16th to the 30th day of November.

By Order of the Board.
H. B. SHAW,
General Manager.
Winnipeg, October 22nd, 1920.

Notice is also given that a bonus of 2% has been declared on the Paid-up Capital Stock, payable to shareholders with the dividend referred to above.

By Order of the Board.
H. B. SHAW,
General Manager.
Winnipeg, October 30th, 1920. 284

McINTYRE PORCUPINE MINES, LIMITED
(No Personal Liability)

DIVIDEND No. 12.

Notice is hereby given that a dividend of 5 per cent. (5%) on the issued Capital Stock of the Company will be paid on the 1st day of January, 1921, to Shareholders of record at the close of business on December 1st, 1920.

By Order of the Board.
M. P. VAN DER VOORT,
Secretary-Treasurer.
Dated at Toronto, November 18th, 1920. 293

THE CANADA LANDED AND NATIONAL INVESTMENT COMPANY, LIMITED

DIVIDEND No. 135

Notice is hereby given that a Dividend of Two and One-half Per Cent. (being at the rate of ten per cent. per annum) on the amount paid up on the Capital Stock of this Company has been declared for the quarter-year to the thirty-first day of December, 1920, and that the same will be payable at the office of the Company, 23 Toronto Street, Toronto, on and after the third day of January, 1921, to Shareholders of record at the close of business on the sixteenth day of December, 1920.

By Order of the Board.
EDWARD SAUNDERS,
Managing Director.
Toronto, 24th November, 1920. 296

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended November 19th:—

O'Brien Mine, 64,890; Dominion Reduction Co., 83,000. Total, 147,890. The total since January 1st is 24,400,596 pounds, or 12,200.2 tons.

RECENT FIRES

Retail Business Section of Quebec Suffered a Loss of $500,000—Steamer "Ballena" at Vancouver Destroyed, $175,000—Mechanics' Institute Building in Montreal Destroyed, $100,000

Aylmer, Ont.—November 17—A fire, causing a loss to the extent of $4,000, occurred at the corner of Thomas and Parker Streets, destroying two houses, tenanted by Peter Rourgeau and John Thibault.

Brantford, Ont.—November 22—An explosion of unknown origin completely gutted the L.E. and N. power substation with a loss estimated at $75,000, covered by insurance.

Bridgewater, N.S. — November 15 — Three dwellings, owned by White Ford Turner, A. MacDonald and James Co., were destroyed by fire, which is believed to have been from incendiary origin.

Canora, Sask.—November 20—Fire, which was caused by the upsetting of an oil lamp, did damage amounting to $6,000 to the store of George Walsum, Water Street. The loss is not covered by insurance. There was one fatality.

Fairville, N.B.—November 18 — Damage estimated at $50,000 was done by a fire which destroyed the fire station, and which included the jail and court house, Orange Hall and a number of houses.

Kenora, Ont.—November 21 — The Kenora municipal offices and telephone exchange was damaged by fire. The total loss is $14,000, covered by insurance.

Lambeth, Ont.—November 19—A large barn and four other buildings belonging to Norman Bogue, on the Talbot Road, were destroyed by fire. The loss will exceed $10,000, which is partly covered by insurance.

Liverpool, N.S.—November 23—The plant of the Nova Scotia Shipbuilding Co. was damaged by fire. The loss is estimated at $5,000.

Montreal, Que.—November 22—The Mechanics' Institute building, situated near the corner of St. Catharine Street and Atwater Avenue, was damaged by fire. The loss is estimated at $100,000, with $5,000 insurance. The chocolate factory of Baines, Limited, at the corner of Moreau and Forsyth Street, was completely destroyed by fire. Fire, causing about $30,000 damage, broke out in the basement of the Jardin de Danse building at 263 Bleury Street. The fire is believed to have been caused by the furnace.

New Toronto, Ont.—November 19—The overheating of a dry kiln is believed to have started the fire which damaged the plant of the Electric Insulator and Varnish Co.

Quebec, Que.—November 21—Fire losses aggregating over $500,000 was caused by a fire which swept the retail business section. The fire started in the dry goods firm of Marceau and Co., 155 St. Joseph Street. Insurance is carried on only a portion of the burned stock.

St. Lambert, Que.—November 20—The sash and blind factory of C. F. Moore, Ltd., general contractors, and buildings on the waterfront were destroyed by fire. The loss is estimated at $15,000.

Simcoe, Ont.—November 21—The frame building at the rear of Dr. McGilvery's residence was destroyed by fire.

Starbuck, Man.—November 15—Residence of Wilfred Dechene was destroyed by fire.

Stewiacke, N.S.—November 17—The meat market belonging to Frank Taylor was damaged by fire. The loss is $500.

Toronto, Ont.—November 21—Store, tenanted by E. C. McKenzie, 199 Boon Avenue, was damaged by fire. The loss is estimated at $2,700, covered by insurance. A fire broke out in the building at 143 King Street West, causing a loss to the building of $1,000.

Vancouver, B.C.—November 13—The steamer "Ballena," of the Terminal Steam Navigation Co., was destroyed by fire. The loss is estimated at $175,000. One fatality.

CANADA PRAISED BY BANKERS TRUST COMPANY

After Fifty Years, this Country Stands High as Regards Water-Powers, Railways, Pig Iron Production and Trade

"THE Land of Achievement" is what the Bankers Trust Company, of New York, terms Canada in a study devoted to the resources, the trade, the financial and the physical development of the Dominion, which has just been published by the bank under the title, "The Dominion of Canada." The book was prepared with the assistance of John MacKay, of John MacKay and Co., accountants, Toronto.

"The characteristic of the Canadian people which most impresses the observer," says the Bankers Trust Company, "is that of determination and achievement. Vision and courage were necessary to bring the Canada of 1867 and the provinces of Nova Scotia and New Brunswick, with their sparse, combined population of less than three million, into a confederation. It took courage, in 1870, to bring into the confederation the almost limitless territory stretching westward to the Pacific and northward to Hudson Bay and the Arctic Seas.

"It took courage to link together this empire, greater in square miles than our own United States, by railroads running into the untrodden wilderness. For nearly fifty years the men of Canada were busy conquering the wilderness and bringing into full flower a representative government, admirably adapted to meet the problems of a great democracy.

Able Business and Political Leaders

"Needless to say," continues the Bankers Trust Company's study, "such a record of achievement as is afforded by the history of Canada during the fifty odd years which have elapsed since 'Dominion Day,' 1867, is not due to chance. Canada has been fortunate during this period in having in political life and in business a group of able, resourceful, morally strong, patriotic men who were not alone capable in action, but capable in leadership. They could not have achieved if there had not been working with them a splendid body of intelligent, determined and resourceful citizenry, men and women of moral force and courage, such as a new country alone seems to develop.

"As an evidence of Canada's phenomenal development, the latest available figures indicate that the Dominion, in relation to nine other industrial countries, now stands first in area, second in potential water power, third in total railway mileage, fifth in total exports, sixth in pig iron production, total exports and foreign trade, and eighth in population.

"The friendship between the Canadian people and ourselves is traditional. Canada interchanges more business with us than with any other nation, not excepting the United Kingdom. We have only one greater customer than Canada, and that one is the United Kingdom. Canada has scarcely begun to grow. Her friendship and her business will be increasingly worth while. We have nothing to fear from her efforts to develop her resources and her manufacturing enterprises. Such development will only increase her need for greater quantities of goods from outside and her ability to pay for them."

VANCOUVER ISLAND TIMBER LIMITS SOLD

Following their inspection of the timber limits owned by the late Mr. Norgeau, on the west coast of Vancouver Island, the Norwegian interests, representatives of which were recently in Victoria, have taken up the option they had on the property and the purchase will be immediately consummated. The price paid is stated to be in the neighborhood of $250,000. It is the intention of the new purchasers to proceed with the erection of mills, etc., to the end that shipments may shortly be made of the lumber to Norway.

J. H. Hawthornthwaite, of Victoria, and W. White, of Vancouver, trustees under the will of the late Mr. Norgeau, negotiated the sale of the limits with the Norwegian interests.

October Bank Statement Shows Business Deflation

Current Loans Reduced by Twelve Millions—Call Loans Also Lower — Usual Reduction in Municipal Advances — Circulation Substanially Increased—Small Advance in Savings Deposits

	October, 1919.	September, 1920.	October, 1920.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$ 705,280,241	$ 677,286,905	$ 687,651,781	— 2.6	+1.3
Deposits after notice	1,262,746,984	1,270,194,097	1,271,275,751	+ 0.7	+0.08
Current loans in Canada	1,104,940,160	1,417,520,756	1,405,401,227	+27.2	—0.8
Current loans elsewhere	160,713,386	202,590,184	193,749,657	+20.6	—0.4
Loans to municipalities	56,116,897	78,103,364	71,374,060	+26.8	—8.9
Call loans in Canada	100,549,390	114,669,611	113,135,902	+13.0	—0.9
Call loans elsewhere	158,194,085	186,962,960	188,367,459	+48.9	+1.1
Circulation	242,509,573	242,988,866	252,882,760	+ 4.2	+4.1

WHILE the October bank statement reveals some unusual changes in some accounts, it does nothing more than reflect the real business condition of the country. The feature was a marked reduction in current loans, in comparison with substantial increases shown in the September exhibit and in the statement of a year ago. The change, although seemingly unnatural, is consistent with the position of the commercial and industrial community. Many merchants and manufacturers, in anticipation of lower prices, are not buying goods, while others are so heavily overstocked that they have reduced their purchases to a minimum. Everybody appears to be selling out, and awaiting the approach of more certain conditions, before engaging in extensive buying. It is readily apparent that under such conditions the natural tendency would be a reduction in loans, as merchants will not require a great deal of money if they are not buying. Another factor which must be taken into consideration is that farmers are now in a position to pay off their loans.

Call Loans

There was a slight decrease of .9 per cent. in call loans in Canada, as compared with an increase of .9 per cent. in September. Since the beginning of the year, the trend of call loans has been regular, but chiefly downward. The following table illustrates the course of both of the Canadian loans accounts during the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
1919—October	$1,104,940,160	$100,549,390
November	1,189,408,423	121,754,469
December	1,207,109,046	125,888,760
1920—January	1,226,962,963	132,015,334
February	1,257,015,902	127,251,919
March	1,322,267,030	128,233,310
April	1,347,238,230	125,644,859
May	1,349,079,981	119,114,493
June	1,365,151,083	115,272,587
July	1,377,276,853	115,360,894
August	1,385,470,153	113,598,923
September	1,417,520,756	114,669,611
October	1,405,401,227	113,135,902

Call loans abroad increased during the month, but the change was not very significant. The monthly movement during recent years is seen in the following figures:—

	1917.	1918.	1919.	1920.
	$	$	$	$
January	155,747,476	132,687,066	140,819,656	170,206,805
February	162,344,556	160,239,494	155,983,681	184,469,882
March	161,616,735	167,296,701	160,116,443	205,202,133
April	159,156,054	179,818,531	155,533,666	206,229,451
May	168,692,675	172,259,879	157,176,325	213,964,182
June	159,309,133	170,034,476	167,236,045	219,214,431
July	151,875,676	167,112,836	178,098,434	203,045,209
August	176,610,625	160,544,990	174,176,578	193,888,245
September	166,480,004	159,680,810	169,532,489	186,962,960
October	151,018,747	157,040,858	158,194,085	188,367,459
November	139,832,552	171,035,732	169,626,880	.. ..
December	134,483,482	150,248,322	172,232,161	....

It is also interesting to note the trend of the loans accounts in October of recent years:—

Oct.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1915	$ 780,785,754	$ 49,612,985	$ 74,574,270	$120,681,624
1916	774,928,222	79,459,621	90,412,023	189,346,216
1917	883,986,860	93,821,865	71,653,719	151,018,747
1918	1,003,593,603	112,869,399	73,685,136	157,040,858
1919	1,104,940,160	160,713,386	100,549,390	158,194,085
1920	1,405,401,227	193,749,657	113,135,902	188,367,459

Savings Deposits

There appears to be a great deal of concern regarding the saving qualities of the people. The October bank statement shows an increase of a little more than $1,000,000 for the month, which does not compare very favorably with previous showings. This may not indicate, however, that the Canadian people are not as thrifty as they were, but perhaps that they are saving more profitably. There are many ways of saving, and many are waking up to the fact that they can earn more than 3 per cent. on their surplus funds. One man has remarked: "I do not see why I should lend my money to the banks for them to invest and make handsome profits on, when I can do that myself and increase my income correspondingly." This undoubtedly reflects the trend of the

Chartered Banks' Statement for October, 1920

thoughts of more than one person, and has been brought about by the education received from our Victory loans.

This factor has not entered very largely into the situation as yet, but may be something which the banks may have to contend with in the future. The banks, however, have demonstrated their ability to meet the demands of the commercial and industrial community, which have been very much in excess of savings deposits during the past year, and are ready to take care of any future condition. The withdrawal of a few millions from the savings accounts would not affect the general economic situation to any great extent, if the money was used to absorb some of the investment securities, which would otherwise go out of the country.

Demand deposits showed an increase of about $10,000,000 for the month, but that account is much lower than it was a year ago. The following table shows the trend of the demand and savings deposits since October, 1919:

	Deposits payable on demand.	Deposits payable after notice.
1919—October	$705,280,241	$1,262,746,984
November	728,657,589	1,137,858,277
December	$703,329,292	$1,138,086,691
1920—January	621,408,024	1,163,297,037
February	620,069,555	1,187,027,307
March	657,412,028	1,197,719,570
April	652,918,760	1,209,573,990
May	645,957,229	1,229,073,515
June	659,622,583	1,243,700,977
July	639,415,025	1,253,170,443
August	640,361,707	1,261,647,732
September	677,286,905	1,270,194,097
October	687,651,781	1,271,275,751

A comparison of these figures during recent years also shows some interesting changes:—

Oct.	On demand.	After notice.	Total.
1915	$392,042,193	$ 701,336,850	$1,093,379,043
1916	489,230,231	814,297,404	1,303,527,638
1917	495,058,449	985,780,850	1,480,849,299
1918	644,220,998	1,076,514,627	1,720,735,625
1919	705,280,241	1,262,746,984	1,968,027,225
1920	687,651,781	1,271,275,751	1,958,927,532

Of the deposit in Central Gold Reserves $11,502,533 is in gold coin; the balance is in Dominion Notes

J. C. SAUNDERS. *Deputy Minister of Finance.*

Advances to municipalities showed a substantial reduction, as is usual at this time of the year. Tax collections have been very satisfactory, according to the latest reports, and many municipalities have been enabled to pay off part of their obligations. Loans to provinces increased by a little over $1,000,000, while the Dominion government increased its credit balance by about $4,000,000.

The greatest amount of notes in circulation was some $10,000,000 ahead of the previous month, while deposits in the central gold reserves increased correspondingly.

Holdings of gold and subsidiary coin were reduced by $1,214,201, but holdings of Dominion notes increased more than five millions. The changes for the month were as follows:—

Gold and sub-coin in Canada	— $ 83,741
Gold and sub-coin elsewhere	1,130,460
Total change ...	— $1,214,201

Dominion notes in Canada	+ $5,145,002
Dominion notes elsewhere	+ 4,369
Total change	+ $5,149,371

Capital and Reserves

A substantial addition was made to the paid-up capital during the month, while slight increases are noted in subscribed capital and reserve. Figures are as follows:—

Banks.	Capital subscribed.	Capital paid up.	Reserve.
Merchants	$49,500	$ 77,750	......
Royal	6,200	146,380	$73,190
Hamilton	40,900	29,000	14,500
Provinciale ..	....	89,239	......
Home	....	18	......
Total	$96,600	$342,387	$87,690

SOLDIERS' INSURANCE APPLICATIONS $3,282,000

875 Policies Were Issued up to November 15, of Which 482 Were to Non-Pensioners—Average Policy is for $3,600

(Special to *The Monetary Times.*)

Ottawa, December 2, 1920.

UP to December 1 there were 1,015 applications for insurance under the Returned Soldiers' Insurance Act. The total value of the insurance represented in these applications is $3,282,000, and the premiums received up to last Saturday night totalled $26,711. In compliance with the act, all the applications have been received since September 1. During September only 160 applications were received, all the others coming in October and November.

Among the applicants are included every rank from private to major-general, although privates form the majority of the policyholders to date. With so many tuberculous soldiers in sanitariums and others throughout Canada suffering from one disability or another, it is a remarkable fact that so far the majority of applicants have been men suffering from no disability whatever. It is estimated that 60 per cent. of those taking policies to date are first-class risks. This statement is made on the ground that three-fifths of those taking insurance have not suffered any illness since their discharge. Of the 1,175 in sanatariums suffering from tuberculosis very few have taken advantage of this insurance.

Of the 875 policies issued up to November 15th, 393 were to pensioners for $1,158,000 and 482 to non-pensioners for $1,722,000. The liability to pensioners is somewhat restricted although they are fully protected. If a pensioner were to die of any other cause than his disability resulting from the war his heirs would not get his pension, and in that case the full amount of the insurance would go to them. If, however, a pensioner does die of his disability, and the pension going to his heirs is greater in capital value than the insurance, the heirs will receive under the act the total value of the premiums paid with compound interest at 4 per cent. If there is a pension the total capital value of which is less than that of the insurance in force, the amount in excess will be paid.

Average Policy is High

Policies are issued for a minimum of $500 and for multiples thereof, not exceeding $5,000. That a large number are taking full advantage of the insurance offered is evident, when it is stated that an average unit of the policies held would be $3,600. Practically all the officers and many privates take full advantage of the opportunities offered by the act. The scale of premiums is below that offered by the insurance companies and slightly higher than that offered to civil servants. The most popular forms of policies are the "all life" and the "20-year pay life" policies.

Premiums are payable monthly, quarterly, half yearly or yearly. As no advantage is given for the longer period payments, the great majority of the policyholders have chosen the monthly payment plan. No woman has yet taken advantage of the plan although the widow of a soldier who died after his discharge or a widowed mother are entitled to avail themselves of it. So far few soldiers who only served in Canada have taken insurance under the act, the name of the act, "The Returned Soldiers' Insurance Act," having probably made them think mistakenly that they could not qualify. No applications have been received from any Frenchman, Italian or American who was resident in Canada before the war and who served in one of the allied armies, although such veterans, too, are eligible. Nurses are eligible, and W.A.A.C's, but V.A.D's, not having been subject to military discipline, would not be eligible. Insurance men have co-operated in the work, advising many men who could not qualify for their companies of the federal plan.

Ontario has furnished the largest proportion of the policyholders. Up to two weeks ago, the policyholders were distributed among the provinces as follows: Prince Edward Island, none; Nova Scotia, twenty risks for $61,000 insurance; New Brunswick, sixteen risks for $63,000; Quebec, 103 risks for $361,500; Ontario, 429 risks for $1,375,500; Manitoba, 84 risks for $254,000; Alberta, sixty risks for $196,000; Saskatchewan, 68 risks for $242,500; British Columbia, 94 risks for $321,500; and the Yukon, one risk for $5,000. No claims have been paid as yet.

Before the opening of parliament next month the government will consider the adding of unemployment insurance to the business it has already established in returned soldiers' insurance, and in civil service insurance. As considerable unemployment is expected through the winter, the minister of labor may urge that unemployment insurance, operated as complementary to the federal system of labor bureaus, would be practical politics.

MORE SHORT-TERM FINANCING FOR EDMONTON

Debentures to be Issued Against Consolidated Tax Areas—Government Urged to Provide More Cars

(Staff Correspondence)

Edmonton, November 29, 1920.

INTERIM annual reports recently published show that the city of Edmonton's position is being steadily improved. There are one or two important features which should be considered in connection with the present discussion regarding the tax levy for the present year which is admittedly of large proportions. The general tax levy was approximately $3,500,000, made up of school and library requirements, $1,200,000 general debt, debenture charges of $850,000, the balance of the levy being required for general municipal purposes (inclusive of discount). In the levy an additional contribution was provided towards the reserve against uncollectible taxes of $150,000, thereby increasing the amount of this reserve to nearly $1,000,000. The school requirements increased by $300,000 over last year. With regard to the important question as to the position of the sinking fund it is understood that the sinking fund instalments for the current year will be fully provided for as at December 31 when a sale of the balance of the short-term debentures authorized against consolidated tax arrears has been effected. The unsold balance of the issue amounts to $1,475,000, and a portion of the proceeds will accordingly be applied in liquidating the sinking fund payments due to the board, so that the fund will be absolutely intact as at the end of the year.

A shortage of cars has been to some extent holding up the movement of grain here. At a convention held in Vegreville on November 4 to discuss this matter, representatives were present from the various agricultural and business organizations along the line of the Canadian National Railway, including the districts served by the towns of Lamont, Chipman, Mundare, Vegreville, Lavoy, Ranfurly, Innisfree, Minburn and Mannville. The territories served by these towns takes in an area running one hundred miles east and west, and fifteen miles south and thirty-five miles north of the Canadian National line.

A careful survey of the situation was made by the convention, and it was estimated (conservatively) that at least 1,660 cars will be required to handle this season's crop. Up to the time of the convention only 328 cars had been supplied, representing the C.N.R. cars of 60,000 lbs. capacity, 360,000 bushels of wheat or 620,000 bushels of oats in all these towns combined. As a contrast to that, it may be pointed out that at one point only, on the Canadian Pacific Railway immediately south of this district, 321 cars representing in C.P.R. cars of 90,000 bushels capacity, 500,000 bushels of wheat or 900,000 bushels of oats, have been shipped. At this one point, which is only typical of those served by the Canadian Pacific, the elevators, through being able to market their grain promptly, have been paying three cents more per bushel for the different grains, and at the same time are obliged to pay one and one-half cent higher freight rate.

THE STATE OF THE BOND MARKET

SINCE Victory bonds were released from control at the opening of business on Monday they have suffered declines of from one to four points. The action of the government was however wise, and should be followed within a few weeks by the repeal of the embargo on the importation of securities which, while it has never been an important factor in determining price levels, is nevertheless an element of disturbance in the market.

The action of the government has been adroit as well as wise. It was the safest solution of a difficult situation which developed from the ill-advised course adopted early in the year. For the market committee, which had hoped to meet the situation by drastic price reductions in August, found bonds again accumulating upon its hands. Another cut of several points would have been necessary, and by letting this reduction take place in the open market rather than at the hands of a controlling committee the government has, so to speak, washed its hands of responsibility for the condition of the market.

The course of Victory bond prices during the past week justifies the contention set forth in these columns since January last, that the control of prices was only in small degree effective. The truth of this is illustrated by the small losses experienced by the bonds, and in comparing the present prices with those previously fixed it must be remembered that the latter did not represent the true state of the market, nor the condiion of supply and demand as reflected in the committee's books. Insofar as the committee traded at artificial prices it also acted unjustly towards the buyers of the bonds. Many cases arose where large purchases were made immediately before a cut in prices, the price being practically forced upon the buyer by the market committee operating at the instance of the finance minister. The operations of the committee were also unfair inasmuch as the exact state of affairs was known only to the members, who were themselves members of bond firms and could therefore adjust their own businesses on the basis of this information which was available to them, but not to other dealers nor to buyers and sellers. The present position of war bonds calls for some readjustment in the prices of other bonds. These will scarcely correspond to the reductions which have taken place in the price of Victories, however, as it was the latter which were out of line with the market as a whole. It is felt now, with good reason, that prices are at rock bottom, and, barring exceptional events, the coming year should bring a slow but steady appreciation in values. In the face of this situation the action of some of the provinces in floating new loans is rather unexpected and to say the least extravagant. To borrow when conditions are favorable, and to retract when rates are high is sound finance. To borrow continually and to pay high as well as low rates is the work of the insolvent. Though the Canadian provinces are still able to meet their obligations some of them are now piling up immense capital charges which will be burdensome in later years.

A REPETITION OF ECONOMIC PLATITUDES

THE conference on international finances held last month at Brussels, Belgium, accomplished little more than the repetition of principles which have been preached but which have not been carried out by the leading governments. The real problems were diplomatically referred to special committees for careful consideration.

The task of this conference, it will be remembered, was to obtain as complete a picture as possible of the economic and financial situation of the world and by an interchange of opinion and experience to assist each country to arrive at the soundest policy possible for dealing with existing difficulties. It was perhaps inevitable, although to many a little disappointing, that no entirely new and acceptable suggestions were made for arriving at definite action which would help what are known as the distressed countries more speedily to obtain financial stability.

There is in fact, in the report, a suggestion of apology for the axiomatic character of some of the resolutions. The conference emphasises that fact that industry must be so organized as to encourage the maximum production, as by such production alone will those improved conditions of life be obtained which it is the aim of every country to secure for its peoples. Above all, to fill up the gap between the supply of and the demand for commodities, it is the duty of every patriotic citizen to practise strict economy and to contribute his maximum effort to the common weal.

The conference strongly endorses the declaration of the Supreme Council of March 8th last—that the states which have been created or enlarged as the result of the war should at once re-establish full and friendly co-operation and arrange for the unrestricted interchange of commodities in order that the essential unity of European economic life may not be impaired by the erection of artificial economic barriers. Each country should aim at the progressive restoration of that freedom of commerce which prevailed before the war, including the withdrawal of artificial restrictions on, and discriminations of price against, external trade.

A SECESSIONIST MOVEMENT IN CANADA

OTTAWA, Toronto—take notice! There are movements on foot to break up confederation, and to cut off industrial and agricultural Ontario from the great outlet at James Bay to the north. Why should Canada trouble itself over the question of Irish self-determination, or federation with Newfoundland and the West Indies, when there is at home a real case of political oppression, misrule, and desire for independence.

Vancouver Island would be loosed from the bonds of confederation, to develop as a free trade colony, to become a manufacturing and financial country like Great Britain. Oscar C. Bass, of Victoria, outlines the secessionist movement in the Island elsewhere in this issue, but he does not specify the exact complaints against the Dominion or provincial governments, or the ways in which connection with the rest of the Dominion has worked out to the disadvantage of the Island.

Northern Ontario also aims to become an independent province, a link between the manufacturing east and the "productive" west, according to Frank H. Keefer, federal member of parliament for Kenora. In describing the movement at a meeting of the newly formed League of Municipalities in Fort William last week Mr. Keefer pointed out that the population of the proposed new province, which would extend from Lake Superior to Hudson Bay and from Manitoba to the White River, would be over 100,000, or more than the population of Prince Edward Island, Manitoba, British Columbia, Alberta or Saskatchewan when they commenced. The new province "Superior" would have ample revenue from Crown lands, minerals, fisheries, timber, succession duties, license fees, fines, and the subsidy from the Dominion.

As a means of impressing upon the respective governments their claims for more attention these secessionist movements may be successful, but further than this their supporters would scarcely be willing to go. The burden of maintaining a provincial government is pressing heavily upon the small provinces. In estimating expenditure upon a district it is easy to overlook many items which are included in overhead. For northern Ontario to become a province or for Vancouver Island to become a Crown colony would retard rather than speed their growth.

THE DANGER OF TOO RAPID DEFLATION

PRICES are now coming down rapidly partly because the public is convinced that they will continue to come down. The effect of such a view is cumulative, for a decline in price instead of increasing purchases only seems to frighten buyers still further. There is a danger, therefore, that the movement may proceed too rapidly.

Present conditions are described by the New First National Bank of Boston as follows: "The country is now economizing, partly because it cannot afford to buy at current prices, partly because increasing unemployment is materially cutting down purchasing power; but mainly because the public senses that the drastic declines in raw materials and wholesale prices must soon result in much lower retail prices. The consumer in increasing degree is restricting purchases, causing a marked slowing down in retail trade. The retailer, still holding some high priced merchandise, is naturally maintaining prices in an attempt to avoid losses on such goods and to secure his usual holiday profits. Meanwhile wholesale houses are successfully conducting bona fide reduction sales which in some instances are being followed by similar sales on the part of retailers. As a stimulent to sales this policy has been remarkably successful and the movement is gathering momentum. The liquidation in the retail market, finally deflating prices to the consumer marks the last stage which must precede a business revival. The situation is not confined to a single country—it is world-wide."

There appears to be a wide difference of opinion as to how long the present movement will continue. In some quarters it is expected that the spring will find business reviving, after a dull winter accompanied by price reductions which will place trading on a sounder basis. In support of this view it is pointed out that there is still a shortage of many kinds of goods, of houses, street railway and other public service equipment, and of power. On the other hand it must be remembered that a shortage which is not accompanied by the ability to purchases does not help business. People never have all they want, because their wants always exceed their resources. Now that hours of labor are shorter than ever before, and general "progress" has been made in securing better conditions of labor, the output of the individual worker has been reduced and his purchasing power can scarcely be as great as it was before the war.

The view that this is but the beginning of an extended downward movement seems to be sounder. The coming winter may be the most severe, witnessing the first big stride in deflation. We hear much talk of the economic cycles which culminated in 1907 and 1914, and the seven year period ending in 1921 may bring a similar experience. In any case this country should weather the crisis safely.

Practically no new industries are now coming to Canada. The changed industrial conditions have reflected themselves quickly in investments of this kind, and some new plants or extensions fully planned or under way have been stopped.

* * *

One encouraging feature of our trade statement for the past twelve months is the fact that exports to practically all countries, except the United Kingdom and France, have increased, showing that Canada is paving the way for a broader market.

* * *

The British Columbia finance minister, in proposing to organize a bank, overlooks the fact that such a bank cannot loan in the province more than its deposits in the province. The chartered banks, on the other hand, do this at times.

* * *

VITAL STATISTICS

One of the census men called at the home of a working man in New York, noted in his neighborhood as a great reader and a wiseacre for statistics. He found the man poring over an encyclopedia.

"How many children have you?" asked the census taker.

"I have just three— and that's all there will be, too," replied the man, looking up from his book of knowledge.

"All right, but why be so positive?"

"According to this book here," said the man with deadly seriousness, "every fourth child born in the world is a Chinaman!"

BANKING SERVICE

Your banking requirements may be entrusted to this Bank with every confidence that careful and efficient service will be rendered. Our facilities are entirely at your disposal.

PERSONAL NOTES

W. R. Allan, of Winnipeg, has been elected vice-president of the Union Bank of Canada, in place of R. T. Riley, of Winnipeg, who has resigned. Mr. Allan is the senior member of Allan, Killam and McKay, general brokerage and steamship agents. He was formerly a director of the Union Bank, and is associated with the Canadian Mortgage Association and the J. H. Sherrard Manufacturing Company. He is also represented on the board of directors of the Scottish Investment and Debenture Company, Dominion Rubber System, Ames-Holden-McCready, and Lake of the Woods Milling Company. G. Montague Black, of Black and Armstrong, insurance and financial brokers, Winnipeg, has been elected to fill the vacancy created on the board of directors.

J. L. Noble has been appointed secretary of the British Columbia Fire Underwriters' Association, and will be hereafter located in the office of the Association in Vancouver, B.C. Mr. Noble's insurance career started with the British America and Western Assurance Company at head office. Subsequently he joined the Canadian Fire Underwriters' Association at Toronto as inspector for the province of Ontario. From this position he was appointed to that of chief inspector of the Western Canada Fire Underwriters' Association at Winnipeg, and in February, 1913, he moved to Victoria as secretary of the Vancouver Island Fire Underwriters' Association. Mr. Noble is an honorary member of the Fire Underwriters' Association of the Pacific Coast, with headquarters at San Francisco, and also a member of the Pacific Northwest Special Agents' Association. He is also a prominent member of the Blue Goose and a member of the National Fire Protection Association, with headquarters at Boston, Mass., on two important committees of which he serves as a member. Mr Noble is secretary of the British Columbia Fire Prevention League, and has devoted a great deal of energy to organizing this association and carry on its work looking to the reduction of the serious economic waste of fire loss. Latterly he has associated himself with A. Z. DeLong, of Terminal Agencies, Ltd., and has become vice-president of that company.

W. S. Fallis, managing-director of the Sherwin-Williams Company of Canada, Limited, has been elected vice-president of that company.

J. O. Herity, editor and one of the proprietors of the Belleville *Ontario*, a local newspaper, has been appointed industrial commissioner of the city of Belleville, Ont., and secretary of the chamber of commerce. He will relinquish newspaper work immediately to take up his new positions.

Clayton R. Burt has been appointed general manager of the Willys-Overland Company, Limited. He was formerly for four years assistant general manager of the Russell Motor Car Company, Limited, and for the past three years has been general manager of the Russell Motor Car Company, of Buffalo.

William MacInnes has been appointed assistant manager for Canada of the Motor Union Insurance Company, Limited. Mr. MacInnes has had considerable experience in both the fire and casualty branches. His early training was with the Commercial Union Assurance Company in Scotland; from which office he went to the London and Lancashire Life and General as fire and accident superintendent at Glasgow. Since coming to Canada Mr. MacInnes has travelled extensively thoughout the Canadian field for various fire companies, and for the past two years has occupied the position of accident superintendent at the Montreal office of the Norwich Union. Early this year Mr. MacInnes was selected by the English head office of the Norwich Union to organize its casualty business in Cuba. Mr. MacInnes is a chartered secretary and is chairman of the Canadian branch of the Chartered Institute of Secretaries, and he is also an associate of the Chartered Insurance Institute of Great Britain.

OBITUARIES

James K. Allen, who for the past twenty-four years has been manager of the Standard Bank of Canada at Newcastle, Ont., died in Toronto this week at the age of 85 years.

T. J. Moore, city manager and clerk, for Guelph, Ont., lost his life last week when he was accidently shot while hunting in the Northern Ontario woods. Geo. D. Hastings, assessor and tax collector, has been appointed to succeed Mr. Moore temporarily.

Malcolm V. MacInnes, chief Canadian government agent in the United States, with offices at Detroit, died on November 21, following an illness of five weeks. Born in Nairn, Ont., in 1859, Mr. MacInnes entered the Dominion government service 37 years ago. For several years he was travelling immigration representative with headquarters in Ottawa. Going to Detroit 25 years ago he instigated the immigration of citizens in the United States to the Canadian northwest. During the past year he arranged for the immigration of 5,700 settlers to Canada.

ROYAL SECURITIES BUYS OFFICE BUILDING

A real estate transaction of some importance in the financial district of Montreal is the purchase by Royal Securities Corporation from the London and Scottish Assurance Co., Ltd., of the six-story office building at 164 St. James Street, corner of St. James and St. John Streets, now occupied by the Corporation. The purchase has been rendered necessary by expansion of the operations of the Corporation. The connection of the Corporation with the building, of which it is now owner, dates from 1910, the first two floors and part of the third floor already being occupied by its staff.

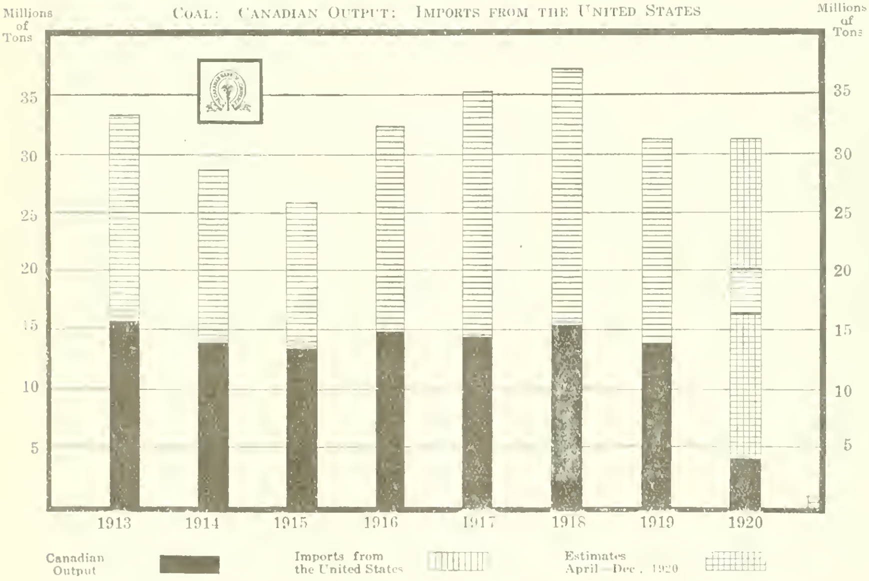
DOMESTIC COAL OUTPUT HAS BEEN STEADY

Imports from United States Show Wide Fluctuations—Present Outlook Not Serious

In a review of present coal situation in Canada the November *Commercial Letter* of the Canadian Bank of Commerce says:—

"Although a coal shortage undoubtedly exists in Canada, there does not appear to be any serious cause for alarm. The dislocation of industry and the labor unrest which followed the armistice and exercised so great an influence upon production in general throughout 1919 have gradually given way to a more normal condition of affairs. This change is reflected in the improved output of coal throughout the Dominion during the present year, and the realization that, for industrial purposes at least, Canada must make better use of her own fuel resources, without too great a dependence upon importations of coal from the United States. It is, in fact, more than likely that any exportable surplus of coal in that country will be largely absorbed by European demands arising through the stoppage of production in Great Britain. During the eight months ending last August Great Britain exported only 18,375,932 tons, as compared with 24,161,423 tons for the corresponding period in 1919 and 18,320,608 in 1913.

COAL: CANADIAN OUTPUT: IMPORTS FROM THE UNITED STATES



Fluctuation in Imports

"The graph given above outlines the history of Canada's coal supply during the last seven years. It will be noted that the fluctuation in the volume imported from the United States is more appreciable than that in the domestic output. Coal imports, which were steadily declining from 1913 to 1915, rose in the following year, under the pressure of war requirements, to the old level, and continued to rise until the cessation of hostilities. In 1919 they fell to the levels of 1913 and 1916, and, from the figures available, it is estimated that the volume for the current year will be even less. The bituminous coal exported from the United States to Canada during the United States fiscal year ending 30th June, 1920, amounted to 10,470,516 tons, as against 16,693,062 tons for the year ending 30th June, 1918, which was a period of exceptional war activity. On the other hand, the exports from that country to Italy rose from 201,220 tons in 1918 to 2,862,773 tons in 1920, while the Netherlands, Switzerland and Sweden made their first appearance as purchasers of American bituminous coal.

"In the case of our domestic production, the most serious drop below normal occurred in 1919, but if the results for the remaining nine months measure up to the standard set by the first quarter of the year (the latest period for which official figures have been issued covering the whole Dominion), this loss should be retrieved by the output for 1920. There are many indications that this will occur. The daily output from the collieries at Glace Bay rose from 9,500 tons in August to 10,000 tons in September and 12,000 tons in October. The mines of British Columbia produced 206,746 tons in August and 236,566 tons in September of this year. In both Nova Scotia and British Columbia there have been strikes and rumors of strikes, but even under these adverse conditions production has kept well up to normal. The vast supply of bituminous and sub-bituminous coal in Alberta is now being used much more generally in all three prairie provinces. Up to 31st August, 758,135 tons of Alberta coal were received and distributed in Saskatchewan, as compared with 405,249 tons for the corresponding period last year. Although the labor situation in Alberta is still very unsettled, the output has actually inreased, assisted in no small degree by the improvement in transportation facilities. From the Drumheller mines 2,733 cars were shipped in September, 1920, as compared with 2,182 in September, 1919, and 1,723 in June of the present year. The output of Alberta for the six months ending July, 1920, was 3,560,323 tons, or 1,431,350 tons more than that for the corresponding period in 1919. The government lignite briquetting plant installed at Estevan is not expected to be in operation before the end of January, 1921. For this reason Saskatchewan lignite is not yet in a position to compete with imported coal."

SERVICE TO FORT McMURRAY

Premier Stewart, of Alberta, returned on November 24th from a ten day trip over the A. and G.W. Railway to Fort McMurray. He says that about $100,000 has been spent by the government in improvements to the waterways system this fall. During the winter 300,000 ties will be got out for repair work, and by next fall he hopes to have a regular service in operation to Fort McMurray.

"The Old Fashioned Executor" is the title of a booklet containing a series of advertisements by the National Trust Company, pointing out many ways in which the administration of estates has been improved by modern trust company methods.

PRICES DOWN IN NOVEMBER

The index number of wholesale prices, constructed by Professor Michell, of McMaster University, based on 40 commodities, 20 foodstuffs and 20 manufacturers' goods, stood at 233.1 for the month of November, a decline of 3.9 per cent. over the previous figure of 242.1 for the month of October, and a decline of 21.8 per cent. over the peak of 298.3 reached in May of this year. "Among the manufacturers' commodities, the following declines were registered," says Prof. Michell: "Rubber, wool, cotton, hides, iron, galvanized sheets, silver, lead, copper, tin and oak. Leather, zinc, cement, paints, pine and hard maple remain unchanged, while newsprint advanced fractionally. Among the foodstuffs, flour, beef, mutton, pork, bacon, lard, sugar, rice and canned peas dropped, while white fish, cheese, tea, coffee, beans, canned tomatoes, oatmeal and tapioca remain unchanged. Butter, potatoes and eggs advanced with the season, as was to be expected. The deflation of prices proceeds with perfect regularity, and with the exception of sugar and wheat, the markets show no sign of breaking badly. There is every reason to expect a steady decline through the winter, with perhaps a recovery in the spring."

EXCHANGE QUOTATIONS

Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates as follows:—

	Buyers.	Sellers.	Counter.
N.Y. funds	13 27 32	13 29-32	....
Mont. funds	Par.	Par.	⅛ to ¼
Sterling—			
Demand	$3.9625	$3.9725	....
Cable transfers	3.97	3.98	....

Rate in New York, sterling demand, $3.48¼ to $3.48½.

Bank of England rate, 7 per cent.

New York quotations of exchange on European countries, as supplied by the National City Co., Ltd., Toronto, as at December 2, 1920, follow: London, cable, 349¼; cheque, 348½; Paris, cable, 6.08; cheque, 6.07; Italy, cable, 3.68; cheque, 3.67; Belgium, cheque, 6.14; Swiss, cheque, 15.67; Spain, cheque, 13.10; Holland, cheque, 30.55; Denmark, cheque, 13.87; Norway, cheque, 13.87; Sweden, cheque, 19.45; Berlin, cheque, 1.15; Greece, cheque, 8.45; Finland, cheque, 2.05; Roumania, cheque, 1.50; Poland, cheque, .19.

TORONTO INSURANCE INSTITUTE GROWS

At a meeting of the Insurance Institute of Toronto, held on November 25, the president, J. B. McKechnie, announced that the membership had increased this year by 81, and now totalled 578—the largest membership in the history of the institute. A. H. Rodgers announced that the educational committee had arranged for a series of talks on building construction and the mercantile schedule for the benefit of students for the higher class of the fire insurance examination sections. These talks are to be given by J. C. White, of the Canadian Fire Underwriters' Association, the first being set down for Friday, January 7th, at the C.F.U.A. offices, Toronto.

The speaker of the evening was Hedley C. Wright, assistant manager for Canada of the London Guarantee and Accident Co., who gave an address on aviation insurance. He discussed aviation as a commercial proposition, particularly its prospects in Canada where the large and important centres of industry are so far apart. He then went on to deal with the underwriting problems which arise in the insurance of aircraft and airmen. He maintained that the insurance companies will have a big part to play in the successful development of commercial aviation in this country, as without insurance facilities men will not risk their capital, pilots will not risk their limbs and lives, and merchants will not risk their goods in schemes of transportation in the air.

BANK BRANCH NOTES

The Royal Bank of Canada has opened a branch at East St. John, N.B.

On November 29th, the Bank of Nova Scotia took possession of their new offices at 263 St. James St., Montreal.

H. C. Males, who has been in Port-of-Spain, Trinidad, since last August in connection with the opening of a branch of the Bank of Commerce, is at present in Canada on leave. A. W. Laing, formerly of the general manager's department of the head office of the Bank of Commerce, has been in Trinidad and is now in Barbados for the purpose of establishing relations for the bank there.

J. V. Steele, who has been manager of the Canadian Bank of Commerce at Milk River, Alta., for the past three years, has been transferred to Champion, Alta. He is succeeded by H. W. Walker, of Naicam, Sask.

Gerald Lawson, who has been assistant manager of the Bank of Montreal at Quebec, has been appointed manager of the bank in Yarmouth, N.S., in succession to T. V. B. Bingay.

The branch of the Merchants Bank in South London, Ont., was robbed at 2.20 p.m. on December 1, when two bandits walked in and, holding up Manager E. M. Dagg and Assistant Accountant John Leckie, took $700 in cash from the till. The men escaped in a motor-car.

John Stanley Bancroft, assistant manager of a branch of the Merchants Bank in Vancouver, has been arrested on a warrant issued by Manager A. C. Fraser, charging him with the theft of $45,000 in Victory bonds, the property of William Day, managing director of the W. H. Day Lumber Co., and placed within the bank for safekeeping. Phil Gevurtz, broker and president of the Gevurtz Lumber Co., was also arrested and charged with having conspired with Bancroft in the theft. Another warrant sworn out by the bank charged Gevurtz with obtaining money from the institution by means of a false statement.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended December 2, compared with the corresponding week last year:—

	Week ended, Dec. 2, '20	Week ended, Dec. 4, '19		Changes
Montreal	$145,674,628	$167,088,108	—	$21,413,480

THE

TORONTO GENERAL TRUSTS CORPORATION

DIVIDEND No. 98

Notice is hereby given that a Dividend of Three Per Cent. has been declared upon the Paid-Up Capital Stock of this Corporation for the quarter ending December 31st, 1920, being at the rate of

TWELVE PER CENT. PER ANNUM,

and that the same will be payable on and after Monday, the 3rd day of January, 1921.

The Transfer Books of the Corporation will be closed from Wednesday, the 15th day of December, until Friday the 31st day of December, 1920, both days inclusive.

By Order of the Board of Directors,

A. D. LANGMUIR
General Manager.

Toronto, November 23rd, 1920.

The Organization for Sales in Foreign Countries

Individual and Group Representation—The Question of Staff—Exclusive Agencies—How the General Agents Should be Paid—Independent Sales Sometimes May be Worked Up to Large Total

By COL. C. R. HILL,
Managing Director, Hill and Co., Ltd., Toronto

(This is the fourth of a series of articles on Practical Exporting, the first of which was published in The Monetary Times of November 12, 1920)

A PREVIOUS article in this series has dealt with various initial means by which the manufacturer could get into the foreign field with his products, ultimately boiling down the result to a decision on branch offices, agencies, or individual customers obtained through advertising, etc.

1. Branch Offices

There are two distinct forms of foreign branch offices which have been tried by Canadian manufacturers and which have proved successes in some cases and failures in others. One is the branch office of the individual manufacturer and the other a branch office of a group of manufacturers of the same or allied products. There are also possibilities of having one foreign office with salaried staff representing a geographical group of manufacturers, for instance, those of one Canadian city, but this would probably develop more into a board of commerce representation rather than a successful sales organization.

(a) The Individual Manufacturer's Office

Some years ago a member of a wealthy Canadian firm went abroad with a bold policy of branch offices and salaried staffs. To-day, that firm's factory premises would cover a large farm and their annual output always runs from 50 to 60 per cent. export business, and the balance domestic, although their name is almost a household word in Canada. This is, of course, the most outstanding case of the success of foreign branch offices among the Canadian manufacturers, but probably only because others have not yet made such a bold bid for export trade and also because the majority cannot afford to experiment.

The decision on the forming of a branch office in a certain country can only be made advantageously by a personal visit to that country by a responsible head of a firm or their export or sales manager, as suggested previously, but certainly, as a general rule, it may be taken for granted that the initial introduction of goods should be through competent agents. If a branch is subsequently desired, the terms of the agents' contract must be met to mutual satisfaction before the office can be opened. This is sometimes done through a basis of compensation to the agent and occasionally by the absorption of the agent in the capacity of branch manager. The latter has a great deal to commend itself as the agent knows his old customers and the trade peculiarities of his own country. On the other hand, a branch manager sent from the head office or factory in Canada has probably got an accurate idea of factory conditions and an intimate knowledge of head office policies, besides being filled with the esprit de corps of his firm. However, if the agent is a capable executive he can probably be brought over to Canada for an intensive training with very satisfactory results.

The question of the branch manager's staff is also important. In England, a complete Canadian staff would prove satisfactory, but this is not the case in countries of a different language. In India, for instance, no white man can successfully approach the native buyers, and sales staffs invariably include native "brokers."

However, all foreign branch offices should have a man trained by the manufacturer on the staff in a responsible position.

(b) The Group Manufacturers' Office

To successfully operate a group sales office abroad the most important thing is to have every member of the group thoroughly understand the basis of operation and co-operation before a foreign manager is appointed or an office opened. Assuming that a group of apple packers undertook to open an office in France, they must co-ordinate their policy of export sales and arrange the distribution of orders as well as expenses. Each must be prepared to fill his orders as received by the group office. Furthermore, the group office must be careful to see that each member of the group is given every opportunity to get his fair proportion of business or jealousies will soon break up the group. The first benefit of group operation is, of course, economy in the foreign office overhead. The greatest benefit, however, is that the foreign manager represents such powerful principals that he is able to undertake big contracts, arrange exhibits, etc., and generally do things on a bigger scale and more effectively than his competitors.

2. Exclusive Agencies

Next to the salaried branch offices, the favorite basis of representation is by an exclusive agent. The selection of that agent is always a difficult problem and opinions vary considerably as to what kind of man or firm forms the best representative. Most manufacturers desire a man who is more or less of a specialist in their line. For instance, a manufacturer of woollen piece goods prefers an agent who has been "born and brought up" in textiles. However, such a qualification is only part of the battle. Probably the most important qualification is character and clientele. The agency which has the entree to the big buyers will eventually produce bigger sales than a smaller concern which has more technical knowledge of the goods, but lesser influence, for the excellent reason that the actual buyers have their own opinion of samples and prices without being told their own business by a salesman. Therefore, if the product is good and prices meet competition, the principal duty of the agent is to get a favorable hearing, and it is easier for a well-established house to get this than for an unknown agent, regardless of the latter's technical knowledge. Of course, a combination of character, popularity and experience is ideal.

The question of the agent's financial status is a minor matter if he is acting as a broker only, and for most purposes a manufacturer is better represented by a broker than by a jobber or trader. The latter system resolves itself into the manufacturer having only one customer and, no matter how many sales he makes to his agent, he could rest assured that the agent's trading profit has killed a good deal of the market which would have developed had the agent been a broker and quoted the manufacturer's prices to all the jobbing and wholesale houses he could get into.

With regard to the "exclusiveness" of an agent, it may be taken for granted that not one agent out of a hundred will attempt to sell goods in a market where his buyers are at all liable to receive the same samples and quotations from a rival. He could not afford to advertise, as he would be assisting his rivals by every penny he spent. Neither would he send out a sales staff on such products, as they would undoubtedly earn more by working on the products for which they knew they were protected on all sales.

Will He Like It ?

Will your friend or relative whom you name as your Executor like to be burdened with the responsibilities involved ?

You will avoid all difficulty and protect your estate by having your lawyer draw up your Will appointing The Union Trust Company as your Executor.

JOHN R. LITTLE, Managing Director

In connection with an exclusive agency, it is sometimes well to allot sales for one country to a general agent on a big discount and allow him a free hand to organize his country into territorial sub-agencies on a basis of lesser discount. For instance, a general agent for a machinery line might be appointed at Cape Town to cover all of South Africa. His own discount might be 25 per cent. on all exports to South Africa. Owing to the size of the country, he should be free to appoint territorial agents at, say, Cape Town, Johannesburg, Port Elizabeth, East London and Durban and offer them 20 per cent. discounts. They, in turn, sell to all possible buyers in their respective districts with or without discounts. At first sight, it would appear that the general agent at Cape Town made his 5 per cent. on all sales without subsequently earning it, but if his judgment has been good the territorial agents will develop big sales and satisfy the manufacturer. If the general agent's selection has been bad, he will know it before the manufacturer and effect a remedy.

3. Independent Customers

Reference has been made in the second article of this series on getting into the export field through foreign advertising, resulting in independent customers.

There are certain lines required for re-manufacture, such as leather, cotton and woollen piece goods, Portland cement, etc., where the reputation of the manufacturer is of great importance, and the brand or trade mark of very little, to the "ultimate consumer." For instance, ten boot and shoe manufacturers in Rome might buy sole leather from the same Canadian manufacturer and be indifferent to the idea of twenty more rivals buying the same leather. Five contracting firms in Havana might all be using the same brand of cement made by a Canadian cement manufacturer. As long as it is standard Portland cement and the manufacturer's reputation is good, no exclusive agency is necessary.

Therefore, certain classes of manufacturers may secure satisfactory results by doing without foreign branch offices or exclusive agency contracts and confine their export efforts to advertising and subsequent mail order business. By so doing they save salaries or commissions, but the manufacturer who wishes to do a big export business on goods which go from his factory to the public must have something better than silent salesmen.

ALBERTA ASSOCIATION OF MUNICIPAL DISTRICTS

Objection to Control Through Provincial Public Utilities Board—Discuss Changes in Municipal Hail Insurance

THE 12th annual convention of the Alberta Association of Municipal Districts was held in Calgary, November 22, 23 and 24. Mayor R. C. Marshall opened the convention, and Robert Gardiner, of Excel, Alta., vice-president, responded. W. J. Jackman presented his report as secretary.

The Alberta Public Utilities' Commission was strongly criticized, and a resolution was carried unanimously to the effect that the Utilities Commission or any other similar body be not allowed to interfere in the matter of the reduction of municipal taxes, or in the matter of municipal tax sales. The question was brought up by the reading of a resolution submitted by Grosmont district: "That the municipal districts shall have the authority to accept such compromise as they think fit in the matter of subdivided lands that are now non-productive, and that the proceeds shall be divided pro rata between the taxing authorities after all expenses have been deducted."

The delegate from Shepard district cited the case of a decision by the Utilities Commission, whereby he stated that municipal and school taxes had been compromised on a certain piece of property, but the provincial taxes allowed to stand. He declared that this was unjust, and added "Judge Carpenter's commission should be put out of business. We know what we want in our individual districts and are better able to adjudicate on matters appertaining to taxation and compromise of taxes than is the commission."

Hon. C. R. Mitchell, minister of municipal affairs, stated that an instance such as that recounted by the previous speaker was as objectionable to him as to the municipalities themselves, and that he was prepared to recommend legislation that would remove any form of discrimination in that respect. A delegate asked the minister if there was any appeal to the department from the findings of the utilities or subdivided lands commission. "There is nothing provided in the act," replied Mr. Mitchell, "but representations have been received by the department, and I am always prepared to hear them in future."

Ald. S. H. Adams, Calgary, addressed the convention as a representative of the Alberta Union of Municipalities. He pointed out the need for co-operation between the urban centres and the rural municipal districts, and advanced the suggestion that future conventions of these bodies should be held in the same city and at the same time, in order that better facilities for getting together on problems of mutual interest might be afforded.

A. J. H. Donahue, of Foremost, was re-elected president.

Hail Insurance Discussed

Following this convention, special representatives met to consider amendments to the Provincial Hail Insurance Act which had been suggested by the Hail Insurance Board. A proposal for an amendment to the municipal hail insurance act that would raise the awards payable in case of loss from $10 to $20 an acre was defeated. It was stated by the chairman of the board, E. H. Malcolm, that if such a raise should be put into effect by the legislature, it would necessitate reinsurance by the board, and that in any case such a measure would be sure to meet with marked opposition from all quarters.

Several other amendments to the hail insurance act were discussed, many of them having been brought before the conference by the board. Robert Gardiner, of Excel, occupied the chair, and introduced a number of amendments that were carried unanimously. It was recommended that the act be amended so that in the event of the owner of any land upon which a crop is growing failing to make a proper crop report in time, a report made by the secretary of the municipal district to the board as to the acreage upon which a hail claim shall be paid, and on which taxes shall be levied, shall be deemed the correct status for the present year. The secretary must also notify the owner of the crop as to his decision.

E. P. Malcolm gave a brief resume of the activities of the hail board in Alberta, and the operation of the Insurance Act during the past seven years. Assessments in that period, he said, have amounted to approximately $4,000,000, and out of that sum $3,154,447 has been returned to the farmers in the way of awards for losses sustained. All claims have been paid at 100 cents in the dollar. 92.15 per cent. of the total assessments have been expended for awards and surplus, while the expenses have amounted to only 7.85 per cent. of the total.

This year, Mr. Malcolm stated, the losses were less than the average, the total amount of claims paid being $880,000, districts that have usually been considered fairly immune suffered the greatest losses. It had been felt by the board that this was a good year in which to build up a surplus so that the rate had been again fixed at six per cent. The surplus on this year's operations will amount to roughly $300,000. Two thousand and forty-four claims were received in 1920, and all were adjusted quickly. The average time elapsing between the date of the storm and the date of adjustment was nine days, and the time between adjustment and payment of the claim was 14 days.

Mr. Malcolm stated that the board felt that they had reason to feel proud of the fact that during the seven years in which the act had been operating, over $4,000,000 had been handled, and that not a scintilla of evidence of any scandal, graft or maladministration had ever been known.

PUBLIC OPINION AND PRICES

Antagonism Has Not Brought Them Down—Deflation Has Been One of the Real Factors

WIDESPREAD and emphatic as has been the popular antagonism to high prices, this has not been the real instrument in checking the rise and bringing about the gradual reduction now under way. Such was the contention advanced by Dr. T. S. Boggs, Professor of Economics, in the University of British Columbia, in an address in Vancouver, recently. The speaker traced the upward trend of commodity prices from the beginning of the war until six or eight months ago, and ascribed reasons for the recent evidences of decline. In this way he sought to explain the present uncertainty in the commercial world.

Three causes were assigned for the increase in prices which began in 1914. These were the destruction of wealth, the withdrawal from production for destructive purposes of millions of workers, and the increase in the supply of paper money and credit.

Statistical Evidence

Indicative of the inflation was that the thirty principal nations of the world had in 1914 seven and a quarter billions of paper money, while in 1919 this figure had grown to fifty billions. The gold reserve against this paper was 70 per cent. in 1914 and only 12 per cent. in 1919. Leaving aside Russia, the most extreme example of this inflation was Austria, which in 1914 had less than 500,000,000 of paper currency and now had ten billion. The gold reserve had shrunk from 55 per cent. to half of one per cent.

In the direction of issuing paper money, Canada, Great Britain and the United States had sinned less than other nations, but inflation had been obtained in these countries by extension of bank credits. He drew attention to the fact that this inflation had occurred at a time when production of wealth was below normal, making the situation doubly accentuated. "The peak of prices has passed," said Prof. Boggs, "but some commodities will continue to rise. The general tendency, however, will be downwards for some time to come." The reasons for this, he said, were that production was increasing rapidly and would soon be above pre-war levels, and that the hostility of consumers was increasing.

Have Gone on Strike

"Consumers have practically gone on strike," he said, "but I think the importance of this factor can be over-estimated. There has been such hostility from the first, manifested in demands for commerce boards, food control, maximum prices, restrictive legislation and other measures which have been attempted. In spite of these, however, the prices continued upward. The check did not come until the real controlling factor, deflation, was put into activity." This did not occur until six or eight months ago and was now general throughout all the three countries mentioned. Deflation was the controlling factor, he said, and must be carried through. It must be done intelligently and not too quickly, however, if a panic was to be avoided. Crises had occurred in the past with less reason than the world now had at its finger-tips. Cuba and Japan had already experienced such crises, but these could easily have been predicted because of the too sudden restriction of credit.

Deflation took eight years after the Napoleonic war and twelve years after the Civil War. Conditions to-day were on a larger scale, but fundamentally similar. With the restriction of credit and the consequent check on extravagance the individual business man became nervous and apprehensive and this spirit did not take long to spread throughout the community. With a falling market merchants and manufacturers were naturally nervous even though their fears were not always fulfilled. Such a period of depression must be experienced, as the deflation was a vital necessity, he asserted. But if carried out sanely and conservatively would not prove anything but beneficial in the long run.

SASKATCHEWAN MUNICIPALITIES HAD SUCCESSFUL YEAR

Bad Crops in 1919 Caused Decrease in Revenue, However—Expenditure Cut Down and Tax Arrears Increased

A REPORT of the Saskatchewan Department of Municipal Affairs for the year ended April 30, 1920, says in part:—

"Despite unsatisfactory crop returns over a considerable portion of the province, owing to unfavorable climatic conditions during the season of 1919, the municipalities of Saskatchewan have completed another successful year. The diminished returns received by the farmers in the western section of the province are reflected in a curtailment of expenditure on the part of the municipalities and an increase in the amount of unpaid taxes. In the older portions of the province, particularly in those sections where the crop results were up to the average, the financial standing of the municipalities continues to be extremely satisfactory. In seven rural municipalities, fifty-eight villages and five towns more than 90 per cent. of the taxes were collected in the year 1919; while in seventy-seven rural municipalities, one hundred and forty-two villages and sixteen towns the collections exceeded 75 per cent.

Higher Standard in Municipal Work

"The work of the municipalities is increasing both in volume and importance from year to year. Each year large sums of money are handled through the office of the secretary-treasurer and it is very essential that competent men be placed in charge of municipal offices and that the records and accounts of the municipality be carefully and efficiently audited. I am pleased to report that there is evidence of an increased sense of responsibility on the part of councillors in the matter of the appointment of their secretary-treasurers, and a fuller realization that qualified men can only be obtained by the payment of adequate salaries. The number of changes in secretary-treasurers during the year continues, however, to be large. This may be due in some measure to conditions resulting from the war. Too great emphasis cannot be placed upon the matter of the selection of the auditor for the municipality. The municipality is a business institution and the greatest care should be taken that only qualified auditors are chosen to audit its books and accounts. I am pleased to note a growing disposition on the part of the councils of the municipalities to employ the services of chartered accountants. In the year 1919 one hundred and fifty-three rural municipalities, ninety-three villages and thirty-eight towns were audited by chartered accountants.

"In the average rural municipality the largest item of municipal expenditure is that for roads and bridges. During the year 1919 the rural municipalities of the province expended the sum of $2,535,320 in the construction and improvement of roads."

BEWARE OF BURGLARY "INSPECTORS"

A warning is issued by the president of the Burglary Underwriters' Association of Canada regarding persons claiming to be insurance inspectors. The notice states:—

"It has come to our knowledge that certain persons have been calling at residences, claiming to represent burglary insurance companies, and asking to inspect the premises, making enquiry particularly as to where jewellery, furs and other valuables are located.

"The public are advised under no circumstances to allow any person to inspect their property without first making absolutely sure that they are properly authorized and seeing their credentials, as it is thought that suspicious characters may be using this means to gain advance knowledge of premises they intend to burglarize."

CANADA'S TRADE STATEMENT REFLECTS FEW CHANGES

Exports to United States Show Slight Improvement—Overseas Demand for Our Farm Produce Not Yet Apparent

An increase in exports to the United States is the only mark of improvement in the trade statement for the twelve months ended October, 1920. The September report showed exports to that country of $512,845,759, while the latest exhibit shows the figure at $530,124,824. This improvement was due to the movement of grain, but up to the end of October only a very small proportion of the crops had left the country, so that subsequent statements should give a much better standing. Small overseas demand for our farm produce is further emphasized in the figures of export to European countries, particularly in the case of the United Kingdom.

	Twelve Months ending October		
	1918	1919	1920
Imports for Consumption	$	$	$
Dutiable Goods	512,060,303	565,279,016	887,486,088

FUR AUCTION TO BE HELD

The Canadian Fur Auction Sales Company, Ltd., has announced that mid winter auction sales of furs will take place in Montreal on January 31st next and following days. The warehouse of the company, it was stated, will be open for the inspection of samples from January 27th onwards. The fur market, it is said in trade circles, is in a much better condition than for some time past, and it is expected that the sale will attract an attendance of buyers even more numerous than that which characterized the initial successful auction of the Canadian company.

POST-OFFICE SAVINGS BANKS

A slightly better showing was made by the post-office savings banks for the month of August. Deposits were about $300 lower than in July, but withdrawals were also reduced to the extent of about $134,000. The following are the August details:—

Dr.	August		Cr.
	$ cts.		$ cts.
Balance in hands of the Minister of Finance on 31st July, 1920	29,795,421.40	Withdrawals during the month	724,261.57
Deposits in the Post Office Savings Bank during month	614,495.61		
Transfers from Dominion Government Savings Bank during month:— Principal Interest accrued from 1st April to date of transfer	.....		
Deposits transferred from the Post Office Savings Bank of the United Kingdom to the Post Office Savings Bank of Canada	12,572.28		
Interest accrued on depositors' accounts and made principal 31st March 1920, Estimate	.....		
Interest allowed to Depositors on accounts closed during month	4,926.95	Balance at the credit of Depositors' accounts on 31st Aug., 1920	29,703,154.67
	30,427,416.24		30,427,416.24

MONTREAL AND QUEBEC SAVINGS INSTITUTIONS

A decline in Dominion government demand deposits and a small increase in savings deposits are the only outstanding items in the monthly statements of the Montreal City and District Savings Bank and the Caisse d'Economie de Notre Dame de Quebec. The loans accounts, as a whole, were almost stationary, while holdings of Canadian municipal securities were considerably lower. The cash position of both institutions was strengthened. Principal figures, with comparisons, are as follows:—

Montreal City and District Savings Bank

	Oct., 1920.	Sept., 1920.	Oct., 1919.
Dom. gov. dem. dep.	$ 200,043	$ 260,043	$ 93,599
Notice deposits	43,950,117	43,889,372	40,253,569
Total liabilities	44,612,689	44,579,544	40,764,462
Gov. and other sec.	12,277,009	12,221,099	9,543,940
Cash	7,037,959	6,785,748	7,017,558
Can. municipal sec.	15,074,560	15,316,253	15,481,022
Loans on bank stocks	809,815	781,537	791,436
Loans on other sec.	9,576,381	9,610,628	7,268,848
Total assets	47,646,735	47,425,548	43,760,786

Caisse d'Economie de Notre Dame

	Oct., 1920.	Sept., 1920.	Oct., 1919.
Dom. gov. dem. dep.	$ 7,628	$ 33,628	....
Notice deposits	10,507,703	10,324,364	$10,688,489

ONTARIO ASSOCIATED BOARDS OF TRADE

Meeting at Belleville Discusses Power Question, and System of Land Titles in Province

THE seventh annual meeting of the Ontario Associated Boards of Trade and Chambers of Commerce was held in Belleville, Ont., November 25 and 26. The president, Wm. Taylor, of Owen Sound, occupied the chair. F. G. Morley, of Toronto, secretary-treasurer, presented his report showing that fifty-seven boards were affiliated with the association, six new boards having been added since the last annual meeting. Resolutions expressing gratitude to the board of trade of Toronto relative to the hospitable manner it entertained the delegates in the Ninth Congress of Commerce of the British Empire, and commending the government for giving encouragement to aviation, also endorsing the proposition for the extension of the Temiskaming and Northern Ontario Railway to James Bay.

A resolution, moved by the Toronto board, was carried, supporting the continuance of appeals from the Canadian Courts to the Judicial Committee of the Privy Council.

Differences on Power Question

R. J. Graham, of Belleville, introduced a resolution urging the government to utilize all water powers, and encourage and aid in the development of every possible unit of electrical energy at reasonable cost for manufacturing, mining and domestic purposes, and to supply the lack of fuel, and to render the province of Ontario less dependent on the United States for its supply. While the resolution was unanimously adopted by the meeting considerable discussion was precipitated before that was done. R. R. Hall, M.L.A., in a somewhat lengthy speech, expressed the opinion that the Hydro-Electric Commission had been remiss in its duty, and had misapplied the funds of the people. W. B. Burgoyne, ex-mayor of St. Catharines, strongly supported the Ontario Hydro-Electric Power Commission, and claimed that it had not failed in any way to supply the people of Ontario with power. As for hydro-electric radial railways, it was the municipalities themselves that should be responsible for the movement in favor of radials, Mr. Burgoyne asserted.

Advocates Torrens System

A resolution was passed in favor of the adoption of the Torrens system of land titles wherever possible, and it was claimed that this system would make it easier for people to buy land than the present method of establishing titles to land.

On motion of J. K. Dunstan, vice-president of the Bell Telephone Co., Toronto, a resolution was passed in favor of greater uniformity between the assessment and taxation methods throughout the Dominion and urging that the methods of assessment and taxation be standardized.

It was decided to hold the convention next year in Brantford, Ont.

Officers were elected as follows: President, John Elliot, Belleville; first vice-pres., Col. H. Brock, Toronto; second vice-pres., G. C. Copley, Hamilton; third vice-pres., M. P. Byrnes, Collingwood; sec.-treas., F. G. Morley, Toronto; executive, G. C. Martin, Hamilton; Cecil Bethune, Ottawa; Arthur Hewitt, Toronto; John Ferguson, North Bay; A. B. Carscalen, Wallaceburg; Col. W. F. Cockshutt, Brantford; E. A. Porter, St. Thomas; K. J. Dunstan, Toronto; J. G. Hannigan, Guelph; J. G. Henry, Sudbury; J. A. Hussey, Sault Ste. Marie; G. F. McKimm, Smith's Falls and J. A. McInnes, Iroquois Falls.

The Mann Corporation, of Chicago, Ill., a subsidiary of the Deering Plough Company, has awarded contracts to the Western Construction Company, of Vancouver, for the building of eight miles of logging railway in the Lillooet River district. When the railway is completed it is estimated that 900,000,000 feet of commercial timber will be made accessible.

An Essential Factor in Stock Investment

Correct judgment as to the true strength or weakness of a preferred or common stock depends largely upon a proper analysis of the facts disclosed by the balance sheet of the Company issuing the security.

It is quite possible for any Investor to obtain access to the balance sheets of Canadian industrial concerns. But to compile the facts obtained from eighty or more such documents is a task which the average investor would find most difficult.

We have accomplished it for him—and the result is published in the latest edition of our Analysis of Canadian Stocks, showing comparative figures that are most interesting.

NEW ORGANIZATION FOR NORTHWEST ONTARIO

Union of Municipalities Formed at Meeting of Central Canada Colonization and Highway Association

By C. Birkett, Fort William, Ont.

THE annual meeting of the Central Canada Colonization and Highway Association was held in Fort William on November 23 and 24. It was a history making conference as well as an unique one. Representatives were present from the four provincial electoral ridings of Fort William, Port Arthur, Rainy River and Kenora, an area which is larger in extent than that of the province of Manitoba.

One hundred delegates were present from the different public service organizations. There were representatives from the city councils, boards of trade, Independent Labor Party, U.F.O., Rotary Club, Kiwanis Club, Motor Club, municipal leagues and rural municipalities. It was an instructive and a business conference. No time was lost in foolish discussion. These delegates had met with one object: that was to find ways and means of improving existing conditions in this part of Ontario, and also to find ways and means of bringing in new settlers.

Appearance is Deceptive

This part of Ontario is rich in minerals and timber. Travellers passing through the country, sitting in the arm chair of a Pullman observation car refer to the country as a barren wilderness. If they could have only heard some of the delegates explain the richness of the country, the wonderful crops of clover, roots, etc., that were being raised, how they would change their opinions. There are large tracts of land in this immense country that are waiting the hand of the settler. The soil is productive and farmers already settled here speak highly of climatic conditions.

True, it takes hard work to clear the land, but with pulp wood ranging high in price as at present, a settler is assured of a fairly substantial income while preparing the land from the sale of this commodity. One delegate stated that he had farmed in the north of England and other parts of the empire, but he had yet to find better crops of roots, or better variety, than those grown here and shown at the different fall fairs.

Municipalities Union Formed

Two or three outstanding resolutions were unanimously adopted. The first one of primary importance was the formation of a union of municipalities in the four electoral districts. A temporary organization was formed with Norman M. Paterson, a Fort William business man, as president, the mayors of Fort William, Port Arthur, Kenora and Fort Francis as the executive committee with the writer as temporary secretary.

These gentlemen will immediately begin to organize a strong union of all the organized and unorganized municipalities in this part of Ontario. They will correlate and co-ordinate all existing efforts and present a united front to the provincial and federal governments. The primary and fundamental function of the union of municipalities will be to bring in more settlers, which can only be done systematically, after the building of colonization roads. The new organization has the best wishes of every citizen in northwest Ontario.

The second resolution, which was unanimously accepted, has reference to the appointment of colonization agents in the four electoral districts, and the provincial government will be asked to appoint these gentlemen. There was a slight difference of opinion as to whether one colonization agent would not be sufficient for the four districts, but the resolution as passed called for the appointment of four officers, one for each riding. Whether one or four are appointed there is sufficient work to keep them busy for the next twenty years.

The provincial government will be well advised to listen to the pleadings of this resolution. It is the concensus of opinion that nothing will do more good to open up our part of the province than the appointment of these colonization agents.

Better Roads Wanted

The third resolution has reference to the building of roads for agricultural purposes only. This part of Ontario is undoubtedly lacking in this respect and previous governments have not had any definite programme in this regard. It can be definitely said without any fear of successful contradiction that the provincial government has over a period of six or seven years received a million dollars more revenue than expenditures from these four districts. This million dollars should be immediately spent on the building of roads and the bringing in of settlers.

These delegates did not and do not believe that the provincial government is being asked for anything that is not fair and honest. Every dollar spent by the provincial government in the opening up of this immense territory will, we think, be returned with interest in the course of a few years.

There was only one rift in the lute. The Hon. Frank H. Keefer, K.C., M.P., under secretary for external affairs, Ottawa, was a guest of the convention and made a fighting speech in favor of these four electoral districts seceding from old Ontario. It was replete with information in the way of statistics, and created a very favorable impression on the minds of his listeners. Being a guest, however, to the convention, his speech was not discussed and no resolutions were passed in this regard. Nevertheless, it can be truthfully said that there is a strong under-current prevailing in this regard, and it depends to a marked extent on the treatment of the provincial government to this part of Ontario, as to whether this feeling grows or dies a natural death.

BELLEVILLE CONSIDERS MUNICIPAL INSURANCE

The question of municipal fire insurance was brought to the attention of the Belleville, Ont., council by Messrs. J. N. Pringle and W. C. Mikel, K.C. The idea is that municipal insurance could be made compulsory and the premiums collected with the taxes. In this city the real estate is valued at between five and six mililon dollars and about five million of personal property available for insurance. It is estimated that between $25,000 and $50,000 a year could be made for the city, and yet not add to the burden of the taxpayers. The matter was referred to the executive committee of the council for consideration.

BRITISH COLUMBIA REPORTS SURPLUS

British Columbia, for the last year, has had a surplus of revenue over expenditures, according to the financial statement made public on November 29 by Hon. John Hart, minister of finance. The statement shows a total revenue for the fiscal year ended March 31, 1920, of $13,861,605, and expenditure for the same period of $13,511,123. This leaves the province with a net surplus for the year of $350,470.

In announcing a financial policy for British Columbia, Hon. John Hart, minister of finance, states that it is the intention to establish a provincial bank, so the government can assist dependents and keep the money of the people in this province for the development of the country instead of having it sent east by the banks of Canada through their branch system and loaned out at high rates in Toronto, Montreal and New York. Another feature of the policy is the proposal to establish a capital reserve fund in which all moneys from the sale of natural resources must be placed. This capital fund would never be impaired, but loaned out on interest for the development of British Columbia.

PAYMENT TO LIFE INSURANCE BENEFICIARIES

Alberta Law Held to Govern Situs of Debt, but Ontario Law to Govern Distribution to Beneficiaries

IN an application by executors for advice as to the distribution of life insurance policies the Alberta Supreme Court held that section 43, chapters 8, 5, George V., 1915, which provides that the money payable under any policy of life insurance "shall . . . be payable in the province" where the assured is or dies domiciled therein, does not purport to do more than declare where the debt is payable; it cannot be construed as holding that the law of the province governs in the construction of the contract when made in another province.

The facts of the case are: The Confederation Life Association on June 3, 1887, issued a policy for $1,000 on the life of John J. Mellon in favor of himself, and on May 5, 1897, the insured executed a declaration in which he appointed his wife, Amelia Mellon, and daughter, Amelia Elizabeth Mellon, beneficiaries under said policy. His wife predeceased him and the insurance company paid the proceeds of the policy to his daughter, surviving beneficiary.

Insured Became Insane

The Grand Orange Lodge of B.N.A. issued a policy on the life of the said Mellon for $1,000 payable to himself and the proceeds of such policy were paid into Court pursuant to an order of Justice Scott, and the insurer was released from any further liability in respect of same.

At the date of his death Mellon was a resident and domiciled in the province of Alberta. On March 25, 1914, Mellon became insane and died in a sanitarium in Guelph, Ontario, on March 4, 1918.

The questions raised in the application are: (1) Does the will make a valid disposition of the proceeds of said policies or either of them. (2) Does the law of Alberta or the law of Ontario govern in determining the disposition of the proceeds of the said policies? (3) Does the law as it was at (a) the execution of the contract of insurance or (b) at the date of the will or (c) at the date when deceased became insane or (d) at the date of his death, govern in regard to the said distribution?

The Confederation Life policy provided that "In all cases of claims under this policy the law of Ontario shall govern."

In his judgment Justice Simmons says:—

"It will be convenient to arrive at a conclusion to question (2) as it has an important bearing upon (1) and (3). The law of Ontario in regard to the distribution of the proceeds of insurance policies was modified in 1897 and 1914 and that of Alberta in 1915 and 1916. The Confederation Life Association was incorporated by Acts of the Parliament of Canada and was registered under the provisions of the Alberta Insurance Act. Section 43 of the Alberta Act, 1915, provides that 'the money payable under any policy of life insurance already issued or that may hereafter be issued by an insurance corporation that has already become or may hereafter become registered under the provisions of this Act . . . shall in all cases be payable in the province where the assured is or dies domiciled therein notwithstanding anything contained in any policy or the fact that the head office of the insurance corporation is not within the province."

Law of Ontario Applicable

"The operative words of the section 'shall be payable in the province' do not purport to do more than declare the situs of the debt shall be in the province and I think it is reading into the section that which is not contained therein to hold that the law of Alberta should apply in determining the construction of the contract especially when to do so is to go to the root of the contract and so modify it as to alter the declared intention of the parties when the contract was entered into. To adopt the view that the laws of Alberta would apply in the construction of a contract made in another province by a company which is the creation of the Parliament of Canada would raise very grave and far-reaching conclusions on constitutional law which I do not think necessary to be dealt with in my view, that the application of the section under a liberal construction does not involve any more than a declaration as to the place of performance of the obligation arising out of the contract.

"The Confederation Life Association raises no objection to payment of the moneys within the province.

"I conclude, therefore, that the provision in the contract whereby the parties agreed that the law of Ontario should govern in regard to the distribution of moneys under the policy is applicable.

"It would appear that so far as the declaration in this policy is concerned, the daughter as a surviving preferred beneficiary was entitled to the entire proceeds of the policy.

"The policy in the Grand Orange Lodge of B.N.A. is not available but it seems to be assumed by all the parties to the reference that the contract was made in Ontario and applying the principles above referred to the law of Ontario would govern.

"In the result then the proceeds of the policy in the Grand Orange Lodge of B.N.A. belong to the four surviving children in equal shares and are to be paid out accordingly."

SUIT OVER SALE OF MINING SHARES

The Supreme Court of Canada last week heard the appeal of W. E. Brown vs. J. S. Crawford, both financial agents of Ottawa, against the decisions of the Ontario Court of Appeal and of the trial judge, both of whom had dismissed Brown's action. Judgment of the Supreme Court was reserved.

The action of Brown vs. Crawford arises from the sale of 15,000 shares of fully paid-up stock in the Prince Rupert Cobalt Silver Mines, subject, it was contended, to agreement, for $1,500. The transaction took place on or about September 27, 1909. The stock was not delivered and has not yet been issued.

Action was taken in the Supreme Court of Ontario for the recovery of the $1,500 paid, with interest, or the specific performance of the agreement. The defence of the action was that the agreement stipulated the stock should be delivered when issued, and it is further contended by the defence that it was subject to a pooling agreement. The case came to trial before Judge Sutherland at the court house on July 23, 1919, the trial judge dismissing the action. The case was then taken to the Ontario Court of Appeals, and this court upheld the decision of the trial judge in dismissing the action with Justice Meredith dissenting.

Next an appeal was taken to the Supreme Court of Canada. Among some of the points emphasized by Mr. Lemieux was that if the sale had taken place subject to a pooling agreement, that Crawford could not sell the shares in the pool to Brown, and if he did, he had not delivered them, and that Mr. Brown had received no consideration for his money so far. Mr. Rupert Broadfoot maintained that the sale of the shares had taken place, subject to an agreement, and among its provisions was that Brown was only to receive the shares when the stock was issued.

FIRE INSURANCE COMPANIES APPEAL

The case of the Miller-Morse Hardware Company against the Dominion Fire Insurance Company, London Mutual and Millers' National Fire Insurance Companies, which was held in Saskatchewan last July, and in which judgment was given for the plaintiff a few weeks ago, is being appealed by the defendant companies. The question at issue arose out of four fire insurance policies covering the stock and buildings of Sam Stockhammer, of Khedive, Sask., being sent to the companies' agent at Khedive, but not handed over by him to the insured. The policies were held at the trial to be in force, although still in the possession of the agent.

News of Industrial Development in Canada

Maritime Steel Plants Idle—Large Pulp Mill for British Columbia—Temporary Relief for Ontario Power Shortage — Welland Secures Large Industry

THE strike situation at the Dominion Steel Corporation's plant at Sydney, N.S., assumed a more serious aspect this week. When the railroaders employed in the company's yards ceased work last week, it was not thought that the conditions arising from the strike would be very effective, but these conclusions were premature.

In addition to closing down of the Steel Corporation's plant the works of the Nova Scotia Steel and Coal Co. at Sydney Mines are in a state of idleness. Men have been employed roofing four batteries at the coke ovens and the steel plant in order to protect them from the weather. This is taken as conclusive evidence that the plant will be closed down for a prolonged period.

Both companies are more or less independent, as the steel industry in this country at the present time is not booming. Competition from other countries has greatly affected the export market, and altogether the steel companies here are experiencing lack of orders. There is still sufficient work on hand, however, to employ a considerable number of men, but it is understood that business is not pressing, and therefore officials can assume a firm attitude regarding the employees' demands.

British Columbia Pulp Mill

Plans for the establishment of a large pulp and paper plant in the vicinity of Prince George, British Columbia, have been completed, a concern in which some of the best known financiers of Eastern Canada are stated to be directly interested, and the first step in the erection of the plant will probably be made, following a visit to this province, of a large number of the principals in the venture in the very near future.

The syndicate owns over 200 miles of timber limits in Central British Columbia, in connection with which it recently paid $200,000 royalties, and the plant and equipment which it plans to erect will involve an investment of over $6,000,000. On its limits it has in view a cut of at least 30 years, it is stated, and has applied for three separate water powers, one at the Grand Canyon, on the Fraser River, one on the Willow River, and one on the Nechako River. Their plans provide for the development of one of all of these water powers.

The matter of location of the plant will be decided when the party visits the scene of the company's operations, as will the location for a sawmill and brickyards, to be utilized in the construction of the plant. It is believed that these plants will be located either at Prince George or very close to it.

In this connection the following names are mentioned: Lord Beaverbrook, Alexander Maclaren, president of the St. Maurice Paper Co., of Quebec; Angus McLean, president of the Bathurst Lumber Co., Bathurst, N.B.; Frank Jones, president of the Canada Cement Co.; Senator Edwards, Mr. Molson McPherson and Sir Chas. Gordon, of the Dominion Textile Co.

Relief in Power Shortage

While in London this week, Sir Adam Beck announced that the Ontario Power Commission had secured an additional block of 10,000 horsepower. Sir Adam stated that the 10,000 extra horsepower is to come from the Niagara Power Co., of Niagara Falls, N.Y., and that a reasonable rate had been tentatively agreed upon for incorporation in a contract that is to be signed at once.

"If the people continue to conserve and avoid waste of power we shall now have a sufficient amount to supply the demand," said Sir Adam. He added that the extra energy will tide the commission over the winter, and that as the load is lighter in the summer months the power famine should be a thing of the past, as the Chippawa plant will be ready for the fall. It is expected that troubles may occur at times during the winter, but otherwise the commission is now in a safe position.

Welland Secures Industry

Another industry has been secured by Welland, Ont., according to an announcement by Geo. Day, industrial commissioner. The Cross Fertilizer Co., Ltd., has chosen a fifteen-acre site, and will build a plant to cost $250,000. Nothing can be done in the way of building this year, but it is hoped that all the buildings will be put up and the machinery installed ready for operation by the fall of 1921. Since 1909 the Cross Manufacturing Co. has been manufacturing fertilizer at Sydney, N.S., from basic slag, a by-product of steel, which they get from the Dominion Iron and Steel Co.

The Acetate Products, Ltd., has under way plans for the establishment of a manufactory at New Westminster, B.C. The products will be wood alcohol, acetate of lime and charcoal. The company has taken over a plant across the river from the city, and alder wood, the raw material, will be secured from the abundant supply in the Fraser Valley.

The basket factory, owned and operated by Ralph Dauphin in Ridgetown, Ont., for several years, has been sold to the Canada Wood Products Co., of St. Thomas. The new owners will continue to operate the plant in conjunction with their other factory.

Massey-Harris Co., Ltd., have purchased a building at Brandon, Man., which will be used as a distributing warehouse. The sum of $140,000 was involved in the transaction.

The Emerson Phonograph Co., Inc., of New York, an industrial concern, which has now five factories scattered throughout the United States, two in operation and three in process of completion, has disposed of its exclusive Canadian rights to the Emerson Canadian Co., Ltd., a new corporation, which is to become established in Brockville, Ont., for the manufacture of Emerson records, and ultimately phonographs. The capitalization of the company, which is endorsed by the Brockville Board of Trade, is $500,000.

Quebec.—Thompson Co., Ltd., Sherbrooke, $100,000.

GOLD CONSIGNMENT REFUSED

Gold to the amount of $806,418, consigned to the Canadian Bank of Commerce in New York, has been refused by the United States Assay Office because it was suspected of being of Russian origin. The gold, which was in the hands of the bank on November 11th, was for the account of customers, the bank itself not being interested except as an agent. The shipment came from Stockholm, Sweden.

C. B. Francis, one of the bank's agents at New York, said that there was no evidence to show that the gold was not of bona fide Swedish ownership, and that the shipment had been ordered by correspondents of high standing in European financial circles. He thought that the embargo on gold maintained by the Assay Office would be lifted as soon as the Treasury Department had examined into the situation.

THREE DOMINION INSURANCE LICENSES ISSUED

Empire Casualty Company Seeking Incorporation—Several Provincial Licenses Also Issued

THREE insurance licenses have been issued by the Department of Insurance, Ottawa, two of which merely authorize extension of scope. The Reliance Insurance Company of Canada has been authorized to transact in Canada the business of fire insurance. Head office will be at Montreal, Que., and J. W. Tatley has been appointed chief agent.

Authorization has been given to the Yangtsze Insurance Association, Ltd., to transact fire insurance throughout Canada. The previous license which the company held restricted its business to the province of British Columbia.

In addition to the classes for which it is already licensed the National Union Fire Insurance Company, of Pittsburg, Pa., may now write automobile insurance in the Dominion.

Provincial Licenses

The New Jersey Insurance Company has been licensed to transact in British Columbia the business of marine insurance in addition to automobile insurance, for which it is already registered.

The Retail Merchants Underwriters' Agency has been registered to transact fire and automobile insurance in the province of Manitoba.

Empire Casualty Company

Application will be made to the Ontario legislature by the Empire Casualty Company of Canada for its incorporation. The objects for which incorporation is sought are to carry on accident and sickness insurance, guarantee, loss or damage to property from any accidental causes, including boiler and other explosions, or by reason of theft, housebreaking, burglary or hold-up, public liability, automobile, inland transportation and marine and fire insurance, and also such other classes of insurance business or contracts which may, from time to time, be authorized by license, pursuant to the provisions of any insurance act. The head office and chief place of business is to be in Toronto, Ontario. The capital is to be $1,000,000, divided into ten thousand shares of $100 each. Smith, Rae and Greer, 4 Wellington Street East, Toronto, are solicitors for the applicants.

Bell and Mitchell, Ltd., insurance brokers, of Regina, Sask., have opened an office in Vancouver at 1325 Standard Bank Building. Gordon Bell, a member of the firm, and formerly of Saskatoon, will be manager of the new office.

Opposes Group Insurance

By unanimous vote the Moose Jaw city council has adopted recommendations on group insurance and will provide insurance for every civic employee. The schedule allows $500 for single men, $1,000 for married men and $1,500 for all heads of departments. The cost to the city is estimated at $2,750 a year.

Although the vote was unanimous, Mayor S. A. Hamilton has announced his determination to oppose the group insurance plan for civic employees, and would ask leave to reopen discussion on the matter. He advances as arguments against the adoption of the scheme that young, unmarried people should be in a position to provide for themselves, particularly well-paid heads of departments, who are in a better position to finance their insurance than many of the ratepayers, who would be forced to contribute. If the civic employees are to be insured, he declared, then the council should similarly cover every citizen.

The Postal Life Insurance Co., of New York, as well as other similar companies, are known to be actively canvassing this country by mail, although they are not licensed to do business in Canada. The government has given warning regarding this kind of business, and the public will do well to ignore any literature from such companies. There are many reputable Canadian and other life insurance companies with which to do business here, so that there is no necessity for negotiating contracts through unreliable sources.

1870 —— OUR GOLDEN JUBILEE —— 1920

Two Hundred Million Dollars

This year the Mutual Life Assurance Company of Canada celebrates its golden jubilee by reaching the two hundred million dollar mark. This point in the expansion of The Mutual Life has been reached more quickly than any of its most ardent friends would have believed possible five years ago. But the reason is not "far to seek." During the Great War and the fatal epidemic which followed in its train The Mutual Life paid out in relief of the families bereaved no less than two million, three hundred thousand dollars ***in addition to ordinary claims.*** The benefits of life insurance were thus so clearly demonstrated that an immense demand resulted and the business of The Mutual has developed as much during the last five years as during the preceding forty-five years. The Canadian people suddenly realized the absolute necessity for life insurance and naturally turned to a company well-known, well-established and financially impregnable.

The Mutual Life Assurance Co. of Canada

Waterloo Ontario

THE INCREASING INTEREST

in Life Insurance and increasing knowledge of the subject cause intending applicants to look more closely than ever into the ***Essentials*** of profitable protection.

The strength and progressive record of The Great-West Life, its investment success, its favorable Mortality and low expense rates, the liberal policy provisions and measure of Service to Policyholders—all reach the most vigorous standard of comparison.

Ask for descriptive literature and rates, giving date of birth.

News of Municipal Finance

Edmonton Issues Comprehensive Survey of Financial Affairs—Some Valuable Opinions on Taxation—Saskatoon Saved on Exchange—Regina Presents Interim Statement—Montreal's Taxable Property Has Increased Greatly in Value—Exemptions Also Slightly Advanced

Montreal, Que.—According to a statement given out by the city treasurer the value of properties exempted from taxation in Montreal has increased during the year from $224,513,871 to $225,190,483, the increase amounting to $676,612. Further details of the property valuation in Montreal for the current year as is set forth in the 1920 tax rolls are to the effect that the total value of properties, including those exempted from taxation, is $889,544,067, and that the net value of taxable property is $664,353,584. In 1919 the total value of property in Montreal was $855,978,406, the value of exempted property was $224,513,871, and the net value of taxable property was $627,114,570. These summaries indicate that the 1920 assessment roll has increased the total value of taxable property by $37,239,014.

Regina, Sask.—Some interesting facts are contained in the city's interim statement for the ten months ended October 31 last. The gross bonded debt amounted to $11,075,323, as compared with $10,893,857 at the end of 1919. This bonded debt is now distributed as follows: General, $4,419,542; local improvements, $1,878,499; electric light, $1,693,823; waterworks, $1,496,252; street railway, $1,587,205.

The revenue and expenditure account shows actual receipts of $767,740, as compared with the estimate of $760,393 for the ten months and $912,472 estimated for the whole year. There is an actual deficit for the ten months of $111,102. The greatest weakness appears to be in the utilities accounts. An actual deficit of $92,768 in all utilities is shown, as compared with an estimated surplus of $23,403, and $28,084 estimated for the year. Electric light and power departments and the street railway show the greatest shortages, while the waterworks department had a small surplus.

While the utilities deficit is still large, there has been a satisfactory improvement within the past two months. At the end of September there was a shortage of $115,000, but within a month, as will be seen from the above figures, this had been reduced to $92,768, and it is understood that still further progress has been made. The loss on the electric light and power department had been reduced by about $6,000 between September 30 and October 31, and according to Commissioner Thornton there should be a further reduction of about $10,000 before the end of the year, as a result of the installation of a new unit at the power house.

Saskatoon, Sask.—Commissioner Yorath has issued a statement covering the ten months of the current year. According to the figures submitted, the city has enjoyed a satisfactory year. The gross debt of the city is $10,873,427, including school debts amounting to $2,024,920. The net general debt, after deducting the debt of the public utilities, sinking fund, etc., is $4,755,285. The largest part of the city's debt—i.e., $4,392,780, or 48.93 per cent., does not mature until 1961, although the city has the option of redeeming same in the year 1941, and sinking fund is being levied on the basis of redemption in this year. The city's sinking fund of $1,865,643 is all invested in gilt-edged securities. No investment has been made which does not yield interest on due dates and which is not easily marketable at all times.

The profits on the sinking fund investments amount to $61,449 at October 31, so that the sinking fund is being made one of the best paying of the city's utilities. As a large proportion of the city's stock and debentures were sold on the London market, with interest payable in sterling, the city has saved $37,518 due to the rate of exchange being as low as 3.88 when interest payments had to be made.

The total tax levy of the city this year is $1,191,168, of which $5[illegible]1,518 represents school tax levies. The question of school taxes which are steadily on the increase is one of the most serious problems with which the municipalities have to deal and it is apparent if capital expenditures are to be kept as low as possible in order to keep within reasonable limits the levy for sinking fund and interest, that a very much cheaper form of school construction will have to be adopted. The city general account will at the end of the year show a surplus of approximately $10,000 over expenditures, which is largely due to a very rigid supervision over expenditures to see that they are kept within the appropriations. The tax collections for the first ten months of the year amount to $893,522, compared with $836,891 for the same period last year.

The net deficit on the three public utilities—i.e., electric light and power, street railway and waterworks—for the first ten months of the current year is $6,171, but it is estimated that at the end of the year this will be converted into a surplus of $6,000. The electric light and power department shows a profit of $39,801. The street railway a loss of $52,344, and the waterworks a profit of $10,180. So far as future capital expenditures are concerned, the commissioner recommends that same be practically eliminated during the year 1921, and that if school or hospital accommodation is urgently required that some temporary provision be made.

Edmonton, Alta.—An interim report has been issued by Comptroller Mitchell, covering ten months of the fiscal year. The statement gives a comprehensive survey of the financial affairs of the city, and also contains some valuable opinions on the taxation question. · Owing to the exhaustive nature of the report, it is not possible to cover it in full here, but the principal parts are briefly outlined.

There was practically no addition to the permanent funded debt of the city during the year. On the other hand the sinking fund investment is increased by the earnings accrued during the year and taking into account the redemptions made to date, the net debenture debt is at least reduced, as at September 30, by $210,000 since December 31 last. Short-term loans aggregating $2,066,166.90, retired, were provided for by the issue of other short-term securities of the par value of $1,649,000—net proceeds $1,506,570 which, together with the tax arrears accumulated with the sinking fund board, amounting to $1,138,224, still leaves $578,628 in their hands towards further redemption.

The gross funded debt of the city, made up of general debentures, $11,507,639; local improvements (property share), $3,971,441; public utilities, $9,894,241; total, $25,373,321. With the gross school debenture debt, the amount is $28,695,893. Less the sinking fund investment, the net debt of the city and school board is $23,205,460.

The improved collection of both current taxes and arrears over last year, as indicated in the half-yearly report, has been fully maintained for the term of nine months, the total collections (inclusive of arrears) as at September 30, being $3,189,198, as against $1,999,581 for the same date of last year.

During the month of October further collections have increased the aggregate to approximately $3,365,924, of which $2,559,129 represents current taxes and which, together with discount allowances, will be equivalent to at least a 60 per cent. collection of the current year's levy for the ten months. The expenditures for general administration (otherwise termed controllable) for the nine months amounted to $917,776, as compared with $611,147 for the same period in 1919, or $306,628, of an increase for the period.

The total levy for the present year, inclusive of discount, is $4,500,000 approximately, of which $3,500,000 is provided by the general tax rate of 45 mills (public school) and 11 76 (separate school) respectively, the balance of the

levy being comprised of special frontage and supplementary revenue taxes, such as business and income and provincial revenue taxes.

In commenting on this the comptroller said: "By way of illustrating the vagaries of our municipal assessment and taxation system, it may be mentioned that on a comparison of the present net assessment and tax levy with those of 1914, it is shown that applying the current year's assessment figures to the general tax requirements of 1914 ($3,347,251), the mill rate would have been 42 mills in that year, while the actual rate imposed was 16.75 on what must now be regarded as an inflated assessment of $190,669,410. On the other hand, applying the net assessment of 1914 to the general tax requirements of the present year ($3,541,154), the rate would be only 18.57 mills—this, of course, without taking into account the fact of business and income taxes ($436,000) this year, which were not in force in 1914. As against this, however, it is necessary to remember that the cost of labor and commodities in 1920 has been on a much higher level than those obtaining in 1914.

"Our tax levy is admittedly high, but we must recollect that for several years the city has been confronted, not with a theory, but with a condition of affairs which is peculiar in certain respects to this city, and the remedy for which must be specially adapted to Edmonton's case. The problem is at the same time largely that of other western cities, most of which are similarly suffering from the effects of previous years' over-expenditures and premature or unnatural development. In the case of Edmonton itself, however, it is no secret that the city's utilities have been designed and installed, not for a population of 60,000 or 70,000, but for one of more nearly 200,000 people, and this fact has to be taken into account in adjudicating upon the city's financial standing.

"In 1914 the civic census showed a population of 72,516. In 1915 this was placed at 59,339; while in 1916 the federal (interim census) gave the figures as 53,846. The civic census for the present year just recently completed shows 61,045, but it may be mentioned that this census was taken at a time of the year when a good many families were absent from the city on holiday, including school children, school teachers and others, so that the actual population of the city would probably be more nearly 65,000.

"The funded debt of the city was incurred under conditions when the population was over 70,000. That debt remains, notwithstanding that the population in the meantime has suffered a severe relapse, and even still we have a certain percentage of floating population whose permanency of domicile is more or less determined by the opportunities of employment and of trading. It is generally, and rightly perhaps, assumed that very largely a solution to the problem lies in (1) a substantial accession to the city's population; (2) an entirely broader basis of taxation than under the present method, which bears almost wholly upon lands and improvements.

"With regard to the outlook as to civic taxation in the immediate future, it is, of course, already known that the city will be deprived of the personal income tax as a source of supplementary revenue at the end of the current year, so that there will be a loss of approximately $175,000 on that account. In order to counterbalance this shrinkage in revenue, it would seem necessary to discontinue any further direct levy towards the reserve for uncollectible taxes meantime."

Government and Municipal Bond Market

Victory Bonds Have Been Released from Control—Prices Fall on Open Market—Three Municipalities Postpone Issues on Account of the Unsettled Situation—Ontario Floating Six Million Dollar Loan Within the Province

VICTORY bonds have been released from control. Such was the announcement which stirred up great interest in bond circles this week, and turned a dull market into one of activity. This move on the part of the government came as a surprise, as it was confidently expected that no such action would be taken until the end of the year. Sir Henry Drayton, minister of finance, has made the following statement in this regard:—

"The special market committee's work has been very efficient. Many subscriptions were made in the national interest and by persons whose circumstances did not permit them to hold their bonds. The price of the bonds has not been subject to violent fluctuations, but stabilization of price has been effective. The committee has sold bonds which have come upon the market and placed them in the hands of permanent investors to the extent of $270,000,000. Stabilization has now continued for more than a year since the last loan, and full opportunity has therefore been given those whose circumstances compel them to liquidate."

Many opinions were advanced as to the reason of the government's action, but the most logical one was that by R. A. Daly, secretary of the special market committee. Mr. Daly stated: "The public had begun to anticipate decontrol, which was generally thought to be slated for the end of the year, by offering their bonds for disposal by the market committee at the present time. Such action was inspired by the fear on the part of some holders that the bonds would fall in price when control ceased, and the view that it would therefore be better to sell now than wait for the change. It was thus necessary for the committee to give up their functions rather sooner than expected, and without any preliminary announcement."

The first day of open trading witnessed violent fluctuations and losses in all issues. This was the natural event, as the market committee had been supporting the prices. The market has become much steadier, however, and within a short time the real condition of affairs should be apparent.

The following figures give a comparison of this week's prices, in comparison with those previously fixed:—

				This week.*	
	Jan.	Mar.	Aug.	High.	Low.
1922	100¼	100	98	97	95½
1927	101¾	100½	97	98	94
1937	104½	102	98	95	93¼
1923	100¼	99¼	98	95	94
1933	102½	100¼	96½	94⅞	93
1924	100	98½	97	95¾	92
1934	100	97	93	91⅜	89

*Toronto Exchange.

While the resumption of trading in Victories was welcomed by most bond dealers, it has had an unsettling influence on the general market. Several issues which were due for sale this week, were postponed on this account, including Hamilton $260,227, York Township $166,000 and Oakville $111,000.

The town of Renfrew, Ont., is calling for tenders up till December 13, 1920, for the purchase of $53,401 6 per cent. 20 and 30 instalment debentures.

Point Edward, Ont., is offering $24,000 20-instalment debentures for sale. Tenders for the issue will be received until December 11, 1920.

Victory Bonds and the Average Man

Freedom from care and convenient interest collection are the principal factors that should govern the choice of investment by the average man.

No other security posssesses these qualities in a greater degree than Victory Bonds, while the interest return, which ranges from 5.67% to 6.55%, is the highest that has ever been obtainable from securities of the Dominion.

Write for our pamphlet entitled "Some Victory Bond Questions and Answers." It will interest you.

Debenture Notes

Walkerville, Ont.—The town has rejected all tenders on $300,000 6 per cent. fifteen instalment housing debentures.

Quebec, Que.—At the next session of the legislature the city will ask power to borrow $900,000 for various purposes.

Beausejour, Man.—On December 21, the town's ratepayers will be asked to vote on a by-law authorizing the raising of $4,000 for electric light purposes.

Selkirk, Man.—Ratepayers of the town will be asked to vote on December 21, on a by-law authorizing the issue of $6,000 7 per cent. six-instalment debentures, the proceeds of which will be used for school purposes.

Sarnia, Ont.—Two money by-laws will be submitted to the ratepayers at the January elections, one providing for the issue of $59,000 debentures to cover the cost of laying new water mains, and the other is to raise $35,000 to be used for the removal of the old waterworks.

Montreal, Que.—The city administration commission has decided to authorize an issue of treasury bonds in favor of the Bank of Montreal, to the amount of $500,000, dated from November 29, 1920, payable on demand and bearing interest at the rate of 6 per cent., payable monthly. This loan is in anticipation of the current year's revenue.

Winnipeg, Man.—The city council has authorized the city treasurer to call for tenders on $800,000 6 per cent. bonds. The securities will be payable in 10 years in Canada or the United States, or in twenty years in Canada only, at the option of the purchaser and the discretion of the treasurer.

Capreol, Ont.—W. H. Matthews, town clerk, advises *The Monetary Times* that the municipality is arranging to put on the market in the near future debentures of $32,000 to cover the erection, furnishing and equipment of an addition of four rooms to the present public school. It is just possible that this debenture will be guaranteed by the provincial government.

Vancouver, B.C.—In January next, ratepayers may be asked to vote on money by-laws aggregating $3,666,000. This amount is subject to final revision before going to the polls, but at present is made up as follows: $1,000,000 for city hall and auditorium; $1,000,000 for roads and pavements; $1,246,000 for schools; $100,000 for roads; $100,000 for streets; $100,000 for waterworks extensions; $85,000 for municipal coal yard; $35,000 for Connaught Bridge.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from November 10 to November 16, 1920. Debentures are to bear 8 per cent. interest: Beaverside, $700 7-years annuity; Suiatyn, $2,000 10-instalments; Big Meadow, $3,800 10-years annuity; Bright, $2,500 10-instalments; Mons, $1,900 8-instalments; Einggenheim, $2,000 15-years annuity.

Eight per cent. 15-years annuity, Rural Telephones: Amulet, $4,100; North Admiral, $11,800; Elstone, $5,500; Wyandotte, $17,200; Horse Lake, $7,300.

Rural Municipality of Ituna Bon Accord, $5,000 8 per cent. 10 instalments for road machinery.

Edmonton, Alta.—In a communication with *The Monetary Times*, Comptroller Mitchell states that the city has on hand $1,499,080 5 per cent. long-term bonds, which were authorized some time ago, but which are unsold and unhypothecated. In addition the city has $1,475,000 5½ per cent. 10-year debentures unsold, and which are the balance of the original issue of $3,000,000, of which $1,525,000 was sold some time ago to the National Bond Corporation.

"With regard to the above unsold debentures," says the comptroller, "there is no immediate object of the long-term debentures being placed at the present time, but it is probable that the $1,475,000 against consolidated tax arrears will be disposed of about the beginning of the new year. This would enable the administration, in addition to retiring other short term loans, to pay the sinking fund instalments for the current year, and thus consolidate same accordingly, it being the intention that the sinking fund, which has been fully maintained without intermission up to the present time, should be paid as at December 31st as hitherto."

Bond Sales

Milton, Ont.—The town has sold $48,000 high-school debentures to local citizens.

Township of Charlottenburg, Ont.—Wood, Gundy and Co. have been awarded $30,000 5½ per cent. 30-instalment debentures at a price of 88.53.

Saskatchewan.—The following is a list of debentures reported sold from November 10 to 16, 1920:—

Schools.—Fanford, $3,500 10-years 8 per cent., Russfield, $4,500 15-years 8 per cent.; Waterman-Waterbury Mfg. Co., Regina. Belleville, $900 20-years 7½ per cent.; R. P. Smythe, Kennedy. Rothbury, $1,000 10-years 8 per cent.; T. A. Mattick, Qu'Appelle.

Village of Prelate, $1,500 10-years 8 per cent., to M. Assuman, Prelate.

Pembroke, Ont.—Brent, Noxon and Co. have been awarded $47,000 6 per cent. 10 and 30-instalment debentures at a price of 93.895, at which rate the town pays about 6.80 for its money. Other tenders were:—

Canadian Debentures Corp.	93.346
United Financial Corp., Ltd.	92.53
T. S. G. Pepler and Co.	92.312
A. E. Ames and Co.	92.09
Wood, Gundy and Co.	91.55

N. A. Macdonald and Co. offered 94.31 for the 10-year lot, and 92.02 for the 30-year lot, while the Bank of Nova Scotia submitted offers of 94.50 and 90, respectively, for the two issues.

Ontario.—The province is offering in the home market, through a large and strong group of bond dealers, $6,000,000 6 per cent. 15-year coupon gold bonds, at a price of 94.34 and accrued interest, yielding 6.60 per cent. The money will cost the province about 6.80 per cent. Ontario has disposed of practically all of its bonds in the United States this year, and in view of this, the outcome of the present scheme should prove interesting.

It was formally intended to place the issue through a syndicate of six or seven houses, but the size of the issue and the present condition of the market made necessary the elaboration of the original plans. The present underwriting syndicate includes practically every bond house in the city of Toronto, which means practically every house in the province.

The securities are dated December 1, 1920, are due December, 1935, and are in denominations of $500 and $1,000. They are a first-class investment, and if there is sufficient money in the province, the syndicate should have very little difficulty in placing the issue.

Stamford Township, Ont.—The township has sold an issue of $22,000 worth of local improvement bonds. They were sold at 98, and bear interest at the rate of 6 per cent. The issue was split up in blocks of $500 and was sold to local people.

CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co., during the week ended November 26, 1920, in provinces, as compared with those of previous weeks and corresponding weeks of last year, are as follows:—

MACAULAY & NICOLLS

INSURANCE OF ALL CLASSES
ESTATES MANAGED

746 Hastings Street - VANCOUVER, B.C.
C. H. MACAULAY J. P. NICOLLS, Notary Public.

—for the good of the community.

WE shall shortly offer for sale, by public tender, the unissued portion of the present Capital Stock of this Company.

The par value of the shares is $50, and the shares will be sold in blocks of ten shares and multiples thereof.

In this connection we are publishing a series of advertisements in the Toronto daily papers dealing with our relation to citizens.

We invite interested parties to write for a form of tender; meantime we suggest the reading of the advertisements in the daily press.

THE CONSUMERS' GAS COMPANY
OF TORONTO

CORPORATION SECURITIES MARKET

Victory Bonds Dominate the Stock Exchanges—Pulp and Paper Issues Weak—Heavy Selling But Lack of Absorption Power—Corporation Bonds Suffer

RELEASE of control of Victory bonds was the principal factor in the stock markets this week. The weakness which accompanied the initial appearance of Victories on the exchanges had an unsettling effect, from which there has been very slight recovery.

From the standpoint of weakness, sugar and the papers were features in both Montreal and Toronto. The former suffered a decline of five points for the week, closing at the low figure. Definite assurance that the price of newsprint paper was to be placed on a 6½ cent basis, and in the case of Spanish River and Abitibi on a 7 cent one, was followed by no responsive action on the part of the pulp and paper group. Riordon, Wayagamack and Spanish River firmed somewhat, but all issues showed a loss for the week.

A favorable movement in Wall Street failed to stimulate any such action here. The stock market appears to be in a mood in which there is response only to bear news. Even the firming of Victories could not bring about any change.

Trading Greatly Increased

Trading on the exchanges was principally in Victory loan issues, which accounts for large turnover of bonds. At the same time, however, there was considerable activity in stocks, but the lack of absorption power was demonstrated, and under such conditions the market could make very little headway. The following figures show the day-to-day trading for the week ended December 1:

	Montreal,		Toronto,	
	Listed stocks	bonds	Listed stocks	bonds
Thursday . .	4,046	$ 29,800	1,120	$ 7,300
Friday . . .	5,683	53,300	1,744	30,500
Saturday . .	5,561	20,500	1,707	8,200
Monday .	12,565	360,350	1,891	539,570
Tuesday . .	10,002	555,000	1,909	526,400
Wednesday . .	10,343	443,100	4,138	822,730
Totals . .	18,203	$1,162,050	12,509	$1,934,700

The figures for the previous week were: Montreal, listed stock, 41,222; bonds, $116,300; Toronto, listed stocks, 8,618; bonds, $65,900.

Weak Bond Market

The extent to which the industrial bond market suffered as a result of the decline in Victories can best be seen from the figures on the next page. Weakness is in evidence, but this should not last long. The American market has been moving up for some time, in accordance with the economic law of commodity prices and security values. Restriction and control has prevented the Canadian market from doing so, but after the first effects of decontrol have passed off, there is every reason to believe that the upward movement will commence.

C.N.R. Quickly Subscribed

The $25,000,000 7 per cent. 20-year bonds of the Canadian Northern Railway, particulars of which were given in these columns last week, and which were offered in New York by Wm. A. Read and Co., and associates, were quickly taken up soon after subscription books were opened.

The securities are enhanced by the Dominion government's guarantee, of course, but nevertheless the quick absorption is a good indication of the condition of the market in the United States for our bonds.

At the annual meeting of the United Grain Growers, Ltd., at Calgary, Alta., on November 26, shareholders authorized the directors to increase the capital stock from $12,000,000 to $15,000,000.

A new listing on the Toronto exchange this week was that of the securities of the Ontario Steel Products Co., Ltd. The securities listed were as follows: Common, $2,000,000; preferred, $750,000; bonds, $600,000. The company's stock has been sold occasionally in the unlisted section of the Toronto exchange, and has been listed at Montreal for several years.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended November 26:—

Bailey Silver Mine, 62,890; La Rose Mine, 87,289. Total, 150,179. The total since January 1 is 24,550,775 pounds, or 12,275.5 tons.

MUTUAL FINANCE CORPORATION

The first balance sheet of the Mutual Finance Corporation, Ltd., Windsor, Ont., has been issued, and shows the organization to be well under way. The company, which was organized in May, 1919, specializes in financing the instalment sale of improved property, paying the builder in cash and obtaining from him a deed of warranty. These deeds are pledged with the Royal Trust Co., Montreal, and debentures issued to the amount of 60 per cent. of their value.

The assets side of the statement shows cash on hand and in bank, $57,401; land contracts and second mortgages receivable, $533,569; first mortgages receivable, $2,271; stock subscriptions unpaid, $251,960; sundry debtors, $5,680; accrued interest receivable, $2,863; commission on sale of stock, $99,208; incorporation and organization expenses, $3,802.

On the liabilities side the principal accounts are: Paid-up preferred stock, 18,938 shares, $189,380; paid-up common, 8,469 shares, $94,690; stock subscribed but not issued, $370,140; accounts payable, $8,140; dividends payable, $3,749; mortgages payable on real estate covered in land contracts receivable, $234,122; deferred profits on land contracts and second mortgages, $49,437; surplus, $5,966.

By Order of the Board.

F. B. WHITTET, Secretary-Treasurer.

Montreal, December 1st, 1920. 306

LOAN COMPANY FORM APPROVED

A number of representatives of the loan and trust companies of Ontario met Mr. V. Evan Gray, registrar of loan corporations, at the Parliament Buildings on November 30 and agreed upon the new loan company balance sheet form, which was drawn up last week.

One of the instructions accompanying the form is that mortgages, under assets, must include only bona fida advances to borrowers on security of real estate. Mortgages in respect of which legal proceedings have been taken for collection of principal, or where a company is in possession of the mortgaged property or any part of it, must be shown as a separate item or in real estate. Principal must consist only of actual advances made to borrower, and must not include any interest capitalized. Interest capitalized must be shown under item "interest."

Condensed Advertisements

"Positions Wanted," 3c per word · all other condensed advertisements 5c. per word. Minimum charge for any condensed advertisement, 65c per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent. extra if charged.

WANTED.—A General Agency for good board fire insurance company for the Province of Alberta. Have large premium income now on our books which we control, and splendid country organization well established. Apply Box 359, *Monetary Times*, Toronto.

INSURANCE OFFICE, with efficient agency organization in Alberta, Saskatchewan and British Columbia, would like to secure general agency for complete casualty lines, including automobile, accident, and also hail insurance in these provinces. Address Box 361, *Monetary Times*, Toronto.

FIRE UNDERWRITER for company operating in Saskatchewan. One with home office experience preferred. Excellent opportunity for young progressive man. State salary, references and experience. Box 363, *Monetary Times*, Toronto.

EXECUTIVE.—Age 35. Twenty years' experience. Eight years in Railway Operating and Construction Departments, twelve years in Accounting Department, past five years as General Auditor. Expert Accountant, thorough knowledge of railway and construction materials, well informed in financial matters, seeks engagement. Box 365, *Monetary Times*, Toronto.

AUTOMOBILE UNDERWRITERS' ASSOCIATION

The following officers were elected at the annual meeting of the Canadian Automobile Underwriters' Association, held in Ottawa on November 25 and 26: President, John Jenkyns, Employers' Liability Assurance Corporation, Montreal; vice-presidents, W. T. Perry, Ocean Guarantee and Accident, Toronto, and E. F. Hussey, of Montreal. The other officers will be appointed later.

On November 25, Mr. Goodwin, secretary of the Automobile Underwriters' office in New York, addressed the convention, touching on various phases of the business. Frederick Williams, Canadian manager of the Motor Union, which company is not a member of the association, also spoke to the members, touching upon the necessity for a more simple rating system, and the desirability of adopting a uniform policy wording. Some of the companies apparently are reluctant to abandon their special forms. This is a matter which the insurance departments already have in hand, and the compulsory adoption of a standard policy is being considered.

Mr. Williams also commented on the undue tendency, not only in automobile insurance but other branches of business, to depend upon and wait for the views, experience and recommendations of the American bureaus. While cordially approving the principle of keeping in touch with affairs in America, Great Britain and elsewhere, he urged for more initiative and celerity in carrying on the Canadian business. Reference was also made to the necessity of encouraging larger limits of indemnity against the risk of claims by the public. The tariff system in the past has not encouraged the selling of adequate indemnities, but rather the contrary. Various other points of interest were also touched upon. Mr. Williams' views were that costs in general were too high, and that anything which helped to reduce these costs and secure better results would help the tariff companies to meet and beat outside competition.

Canadian Pacific Railway Gross and Net Earnings Made Record Showing in October—Barcelona Traction Results Not Quite So Favorable

Barcelona Traction, Light and Power Company.—While net earnings in October increased satisfactorily over the figure of a year ago, the result did not mark up to previous exhibits. Figures since the beginning of the company's fiscal year illustrate this:—

	Gross (Peset.).	Net (Peset.).	Net inc. (Peset.).
March	2,533,815	1,695,141	754,489
April	2,676,592	1,767,913	782,874
May	2,647,592	1,767,311	628,785
June	2,523,998	1,618,187	488,939
July	2,542,202	1,570,414	451,773
August	2,715,020	1,716,904	463,834
September	2,910,418	1,945,823	793,844
October	2,795,106	1,831,392	520,795

Anglo-British Columbia Packing Company, Ltd.—At the annual meeting of the company in London, England, recently a good deal of criticism was voiced at the policy of the British Ministry of Food, which had been eventually left with 300,000 cases of pinks purchased by them at high prices, which they could not dispose of. These stocks were carried until last spring and summer, when they were thrown on the market at very low prices, making it impracticable not only for remaining stocks of pinks of the 1919 pack in other hands to be sold at a reasonable price, but even to bring over any of the 1920 pack at all until the market could recover. The company's 1920 pack had amounted to over 255,000 cases, and could have been further increased if they had cared to pack more second-grade fish, which, under the circumstances, was obviously inadvisable. Market conditions had not improved since the end of the company's financial year, and in the United States particularly buyers had been very badly hit by the recent heavy decline in sugar and other commodities.

In commenting on the reports for the period ended June 30, 1920, the chairman stated that as the result of a consistently conservative policy in the past, the company was in strong financial position, and better able to carry on through these difficult times than many of their weaker competitors.

Canadian Pacific Railway Company.—Net earnings of the company during October, 1920, showed an increase of $2,353,040, as compared with the same month last year, and $3,792,168, as compared with the September figure. This fine result reflects a heavy increase in traffic, due to the crop movement, but an influential factor which must be considered is the increased rates granted to the Canadian railways.

Gross and net earnings in October during the past ten years shows the following conditions:—

October.	Gross.	Net.
1920	$24,800,632	$7,700,822
1919	18,296,652	5,347,781
1918	15,682,780	5,085,835
1917	14,733,774	5,074,701
1916	13,237,086	5,674,739
1915	14,443,214	6,579,434
1914	9,282,928	3,321,328
1913	14,480,206	5,602,858
1912	31,060,397	5,060,887
1911	11,207,991	4,684,104

The figures for the ten months reveal less satisfactory results. Of course, it could hardly be expected that the result of one good month would be sufficient to offset the detrimental results of the previous months. The ratio of operating costs to gross earnings in the ten-monthly period this year was 81.1 per cent., against some 80 per cent. in 1919. The ten months' gross and net figures since 1911 are as follows:—

Ten months.	Gross.	Net.
1920	$172,238,035	$26,857,961
1919	142,536,626	28,401,051
1918	126,763,755	28,292,903
1917	124,127,290	37,376,847
1916	113,900,875	39,891,110
1915	83,340,289	31,468,501
1914	94,965,464	29,944,471
1913	115,934,317	37,211,092
1912	109,697,419	37,305,286
1911	89,720,951	30,460,424

Brazilian Traction, Light and Power Company.—Despite the fact that operating expenses were higher than in any previous month this year, net earnings for October established a new record. This was due to the fine showing made by gross. The following figures give the monthly gross and net for the ten months of the current year, together with the increase of net over last year:—

1920.	Gross (Milreis).	Net (Milreis).	Net inc. (Milreis).
January	9,655,000	5,101,000	827,000
February	9,381,000	4,984,000	1,120,000
March	9,900,000	5,310,000	297,000
April	10,245,000	5,595,000	499,000
May	10,985,000	6,262,000	1,045,000
June	10,874,000	5,796,000	919,000
July	11,745,000	6,118,000	729,000
August	11,837,000	6,152,000	1,267,000
September	12,043,000	6,217,000	1,208,000
October	13,442,000	6,940,000	1,977,000

Famous Players Canadian Corporation.—Earnings in excess of prospectus estimates, a strongly liquid position and satisfactory progress with the corporation's proposed construction program will be features of the first annual report. The report will cover the twelve months ended August 28th, 1920, and, therefore, six months of the period since public issue by Royal Securities Corporation of Famous Players Corporation 8 per cent. first preferred shares.

It is understood that net profits will be considerably in excess of prospective estimates at the time of issue of the preferred shares. They will exceed $250,000. The fact that the motion picture business is a non-inventory business, and the holding by the corporation of a large cash reserve for use in its construction program, will be reflected in net current assets at the end of the year's operations of over $2,500,000.

The corporation's program of a chain of large motion picture theatres from coast to coast is well on the way to realization. The present schedule calls for the opening of seven new theatres in leading Canadian cities before June, 1921.

Arena Gardens, Ltd.—On November 9 the Toronto General Trust Corporation was notified by the company that it intended to cease carrying on business, and did not intend to resume it on account of its financial position. On the request of Wm. Lyall, a bondholder to the extent of $19,900, the Toronto General Trust Company named Chas. E. Robin as receiver. On November 20 Justice Middleton confirmed this appointment, naming him as receiver until a permanent receiver is appointed at the trial.

It is stated by the Toronto General Trust Company that in June, 1917, the bondholders temporarily waived the payment of interest on the bonds for four half-yearly periods, commencing in September, 1917, and ending March, 1919. In the event of a receiver being appointed, the interest on these bonds for that period would become payable.

The present situation was described as one of "no prosperity, but wonderful prospects," by John Moody in an address before the Toronto Board of Trade on December 1.

DIVIDENDS AND NOTICES

International Petroleum Company, Limited

NOTICE OF DIVIDEND No. 1

Montreal, Nov. 30th, 1920. 302

RECENT FIRES

Muskoka Free Hospital for Consumptives at Gravenhurst, Ont., was Destroyed with Loss of $100,000—Garage in Montreal Suffered Loss of $50,000

East Angus, Que.—November 21—House and barn of Mr. Stevenson, on the Cookshire Road, was destroyed by fire. There was no insurance.

Gravenhurst, Ont.—November 20—Muskoka Free Hospital for Consumptives was destroyed by fire. The fire started in the diet kitchen. The loss is upwards of $100,000, with insurance of $90,000.

Harrowsmith, Ont.—November 25—Damage to the extent of $1,000 was done when a fire broke out in the Bank of Nova Scotia.

Merritt, B.C.—November 22—Fire broke out in the new building recently opened by John McStay as a restaurant and delicatessen store, completely destroying the interior. One fatality.

Moncton, N.B.—November 23—A fire broke out in the Minto sample rooms on Robinson Street, doing $18,000 damage.

Montreal, Que.—November 24—A garage at 563 Amherst Street, five autos were destroyed and seven others practically ruined by water. The loss is $50,000.

November 25—Damage which will probably amount to about $65,000 was caused by a fire which broke out in the premises occupied by the United Press Printing Co. on the second floor at 25-29 Notre Dame Street East.

Oshawa, Ont.—November 29—Residence occupied by Claud McQuaid was destroyed by fire. Defective wiring is believed to have been the cause. The house was valued at $7,000, partly covered by insurance.

Ottawa, Ont.—November 23—Residence of George C. Wright, 345 Waverley Street, was damaged by fire. The loss is estimated at $900.

Parkhill, Ont. November 27—Residence of Robert Whimp was destroyed by fire.

Perth, Ont.—November 22—The frame building adjoining the Hotel Cecil was destroyed by fire.

Rimouski, Que.—November 28—Garage owned by Mrs. J. A. Theberge was destroyed, with eight cars. The loss is $30,000.

Sydney, N.S.—November 12—The department store of J. F. Merchant and Sons on Charlotte Street was completely gutted, damage estimated at over $100,000 being caused.

Toronto, Ont.—November 30—A defective motor caused $2,000 damage to the leather goods factory of A. R. Clarke and Co., 663 Eastern Avenue.

ADDITIONAL INFORMATION CONCERNING FIRES

Brantford, Ont.—November 22—The Lake Erie and Northern sub-power station on West Mill Street was destroyed by fire. The fire was caused by an over-surge of electricity on the wires, which ignited the oil in the transformers and caused an explosion. The total loss is $58,500, with $19,500 insurance.

Limoilou, Que.—September 7—Roman Catholic parish house was damaged by fire. The loss was $6,025, not $20,000 as previously reported in *The Monetary Times*.

Ontario.—The fire marshal's report for the month of October shows that during the month there were [illegible]60 fires, with a loss of $1,005,952. Lightning was responsible for 102 fires. There were 99 barns destroyed, 415 dwellings, 65 stores and 56 manufacturing.

LIFE MANAGER WANTED by large British company contemplating transacting life insurance in Canada. State in confidence all particulars, experience, salary expected, etc., Box 367, *Monetary Times*, Toronto.

CENTRALIZED CONTROL IN B.C. FIRE INSURANCE

Provincial Association Now Operating — Fire Danger on Waterfront—Decision on Casualty Insurance

(Special to *The Monetary Times.*)

Vancouver, November 27, 1920.

THE British Columbia Fire Underwriters' Association as reorganized has been operating but a few months, instead of two associations as formerly, one on the mainland of British Columbia and the other on Vancouver Island. The wishes of the fire insurance companies were carried out by centralizing the control and abolishing both associations, reopening as a provincial body. The personnel of the administration is as follows: R. S. Day, Victoria, general agent of the Guardian Insurance Company, president; T. W. Greer, general manager of the Pacific Coast Fire Insurance Company, vice-president; F. W. Rounsefell, A. W. Ross, Wm. Thompson, F. W. Walker, C. R. Elderton, G. F. Rennie, all of Vancouver; C. F. McHardy, Nelson; Senator A. E. Planta, Nanaimo, and J. Forman, Victoria.

Fire Boat Again Urged

A serious fire on the waterfront, which was confined to the entire destruction of one coast steamer and the partial destruction of another, and which narrowly escaped being a very serious conflagration, has for the hundredth time raised the question of a suitable fire boat for Vancouver, and the newspapers are again editorially warning the authorities that their procrastination in this connection may yet lead to grave results.

A case of great interest to casualty insurance companies has just been decided in the Supreme Court here. Mr. Hanbury, a well-known lumberman, was driving Major Godwin as a passenger in his automobile when the car was struck by the British Columbia Electric train running between Eburne and Vancouver. Mr. Hanbury was severely injured and Major Godwin was killed. The widow of Major Godwin sued Mr. Hanbury for damages. At the trial the jury, after sitting until 11.30 at night, decided that Mrs. Godwin was not entitled to damages from Mr. Hanbury.

Insurance Organization in Washington

B. L. Barry, field secretary of the Insurance Federation of the State of Washington, delivered an address before the insurance men of Vancouver at their monthly "Get-together" luncheon, held on November 23. He stated that there were two organizations in Washington State which some thought were running on parallel lines, namely, the Insurance Federation of Washington and the State of Washington Insurance Agents' Association. As a matter of fact, their objects are entirely different. The Agents' Association was organized to correct vicious practices between agents and assist the companies in every reasonable way to make the profession a clean and honorable one, and operated in the best interests to the public at large. The Insurance Federation was organized for political purposes only, although they, too, aimed to act to the best interests of the public.

The Vancouver Fire Insurance Agents' Association have decided to hold a convention in Vancouver, to which fire insurance agents throughout the province will be invited. The date of the convention will be early in the coming year. The agenda paper will cover a great many questions of common interest, and the convention will no doubt result in a provincial organization, with probably the same constitution and by laws for the different provincial insurance centres.

At a meeting of the British Columbia Automobile Underwriters' Association, J. J. Banfield, of the Norwich Union Fire Insurance Company, was elected president in place of E. P. Withrow, resigned. It was also decided at this meeting to reduce the public liability and property damage rate on all commerical cars by 25 per cent. There are now sixty-three companies in our organization.

Rise and Progress of Canadian Life Insurance*

First Company, Canada Life, was Started by Men Who Could Not Get Insurance Here—Out of Thirty-Four Companies Started Under Dominion Laws, Twenty-Four Remain—Growth of Life Companies, and How Their Assets are Distributed

By T. B. MACAULAY
President, Sun Life Assurance Company of Canada

PRIOR to 1847, life assurance was almost unknown in the provinces of British America. The population was small and scattered, and the policies in existence were almost entirely British companies, chiefly the National Loan Fund. In that year, however, the first Canadian life office was founded, the Canada Life Assurance Co. At about the same time a branch also was established of the Colonial Life of Edinburgh, which had been established to operate in the British Colonies in association with the Standard Life, with which its business was afterwards amalgamated. These two companies, one Canadian, one Scotch, had the field almost to themselves, but the volume of their transactions was very small. Gradually, however, new British competitors appeared, and in 1866 several American companies also established themselves in the Dominion. The business of all combined was, however, but small when measured by our present standards. When in 1867 the Canadian provinces were federated and became the Dominion of Canada, the total of the assurances in force was probably in the neighborhood of $15,000,000, about one-fourth of the amount being in the Canada Life, the remainder in British and American companies.

First Canadian Company

The circumstances which led to the founding of the Canada Life are of interest. Mr. Hugh C. Baker, of Hamilton, Ont., a gentleman of considerable banking experience, desired to assure his life, and for that purpose applied to one of the British offices. Being a rather sub-standard life, there was a little hesitancy, and he was requested to go all the way to New York for examination, no small undertaking in those days, when railways were unknown and the only means of transportation were stage coach and saddle. Mr. Baker was a thoughtful, studious man, and he decided to found a local company in his own town. He succeeded in interesting a number of others, and thus in 1847 the Canada Life Assurance Co., the pioneer office of the Dominion, came into being. I may perhaps be pardoned for interjecting that my honored father joined the staff of the Canada Life as its accountant when it was eight years old, in 1855. I have often heard him speak of Mr. Baker, and always in terms of admiration, and even of affection. He had a profound regard for Mr. Baker's character, ability and devotion to the interests of his company.

Those were the days when such men as he had to grope in the dark to a large extent when faced with actuarial and investment problems. Elaborate tables of policy values, with the multitude of other helps which we now have, did not exist. Mr. Baker had to do much of his own calculating, using chiefly, if I remember aright, the Carlisle 6 per cent. tables for valuations. I have heard my father describe his voluminous calculations in connection with premiums, reserves and bond values. Such work was congenial to him, and the Canada Life was indeed fortunate in having such a man as guide in its early years. In those days the public knew almost nothing of the principles of life assurance, and were indifferent to its advantages. In many cases there was even keen opposition on the ground that it was an interference with the workings of Divine providence. The company had great difficulties to contend with, but Mr. Baker builded even better than he knew, and the Canada Life as it stands to-day is the monument to his enterprise and wisdom. Those who were associated with him honored and cherished his memory, and so should Canadians of a later generation.

Twenty-Five Year Interval

It was nearly a quarter of a century before any other Canadian company entered the field. The federation of the provinces, however, stimulated greatly the national consciousness and enterprise. In the late sixties several companies were incorporated, and shortly afterwards began business, the Ontario Mutual, now the Mutual Life of Canada, in 1870, the Sun Life and the Confederation in 1871. On the other hand, some of the American companies withdrew as the result of the passage of legislation requiring the deposit of securities for the benefit of Canadian policyholders, among them the Mutual of New York and the Connecticut Mutual. The Mutual Life protested that it was impossible for it to comply with any legislation of that character. It claimed that as a mutual company it was prohibited from giving any section of its policyholders a special lien on any portion of its assets. When we remember the dominating position occupied by the Mutual of New York in the life assurance world of those days, it will be realized that its withdrawal was felt to be a loss to the insuring public of the Dominion. Incidentally the Sun Life of Canada to a large extent owes its origin to this action by the Mutual. Mr. M. H. Gault, M.P., chief representative of the Mutual in eastern Canada, was one of the most wealthy and influential citizens of Montreal. He endeavored to dissuade his company from withdrawing, but without avail. He offered to personally put up the deposit required by the government, but even this proposal was not accepted, and the company withdrew. Mr. Gault thereupon secured an amendment to the charter of a new company which he had already incorporated in 1865, limiting it to life and accident assurance, and changing the name to the "Sun Mutual Life Insurance Co. of Montreal." You will notice that the words are identical with the title of the New York office, except that they are prefaced by the word "Sun," and New York is replaced by "Montreal." The word "Mutual" was actually a misnomer, for the company never was mutual. Why the great luminary was chosen as godfather I never knew, and all who could throw any light on the question have long since joined the great majority. Business operations were begun in 1871, and thus came into existence the company now known as the Sun Life Assurance Co. of Canada. When it was three years old, in 1874, Mr. Robertson Macaulay was invited to take charge of its destinies, and I hope I may be pardoned in saying that I, his son, joined him three years later, in 1877.

---

*An address before the Association of Life Insurance Presidents, New York, December 10, 1920.

The Mutual Life of Canada was founded by the late Mr. Wm. Hendry, who has but recently passed away, leaving a very fragrant memory. It began as an assessment company, but Mr. Hendry early saw the weakness of that system, and after consultation with Mr. Elizur Wright of Boston, took steps to organize the company on standard lines. It is good to know that he lived long enough to see the company which he had created become one of the great institutions of the Dominion.

The Confederation Life dates from the same year. I understand that the name mentioned in the application for the charter was the Dominion Life, but the members of parliament of the new Dominion were so afraid the public might suppose there was some connection between the company and the government that they changed the name to the Confederation Life. Its founder, Mr. J. K. Macdonald, has been for just about half a century an outstanding figure in Canadian life assurance, being now the last of the grand old pioneers. He holds a unique and outstanding position in several departments of Canadian life, and has been repeatedly honored by his fellow-countrymen, whose respect and goodwill he enjoys to a very remarkable degree. Now in his eighty-fourth year, his activity would put many a young man to shame. Some years ago he retired from the active management of his company, which passed to the shoulders of his able and popular nephew, Brigadier-General W. C. Macdonald. The tragic death of this gentleman, however, not merely shocked and grieved us all, but compelled Mr. Macdonald to resume the management. We are happy to know that he is still the active president of the company, paying particular attention to the investment department. With him are now associated his son and nephew. I understand that policy No. 1 in the Confederation, taken out in 1871, forty-nine years ago, is on the life of Mr. Macdonald, and is of course still in force. Long may our friend be spared to enjoy the honor and comfort which he has so well earned.

Five Thousand Policies in Force

When these newly organized companies began to compete for their share of business in 1871, the Canada Life had in force slightly over five thousand policies, covering a little more than eight million dollars of assurances. In those days, however, these figures appeared very large. The company had behind it twenty-four years of prosperous business life, and its prestige was indeed great. Its assets of a million and a quarter dollars were considered enormous for Canada, and it had a record for large profits such as few companies anywhere have been able to sustain. Canadians were, and are, rightly proud of their pioneer company, which has now, however, grown to a size and strength which would make the men of 1871 gasp with astonishment.

Continuing the history of the Canada Life: On the death of its founder, Mr. Baker, in 1859, the board of directors sent a deputation to the old country to select a successor who would possess the advantage of training in the head office of some British company. Their choice fell on Mr. A. G. Ramsay, at that time connected with the Scottish Amicable Life. I was privileged some time ago to read the interesting correspondence which these representatives of the board had with Mr. Ramsay, which led to his becoming manager of the company, and ultimately, in 1875, its president. After twenty-six years of arduous service, Mr. Ramsay retired in January, 1900, on a liberal and well-earned pension, which he enjoyed for many years. He was succeeded by Senator Geo. A. Cox, one of the most forceful and enterprising men Canada has produced. He had been connected with the company for over thirty years before assuming the presidency. He, in turn, was succeeded by his son, Mr. E. W. Cox, whose career was cut short by death after but one year of office, his successor being our friend, his brother, Mr. H. C. Cox, president of the company at the present time.

Perhaps I may add that, to those who remember the great part played by Mr. A. G. Ramsay in the development of the company, it is very pleasing to know that the name has not been allowed to drop out, for among those intimately associated with Mr. Cox is Mr. Ramsay's grandson, another A. G. Ramsay.

Numerous Other Companies Formed

The number of companies continued to increase. The London Life began as a provincial company in 1874, taking a Dominion license in 1885. The North American Life was founded in 1884, by the late Mr. William McCabe, with whom was associated Mr. Leopold Goldman, whom we are pleased to have with us, and who has long been the head of his company. The Temperance and General Life appeared in 1884, afterwards amalgamating with the Manufacturers Life, which began in 1887. These were followed in time by the Dominion, the Excelsior, the Great West, the Northern, the Imperial, and others.

As compared with the record at Confederation, of one company, with assurances of about four and a half millions, we have now twenty-four companies operating under Dominion license, with assurances in force at the present time (1920) of approximately $1,650,000,000 within the Dominion, and $2,000,000,000 if we include their foreign business.

A total of thirty-four Canadian companies have at various times been licensed by the Dominion Insurance Department, but in the course of years nine have reassured or amalgamated, and one has liquidated. It is a matter of some pride to Canadians that no person has ever lost a dollar through the failure of any Canadian life office.

In addition several companies have been formed from time to time under provincial charter, but those as a rule have limited their activities to the confines of the particular province in which they were formed, and their operations have not been on a large scale.

Competition from United States

The Canadians, however, have by no means had the field to themselves. Thirty to forty years ago the American companies were exceedingly active, and made a great impressive on the character of Canadian life assurance. With the increasing competition from the Canadian companies, our American friends after a while showed a tendency to somewhat neglect the field, but in more recent years some of them, the industrial companies in particular, have been extremely active. Among these, in order of ordinary business

LIFE ASSURANCE IN FORCE IN CANADA ORDINARY AND INDUSTRIAL COMBINED

At end of	Canadian companies.	% of total.	American companies	% of total.	British companies.	% of total.	Total.	Approximate population of Canada.	Assce. per head.
1869	$ 5,476,358	15	$ 13,885,249	39	$16,318,475	46	$ 35,680,082	3,386,000	$ 11
1879	33,246,543	38	33,616,330	39	19,410,829	22	86,273,702	4,157,000	21

in force, come the Metropolitan, New York, Prudential, Travelers, Aetna and Equitable. The Equitable is at present withdrawing, but the other companies named show every indication of being more energetic than ever.

Coming down to statistics, the earliest official figures relating to the business appear in the first report of the Dominion Superintendent of Insurance, published at the end of the year 1875. The first year for which the business is reported is 1869. The rapid development may be noted from the table herewith, compiled from the reports of the superintendent. For comparison I have added some details regarding population.

Canadian Companies Go Abroad

The limitations imposed by the comparative smallness of our population have been felt, and other parts of the Empire and of the United States and Foreign fields have proved attractive. The Sun Life was the first Canadian office to venture abroad, taking that step in 1879. For over ten years it was alone in having outside branches, but it was then followed by the Canada, North America, Manufacturers, Confederation, and others. Ten of our companies are now doing business beyond the limits of the Dominion. These outside agencies extend to many parts of the world. With the exception of Australia and New Zealand there is hardly a part of the British Empire in which one or more of the Canadian companies is not operating, and the same may be said of the West Indies and the Spanish-speaking countries of South America. The partial withdrawal of the American companies from foreign business as a result of the Armstrong legislation has left the field more open to the Canadian offices, which are gradually taking their place at the international life assurance institutions of the world.

When speaking of foreign business, we do not include in that category the branches within the United States. It is not in our hearts to speak of our American friends, even in business arrangements, as foreigners. We look on you merely as our brothers who have set up business on your own account, while we prefer to stay in partnership with the old firm. Such business independence, however, does not destroy the family relationship. Five Canadian companies have such non-foreign branches in one or more of the American states, the total American territory thus reached being ten states and three dependencies.

The total business in force in Canadian companies outside of Canada is now (1920) approximately $350,000,000.

The industrial business in force amounts (1920) to about $300,000,000, and is divided between the Metropolitan, Prudential and London Life.

Life assurance exists for the purpose of relieving the distress which would otherwise result from the removal of the husband or father. All our activities, all our accumulations, are for the purpose of enabling the companies more extensively and more surely to perform this function. The extent to which the social life of Canada has been thus served may be seen by the following table:—

PAYMENTS TO POLICYHOLDERS IN CANADA BY COMPANIES OPERATING UNDER DOMINION LICENSE

Year.		Death claims.	Matured endowments.	Other payments.	Total.
1869	..	$ 315,018	(Incomplete—only figures available.)		
1879	..	818,698	$ 120,044	$ 364,736	$ 1,303,479
1889	..	2,080,496	424,513	950,899	3,455,909
1899	..	4,280,560	1,370,255	1,631,191	7,282,007
1909	..	6,993,172	3,033,152	4,035,005	14,061,330
1919	..	20,625,018	7,436,582	14,350,659	42,412,260

Approximately $450,000,000 have already been thus distributed to policyholders and their representatives.

Philanthropy on a Business Basis

These figures are, however, a mere foretaste. I like to remember that it is but a question of time when the total sums assured by the companies will be paid out in death claims or endowments. It is true, unhappily, that some of the policies will lapse, but we can rejoice in the fact that lapses form a continuously diminishing percentage of the total, and in any case every policy thus cancelled is at once replaced by several new ones. Viewing the matter from a humanitarian standpoint, think what it will mean to have, say, two billions of dollars distributed among the population of Canada during possibly the next fifty years to just the people who will need it, and at just the time when they will need it. There is a danger that we may become so absorbed in the commercial aspects of our calling that we may at times forget its vast social importance. If there is one business that can be said to approach the divine in its character, that business is ours. I often speak of it as philanthropy reduced to a business basis, and thus enabled to be carried out on a scale compared with which all our charitable efforts must of necessity be the veriest trifles. We have the honor of being connected with the noblest business on earth, which has already been a blessing to humanity beyond power of measurement, but which in the future is bound to be a factor of immeasureably greater magnitude in the relief of human misery and the uplifting of mankind. On us falls the honor and responsibility of directing this great movement. We must see that it is conducted safely, energetically, and on a level in keeping with its character. But this is a digression.

It is in times of unusual distress resulting from some great calamity that the benefits of life assurance are most forcibly brought home to people. We have just passed through one of the most trying periods that the world has ever experienced, that of the war, and the subsequent influenza epidemic. These two great calamities, the second, however, resulting directly from the first, have put life assurance to a severe test.

War and Influenza Claims

The war claims which fell in under Canadian policies totalled $20,353,638, and the influenza claims $12,695,902, a total of $33,049,540, a large sum for Canada. All of these claims may for practical purposes be regarded as extraordinary losses, not contemplated in the original premiums, but the companies have stood the strain in a way that has surprised themselves. No more striking proof could have been given of the soundness of the foundation on which the business rests. The widespread distribution of the claims, and the confidence thus created, have done more to popularize life assurance than any amount of advertising propaganda along the usual lines could have done.

The service rendered by these institutions is, however, by no means limited to the distribution of policy claims. Our life companies have been a powerful factor in the development of the country. The small savings of tens of thousands have been gathered together in the form of accumulated reserves, and thus rendered available for mortgage loans and the purchase of government, municipal and corporation debentures and stocks.

Distribution of Assets

The following table shows the total assets of the Canadian companies at decennial dates, and the classified distribution of their investments:—

ASSETS OF CANADIAN LIFE COMPANIES

Year.	Mortgages.	%	Bonds.	%	Stocks.	%
1879	$ 901,331	17	$ 2,516,025	48	$ 74,696	1
1889	8,945,126	46	3,807,526	20	897,789	5
1899	17,440,942	32	14,411,738	27	2,917,516	6
1909	45,339,423	29	60,801,240	38	9,971,652	6
1919	91,325,101	24	179,510,373	47	24,979,354	6

Year.	Real estate.	%	Policy loans.	%	Other assets.	%
1879	$ 229,476	4	$ 502,867	9	$ 1,811,167	21
1889	1,101,007	6	1,564,250	8	2,419,514	15
1899	4,523,069	8	5,425,091	10	9,036,850	17
1909	6,214,770	4	18,409,651	12	12,953,555	11
1919	16,791,000	4	44,611,927	11	19,259,135	8

Year.	Total assets.	Total premiums.
1879	$ 5,303,219	$ 919,345
1889	18,735,212	4,459,595
1899	53,755,206	9,256,569
1909	153,790,291	24,236,724
1919	376,476,890	66,953,436

This concentration of savings enabled the companies to render unusual service to our government during the course of the war. Their managements, one and all, loyally devoted themselves to the task of supplying funds for the prosecution of the great struggle in which we in common with the rest of the Empire were involved. In the following table I have included subscriptions by the Canadian companies, and by the Canadian branches of American and British companies which obtained their funds from their Canadian policyholders.

SUBSCRIPTIONS TO CANADIAN GOVERNMENT LOANS

First war loan	$ 14,322,500
Second war loan	17,542,700
Third war loan	31,020,000
First Victory loan	51,967,400
Second Victory loan	49,390,550
Third Victory loan	70,871,000
	$235,114,150

The larger subscriptions were not in all cases accepted in full, but the amount actually allotted to the companies and taken up by them totalled $182,538,350. The importance of this action by our life assurance companies can hardly be over-estimated. It was a handsome sum of money to supply when our population is considered, but the indirect value of the service was even greater. We must remember that up to the beginning of the war there had never been a Canadian government loan floated in the Dominion. Our people prior to that time had always borrowed for their requirements in Britain. Now they were thrown on their own resources, and it was but natural that in some quarters there should be timidity as to whether domestic loans could be made a success. Even in some high financial quarters pessimism was expressed, but when the subscriptions of the life companies began to be made public, doubt vanished, and was replaced by confidence and enthusiasm. The public subscribed with a heartiness and goodwill which surprised everybody. Canada came to know her own strength. The government loans were a great success, and in bringing about that success the life companies had been one of the most important factors. Several of our companies were also able, as a result of their external branches, to take worthy proportions of some of the British and French loans.

In closing I should mention that in Canada we have but one government department for the supervision and regulation of assurance throughout the whole Dominion. We thus have to deal with one central federal superintendent, instead of with officials located in every province. We have also one federal law, which regulates most of the details of the business, the provinces having jurisdiction over only local companies which have not secured a Dominion license, and over certain of the agency and other operations of the Dominion companies which are local in character. We do not claim that our laws are perfect. What laws are? We do, however, believe that we have one of the best Insurance Acts to be found on the statute books of any country. The Superintendents of our Insurance Department have moreover not been appointed for political reasons. We have had but three since the organization of the department in 1875, and none of these gentlemen had ever taken any part in active politics.

From the foregoing summary Canadians feel that they are justified in looking with considerable satisfaction on what has been already accomplished in the Dominion in developing this noble business, and that they can look forward to the future with the most absolute confidence.

LOAN AND TRUST COMPANIES MUST REPORT

Forms Now Prepared for Inspection by Dominion Department of Insurance—Overlapping of Taxation to be Discussed at Conference

(Special to *The Monetary Times.*)

Ottawa, December 9, 1920.

IN consequence of amendments passed at the last session of Parliament to the Loan Companies' Act and the Trust Companies' Act, forms are now being printed for the purpose of sending out to all loan and trust companies incorporated under a Dominion charter so that they may state on them all important facts with regard to the business, finances and other affairs of the companies for the year 1920. These forms will reach all these companies before New Year's Day, and they will be expected to forward to the Superintendent of Insurance, not only full particulars of the companies' business, but any special information which the superintendent may require. All these returns have to be in the office of the Superintendent of Insurance before March 1st.

As a result of the two amendments passed last session inspectors will now visit the head offices of each loan company and each trust company at least once a year. The first inspection visits will occur after the New Year, and inspectors will have every right to examine all books of each company with a Dominion charter, including minute books of meetings of boards of directors. It is understood that special attention will be given in connection with this new work of the Insurance Department to names on various boards of directors in order to ascertain what ramifications, if any, exist between directors of loan and trust companies and directors of insurance or other companies.

An annual report must hereafter be made by the Superintendent of Insurance to the Minister of Finance with regard to all trust companies and loan companies, but this cannot now be expected before next May at the earliest. When the superintendent believes that the assets of any company are insufficient to justify its continuance in business, the minister can suspend or cancel the certificate of the company, after giving it a reasonable time to present its case. It may continue to transact business if the minister issues a conditional certificate. Such conditional certificate may provide that the company arrange to sell its assets and transfer its liabilities to some other company. If, however, no arrangement satisfactory to the minister has been made for such sale and transfer, and if the company's condition has not improved, it "shall be deemed to be insolvent."

The announcement that premiers of the western provinces will come to Ottawa for a conference with the Dominion government with respect to that subject of almost annual pilgrimage—the transfer to the provinces of the natural resources still held by the Dominion in the Prairie provinces—makes it probable that other matters of great importance may also be discussed. There may be something further with respect to the uniformity of labor laws throughout the Dominion, and it is getting nearer to the domain of practical politics each year that there shall be a conference of the finance minister and his officials with provincial treasurers and their taxation experts in order to map out the area of revenue and prevent annoying and useless duplication. It is understood that the finance minister is himself of the opinion that such a conference is necessary, and that the taxation powers of cities should themselves come under scrutiny as well at such a conference, especially with regard to civic income taxes. Whether such a conference would proceed further to consider proposals made recently in western Canada for a consolidation of the collection machinery for provincial, municipal and federal purposes is doubtful.

THE TARIFF INQUIRY AND POLITICS

DECEMBER 6th brought the sessions of the Federal Tariff Commission to a close, except for a special meeting to be held in Ottawa for the presentation of some evidence held over from regular sittings. No interest is being evinced as to what the commission will recommend, for the attitude of the members and the policy of the government are already well known. Premier Meighen has been preaching his policy of "moderate" protection throughout the country, and Sir Henry Drayton's remark in Toronto that what the commission wanted was evidence as to details rather than as to general principles endorses the view that the present level of protection will not be substantially altered. The government has not wavered in its attitude, and now that a contraction in business favors an appeal for preference in the home market and for support rather than pressure on prices, grounds for a protectionist policy, from the standpoint of popular support, will be all the stronger.

The tariff, in fact, is one of the few issues which are so big that they cannot be taken out of politics. The fact that a protective tariff favors city growth against that of the country is well known and unquestioned. But is there any scientific way of deciding whether city growth should be favored? Certainly there is not, and, assuming that protection is agreed upon as to principle, there can be no theoretical method of determining the extent of such protection. The general level of customs duties must be arrived at in the political field, though the adjustment of detail, such as the comparative duties on raw materials and on manufactured goods, can be settled in a fairly scientific way.

There is, therefore, no prospect of a tariff reduction at the hands of the present government, and if Sir John Willison is right in saying that all parties became protectionist when they came into power, then any change in government will also be devoid of substantial change in duties. While free trade as a practical policy is out of the question for the time being, and the present state of industry throws the strong argument for preservation of the home market on the side of the protectionists, yet it is not justifiable to suppose that a farmers' government, or possibly a Liberal government, might not bring about substantial reductions. In any case, there is a growing movement in this direction, which becomes stronger and sounder through political experience in the provinces, and which certainly will gain in power if it survives the present critical period of depression. There are sound arguments upon which the low tariff advocates can always rely, such as the essentially primary character of Canadian industry, and there is also the effective illustration of what was accomplished under free trade in Great Britain.

BANKING IN CANADA AND ABROAD

THE end of November was marked in North Dakota by the closing of another bank, the seventeenth which has been compelled to acknowledge that its current funds were exhausted. The financial situation in that state, as described by those who have recently traversed it, is said to compare closely with that which existed in 1907, when ordinary currency was unobtainable.

Almost all the banks in North Dakota, both state and national, are said to be calling loans and refusing to part with money. Many depositors, alarmed that they may be unable to secure funds when they require them, are anticipating this occasion and withdrawing money in advance, thus rendering the position that much worse. New borrowers have no chance to obtain funds in the state, and applications are rejected every day. In Fargo and Grand Forks money is reported just as tight as in outlying points.

The banking situation in Cuba is also critical. On November 29 President Menocal signed a decree extending the existing moratorium from November 30 until December 31. The moratorium will continue under the same conditions which have prevailed since it was first ordered. Failure of the Cuban Congress to convene and enact legislation necessary to relieve the existing financial situation in Cuba was given by President Menocal as the reason for extending the moratorium. Efforts by administration leaders to convene in

Congress to consider financial measures have so far met with failure. Liberal members persist in their determination to absent themselves from sessions of the Lower House, and the extension of the moratorium is looked upon as a further opportunity given Congress to reach a solution of the difficulties confronting business interests throughout the country.

Canada is fortunate in being able to turn the corner without having the bank crises which have been experienced in Japan, Cuba and North Dakota. In each case there were, of course, special causes which contributed to the failure of banks. In Japan it was the drop in silks, combined with a quick contraction in business generally, which brought down at least one bank which was closely allied with the silk trade. The fall in the price of sugar tested the strength of the Cuban institutions, and the fact that a moratorium was required indicates that they were not able to handle the situation. The strength of the banks of North Dakota has been undermined by the government of the Non-Partisan League, a socialistic party, and the drop in wheat sent many to the wall. The relative strength of Canadian banks is indicated by the fact that they were among the last to take advantage of the Cuban moratorium, drawing heavily upon their main resources to meet the situation. An extensive scale of operations in varied industrial fields combine to give the Canadian banks strength which is not enjoyed by the local institutions, or one specially identified with a single industry.

PUBLIC UTILITY RATES AND COSTS

ARE shareholders to-day opposing the purchase of public utilities by the cities of Canada? This question can best be answered by another, How many public utility companies are now making a profit commensurate with the investment and with current rates of interest? The answer to the latter is that there are very few, and bondholders and shareholders, as a general rule, welcome the opportunity to exchange their unprofitable investments for municipal securities yielding the high rates which must now be paid on new borrowings. What the shareholders do urge, however, and fairly so, is that prices fixed by arbitrators be in proportion to present replacement costs, and that assets be not depreciated through years of starvation.

The attempt is continually being made by public ownership politicians to create the impression that the shareholders are averse to selling out, and, since the corporation is opposed, it must be good business for the citizens. An illustration is found in the case of the Winnipeg Electric Railway. But the facts show that on October 25, 1918, when the company first applied to the city council for an increase in fares, counsel for the Winnipeg Electric Railway Co. made the following statement: "I feel certain that if the city council should pass a resolution that they are in favor of taking over the street railway utility now, under the terms of By-law 543, they would get a hearty response from the shareholders, whom, I am sure, would be quite willing to hand it over to them." That statement was made in reply to a suggestion that the company should cease operating the utility, but there has been no further action taken. Neither has the offer been withdrawn.

Those who to-day upbraid the company for giving citizens a street railway service also demand that if the company is to continue operating the utility, then it should revert to the old franchise fares. It is to be assumed that those people who make such a demand are logical enough to concede that the quality of service given, too, should be governed by the old franchise provisions. If this were the case, Winnipeg would have a street railway which extended no further than the city limits; did not operate on Sundays; did not run after midnight; served only the downtown sections; and charged double fares after 11 p.m. Furthermore, it would have street cars which were without safety devices; heated only with a stove placed in centre of floor; without double windows, front exits, etc., and would be paying its motormen and conductors not sixty cents an hour, but nineteen cents an hour.

It would seem that patrons of street cars, and particularly those interested in Labor circles, who paid five cents a ride when the carmen were getting 19 cents an hour, should have no difficulty at all in seeing a thoroughly logical relationship between the increase of fare to 6¼ cents and the present wage scale for carmen of 60 cents an hour.

WHEN THE COUNCILLOR APPEALS

THIS is the season when municipal councillors pledge themselves to efficiency and economy, principles which appeal to the elector in the abstract, but in which he is not inclined to concur in actual practice. While the municipal council has the tacit approval of the electors in the frenzy of expenditure and borrowing which has taken place in Canada, it is not correct to assume that the voter is fully conversant with the financial record of the appealing councillors. His political memory is short-lived, and he is inclined to vote on the strength of promises rather than of past deeds. Now that considerable unemployment is an important factor, this will be all the more true of the coming elections. What aspirant to political office would dare to pledge himself to a policy of free spending and borrowing when such a policy can be carried out under the name of progress and public service? The transition is easy, and requires only a gentle suppression of the political conscience. "The devil was sick,—the devil a monk would be; the devil was well,—the devil a monk was he."

But the financial record of councillors would be better impressed upon the elector if annual financial statements were presented before rather than after elections. S. B. Prest, of Souris, Man., suggests in a letter to *The Monetary Times* "that councillors should be elected a month or six weeks after the end of the financial year in place of before it as at present. An amendment to the Act along these lines would enable people to better size up the acts of the old council before they are called upon to elect a new one, as they could have the audited statements in their hands before they went to poll their votes. Nobody ever hears of shareholders of an incorporated company electing their directorate before the annual statement was issued, and I can't, for the life of me, see why municipal affairs should not be run along the same lines, and I would be pleased to hear what objections there would be to the change suggested."

This is brought about to a large degree, it should be pointed out, by the practice of cities, such as Regina, Saskatoon and Edmonton, in preparing ten-months' statements, which are available before the end of the year. A year's record would be more conclusive, however, and it would be both sound and practicable for elections to be held about March first. Financial responsibility would then be definitely fixed upon the members who appealed for re-election. This is not the only consideration in municipal politics, but it is one which is not sufficiently emphasized in the misrepresentations of a political campaign.

The British Food Controller sees in the fall in the price of wheat in America and Australia a sign of a real change in the economic situation in Great Britain, says a cable from London. The Food Controller is to be congratulated for recognizing a real solution of the problem which he has been up against.

The proposal for the French government to operate a huge lottery yielding sixty billion francs a year in profits is a blow to the credit of that great nation. It is a bad day when the avarice of the small investor must be exploited to save the finances of the state.

The Ontario farmer who said that "the price of wheat had gone down, why should not the price of telephones follow?" forgets that, though the price of telephones followed the upward movement of wheat, there was a considerable interval between.

LEADING FIGURES IN POWER DEAL

Sir Adam Beck
Chairman of the Hydro-Electric Power Commission of Ontario

Sir William Mackenzie
Former "Power King" of Ontario, Who Offers Holdings For Sale

Terminating ten years of conflict and two years of negotiation, Sir Adam Beck and Sir William Mackenzie, Ontario power leaders, have reached an agreement, whereby all of the important electric generating plants in the province, with the exception of the Dominion Power and Transmission Company, Hamilton, will be placed in the hands of the Hydro-Electric Power Commission, providing that Toronto ratepayers are agreeable. Details of the negotiations are given elsewhere in this issue. Sir Adam Beck, who was chiefly responsible in bringing about the big deal, was appointed commissioner to investigate development and distribution of electric power from Niagara Falls in 1903, and ever since he has been closely identified with the policy of supplying cheap electric power to the people of Ontario. In 1906 he introduced a power bill to the Ontario Legislature, creating a commission under the above name. Through all these years as chairman of that body, he has worked incessantly against strong opposition.

Sir William Mackenzie, who heads the interests selling out, has been identified with railway, power and public utility projects in Canada for twenty-five years past. In partnership with Sir Donald Mann he built the Canadian Northern Railway, sold to the Dominion government in 1918. The Toronto Railway Company and its subsidiaries was the chief public utility group with which he is identified. In addition he is a director of several financial institutions.

At a meeting of the board of directors of the Merchants Bank of Canada this week, a bonus of 10 per cent. to the entire staff was voted.

PERSONAL NOTES

N. F. Hoxie, formerly of Goldman and Company, investment brokers, Toronto, has joined the staff of H. J. Dingman and Company, bond dealers, Toronto, as sales manager.

W. C. Muir has been appointed general manager of the Canadian National Express Company, with headquarters at Winnipeg. Mr. Muir was formerly general superintendent of the company.

Thomas Bradshaw, general manager of Massey-Harris Company, Toronto, and formerly finance commissioner for the city of Toronto, has been elected to the directorate of the Toronto General Trusts Corporation.

R. H. Metzler, for many years resident partner at Halifax of the stock brokerage firm of F. B. McCurdy and Company, whose financial business was recently sold to Johnston and Ward, members of the Montreal Stock Exchange, has associated himself with the new firm as a partner, and will take over the management of its Montreal office.

Lieut.-General Sir Arthur Currie, principal of McGill University, and Sir Lomer Gouin, formerly prime minister of the province of Quebec, were elected to the board of directors of the Bank of Montreal at the annual meeting of the institution, held in Montreal this week. This action followed the approval of the shareholders of a change in the bank's by-laws increasing the number of directors constituting the board to eighteen, instead of sixteen, and brings the number of the present personnel up to seventeen. The other directors were re-elected without change.

BANK PRESIDENT LOOKS FOR EASIER CONDITIONS

Discussing falling prices and a remedy for them, Sir Vincent Meredith, president of the Bank of Montreal, in an address at the annual meeting of shareholders on December 6, said an international scheme was necessary for the financing of foreign trade, owing to the dislocation of foreign exchange. Pending the adoption of such a scheme, Sir Vincent said Canada should act on its own initiative by establishing a corporation to foster foreign trade so as to keep factories busy and give employment to labor. Sooner or later, he declared, such a corporation must be launched, adding: "If foreign trade can be revived it will solve many of our difficulties."

Speaking of the burden imposed on the country by national railways operated at a heavy loss, he expressed the opinion that the railways should be placed under corporation control upon terms fair to the country. He also expressed the opinion that no more ships should be built by the government, as world tonnage already exceeded requirements.

"The strain on credit," continued Sir Vincent, "appears to be now reaching its peak. An easier tendency is the logical outcome of deflation of prices. Manufacturers and wholesalers are revising inventory values to meet the changed conditions, and retailers must adopt the same policy to induce the public to again freely enter the market. The pursuance of this course will tend to ameliorate the labor situation by lessening unemployment and should prove a factor in warding off slackness of work, which acts and reacts to the detriment of business. Employment is the sovereign remedy for labor unrest. The commercial mortality of Canada has been notably low for several years past, but it must be expected that the process of deflation and slacker trade will somewhat swell the failure list, a contingency for which prudent bankers prepare. Some reduction of bank deposits may also be apprehended. I believe, therefore, that this is a time to keep close-hauled, to prepare against gusts without inviting gales, and to recognize the existence of world-wide conditions presaging a substantial readjustment of commodity prices before rock-bottom is reached."

ONTARIO POWER NEGOTIATIONS SUCCESSFULLY CONCLUDED

Hydro Commission and the City of Toronto Close Big Deal With Mackenzie Interests—Nearly Thirty-three Millions Involved—Ratepayers Will Vote

BY the conclusion of negotiations between the Hydro-Electric Power Commission of Ontario, the city of Toronto and the Mackenzie interests the province of Ontario comes into possession of a generating and distributing power organization greater than any other in the world. The deal has gone through, but is still subject to the approval of the ratepayers of the city of Toronto. Very little opposition is expected when the vote is taken in January, however. The public-owned Hydro system has been in actual operation for ten years, while the negotiations just concluded have been in progress for over two years. In all, eighty-four companies are now part of the system, all of which were secured by negotiation. The added sources of power supply will, it is expected, eliminate the constant danger of interruption in service, and, with the addition of the energy to be generated by the Chippawa development, ought to guarantee unbroken service and ample power.

According to Sir Adam Beck, chairman of the Hydro-Electric Commission, there will be no occasion for the securing of any additional right-of-way for some thirty or forty years. The only power system in Ontario which is not now publicly owned and operated is that of the Dominion Power and Transmission Company, of Hamilton.

Details of the Transaction

As summarized by R. J. Fleming, manager of the Toronto Railway Company, details of the transaction are as follows:—

"The Toronto Railway Company will sell to the Hydro-Electric Power Commission of Ontario:—

"(a) All of the issued capital stock of the Toronto Power Co., Limited, of par value of $3,000,000.

"(b) All of the issued capital stock of the Toronto and York Radial Railway Co.

"(c) All of the issued capital stock of the Schomberg and Aurora Railway Co., which three companies control the property commonly known as the Toronto Power Co., Limited, the Toronto-Niagara Power Co., the Electrical Development Co. of Ontario, Limited, the Toronto Electric Light Co., Limited, and the Toronto and York Radial Co., also the Schomberg and Aurora Railway Co.

"The sale, if made, to take effect as from the first day of December, 1920, as of which date all taxes, insurance and other necessary adjustments are to be made.

"The consideration to be $32,734,000, payable to the Toronto Railway Company as follows:—

"(a) Approximately $6,971,295 in 6 per cent. 20-year bonds of the corporation of the city of Toronto, dated December 1, 1920:—

"(b) Approximately $2,375,000 of 20-year 6 per cent. bonds of the Commission, dated December 1, 1920, secured by first mortgage on the properties of the Toronto and York Railway Co. outside the city of Toronto, which bonds are to be guaranteed by the province of Ontario as to principal and interest, and issued under the terms of the Hydro Radial Act.

"(c) Approximately $613,528 of 20-year 6 per cent. bonds of the Hydro Commission, dated December 1, 1920, guaranteed as to principal and interest by the Province of Ontario.

"(d) The assumption by the Commission of the underlying bonds and the interest and sinking funds thereon of the Toronto Power Co., Limited, as follows:—

"(1) First mortgage 5 per cent. bonds of the Electrical Development Co. of Ontario, secured by trust deed, dated 1st March, 1903, now outstanding in the hands of the public, $1,335,000.

"(2) Four and a half per cent. 30-year debenture stock or bonds of the Toronto Power Co., Limited, now outstanding, amounting to $13,558,917.

"(3) Five per cent. mortgage bonds, maturing 1st July, 1924 (secured on preferred stock) of Electrical Development Co., Limited, $4,103,200.

"(4) Three-year 6 per cent. promissory notes of the Toronto Electric Light Co., Limited, secured by the deposit of $1,000,000 of first mortgage bonds of that company, on which there is due for principal $840,000.

"(5) Outstanding shares of Electrical Development of Ontario, Limited, $13,100.

"Total, $22,850,217, less sinking fund, aggregating approximately $75,040, $22,775,177."

Summed up, the figures are as follows: Total purchase price, $32,734,000; obligations to be assumed, $22,775,177; bonds to be delivered, $9,959,823.

The terms of the purchase, as indicated in the letters exchanged, provide for no immediate cash payment on the part of either the city of Toronto or the Hydro-Electric Power Commission.

Toronto's Part

Toronto will purchase that portion of the Metropolitan division of the Toronto and York Radial Co. within the city limits for $585,000, which is considerably less than the portion of $790,000 given to Mayor Church some time ago, which included $40,000 indemnity to the county of York for the services guaranteed by the company under its franchise.

The city will assume $840,000 6 per cent. bonds of the Toronto Electric Light Co., due $30,000 every three months until 1922, when the balance matures, and will issue 20-year 6 per cent. bonds for the balance.

The total cost of the distribution system and the Metropolitan division will be $7,811,295. To this must be added $2,735,000 for the Scarboro' and Mimico divisions, the balance of the Metropolitan division of the Toronto and York Radial Railway Co., which brings the total obligations of Toronto to $10,546,295.

In respect of the acquisition of the Scarboro' and Mimico divisions, the city of Toronto will deposit its bonds with the Hydro-Electric Power Commission, and the commission will issue its bonds, guaranteed by the province of Ontario. It is provided in the agreement of purchase that any of the municipalities through which either the Metropolitan, Scarboro' or Mimico divisions pass may have the option of becoming partners in the scheme, and may substitute their securities for those of the city of Toronto.

Saving on Power

That the new system will be an economical one is evident. The price of power to the Toronto Railway Co. now is $25 per h.p. for the block of 40,000 being received from the Toronto Electric Light Co. The operating costs of the Toronto Railway Co. are based on this figure. Officials of the Transportation Commission estimate that power can be delivered to the railway for $9 less, which would mean a saving of $360,000 per year to the city in respect of the operating cost of the railway.

While the preliminary details have been completed, the biggest part of the job has yet to be faced. This includes the uniting of the several radials. The Hydro Commission already has surveyors at work, but no definite commencement can be made until the ratepayers have given their approval.

RAILROAD GETS HIGHER RATES

The Board of Railway Commissioners, in a judgment handed down on December 1, approves the application of the Windsor and Lake Shore Rapid Railway Co. asking that the recent 40 per cent. increase in freight rates be applied to that road. In granting the request the board points out that for the year ending June 30, 1919, the road had a deficit of approximately $15,000, while for the year ending June 30, 1920, there was a net income, after paying interest and taxes, of but slightly over $5,000. In neither of these years was any dividend paid on the capital stock.

BANK BRANCH NOTES

Three New Branches Announced This Week—Twenty-Seven Opened and Seven Closed in November

The following is a list of branches of Canadian banks which have been opened recently:—

Hamilton, Ont. (Lettridge and Barton Streets)	Royal Bank of Canada
Windsor, Ont.	Imperial Bank of Canada
Toronto (Bathurst and Queen Streets)	Royal Bank of Canada

The Dominion Bank is going to erect a new building on the south side of King Street at Wentworth St., Hamilton.

The Canadian Bank of Commerce has purchased property on the south side of Wellington St., Ottawa, for $40,000.

J. C. Scott, who has been in charge of the branch of the Standard Bank at 337 Portage Ave., Winnipeg, is leaving for Calgary, where he will be engaged in the department of the supervisor as an inspector. He is succeeded by W. R. McKenzie, who comes from the head office in Toronto.

K. D. Johnson, who has been connected with the Molsons Bank in Lethbridge for several years, is taking a two-months' vacation for recuperating his health, and then will go to Revelstoke, B.C., as manager of the bank there, the position being now temporarily filled there by A. C. Hogarth, manager of the branch in East Vancouver. Mr. Johnson is succeeded by J. F. Shaw, who has been manager of the branch in Revelstoke.

James Fleming, formerly accountant in the Royal Bank's branch at Woodbridge, Ont., who had been arrested in connection with the robbery at that branch, but against whom the charge was later withdrawn, has re-entered the service of the bank in Toronto.

Branches Opened in November

During the month of November there were 25 branches of Canadian banks opened. The following have not been mentioned in *The Monetary Times*: Cairo, Ont., Royal; Cap Rouge, Que., Hochelaga; Castries, St. Lucia, B.W.I., Royal; Englehart, Ont., Imperial; Hamilton (Main and Sherman), Royal; Homewood, Ont., Union; London, Ont. (Dundas and Wellington), Montreal; Mansfield, Ont., Union; Minesing, Ont., Union; Montreal (Mt. Royal and Bordeaux Streets), Molsons; North Wiltshire, P.E.I., Royal; Primate, Sask., Imperial; Ridgeville, Man., Hochelaga; St. Alexandre de Kamouraska, Que., Hochelaga; St. Lazare, Man., Hochelaga; Stoke Centre, Que., Hochelaga; West Summerland, B.C., Dominion; Winnipeg (Portage Ave. and Kennedy Streets), Dominion.

The following seven branches were closed: Branchton, Ont., Toronto; Cardale, Man., Union; Dalmeny, Sask., Royal; Flinton, Ont., Royal; Graysville, Man., Union; Homewood, Man., Union; Ingonish, N.S., Nova Scotia; Margaret, Man., Union; Round Hill, Alta., Royal; Sheerness, Alta., Toronto; Sheffield, Ont., Merchants; Verschoyle, Ont., Imperial; Westlock, Alta., Imperial; Winkler, Man., Union.

The branches opened were distributed among the banks as follows: Nova Scotia, 2; Royal, 8; Hochelaga, 5; Imperial, 2; Union, 3; Montreal, 1; Molsons, 1; Dominion, 3.

Union Bank Increases Facilities

Announcement has been made by H. B. Shaw, the general manager of the Union Bank of Canada of the use which the bank will make of the White and Manahan building, on Main St., near William, Winnipeg, which has been acquired by the institution. The proposal is that this new building will be used primarily as a savings department. None of the ordinary commercial business of the bank will be done there. In addition to the savings office, the new building will have two other new and important departments. One of these will be for the bond business and the other a department of farm exchanges

WEEKLY BANK CLEARINGS

The following are the Bank Clearings for the week ended December 9, 1920, compared with the corresponding week last year:—

	Week ended Dec. 9, '20.	Week ended Dec. 11, '19.		Changes.
Montreal	$136,972,026	$125,529,725	+	$11,442,301
Toronto	108,930,543	110,131,836	—	1,201,293
Winnipeg	106,626,003	63,081,116	+	43,544,887
Vancouver	20,209,320	15,598,088	+	4,611,232
Ottawa	12,570,145	12,454,386	+	115,759
Calgary	10,339,849	9,857,302	+	482,547
Hamilton	7,289,368	6,857,302	+	432,066

THE TORONTO GENERAL TRUSTS CORPORATION

DIVIDEND No. 98

Notice is hereby given that a Dividend of Three Per Cent. has been declared upon the Paid-Up Capital Stock of this Corporation for the quarter ending December 31st, 1920, being at the rate of

TWELVE PER CENT. PER ANNUM,

and that the same will be payable on and after Monday, the 3rd day of January, 1921.

The Transfer Books of the Corporation will be closed from Wednesday, the 15th day of December, until Friday the 31st day of December, 1920, both days inclusive.

By Order of the Board of Directors,

A. D. LANGMUIR
General Manager.

Toronto, November 23rd, 1920.

Quotations an Important Factor in Foreign Trade

Different Methods Used, but Buyer Usually Prefers That Which Shows Cost to Him—How to Make Up Prices for Foreign Markets—Factory Costs, Rail and Ocean Freight, Terminal Charges, Insurance, Loss of Interest and a Safety Margin Must all be Provided

By COL. C. R. HILL
Managing Director, Hill and Co., Ltd., Toronto

(This is the fifth of a series of articles on Practical Exporting, the first of which was published in The Monetary Times of November 12, 1920)

THE Canadian manufacturer, as he gets into the export field, will find that there are a few standard terms continually used by initials only when quotations are requested. The most common are given herein:—

C.F. or C. and F. (Cost and Freight) means that the seller furnishes the goods and pays the freight—no other expenses—to place of delivery as agreed. All risks while goods are in transit are for account of the buyer.

C.I.F. (Cost, Insurance and Freight) means that the seller furnishes the goods, pays the freight and insurance to point of delivery—all other risks while goods are in transit are for account of the buyer.

F.O.B. Destination means that the seller pays all costs and assumes all risks until the goods reach the place of delivery as agreed.

F.O.B. Steamer means that the seller is to deliver the goods aboard the steamer in proper shipping condition—all subsequent risks and expenses are for account of the buyer.

F.A.S. Steamer means that the seller is to deliver the goods alongside steamer on lighter, or on the receiving pier of the steamship company, in proper shipping condition—all subsequent risks and expenses are for account of the buyer.

In making quotations for foreign markets the closest attention should be made to describing the conditions of the price to avoid ambiguity. It is not sufficient to say "F.O.B." without specifying *where* the goods are quoted as "free on board." In many countries a quotation "F.O.B. Atlantic Port" will be taken to mean "F.O.B. Steamer" whereas the manufacturer may have made up his calculation by simply adding the cost at factory to his rail charge to seaport without taking terminal, dock, wharfage, handling or lighterage charges into consideration.

C.I.F. Quotations Preferred

As previously pointed out, most foreign buyers want prices quoted C.I.F. their ports and will not consider any other basis. This is not so important on expensive goods of light weight and bulk. For instance, textiles worth two dollars a yard are not affected seriously by transportation charges whereas on cement the transportation charges are often more than the cost of the cement at plant. As the goods must be prepaid in most insances and as the shipping end is in a better position to estimate rail and ocean charges than the buying end, the purchaser can only protect himself by demanding a C.I.F. quotation. Therefore, the Canadian manufacturer must study the problem of how to quote C.I.F. to accommodate the foreign buyers, but also figure to protect himself against losses.

The export manager in making up C.I.F. quotations has several items to take into consideration before he arrives at his total. These will be dealt with in rotation as follows: (a) Cost at factory; (b) commissions and discounts; (c) railway charges to seaboard; (d) terminal charges; (e) ocean charges; (f) marine insurance; (g) loss of interest; (h) safety margin.

It is customary for manufacturers to quote lower prices for export than for local markets as the profits which they demand in domestic customers must partly be used in absorption of carriage to foreign fields to meet competition. This lesser profit, however, has its compensation in the fact that export business nearly always results in immediate cash through banking facilities.

To the factory cost must be added selling commissions to foreign agents and provision made for discounts although manufacturers should realize that export business means generally payment of duty by the buyer on the invoice price, regardless of discounts. Therefore, if an invoice for $1,000 specifies at 20 per cent. discount, the buyer pays duty in many cases on $200 of paper value.

Railway and Terminal Charges

Having settled factory costs, it is a simple matter to obtain rates from an inland point to the ports of Montreal or Vancouver for instance. In making the enquiry the railway should be asked to quote "for export, with terminal charges." Otherwise, a domestic rate will be quoted which will invariably be higher than the rate for export. Consideration should also be given as to whether to use the carload rate or less than carload. It is largely a matter of the product. Lumber orders would always be C.L. and textile orders L.C.L. Piano orders might be either and in such a case it is well to take only the L.C.L. rate into consideration in making up a C.I.F. quotation. If carload business ensues the manufacturer is in pocket what he saves in prepayment on the C.L. basis versus L.C.L.

So far as Canadian ports are concerned the question of terminal charges is easily ascertained from the local railway agent on his application to the foreign freight agent. They are very reasonable for carload and less than carload business. Some foreign business, however, can only be handled through ports such as New York, owing to steamship service not being available from Canadian ports. In the case of New York carload business can be taken care of by the "lighterage free" clause, but L.C.L. business will be very expensive in cartage unless the shipper consignes his goods to the railroad pier nearest that of the outgoing steamer.

Ocean Charges

Most steamship companies refuse to allow tariffs in the hands of "the public" because of liability of misinterpretation, but also because their rates are subject to fluctuation without notice, although these fluctuations in normal times are usually not sufficient to seriously upset C.I.F. prices. The fact that they do fluctuate requires that C.I.F. quotations on a narrow margin of profit be made "subject to confirmation." In any event the manufacturer can always obtain a fairly standard quotation for ocean carriage to any port by application, specifying not only class of goods and how packed, but also gross and nett weights and outside measurements of packages. The reason for weights and measurements is that steamship companies usually work on an estimate of forty cubic feet to a ton of 2,240 pounds as a basis for calculation and make quotations of so many dollars per ton "ship's option." On light and bulky articles they charge by cubic feet and on compact heavy parcels they charge by weight. On small consignments the steamship companies usually charge a minimum of from $7.50 to $10.00 for each shipment. If, therefore, a C.I.F. price has been calculated on $22.40 per ton ocean charges and an order is received for

JOHN R. LITTLE, Managing Director

a shipment weighing less than 750 pounds or measuring under 13 cubic feet, the ocean charges will prove more than originally calculated.

Marine Insurance

Most of the big insurance agencies include marine insurance in their work and policies are easy to obtain. The ordinary policy of marine insurance covers the risk only when the goods are actually laden and terminates with discharge of the goods at port of destination. The shipper can arrange to have his insurance to attach from the time his goods are receipted for by the ship's agents and to continue the risk after discharge at port of destination until delivered to the consignee. The latter plan is the more satisfactory and the small extra premium is a good investment. Insurance must be taken out for 110 per cent. of the C.I.F. value of the goods, i.e., the full face value of the draft on buyers; otherwise the banks will not negotiate the draft as they will not have full insurance protection. War risks are still in effect, but are not always required.

Loss of Interest

The terms of sale indicate the beginning and ending of responsibility for interest charges, but interest is a very important item in export business, as foreign buyers in distant countries are accustomed to making purchases on basis of 60, 90 or 120 days sight, which means, for instance, that a Cape Town buyer has 90 days in which to make payment *after* he has accepted the draft and the date of his acceptance will probably be 30 days after the Canadian manufacturer signed the draft. After settlement has actually been made another 30 days is required for return of the funds to Canada, so that the manufacturer is theoretically waiting 150 days for payment. For this time he is entitled to charge interest and have such interest charges included in his C.I.F. quotation if it is made on payment at "90 days sight." The next article in this series will deal with the financing of export business, but in the meantime it is pointed out that an addition of $2\frac{1}{2}$ per cent. to an otherwise net price will not upset foreign sales and the terms of payment will go a long way towards inducing them.

The last item to consider in making up C.I.F. prices is a safety margin of 1 per cent. to allow for all sorts of small unforeseen contingencies that may arise such as extra packing expenses, heavy cartage charges at seaboard, warehouse charges through boat delays, etc.

Exchange

The intricacies of exchange fluctuations are more a matter of worry for the importer than the exporter and it is just as well for the Canadian manufacturer to confine his quotations to dollars, except in odd instances. It will occasionally happen that a manufacturer will be asked to quote in the currency and weights of a foreign country and if he uses careful judgment he will be able to protect himself and possibly develop excellent business through this accommodation. For instance, a request may come from France for a quotation C.I.F. Havre in francs per kilogramme. The big point to protect against is the fall of the franc. The manufacturer's bank will give him the daily value of the franc for two months back and the ratio of fall for the coming two weeks can be estimated fairly closely. If conditions are such that the franc has been jumping up and down rapidly, the business on a basis of payment in French currency should be refused.

Another point regarding quotations is the question of making them in Canadian versus United States dollars. As a general rule, Canadian quotations to all British Empire countries should be made in Canadian funds as the mere suggestion of U.S.A. funds brings a suspicion to the buyer that he is dealing with a Canadian branch of an American house. Also, one of the biggest talking points for the foreign agent of a Canadian house is the lower value of the Canadian dollar. On the other hand, this argument is not so applicable to countries such as Brazil and the Argentine who are accustomed to New York exchange and are more interested in comparisons with U.S.A. quotations. Therefore, it would be as well to reduce prices by about 10 per cent. and quote in New York funds when quoting to countries outside the British Empire.

Examples of C.I.F. Quotations

(a) Net price in Canadian funds on one automobile boxed quoted C.I.F. Cape Town on payment "60 days sight" when shipped in carload lots.

Cost boxed Toronto	$ 820.00
Inland freight	13.14
Terminal charges	.72
Ocean freight	79.50
Marine insurance	12.56
Loss of interest	18.52
Safety margin	9.44
Total	$ 953.88

(b) Net price in *New York* funds on one 6-h.p. engine boxed quoted C.I.F. Bombay on payment "30 days sight."

Factory price list		$ 264.00
Less trade discount	$ 66.00	
Less exchange	19.80	
		85.80
		$ 178.20
Plus rail and terminals		2.00
Plus ocean freight		9.75
Plus insurance		2.66
Plus loss of interest		2.94
Plus safety margin		1.99
Total		$ 197.54

In closing this article it is pointed out that export managers can spend no time more profitably than in careful preparation of export price lists and no other feature of their work will so assist sales as C.I.F. quotations on long term payments.

FISHING RIGHTS DECISION

The Privy Council gave judgment on November 30 in the Dominion versus Quebec Attorney-General case concerning the powers of the province to grant fishing rights in tidal waters. The judgment is somewhat involved, but is mainly favorable to the Federal contention that the control of fisheries in tidal waters is vested in the Dominion.

FAILED WITH $25,000,000 LIABILITIES

At a meeting of the creditors of N. Brenner and Co., Toronto, steel, tin and zinc brokers, who made an assignment dated on November 10, the statement was made that the liabilities would reach between $24,000,000 and $25,000,000, while the assets will be about $167,000. The liabilities include $5,000,000 in metal futures and $19,000,000 in foreign exchange, which were bought as a speculation, but the collapse of the market caused the assignment. It was stated that if the futures and exchange were cleared out at the present time something like $20,000,000 would be realized, and if held for some time, until the market and exchange becomes better, there might be a profit instead of a loss.

The creditors are foreign firms with the exception of one Canadian company, which is interested to the amount of $40,000. Inspectors for the various creditors were appointed as follows: Mr. Ochiltree, of the Shawmut Corporation, Boston; Geo. Edwards, Toronto, to represent English creditors; N. L. Martin, Toronto, to represent Canadian creditors; Harry Edwards, for the New York steel interests, and M. H. Housser, of Zimmerman, Forshay and Co., New York, and the assignee was instructed to proceed with the disposal of the assets and the metal futures and exchange.

November Bond Sales Were $39,788,527

Total Swelled by Canadian Northern Flotation—Thirty-Five Millions Go to United States Dealers—Good Volume of Municipal Issues

CANADIAN borrowings again reached a substantial sum in November, due largely to the Canadian Northern Railway flotation. The total of all bond sales, according to *The Monetary Times'* record, was $39,788,527, as compared with $43,880,467 in October and $12,043,521 in November of 1919. In connection with last year's figure, it must be remembered Victory loan operations retarded other bond activities during the first half of the month. Of last month's total, $34,350,000 went to United States investors, illustrating still further the ability of our southerly neighbors to absorb our securities.

Practically all of the municipal issues were taken up by Canadians, including the city of Toronto bonds. Last month was a good one for municipals, as far as volume was concerned, but prices showed no improvement. March holds the record this year with a total of $8,367,299, but a large part of that amount went across the line.

The market situation was greatly disturbed at the end of November by the release of control of Victory bonds, and three important issues, including Hamilton, $260,227; York Township, $166,000, and Oakville, $111,000, were held over.

A summary of last month's bond sales, with comparisons, follows:—

	Nov. 1920	Oct. 1920	Nov. 1919
Provincial	$ 8,750,000	$ 9,250,000	$ 6,282,000
Municipal	5,238,527	3,530,467	2,811,521
Railroad	25,000,000	25,000,000	....
Corporation	800,000	6,100,000	2,950,000
	$39,788,527	$43,880,467	$12,043,521

FISHING COMPANY ASSIGNS

The Canadian Fisheries and Storage Company, of Port Stanley, Ont., has assigned to McLeod, Few and Co., of Hamilton, for the benefit of its creditors. The condition of the estate has not yet been ascertained by the trustees. H. A. Shortt is secretary and manager of the company. The principal shareholders reside in Toronto and in American cities. Limited capital and poor business are the reasons given for the assignment.

"The Exchange Rate, What Controls it?" is the title of a pamphlet issued by the Canadian Bank of Commerce, containing a series of advertisements regarding exchange.

NOVEMBER FIRE LOSS IS HIGHER

Total for Eleven Months Greater than for Whole of 1919—Quebec and Winnipeg Suffered Heaviest Losses in November

Fire losses in Canada in November are estimated by *The Monetary Times* at $2,769,800, made up as follows:—

Fires exceeding $10,000	$2,205,000
Small fires reported	64,800
Estimate of unreported fires	500,000
	$2,769,800

Quebec, Winnipeg, Ottawa, Montreal, Vancouver and Gravenhurst suffered the heaviest losses in the month.

The Monetary Times' record for the past four years shows the following monthly losses:—

Month.	1917.	1918.	1919.	1920.
January	$ 1,918,660	$ 2,688,556	$ 3,915,290	$ 2,637,850
February	2,009,953	2,243,762	1,091,834	1,895,575
March	2,050,650	1,682,286	2,154,095	1,793,200
April	1,317,714	3,240,187	1,080,070	3,229,500
May	1,163,110	3,570,014	1,785,130	2,001,819
June	1,184,627	3,080,982	3,337,530	1,424,319
July	1,101,734	3,369,684	1,118,377	1,426,850
August	1,230,183	3,110,445	1,374,495	1,857,800
September	1,301,700	917,286	1,940,272	2,480,485

BRITISH EMPIRE PRODUCTS IN LONDON

There has just been launched in London, England, an enterprise which is, briefly, a co-partnership between colonial manufacturers and producers in an organization for the sale of their goods direct to the householders in the United Kingdom. An imposing pile of buildings is going up in the very centre of London's eight million consumers wherein to house this marketing organization. Colonial products are already being distributed by this enterprise to many thousand British homes. The name of the company is Public Service Stores, Limited, Westminster Bridge Road, London, England.

FISHING COMPANIES GO DOWN

The difficulties which have beset the fishing interests forming the dominating industry of Newfoundland culminated on November 26th in the announcement of liquidation of three large fishing firms on the south coast, with total liabilities exceeding a million dollars. It was stated that the assets were considerably in excess of the liabilities, but that they consisted largely of fish products and other property which it was impossible to turn into cash under present conditions. The firms and their liabilities are the Moulton Company, Burgeo, $580,000; Inkpen Company, Burin, $350,000; Lake Company, Fortune Bay, $190,000.

It was announced on November 22nd that the government was considering a proposition to guarantee purchases of codfish in an effort to relieve the situation caused by the large quantity of cured fish remaining unsold because of prevailing low prices and lack of market in Mediterranean ports, ordinarily the chief consumers of the product.

DIVIDENDS AND NOTICES

International Petroleum Company, Limited

NOTICE OF DIVIDEND No. 1

F. B. WHITTET, Secretary-Treasurer.

Montreal, December 1st, 1920. 306

INSURANCE DEPARTMENT MAY LIMIT AGENTS' COMMISSIONS

Ontario Superintendent Maintains Masten Recommendations Not Carried Out, and Calls Conference for December 16

FAILURE of fire insurance companies to reduce agents' commissions as recommended by Justice Masten in his report of January, 1919, on fire insurance in Ontario, leaves it to the province to enforce regulations of this kind, according to Superintendent of Insurance Gray. Conditions, he points out, have not been improved, and commissions paid to agents in Toronto have increased until at present rates as high as 30 per cent. of the premium are being paid to local agents, and over-riding commissions on this rate are paid to general agents or company managers. Mr. Gray makes the following statement regarding commissions:

"Fire insurance premiums paid in Ontario to registered companies annually (approximately), $16,500,000.

"Expenses of management payable out of these premiums, Canadian companies, 40.8 per cent.

"British companies in Canada, 34.95 per cent.

"United States companies in Canada, 33.87 per cent.

"Average (approximately), 38 per cent.

"Of the premium income received from Ontario $6,270,000 is spent by the companies in administration expenses, including commissions. This is entirely exclusive of fire losses paid and company profits. Of this amount over $4,000,000, or approximately 25 per cent. of the premiums paid by the public, was paid out by the companies as commissions to the agents for securing business.

Masten's Views

"The Honorable Mr. Justice Masten in his report as Insurance Commissioner made on 18th January, 1919, said: 'That since commissions are in my opinion excessive, and since it has so far proved mpossible for the insurance companies themselves to effectually bring about an agreement limiting them, I suggest that unless before action is taken on this report the companies do agree upon some alternative that the legislature consider an enactment limiting the amount of fixed commissions which may be received or paid for the taking in Ontario of any applications for insurance on property or in respect to the placing out of Ontario of any insurance on property in Ontario.'

Competition is Too Keen

"The warning to the companies contained in this report was unheeded and the companies have taken no action in the matter. In the meantime conditions have grown worse instead of better. The rates of commissions paid to insurance agents in Ontario have grown from 18.60 per cent. in 1917 to between 23 and 25 per cent. in 1919. This includes both original and renewal business as the rate of commission on both is the same in fire insurance. The reason that the insurance companies have been unable to deal with the matter is very well stated in the report of Mr. Justice Masten as follows:—

"'The agent is the person who comes into direct contact with the insurer or owner of property, and in that way he controls the placing of the insurance and is able to place it in whichever of the companies he chooses. The companies compete for his favor and he sells the business to the company that pays the highest commission. . . . The result is that owing to the competition between the companies and the control which the agents have over the business, the expense of insurance is increased to the public without any chance of its being lowered by competition or ordinary means, and the public who have to pay in the end are unable to lower the expense in any way unless by legislation.

"'The companies themselves are powerless to completely deal with the difficulty unless all the companies can be induced to enter into a binding agreement limiting commissions, because if any strong companies stand out the result is that they get all the preferred business away from those who had agreed to lower the commissions.'

A Fifteen Per Cent. Limit

"After a long and careful study of the situation the department has been forced to serve notice upon the companies that it will recommend to the legislature that insurance agents' commissions throughout the province be limited to 15 per cent. of the premium payable.

"This will result in an immediate reduction in commissions payable by the companies of approximately $1,600,000. Some part of this will require to be spent by the companies by replacing certain services which agents have heretofore rendered in their more liberal commission rates, but of this amount more than $1,000,000 will be actually saved to the insuring public by securing from the companies lower insurance premium rates.

Should Reduce Insurance Rates

"I am of opinion that the companies on the adoption of the proposed limitation of commissions will be able to reduce the rates of premiums on all dwellings, household furniture and other three-year risks by at least 10 per cent. and all other classes of risk by at least 5 per cent. This will absorb practically the $1,000,000 which is estimated above as the savings to the companies in commissions.

"At the present time in Ontario outside of Toronto commissions have been effectively limited by company rules to graded terms of 25 per cent. on dwellings and household furniture, 20 per cent. on mercantile risks and 15 per cent. on all other classes. This is equivalent to an average rate to the agent outside of Toronto of 18 per cent. The effect upon the agent outside of Toronto, therefore, is an apparent reduction of 3 per cent. Upon the agent in Toronto the reduction will be considerably greater.

"The other branch of the department program, namely, the limiting of the issue of licenses to bona fide agents, will fully compensate legitimate insurance agents outside the city of Toronto for the apparent reduction in commission rates."

Conference to be Held

A draft of the proposed legislation will be ready for submission at a conference of company heads to be held in Toronto on December 16. The purposes of the department are outlined by Mr. Gray as follows: "First, reduction of insurance rates to the assured; second, reduction of cost of acquisition of business to the companies; third, equal and fair remuneration for equal service to agents in all parts of Ontario; fourth, improved agency service to the public by competent and trustworthy agents."

FIRST GENERAL MEETING OF ONTARIO EQUITABLE

On November 23 the Ontario Equitable Life and Accident Insurance Company held its first general meeting of shareholders for the purpose of organization and election of directors. The company has over three hundred shareholders in the towns of Waterloo and Kitchener themselves, and a large number of these were in attendance. It will be remembered that the Ontario Equitable made a record in the selling of its capital stock, and the same vigorous management has been evinced in the company's short business career. In the space of one week over $300,000 of life insurance has been placed.

The following shareholders were chosen for the board of directors: A. Bauer, J. C. Breithaupt, Dr. J. W. Brien, A. E. Hulet, A. R. Kaufman, Senator H. W. Laird, M. P. Langstaff, W. E. Long, E. C. Mitchell, Thos. Reid, A. E. Silverwood, S. C. Tweed, Jas. Valentine, Dr. W. T. Wallace.

At the adjournment of the general meeting the board of directors held its first session. S. C. Tweed, the managing director, was appointed the president of the company; M. P. Langstaff, A.I.A., F.A.S., was appointed assistant manager and actuary, and Aloyes Bauer and Senator H. W. Laird, vice-presidents.

DIVIDEND NOTICES

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of two and one half per cent. (2½%) on the Common Stock of the **Dominion Textile Company, Limited,** has been declared for the quarter ending 31st December, 1920, payable **January** 3rd, 1921, to shareholders of record **December 15th, 1920.**

By Order of the Board.
JAS. H. WEBB,
Secretary-Treasurer.

Montreal, 6th December, 1920. 313

THE STANDARD TRUSTS COMPANY

DIVIDEND No. 33.

Notice is hereby given that a dividend at the rate of 9% per annum on the paid-up capital stock of The Standard Trusts Company has been declared for the half-year ending December 31st, 1920, and that the same will be payable at the Company's offices in Winnipeg on and after January 2nd, 1921.

By Order of the Board.
WILLIAM HARVEY,
Managing Director.

31

WANTED.—A General Agency for good board fire insurance company for the Province of Alberta. Have large premium income now on our books which we control, and splendid country organization well established. Apply Box 359, *Monetary Times*, Toronto.

EXECUTIVE.—Age 35. Twenty years' experience. Eight years in Railway Operating and Construction Departments, twelve years in Accounting Department, past five years as General Auditor. Expert Accountant, thorough knowledge of railway and construction materials, well informed in financial matters, seeks engagement. Box 365, *Monetary Times*, Toronto.

DEBENTURES FOR SALE

TENDERS FOR PULPWOOD AND TIMBER LIMIT

Tenders will be received by the undersigned up to and including the 18th day of December, 1920, for the right to cut forest products on an area in the English River Water Shed.

Tenderers shall state the amount of lump sum cash bonus they are prepared to pay, which sum shall be in addition to the rates of Crown Dues fixed by Order in Council dated 27th day of March, 1920.

Parties making tender will be required to deposit a marked cheque payable to the treasurer of the Province of Ontario for the entire amount of the lump sum bonus specified above, which lump sum shall be forfeited to the Crown if the successful tenderer does not enter into an agreement as provided in conditions of sale.

The highest or any tender not necessarily accepted.

General terms and conditions of sale may be had by applying to the undersigned.

BENIAH BOWMAN,
Minister of Lands and Forests.

Toronto, September 24th, 1920.

N.B.—No unauthorized publication of this notice will be paid for. 292

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 29th day of December, 1920, for the right to cut pulpwood and pine timber on a certain area situated on the North Shore of Lake Superior, and territory adjacent thereto, in the district of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet board measure on pine, that they are prepared to pay as a bonus in addition to dues of 80c. per cord for spruce and 40c. per cord for other pulpwoods, and $2.50 per thousand feet board measure for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council for the right to operate a pulp mill and a paper mill on or near the area referred to.

The successful tenderer shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honourable the Treasurer of the Province of Ontario, for twenty-five thousand dollars ($25,000), which amount will be forfeited in the event of their not entering into agreement to carry out the conditions, etc.

The highest or any tender not necessarily accepted.

General terms and conditions of sale, together with particulars and description of territory, may be had on application to the undersigned.

BENIAH BOWMAN,
Minister of Lands and Forests.

Toronto, 1920.

N.B.—No unauthorized publication of this notice will be paid for. 312

DEBENTURES FOR SALE

TENDERS FOR DEBENTURES

Sealed tenders, marked "Tender for Debentures," will be received by the undersigned up to 6 o'clock p.m. of Tuesday, the 21st day of December, 1920, for the whole or part of the Forty-Five Thousand Dollars of Debentures issued by the Board of Trustees of the Roman Catholic Separate School for the Town of Iroquois Falls.

These debentures shall be payable at the expiration of Twenty years from the 30th of September, 1920. Interest at the rate of 6% is payable yearly. Coupons covering interest are attached to Debentures.

The payment of these debentures and interest is **Guaranteed by the Province of Ontario.**

The highest or any offer not necessarily accepted.

Information regarding debentures may be obtained from the undersigned or from Fred. A. Day, Barrister, &c., Sun Life Building, Toronto.

A. PELLETIER,
Secretary, Board of Trustees of the Roman Catholic
Separate School for the Town of Iroquois Falls.

TARIFF EVIDENCE IN ONTARIO

Little Interest Shown in Hearings—Views are Mostly Protectionist—Farmers Admit Industrial Centres are Good Market

FINAL sessions of the Federal Tariff Commission were held in Ontario, starting in Hamilton on November 26 and ending in Toronto on December 6. A special session will be held in Ottawa for hearing some evidence held over.

In Hamilton on November 26 and 27, the jam manufacturing industry was represented by Senator E. D. Smith, of Winona, and the Canadian Woollen Manufacturers' Association by R. G. Thompson, of Carleton Place. Others who gave evidence were James A. Livingstone, a fruit grower, and publisher of *The Grimsby Independent*, John Bridgman, vice-president of the Niagara Peninsula Fruit Growers Association, Hudson Usher, manager of the Niagara Fruit Company, Queenston, W. E. Groves, president of the Canadian Florists and Gardeners' Association, R. L. Smith of the G. W. Robinson Co., and H. A. Pigott of the Pigott-Healy Construction Co.

Senator Smith said that owing to the higher costs of production here, free trade would wipe out the jam industry and ruin the Niagara fruit-growers. The refining of sugar in Canada would be dealt a severe blow, and so would those Canadian industries now engaged in making glass containers, tin cans, etc. Not a few fruit-growers had made as much as $1,000 per acre by selling small fruits to the jam factories, as against $50 an acre from the growing of wheat in western Canada, he said. At the present time English jam-makers were laying down jam in Canada for eight cents a pound less than it could be made for in this country. As a result several jam factories in Canada were likely soon to go to the wall

Some Farmers Favor Tariff

In London, on November 29, several farmers expressed themselves as satisfied with protection, as the cities and towns of western Ontario, undoubtedly, had a better market on this account, and the value of their lands and produce was [illegible] accordingly. Leonard Ged, secretary and sales manager of the Tillsonburg Shoe Co., said his firm came from Detroit to Tillsonburg owing to the protective tariff, and added they would have to go out of business if anything like free trade were introduced. H. A. Gilroy, a farmer of Bruce county, stated that he was a grower of sugar beets, and suggested that the industry in that commodity should be stimulated by a bonus. "If there is anything needs protection it is an infant industry like that in connection with sugar beets," he asserted.

M. R. Seed of the Aylmer Pump & Scales Co., Ltd., declared that to compete with United States manufacturers his firm and those making similar lines have the protection now enjoyed. He pointed out that the United States manufacturers had a market of 110,000,000 people, to say nothing of a large export market. He declared that the larger market enjoyed by the United States manufacturers allowed them to obtain machinery which the Canadian manufacturer could not afford and which allowed of much cheaper manufacture. He stated that one firm in Chicago with specialized machinery was able to make eight or ten operations on one pump which required the same number of individual operations in his own plant. Mr. Seed stated that the greater part of their raw material was purchased in Canada, and that even under present conditions prices between United States and Canadian firms were so close that it was a job to compete with them.

Manufacturers' Views in Toronto

When the Toronto sessions commenced on December 1, briefs were presented by the Ontario division and the Toronto branch of the C.M.A. John R. Shaw, chairman of the Ontario Division of the C.M.A., pointed out that Ontario manufactured 48 per cent. of the total goods made in Canada and its population was one-third that of the Dominion. Its manufacturing establishments number 15,337, with $1,442,220,759 invested capital, employing 320,808 people and paying $302,399,077 in wages, and produce $1,640,771,634 of manufactured goods. The factories were intimately connected with the commercial life of the community in which they were situated. He pointed out that the province had no coal and no developed iron, yet had been able to meet American competition and retain its home market because of the Canadian tariff's protection. Its natural resources and water powers had been factors, but the protective tariff was the greatest factor in its industrial success, because without it there would have been neither opportunity nor necessity for power development to carry on manufacture of its natural products.

T. A. Hollinrake, chairman of the Toronto branch, pointed out to the tariff commission that Toronto now produces 14 per cent. of the goods manufactured in Canada and 31 per cent. of the manufactures of Ontario; that there were, according to the Dominion Bureau of Statistics estimates for 1918, 2,835 manufacturing establishments in the city with an investment of $392,945,178, employing 106,128 people and paying in wages $105,509,698; the raw materials used cost $266,580,781 and the value of goods produced was $506,429,283. Assuming that each wage earner supported but one other person, there were 200,000 people, 40 per cent. of the city's population, dependent on its manufacturing plants.

Increased protection for gasoline was urged by oil refiners, represented by S. R. Parsons, while, on the other hand, Chas. F. Steele, of Port Colborne, president of the Natural Gas and Petroleum Association, wanted the duty removed from equipment used in the manufacture of natural gas. Manufacturers of and dealers in pianos, organs and phonographs also appealed for consideration, not so much in the way of increased protection as in the removal or reduction of the luxury tax.

E. C. Drury, premier of Ontario, appeared as an advocate of tariff reduction. He had no objection, he said, to a federal land tax as a substitute for tariff revenue. He claimed that Ontario's development had been one-sided, and that manufacturers who sought to retain the existing tariff or a higher one looked at the question from a very narrow viewpoint. It was purely selfish. The chief thing was to get down the cost of living, and the present tariff was one of the great stumbling-blocks to such an end.

The United Farmers of Ontario and the Fruit Growers were also heard in favor of some reductions in duties.

TAXES RECOVERABLE BY PERSONAL ACTION

Medicine Hat Allowed to Sue Against Personal as Well as Real Property, in Case on Wording of City's Charter

IN an appeal by the city of Medicine Hat from a judgment on a special case where the city sought personal judgment for certain taxes alleged to be due to the city in respect of certain real property situated therein, it was held that sections 6 and 7, title 32 of the city's charter, makes taxes which are due it a debt recoverable in a personal action by it and the omission to include the lots in a tax sale which was held does not release the debtor from his liabilities.

Provisions of Statute

Justice Stuart in his judgment says: "It was contended by the defendant that the act in question did not give any right to the corporation to recover the taxes as a debt. The material sections of the act contained in title 32 are as follows: '6. The taxes due upon any land may be recovered from any owner or tenant originally assessed therefor and from any subsequent owner of the whole or any part thereof saving his recourse against any other person, and such taxes shall be a special lien upon the land and shall be collectable by action or distraint in priority to every claim, privilege, lien or encumbrance of every person except the King; and lien in its priority shall not be lost or impaired by any neglect, omission or error of any officer of the city. 7. The production of a copy of so much of the roll as relates to the taxes payable by any person in the city certified as a true copy by the secretary-treasurer shall be conclusive evidence of the debt.'

"It is apparently well settled law that a tax is not a debt unless expressly declared to be so by the statute imposing it. The simple question is whether by the words used in the above sections, the court should hold that the statute has declared the taxes to be a debt. The words are practically the same as those of section 305 of the Iowa Act, and in the case of 'Castor v. Fenton,' the chief justice held that under the latter section taxes could be recovered in a personal action as a debt.

Gives Right to Personal Action

"It is a settled canon of construction that a statute ought to be so construed that if it can be prevented, no clause, sentence or word shall be superfluous, void or insignificant. So in the present case if the contention of the defendants be correct as to the meaning of section 6 of title 32—viz., that it merely creates a lien and give a right to collect the taxes in an action to enforce the lien or by distress, then all the words of the section down to 'thereof' in the third line are superfluous. They would in that case, add absolutely nothing whatever to the meaning of the statute because everything that the defendants admit is done by the section is done fully and completely by the succeeding words.

"I cannot but conclude that the real meaning and effect of the statute is to make the taxes a debt recoverable by personal judgment and I therefore think the appeal should be allowed with costs and I see nothing in the statute which shows that the omission to include the lots in a tax sale which was held would release the defendants from their liability."

SHAREHOLDERS MUST PAY FOR SHARES

The Quebec Superior Court, in a ruling maintaining that the obligation of a shareholder is to pay in full for his shares in a joint stock company, has granted the petition of E. St. Amour, in his quality of liquidator of the Compagnie Industrielle d'Immeubles, Limitee, as directed against A. W. Rousseau, Jules Beauchemin, Arthur Ecrement and Napoleon Turcot, and placed them upon the list as contributors of this company for $20,000 each. The company was incorporated under the provisions of the Canada Companies Act by letters patent issued on July 16, 1912, with an authorized capital stock of $250,000

QUEBEC PROVINCE WINS LAND TITLE CASE

Cable advices state that the Privy Council has decided in favor of Quebec's appeal against the Dominion's claim to the ownership of former Indian reserves. The case arose from small beginnings, when the Ottawa government sold to Madame Beausoleil a piece of land which had been contained in an Indian reserve abandoned by treaty between the Indians and the government. On the other hand, the Quebec government sold the same piece of land to another party. Each government contended it was the sole owner of the land contained in Indian reserves in this province after they had been abandoned as reserves by the Indians.

In Ontario the same question had been settled by the Privy Council in favor of the province. In the Star-Chrome case it was contended that the Ontario judgment did not apply to Quebec province, as the reserves had been created under different laws from the Ontario reserves. That was the whole contention. The Superior Court decided against Quebec after a lengthy case and a long delibere. The Court of King's Bench Division affirmed the judgment of the Superior Court by a majority judgment. The Privy Council has now reversed these decisions.

"This decision will have a very wide effect," says the Quebec attorney-general. "In the past the Dominion government has obtained abandonment of several Indian reserves and then proceeded to sell the land. It is obvious that under this decision these sales were made by a person who was not the owner. Settlers and others who have bought these lands will have to regularize their position with the Quebec government. There will, however, not be any attempt to disturb them in their possession of the lands, and the amount of money involved is so small that it will probably not be considered desirable to apply for any refund of purchase moneys from the federal government."

LAND PURCHASER HELD TO AGREEMENT

Two appeals, involving a total of nearly $250,000, have been dismissed by the Supreme Court of Canada, the appellant being H. P. Kennedy and the respondents J. H. Mellick and the Inman estate. The appeals were taken from a decision of the Appellate Division of the Supreme Court of Alberta. At the sittings of this court last January, Chief Justice Harvey and Justices Beck and Stuart upheld judgments of Justices Ives and Hyndman, granting specific performances of agreement of sale of lands by the executors of the Inman estate and by J. H. Mellick to H. P. Kennedy.

The case dates back to the boom days of 1913, when Kennedy purchased some 500 acres of land to the east of the Edmonton stockyards, just outside the city limits. The Inman estate comprised 320 acres, while 180 acres were purchased from Mellick. With real estate booming and land going at unheard-of figures, Kennedy paid $298,000 for the acreage. Shortly after the sale was effected the bottom dropped out of the boom and Kennedy did not complete his payments. Suit was brought by the respondents in the present case in the Supreme Court to compel Kennedy to carry out the agreement.

In the Inman case $14,000 has already been paid, while $192,000 is the amount claimed. A total of $68,000 was paid on the Mellick property and suit brought for the balance of $24,000. In his defence the appellant asserted that the Inman property was never at any time worth more than $31,000, while the valuation of the Mellick property was placed at $21,900. The court was asked to relieve him from his contract by allowing him to forfeit a considerable part of the amounts already paid without further liability on the ground that in 1913 all parties were laboring under the general infatuation incidental to the times, resulting in fictitious values being placed on Edmonton property. The famous South Sea bubble of 1720, when a great portion of the population of England lost their heads and plunged deeply into speculation, was referred to, and it was pointed out that at that remote date in many instances English judges had seen fit to grant relief.

News of Industrial Development in Canada

Business Readjustment is Affecting Ontario Municipalities—Depression is not yet General, However—Wettlaufer Company Proposes Extensions at Kingston—Amalgamation of Rolling Mills and Electric Steel Smelters at Port Moody Will Result in Important Amalgamation

ONTARIO industries are beginning to experience the effects of business readjustment. During the past week announcements have been made regarding the closing down of several factories in the province, and more may follow. The Standard Chemical Co., of Sault Ste. Marie, has notified its 200 employees that on December 15 the plant will be closed down on account of lack of orders. The company's activities include the manufacture of charcoal, alcohol and acetate of lime.

The four brick works at Milton have been closed, throwing many men out of work. The town is at the present time combatting unemployment, and the approach of the winter is being regarded with alarm. Several men have been put to work cleaning the streets, but the number out of jobs is still large.

At Thorold, the Beaver Board factory has received orders from Buffalo to close down. This is one of the main industries of the town, and employs eight hundred men. No explanation has been given as to the reason for the cessation of operations, but as the plant has been running almost up to capacity, it is thought that the closing down is merely a move toward the lowering of wages, and if so, will only be temporary.

Activity in Some Municipalities

The depression is not yet general, however, judging from the activity in some municipalities. At Smith's Falls, the International Button Co. has completed the installation of machinery in the Steele planing mill, and is now taking on operators as fast as they can be trained.

The American Ironing Machine Co., of Chicago has leased the plant of the Woodstock Worsted Knitting Co., with the option of purchasing at the end of twelve months, and will commence operations shortly.

At Bridgeburg, the Tuttle-Bailey Manufacturing Co. is preparing plans to enlarge its plant. The company, which is engaged in the manufacture of registers and grills, is working its plant at full capacity. On December 6, the Wood Hydraulic Hoist Body Co., of Detroit, opened a new Canadian branch factory at Windsor, Ont. The hoist manufacture is one of the forms of motor truck dumping or unloading devices now on the market.

Wettlaufer at Kingston

Before the board of trade, Kingston, Ont., recently, Messrs. Watson and Wettlaufer, of the firm of Wettlaufer Bros., manufacturers of concrete machinery, gave an account of their proposed extensions. The present plans call for the centralizing of the organization and plant in order to meet the demands for output, increase efficiency and reduce overhead expenses and cost. With regard to the markets, Mr. Wettlaufer stated that the company supplies a great home demand and has entered into agreement with the Canadian Fairbanks-Morse Co. to sell their machines in Halifax, Winnipeg, Vancouver and Victoria, thus reducing their field staff. They hold exclusive patent rights in the United States, Canada and England.

Their business extends to England, France, New Zealand and Australia, and owing to seasonal changes that affected home demand, there would never be any shutting down of the plant, because after filling home demands the foreign market would absorb all surplus output. The company also has two offices in the United States, the Niagara Concrete Machinery Co., Buffalo, and Wettlaufer, of Detroit where their machinery was handled. If there was any overproduction here, it would be taken up there.

Under the scheme now proposed the reorganized company is increasing the capital and will require $100,000 to [illegible] new plant in Kingston. This course is necessary so that the present capital and reserve will not be impaired. Arrangements are being made to solicit subscriptions for this amount of stock among the citizens of Kingston.

Quebec Railway Opens New Resources

Announcement has been made of the extension of the Quebec-Chibougamou Railway, to run along the northern portion of Lake St. John, and to connect with the Canadian National Railway and complete the railway link around the whole lake.

This has a direct interest to the lumbering and pulp industry in the province, as this railway will traverse what is believed to be the best unleased virgin pulp forests. In addition it will open a fresh supply of mineral resources. The project, it is expected, will be commenced in the spring.

Rolling Mills for B.C.

The industrial department of the British Columbia government has approved a loan of $250,000 to finance the amalgamation of the Port Moody rolling mills and electric steel smelters, and the Port Moody rolling mill will start operations again on an enlarged scale. The new company, to be known as the British Columbia Steel Works, Ltd., will comprise an amalgamation of the Port Moody, Eburne and Tudhope electrical plants under an organization headed by Brig.-Gen. Victor W. Odlum assisted by iron and steel experts. Orders have been received in advance for a great deal of the output of the plant which will give employment to several hundred men, running in continuous night and day shifts.

Each of the plants will continue to operate at present location pending the concentration of all of them at Port Moody where ample room for expansion has been secured. The mills will handle scrap iron, which will be made into iron rods, angle iron for ship work, flats and other varieties of stock metal. The electric smelters will be used to handle scrap steel which hitherto has gone out of the province. Under the electric system the scrap steel is converted back to pig iron. Several light industries will locate in Port Moody as a consequence of the organization of the steel mills. One of these is a bolt, nut, spike and rivet company, which has also been assisted by the provincial government with a loan of $45,000.

The Canadian Queen Manufacturing Co., Ltd., which was incorporated some time ago, has leased a factory at Vancouver, B.C., with the intention of purchasing next year. The company has been formed for the purpose of manufacturing the brooders, incubators, poultry supplies and feeds, known as the "Canadian Queen," and has already received requests for more machines than it is able to handle this season, without increasing the capacity of the present plant.

Wm. Power, who recently reorganized the firm of W. M. and J. P. Sharples and Co., and had it incorporated at Ottawa, has likewise reorganized his other private interests, and has had them incorporated by letters patent in the province of Quebec under the name of the Power Lumber Co., Ltd., with a capital of $2,000,000. The new company plans to purchase and operate certain mill properties, limited and freehold lands, situated on the south shore of the St. Lawrence River.

It likewise intends to purchase the River Ouellett Pulp and Lumber Co., the Lafontaine Lumber Co., together with certain mills situated at River Manis and Lapointe, in the county of Kamouraska and St. Appollina, in the county of Monteagny, also other lands and timber holdings in the vicinity. Montreal, Ontario and Quebec capital is interested in the company. The head office of the company will be at St. Pacome. No stock will be issued for public subscription.

ANOTHER FIRE COMPANY WILL DO BUSINESS HERE

Caxton Insurance Company Coming—Ontario Branch For Liverpool and London and Globe

THE Liverpool and London and Globe Insurance Co., Ltd., with affiliated companies, the Liverpool-Manitoba Assurance Co., and the Globe Indemnity Co. of Canada, will on the first of January next open a branch in the Excelsior Life Building, Toronto, to which all the agents in Ontario, west of the line of the Kingston and Pembroke Railway, will report their business. This branch will be in charge of J. D. Simpson. The reason for this departure is to afford western Ontario agents quicker service and generally to facilitate the extensive operations of these three companies.

Carson, Williams and Willcox, Ltd., prominent Canadian insurance agents, are bringing into Canada the Caxton Insurance Co., Ltd., of London, Eng., for fire insurance. This company has a paid-up capital of $1,000,000.

United Assurance Company

Very little has been heard of the United Assurance Co. since it commenced business in 1916, but nevertheless the company is making good progress in western Canada. The head office is at Calgary, Alta., and there is also a branch at Moose Jaw, Sask. Under its charter the company has power to write fire, hail, automobile, accident, sickness and miscellaneous lines, but at present is only writing fire and hail insurance.

The company has received a substantial and increasing premium income each year, and according to T. J. Ranaghan, secretary-treasurer, the amount for 1920 will reach $200,000. The underwriting experience of the company has been successful and a substantial reserve has been built up. Surplus funds are mainly invested in Dominion Victory bonds. H. B. Macdonald, of Calgary, is managing director.

Agency Appointments

Robert Hampson and Son, Montreal, chief agents for Canada of the Insurance Co. of North America, announce the following appointments:—C. D. Forbes to be inspector at Calgary for Alberta and western Saskatchewan, and H. C. Mills to be inspector at Winnipeg for Manitoba and eastern Saskatchewan.

George Lyman, the well-known insurance broker, Montreal, has recently been appointed general agent for the city of Montreal of the Essex and Suffolk Equitable Insurance Society, Ltd. Mr. Lyman has also received the appointment as general agent for Montreal and district for the marine department of the Phenix Insurance Co. of Hartford.

John D. Rowell, inspector for Ontario of the North British and Mercantile Insurance Co., has retired from that position after 25 years' service with the company to become associated with Bryce B. Hunter, insurance agent, Toronto. To succeed Mr. Rowell the North British and Mercantile has appointed William Cooke as Ontario inspector. Mr. Cooke will also represent the Occidental Fire Insurance Co.

LAURENTIDE COMPANY ACQUIRES TIMBER LIMITS

The Laurentide Company have purchased 404 square miles of timber limits in Saguenay county, 145 miles below Quebec City. This should round out considerably Laurentide's timber holdings, and is in line with the policy of providing well for the future. The new holdings contain about 1,500,000 available cords of pulpwood, and this winter 10,000 cords will be cut. The pulpwood will be shipped first on barges to St. Augustin, twenty miles from Quebec, then shipped by National Transcontinental to the Black River, and thence by water down to the Laurentide mills.

The annual general meeting of the Bank of Toronto will be held on Wednesday, January 12, at noon.

1870 —— OUR GOLDEN JUBILEE —— 1920
Two Hundred Million Dollars

This year the Mutual Life Assurance Company of Canada celebrates its golden jubilee by reaching the two hundred million dollar mark. This point in the expansion of The Mutual Life has been reached more quickly than any of its most ardent friends would have believed possible five years ago. But the reason is not "far to seek." During the Great War and the fatal epidemic which followed in its train The Mutual Life paid out in relief of the families bereaved no less than two million three hundred thousand dollars ***in addition to ordinary claims.*** The benefits of life insurance were thus so clearly demonstrated that an immense demand resulted and the business of The Mutual has developed as much during the last five years as during the preceding forty-five years. The Canadian people suddenly realized the absolute necessity for life insurance and naturally turned to a company well-known, well established and financially impregnable.

The Mutual Life Assurance Co. of Canada
Waterloo · Ontario

THE TEST OF VALUE IS DEMAND

On this test the value of The Great-West Life Policies is strikingly obvious.

For thirteen successive years popular opinion has given first place to the Great-West policies. For thirteen successive years The Great-West has written the largest Canadian Business of any Canadian Company.

During twenty-seven years there has been a steadily increasing appreciation of the low premium rates, the high profit returns and the liberal conditions that characterize the Policies of—

News of Municipal Finance

Some Taxation Views Expounded by Halifax City Solicitor—Burnaby Aims to Reduce Bonded Indebtedness — Victoria's Revenue Exceeds Expectations — Dartmouth Exemptions Excessive

TAXATION is a topic which is never void of interest. Each year finds our municipal councils combatting fresh problems, and suggestions on the subject are always welcome. While addressing the "Progressive Club" at Halifax, N.S., last week, F. H. Bell, K.C., city solicitor, expounded some interesting views. There were two methods of taxation, he explained, one the system used in Montreal, that of fixing a certain rate of taxation and dividing it among the city budget items—in other words, cutting the suit to fit the cloth; the other, the method used in Halifax, that of making up the city budget first and then fixing the taxation accordingly.

The land tax he described as the open end of taxes, because it was made to take care of the balance left over from the city budget. An agitation was due in Halifax this winter—in fact, had already started—and the two points under discussion were an objection to the form in which the business tax is struck, and as to whether land and buildings should be rated differently. As to the first, it was a question as to whether the value of the business and premises a man owns should be fixed, no matter how values change, or whether it should fluctuate like other taxable property. In Ontario there were differential rates for various classes of business, distillers being rated highest, wholesalers next, and so on. In regard to the second point, which was likely to raise much controversy, while many were advocating conformity to the Ontario taxation system, there was evidence to prove that the system was not so successful in western provinces as at first thought, when land was booming and no one objected to the minor sums involved in taxation. But when the pinch had come and land valuations went down, there were many protests.

Land Speculators Necessary

It was contended, Mr. Bell explained, that where land had no value except as part of a city area, a building in an out-of-the-way place shouldn't be taxed so high. Also it was contended that men should be encouraged to build, and that if the land tax was high it would force land into the market and make speculators give up hanging on to land with hope of it going up in price. As far as speculation was concerned, he did not believe that much land in the city was being held for purely speculative purposes, for, as a matter of fact, a man who could sell land at, say, $10,000, was, if he kept it, losing the interest on that amount, plus the land tax, and would have to plan on eventually getting an amount that would cover those costs, which would be a doubtful proposition. Also, as a matter of fact, land speculators got more blame than they deserved, inasmuch as that they were a necessary element in the city, for nobody was going to buy property in an old field. The speculator had to drain the land and make it marketable at his own expense.

Another thing pointed out was that it was not altogether to the advantage of the city to have land forced into the market. People were inclined to think every time they saw bare land that if it had houses on it it would add immensely to the revenue of the city in taxes; but they overlooked the expense the city would be put to to provide sewerage, lighting, pavement, streets and other things. Outlying city properties, he had found by experience, often didn't pay in as much as the city spent upon them.

In conclusion, the city solicitor stated that Halifax had thought it had a uniform taxation, not realizing that it was taxing a good building on poor land at the same rate as a poor building on good land, and that because there was no variation in the rating of various classes of business, some businesses were paying practically a full percentage of taxes, while others were paying as low as 2¼ per cent.

Dartmouth, N.S.—Exemptions on real and personal property in Dartmouth total over a million and a half dollars, equal to 25 per cent. of the total assessment on which taxes were collected last year. The total exemptions represent a loss in revenue each year to Dartmouth of about $47,000, and this is placing it at a low figure, because the assessment does not anything like represent the true value of the exempted property, either in real or personal. The exemptions are on churches, educational buildings and government property.

Victoria, B.C.—Up to November 25 the city's revenue amounted to $957,547, as compared with an estimate for the whole year of $964,145, according to the city comptroller's statement. Collection of arrears of taxes are also well ahead of expectations, being $402,509 up to November 25, as compared with an estimate for the whole year of $300,000.

The statement of approriations and expenditure also shows that in the majority of instances the city is still well within the year's estimates. The city was unable to foresee the fluctuations in exchange, and one of the results is shown in the fact that the item of brokerage and exchange indicates expenditure of $22,000 more than the estimate of $7,000 provided for in relation to the city's debt. The amount set aside for general interest was $25,000, but the expense on this account promises to be more than double this.

Burnaby, B.C.—A by-law has been introduced to the council which, in effect, calls for the conservation of assets and a general improvement of the credit of the municipality by a reduction of the bonded indebtedness of the corporation. Nothing in the Municipal Act provides for just this kind of financing. There are plenty of clauses and sections regulating the spending of money and how certain moneys shall be raised, but nowhere is any provision made for the conservation of accounts under trust held by the successive councils. Consequently, it will be necssary for the by-law to become incorporated in a private bill, which must receive the sanction of the government of British Columbia.

This by-law to be validated by the provincial government is a corollary of the action taken by the council in 1919, when a temporary debenture by-law was passed, borrowing a sum of $400,000 and setting up as collateral certain arrears of taxes amounting to the same figure. Up to the present, approximately the entire $400,000 has been taken care of, and in less than two years the account is wiped off the slate by arrears of taxes paid and by the disposal of certain lands which had reverted to the corporation for taxes. The balance of the lands, which have become the property of the municipality by way of unpaid taxes, stand at a conservative estimate of about $750,000. It is this three-quarters of a million dollars or more which the corporation now desires to conserve for the ratepayers of the municipality.

The by-law, when validated by the government, will give the council of Burnaby power to deposit the proceeds from the sale of lands received to the credit of a trust fund to meet the temporary debenture loan of $400,000, and any moneys accumulating thereafter from the sale of the unsold balance of bonds will go into this fund to purchase outstanding bonds of the municipality when same can be secured at reasonable prices. All bonds so purchased must be cancelled and cannot be resold. Should any balance remain in this fund after said bonds have been lifted off the market, the by-law provides that all unexpended balances can, with the sanction of the Lieutenant-Governor-in-Council, be utilized on such permanent works as water works, roads and sewers.

The prime object of the by-law is to reduce the overhead indebtedness of the municipality, as the fixed charges on every levy made in Burnaby amount to about 50 per cent. of the revenue. That is, when a levy of $400,000 in taxes is made, the ratepayer can figure that only one-half of that amount is going to maintenance and works in that municipality, the balance being absorbed by interest and sinking funds on previous loans.

Government and Municipal Bond Market

Ontario Loan Increased to Fifteen Millions—Practically All of That Amount Has Been Placed Here—Winnipeg Borrows in United States—Victory Loan Prices Stronger—Irrigation Bonds to be Sold in January—Tenders Are to be Opened on the Seventh

ONTARIO has tested the Canadian market and has attained surprising results. Within a week, $15,000,000 6 per cent. 15-year bonds were absorbed at a price on a basis of 6.60 per cent., and mostly within the province. About a month ago if you had asked a banker or a bond dealer whether such an amount could be absorbed, and within such a short time, he would have told you that such a thing was impossible. But now, that amount seems small. One dealer said that the only thing to regret was that no more bonds could be obtained, at the present at least. Nevertheless, municipailties seem afraid of the market, but dealers are expecting a busy time at the beginning of the new year.

Winnipeg's bonds for disposal in Canada met with a poor response, but the city was able to get a good price for securities payable in the United States, paying 5.78 for its money. Had the city wished to place these debentures here, it would have had to pay about 7 per cent. for its money.

Victory bonds continue to be the chief attraction. The past week has witnessed a large turnover, with prices becoming much stronger. The market has turned the corner, undoubtedly, but it is hardly reasonable to expect an abundance of new issues just yet in response to this strengthening. In a falling commodity market, it is not usual for brisk buying to take place, therefore in a strengthening bond market it is reasonable to expect a waiting attitude on the part of the borrowers.

The following figures show the change in Victory bond prices during the past week:—

	Last week.		This week.	
	High.	Low.	High.	Low.
1922	97	95½	97⅝	96⅜
1927	98	94	98	96¾

Coming Offerings

St. Jerome-de-Matane, Que.—The village is asking for tenders until December 20, 1920, on $100,000 5 per cent. 5-year debentures, dated November 1, 1920. J. E. Gagnon, secretary-treasurer.

Sorel, Que.—Tenders will be received until December 17, 1920, for the purchase of $80,000 6 per cent. 10-year debentures dated October 1, 1920 Interest payable semi-annually. A. O. Cartier, city clerk.

Iroquois Falls, Ont. (separate school board), is calling for tenders until December 21, 1920, for $45,000 6 per cent. 20-year debentures, which are guaranteed by the province of Ontario. Particulars of the issue will be found in an advertisement elsewhere in this issue.

Point Edward and Renfrew Town, Ont., are coming up with small issues on December 11 and 13, respectively. Particulars of these issues were given in these columns last week.

Domestic Loans

Alberta school district debentures to the amount of $300,000 are being offered for sale by the Department of Education. They have been authorized by the public utility commissioners, the proceeds to go for strictly educational purposes, such as the erection of new school buildings and the installation of additional school equipment. Local school districts in all parts of the province are included in the list of borrowers, and the debentures will be issued in blocks of from $500 to $25,000. The securities will bear interest at 8 per cent., payable annually, and mature in ten and fifteen years. They are protected by the assets of the respective school districts, comprising from 8,000 to 20,000 acres of land in each case. No time limit is set for the sale of the bonds, which will be disposed of by the department or by recognized bond dealers in whatever lots may be desired.

Victoria, B.C., will shortly undertake to sell locally a large proportion of its recent issues of bonds, amounting altogether to about $500,000. An effort will be made to arouse the interest of the local bond-buying public in these securities with a view to having as large a percentage as possible held in Victoria. The bonds are now ready, and they are offered to yield the purchaser 6½ per cent.

Peterboro, Ont.—At a meeting of the city council this week, the city treasurer was authorized to sell locally $47,548 local improvement debentures and Nashua Paper Co. debentures on hand.

Milton, Ont.—The town council has passed a $34,000 debenture by-law in order to defray the cost of an additional room to the new high school. The securities will be sold locally, as was the previous issue of $48,000.

Irrigation Bonds in January

On January 7, 1921, tenders will be opened for $5,400,000 7 per cent. 30-year Lethbridge Northern Irrigation district bonds. All details have been completed, and copies of the prospectus have been forwarded to about fifty bond dealers in both Canada and the United States. The opening of these tenders should prove to be an interesting event, as this is the first time that such securities have been issued in Canada.

These debentures to be issued are a direct obligation of the Lethbridge Northern Irrigation District, which comprises 105,265 acres of irrigable land. They are a direct charge on all land in the district, which is liable to taxation, including buildings and improvements. There is no outstanding debenture debt of the district.

While this is the first time that farmers have bonded their land for irrigation in Canada, irrigation is not a new venture. For many years large works have been in operation in Alberta by the Canadian Pacific Railway, other large corporations and a number of small private schemes. The total area under irrigation in the province at the present time is about 1,000,000 acres. The Canadian Pacific Railway has invested $15,000,000 in irrigating its own lands, which have an area in excess of 700,000 acres. Developed irrigated farms sell readily at from $90 to $150 per acre.

Applying for Borrowing Power

Several municipalities in Ontario will apply for power to borrow money, without the assent of ratepayers, at the next session of the legislature, as follows:—

Municipality.	Amount.	Purpose.
Orillia........	$ 25,000	Floating debt of Orillia, Water, Light and Power Commission.
Kincardine....	20,000	Consolidating floating debt and for roads.
Ottawa	275,000	Various local improvements.
Belleville . .	30,000	Bridge.
Peterboro. ...	1,275,000	Re agreement between Nashua Paper Co., Ltd.; electric, waterworks, and filtration plant.
London ..	517,500	Electric, waterworks, London Railway Commission.
London . .	413,000	Various local improvements.

Trustees and Guardians

are frequently in need of suggestions as to suitable investment for trust funds. Our long experience with Canadian Government and Municipal Bonds permits us to fulfill these requirements in a singularly efficient manner.

INVESTMENT-SERVICE

Bonds will Advance

One reason is the passing of extreme speculation in commodities and stocks and the tendency of conservative investors to strengthen their Bond holdings.

Another is the fact that the next long swing in money rates will be down, and, conversely, the next long swing in Bond values will be up.

For safety and profit, buy Bonds and fixed-interest securities *now*.

Write and we will recommend attractive purchases.

Debenture Notes

St. Thomas, Ont.—The city council has decided to raise $50,000 to lay new gas mains.

North Walsingham, Ont.—At the January elections, ratepayers will be asked to vote on a $5,000 debenture issue to build a municipal hall at Langton.

Kemptville, Ont.—Ratepayers have passed a by-law authorizing the raising of $25,000 to install new hydro distribution lines within the town limits.

Brantford, Ont.—Ratepayers will be asked to vote on the following money by-laws: $185,000 for collegiate institute additions; $125,000 for schools; $150,000 for waterworks.

Grand Forks, B.C.—The city has disposed of $55,000 refunding debentures. Of this amount $49,500 was taken up by local citizens, while the balance was placed in Nelson, B.C., by J. H. Lawrence, city auditor.

Halifax County, N.S.—Only two tenders were received for the $15,000 6 per cent. 20-year debentures, one being from J. C. Mackintosh and Co., for 92.08, and the other from W. F. Mahon and Co. at 91.41. Neither of these were considered satisfactory, so the debentures were not awarded.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from November 16 to 25, 1920:—

School Districts.—Pauline, $3,000 8 per cent. 10-years annuity; Buffalo Head, $775 8 per cent. 5-instalments; Nauka, $1,200 8 per cent. 10-years annuity; Selmond, $600 8 per cent. 10-instalments; Regina, $190,000 6½ per cent. 30-years sinking fund; Regina, $140,000 6½ per cent. 30-years sinking fund.

Bond Sales

Montreal, Que.—The announcement is made that the balance of the $5,000,000 province of Quebec 5-year 6 per cent. issue maturing June 1, 1925, consisting of $750,000, has been purchased by Beausoleil, Ltd., and is being offered to the public at par, plus interest.

Saskatchewan.—The following is a list of debentures reported sold from November 16 to 25, 1920:—

Schools.—Smithville, $5,000 7 per cent. 15-instalments, to local purchaser; Brotherfield, $1,700 8 per cent. 10-instalments, to Mutual Life Assurance Co.

Rural Telephones.—Cambridge, $450 8 per cent. 10-instalments, to G. L. Martin; New North Aberdeen, $2,700 8 per cent. 15-instalments, to T. N. McCallum, Saskatoon.

Rural Municipality of Estevan, $2,000 6½ per cent. 10-years, to local purchaser.

Winnipeg, Man.—The city has sold $800,000 6 per cent. 10-year bonds, payable in Canada and the United States, to Harris, Forbes & Co., Incorporated, at a price of 102.09. Alternative tenders were asked for, and the bids were as follows:—

	10-years, U.S. and Canada.	10-years, Canada only.	20-years, Canada only.
Harris, Forbes and Co.	102.089	.....	.....
Wood, Gundy and Co.	101.13	90.67	87.38

Stock Prices Show Better Trend on Canadian Exchanges—Victory Bonds Chief Influence—New Issue for Standard Bank—Dominion Foundries Preferred Offering—Consumers' Gas Company Will Sell Stock

A MUCH better tone in Victory bonds was the chief influence in bringing about an improved trend in stock prices this week. At the close on December 8 the markets presented a very satisfactory appearance, notwithstanding the weakness exhibited by Wall Street. Operations on the New York exchange were largely professional, and consequently the influence from that quarter was not very great. In the United States sentiment is improving. Captains of industry and bankers are undertaking constructive measures, and confidence in the general financial situation is growing. Call money is easier, although funds are not plentiful.

The money situation in Canada is apparently much better. The quick disposal of fifteen millions of Ontario bonds and the continued absorption of Victories on a large scale would seem to indicate anything but a scarcity of funds.

Pulp and paper stocks were the strong features this week in both Montreal and Toronto. The increase in prices of paper when the general commodity market is moving downward is perhaps unusual, but should prove very satisfactory to shareholders in these concerns.

In the United States it is generally expected that when the annual reports of the various companies begin to make their appearance passing of dividends will be frequently announced. This may be the case in Canada, but the concerns whose year ends with December 31 should make reasonably good showings, as business readjustment in Canada is several months behind that of the southern republic.

The Consolidated Mining and Smelting Company has decided to defer payment of the dividend for the last quarter of the year, but the stock market had already discounted this. From an operating standpoint, it is stated that the company has had a very successful year, but, on the other hand, there has been such a severe drop in metal prices on the world's markets, with no corresponding decline in the labor scale or materials, fuel and transportation costs having increased very subtsantially, that the directors considered it prudent to adopt the above course. The stock continues to show weakness on the exchanges.

Trading in both stocks and bonds continues in considerable volume. Victory loan issues are responsible for the large turnover of securities, there being very little activity in the other section of the bond market. Toronto, it will be seen, is the chief market for Victories. Figures are as follows:—

	Montreal.		Toronto.	
	Listed stocks.	Bonds.	Listed stocks.	Bonds.
Thursday	14,392	$ 427,600	2,476	$ 808,850
Friday	10,343	251,750	2,513	770,200
Saturday .	7,603	292,700	2,255	302,850
Monday .	10,402	378,350	1,814	398,050
Tuesday . .	6,256	312,700	2,486	616,650
Wednesday .	7,324	321,850	2,758	565,100
Totals	56,320	$1,984,950	14,302	$3,461,700

The figures for the previous week were: Montreal, listed stocks, 48,203; bonds, $1,462,050. Toronto, listed stocks, 12,509; bonds, $1,934,700.

New Issue for Standard Bank

The Standard Bank of Canada has decided to make an issue of $500,000 new stock in the proportion of one share of new to every seven shares of old stock presently held. The stock will be distributed to shareholders of record January 8, 1921, at $175 per share. The shares have a par value of $100 each. The authorized capital of the Standard Bank is $5,000,000, and the amount subscribed and paid up at the present time is $3,500,000. With the new stock bringing the paid-up capital to $4,000,000, the outstanding stock will have been quadrupled in the past fourteen years.

The offering price of these new shares is considerably higher than the prices of previous bank stock offerings, as the following comparisons will show:—

Bank.	Amount.	Ratio of new stock to old.	Price.	Market price.
Hamilton	$1,000,000	1 to 4	$150	$190
Royal	3,400,000	1 to 5	150	221
Montreal	2,000,000	1 to 10	150	208
Merchants	2,100,000	1 to 4	150	189
Provinciale	1,000,000	1 to 2	120	. . .
Standard	500,000	1 to 7	175	212

New Stock Issues

Dominion Foundries and Steel, Limited, Hamilton, announce an offering of $800,000 7 per cent. cumulative preferred stock of their subsidiary, the Adirondack Steel Foundries Corporation, whose plant is located near Albany, N.Y. The shares will be offered at par, $100, and with them will be given a bonus of three shares of common stock of no par value for each share of preferred. The stock is to be paid for, 10 per cent. by December 11 and the balance within thirty days.

President C. W. Sherman, in his letter to shareholders, points out that the Dominion Foundries and Steel, Limited, built the Adirondack Steel Foundries Corporation plant and own all the issued stock of that corporation, less a small amount sold. Production was started in August, and in the month of October, the third operating month, profits on one-fourth the rated tonnage were very satisfactory, according to officials of the company.

The Consumers' Gas Company, Toronto, Ont., is now offering for sale, by tender, the unissued portion of the present capital stock. Par value of the shares is $50, and the shares will be issued in blocks of ten and multiples. Public offering will shortly be made.

The Northern Lumber Company, Ltd., of Saskatchewan, has been authorized to increase its capital stock from $200,000 to $750,000.

CORPORATION FINANCE

Windsor Hotel Company Had Satisfactory Year—Western Power Negotiations to be Completed on December 23—Imperial Tobacco Profits Increased

British Columbia Packers' Association.—The British Columbia Fishing and Packing Co. will cease on December 31 to be a holding company of the stock of the British Columbia Packers' Association, and will become an operating company on January 1, 1921. This means merely the disappearance of the holding company, and the retention of the name of the British Columbia Packers' Association as the operating concern. Directors and officers are the same for both companies.

Imperial Tobacco Company of Canada.—For the year ended September 30, 1920, the company reports net profits, after charges and war taxes, of $3,386,150, equivalent after preferred dividends to 55 cents a share (par $5) earned on the $27,002,500 common stock as compared with net profits of $2,920,719, or 45 cents a share in the preceding year.

Income account for the past four years compares as follows:—

	1920.	1919.	1918.	1917.
*Net profits ..	$3,386,150	$2,920,719	$3,624,487	$2,455,224

Surplus ...	$1,364,738	$ 818,769	$1,522,537	$ 353,274
*P. & L. surplus	4,224,674	3,129,960	2,581,216	1,328,704

---

*From which is paid final dividend on ordinary stock for the current year.

Canada Gas and Electric Power Corporation.—The Public Utilities Commission of Manitoba granted the company an increase in rates at a recent hearing in Brandon, Man. The former rates were: 3½ cents per k.w.h. for street railway power, five cents per k.w.h. for street lighting, ten cents per k.w.h. for domestic lighting and power, and $1.75 per 1,000 condensation for steam. The increase provides 12 cents per k.w.h. rate for electric power, with a flat rate on a ten-hour day basis of $6 per month. The electric lighting rate will be 12 cents per k.w.h. with minimum rate of $1 per month. The rate for the street railway will be five cents per k.w.h., and for street lighting six cents per hour. Steam heating rates will be $2.80 per thousand for any amount of steam up to 3,000 pounds per month, with a sliding downwards for users of greater quantities than this. A minimum charge of $3 will be made.

There was a good deal of opposition from the city, but the application was approved. The company submitted figures showing a loss of $106,000 during the past three years.

Windsor Hotel Co., Ltd., of Montreal.—Profits for the twelve months ended October 31 last amounted to $172,733, compared with $172,177 in 1919 period, and $68,282 in 1918. After deducting bond interest for the year there remained available for application on the $1,500,000 outstanding capital stock of the enterprise the sum of $145,733, or equal to 9.7 per cent., against approximately the same in 1919, and 2.7 per cent. in the preceding statement. The showing in respect to profits is rendered more satisfactory by reason of the fact that $405,668 was written off for repairs and renewals before the net figures were arrived at. This allowance compares with one of $189,477 a year ago, and $104,881 in 1918.

During the year there was paid to shareholders $120,000 in dividends and bonus, or at the rate of 6 and 2 per cent., respectively, against $90,000 in 1919, representing an annual disbursement of 6 per cent., and $30,000, or 2 per cent. in 1918. After all deductions, the surplus profits of the year amounted to $25,733, which with the addition of the balance carried forward from the previous statement, brought total surplus up to $548,133.

The balance sheet shows few outstanding changes. A new item of "investments" appears at $215,207, while cash holdings show a reduction of $155,000. The principal figures are as follows:—

	1920.	1919.
Buildings	$1.787,671	$1,834,715
Power plant	80,000	90,000
Furniture	405,000	427.500
Investments	215,207	....
Inventories	78,073	61.372
Cash	84,706	239,895
Total assets	2,888,016	2,893,531
Bonds	600,000	600.000
Stock	1,500,000	1,500,000
Accounts payable	111,560	144,981

DEBENTURES FOR SALE

TOWN OF WALKERVILLE

DEBENTURES FOR SALE

Sealed tenders addressed to the undersigned and marked on the outside "Tenders for debentures" will be received up to noon of Tuesday, December 14th, 1920, for the purchase of the following debentures and accrued interest:—

$300,000, part of an issue of $400,000 for Housing purposes issued under the Municipal Housing Act, 1920. The whole issue is payable in fifteen equal annual instalments of principal and interest, of which the amounts in the schedule below will be sold. These debentures carry interest at the rate of 6% per annum. Both principal and interest guaranteed by the Province of Ontario, and are secured by a special rate over and above all other rates.

Schedule of amounts:—

1921 ..	$ 1,185.10	1926 ..	$16,997.55	1931 ..	$24,775.91
1922 ..	12,216.21	1927 ..	18,377.40	1932 ..	26,622.46
1923 ..	13,309.18	1928 ..	19,840.04	1933 ..	28,579.81
1924 ..	14,467.74	1929 ..	21,390.45	1934 ..	30,654.60
1925 ..	15,695.80	1930 ..	23,033.88	1935 ..	32,853.87

Debentures will be delivered and must be settled for at the office of the Town Treasurer, Walkerville, Ont.

All debentures are Coupon, Bearer issued in $1,000 and odd amounts, and carry interest from 14th of December, 1920. Principal payable at the Canadian Bank of Commerce, Walkerville, on 14th of December in each year. Interest payable semi-annually on the 14th June and December in each year.

The highest or any tender not necessarily accepted.

Canadian Situation Reviewed at Bank of Montreal Meeting

"While there does not seem to be any cause for apprehension, there is every reason for the exercise of the utmost measure of caution."—(Sir Vincent Meredith.)

"Our faith in Canada to-day is stronger than ever before. On the other hand, we have never faced a banking and business situation requiring more delicate handling."—(Sir Frederick Williams-Taylor.)

The annual meeting of the Bank of Montreal, held at the Head Office of the Bank, afforded an exceptional opportunity of learning how the Dominion is passing through the extraordinary conditions which now prevail. This year every manufacturer and businessman in Canada is anxious to determine just what the outlook is and it is probably on this account that both Sir Vincent Meredith, the President, and Sir Frederick Williams-Taylor, the General Manager, dwelt more especially on different developments which had a particular bearing on the Canadian situation and stressed the factors which bore on the general outlook for this country.

Outlook for Caadian Situation

Sir Vincent Meredith, in his review to the shareholders, said, in part:—

"The year just closed has been a difficult one for bankers, but the progress we have made and the results we are able to show will, I feel sure, prove satisfactory to our shareholders.

"An overwhelming demand for credit has taxed resources to the utmost. Following a period of excessive prices and deflated currencies characteristic of war times, the country is now in the midst of the process of readjustment. It has been difficult to make producers, merchants and others carrying heavy stocks, who have grown accustomed to high prices, accept the inevitable by recognizing the fact that it is futile to attempt to overcome natural laws and to realize that economic conditions, which no artificial means can alter, alone are the cause of price decline. The demand for intervention through Government control is still insistent in some quarters. Canada alone cannot control world-wide conditions and it is idle to turn to the Government for relief from falling prices. This applies to wheat as well as to other commodities. A lower price level must be reached before we can reasonably look for a resumption of business activity on a sound basis. To arrive at this stage inventories must be reduced and deficiencies made good by drawing upon the excess profits of previous years."

Money Rates.

"I see no reason to look for permanently lower interest rates in the near future. Reaction in business and the marketing of the crops may bring an easier tone temporarily, but the magnitude of international indebtedness to be refunded, together with the wastage of war, cannot be made good immediately, and probably not for a somewhat indefinite time.

International Banking Corporation Needed.

The necessity for financing foreign trade has come very closely home and pending an international working scheme, I feel it would be well for Canada to move locally. I am still of the opinion that a corporation to foster foreign trade so as to keep our factories busy and give employment to labor is desirable and sooner or later must be launched. If export trade can be revived, it will solve many of our difficulties.

Government-Owned Railways and Ships.

Canada to-day has a very large National Railway System, which is being operated at a heavy loss, thereby increasing the load on an already heavily tax-burdened country. Sooner or later some means must be found to relieve this situation. Some confidently believe that by proper public administration of the lines, deficits can be cut down. My own view is that the proper solution will be found if the Government, at the earliest feasible time, divests itself of ownership and operation of the roads and places them under corporate control upon terms fair to the country and upon conditions that will ensure the service for which the construction of the lines was undertaken.

Resume.

"To sum up the situation in Canada at present, as I view it, is that while there does not appear to be any cause for apprehension, there is every reason for the exercise of the utmost measure of caution. Canada cannot disassociate herself from world conditions, and world conditions are not satisfactory. On this continent the two years supervening upon the Armistice have been marked by unexampled trade activity and prosperity, a circumstance common to the conclusion of all great wars, but the reaction has set in and may not yet be in full play. Happily, Canada is well buttressed on many sides, and the exercise of prudence and sagacity should enable her to meet the shock of falling prices, restricted credits and deflated currency, without serious impairment of her commercial and financial vitality."

Sir Frederick Williams-Taylor, in his review of banking developments of the year, and touching on the conditions which confront Canadian banks to-day, said, in part:—

"As comparisons are constantly made between Canada and the United States, owing to general similarity in conditions, one anomaly attracts attention, viz.: that with credit restriction as acute here as it is across the line, the price of money is materially lower in the Dominion.

"This condition, in days of world-wide high interest rates, has attracted much attention in other countries and is regarded as a tribute to Canada's good banking system. The one disadvantage of this cheap money condition is that persons on fixed incomes derived from investments face the higher cost of living, including income tax, with little increase in revenue. As everyone knows, the connection between the price of money and the yield on investments is of the closest.

"With reference to current loans in Canada, your Directors have felt impelled for many months past, in the Bank's and the country's best interests, to follow the policy found essential in every other country, and keep within bounds our advances to merchants and manufacturers. This policy is in accordance with the views of the Dominion Government and has been followed, more or less closely, by all Canadian banks.

"Naturally enough, exception has been taken in certain quarters to such restrictions, but, as a rule, our customers have recognized the necessity of checking over-trading and further expansion in such times as we are now facing. There has never been a period in our experience when requests for advances for puroses out of the ordinary have been so numerous.

"It is safe to say that had credit been granted freely and banking resources become tied up, a serious condition would have resulted in this country. Already the tide has turned and many of our friends now frankly admit the danger of the undue expansion so much in evidence a few months ago. We are convinced that the business of Canada is in a safer and sounder position to-day in consequence of a judicious credit restriction.

"There is a general sense of relief resulting from the present evidence that the decline in the high cost of living has commenced. From now onward we may confidently expect the trend of prices to be downward, and with lower values the demands for bank credit should logically diminish. It is relevant to add that by restrictive measures the banks have contributed in no small measure to this improved condition.

"It is noteworthy that the greatest expansion of the Bank during the past few years has been in our own country. This is revealed in our greatly increased loans and deposits in Canada and in the number of branches opened during the period:—

	Loans in Canada.	Deposits in Canada.	Branches in Canada
1914	$123,147,000	$168,557,000	173
1920	$240,725,000	$358,878,000	302

"I might say that in my opinion we have never faced a banking and business situation requiring more delicate handling. Since August, 1914, the world has travelled far along the road to ruin. We may be thankful that the waste and destruction ended before the point of utter exhaustion was reached. Canada has escaped, but we are still a virile people in a goodly land. There is no reason for dismay over our national outlook, but there is every reason for sober thought while we take stock of our resources and of our prospects. We must bear in mind there is no royal road to the stable conditions of former years, no magic by which we can restore the wealth that has been lost or wipe out the debts incurred. There is nothing for it but to travel slowly back the way we came, repair the damage, retrench, and work out our salvation."

Two New Directors.

The annual report was unanimously adopted, and thanks were voted to the president, vice-president, general manager and staff.

The shareholders gave approval to the motion by Lord Shaughnessy to increase the number of directors from 16 to 18. All the retiring directors were re-elected and to the two new positions on the Board Sir Lomer Gouin and General Sir Arthur Currie were elected.

Trade Bakery, Ltd., Suffered a Loss of $100,000—College Hall of Acadia University, $80,000—Scottish Co-operative Elevator, $75,000

Biggar, Sask.—December 2—The Scottish Co-operative elevator was destroyed by fire. The loss is estimated at $75,000.

Cornwall, Ont.—December 4—The large barns of Finlay McRae were destroyed by fire. The loss is $8,000, with insurance of $2,000.

Essex, Ont.—December 1—Barn, owned by Herman Harrison, was destroyed by fire.

Galt, Ont.—December 6—The residence of Mr. Reid, Norfolk Avenue, was damaged by fire. The fire was caused by a defective chimney. The loss is covered by insurance.

Moncton, N.B.—December 5—A small building, owned and occupied by Moses L. Tracey as a grocery store, was destroyed by fire. The loss is estimated at $1,000.

New Carlisle, Que.—December 6—The residence of Hon. John Hall Kelly, member of the Legislative Council of Quebec, was destroyed by fire. The loss is placed at $50,000 and the insurance at $15,000.

Orillia, Ont.—December 4—The buildings, plant and equipment of the Electro Foundries, Ltd., was destroyed by fire. The loss is estimated at $35,000. The plant was insured.

Quebec, Que.—November 29—The sawmill, owned by J. H. Gignac, on Church Street, was damaged by fire to the extent of $200.

December 3—The American steamer "Chippewa," owned by the Independent Steamship Co., of Cleveland, Ohio, was damaged by fire.

St. John's, Nfld.—December 7—One hundred thousand dollars' damage was done by a fire in the Trade Bakery, Limited. There is about $80,000 insurance.

Thamesville, Ont.—December 2—A barn, owned by Ira Orr, was destroyed by fire. The origin of the fire is a mystery.

Vancouver, B.C.—December 8—Three men lost their lives when a fire broke out in the Parks rooming-house. The building was valued at $80,000.

Wolfville, N.S.—December 1—Acadia College Hall, one of the central buildings of Acadia University, was destroyed by fire. The building was valued at $80,000, with insurance of $40,000.

Woodstock, Ont.—December 2—A fire, caused by a spark igniting the gas in the Standard Tube Company's plant, did $2,500 damage.

ADDITIONAL INFORMATION CONCERNING FIRES

Belleville, Ont.—November 16—A fire which occurred in the Palace Theatre did damage to the amount of $11,600 to the building and contents. There was insurance of $10,500.

Bridgewater, N.S.—On November 14 there were three fires in this town. They are believed to have been of incendiary origin. The loss was as follows:—

Owner.	Value.	Insurance.	Damage.
Artemas Ramey	$1,500	$1,000	$ 5
James Cook	2,500	500	75
Donald McDonald	100	....	10

Calabogie, Ont.—November 5—Warehouse, packing house and ore shed of the Black Donald Trophite Co., Ltd. The cause of the fire is unknown. The total loss was $41,057, with insurance on the building to the amount of $4,000, in the following companies:—Century Insurance, Rochester Underwriters (Great American Insurance Co.), Hudson Bay Insurance, Northern Assurance, Pacific Coast, Globe Underwriters (Globe and Rutgers), London Assurance, Western Assurance, Sun Insurance, General Accident Fire and Life, Canadian Fire, Exchange Underwriters (Royal Exchange), Royal Insurance, Commercial Union, Insurance Company State of Pennsylvania, Imperial Underwriters (Sun Insurance Office), British Crown Assurance, and Liverpool, London and Globe. The insurance on the stock was as follows:—British Crown Assurance Corporation, Ltd., $5,000; Exchange Underwriters (Royal Exchange), $5,000; Canadian Fire Insurance Co., $1,250; Northwestern National, $1,500; General Accident, Fire and Life, $1,000; stock, total, $13,750.

Carberry, Man.—October 19—Barn of John Graham was destroyed by fire. The loss is $6,450, with insurance of $12,750 in the Postage Mutual Fire Insurance Co.

Manitoba.—The fire commissioner's report for the month of October shows that during the month there were 151 fires, entailing a loss of $266,257. There were 44 dwellings destroyed and 39 farm buildings. Careless smokers caused 12, electric origin 8, stoves and furnaces 13, and 6 fires were caused by incendiarism.

Rimouski, Que.—November 28—A garage and eight cars were destroyed by fire. The loss is $10,000, with insurance of $2,000. A residence was also damaged to the extent of $6,000, with insurance of $3,200.

SASKATOON REORGANIZES BOARD OF TRADE

Business is Dull, Because Farmers are Holding Wheat and Won't Buy—Collections are Poor

(Staff Correspondence.)

Saskatoon, December 4, 1920.

THE business outlook in Saskatoon and throughout central Saskatchewan is quiet at the present time, in common with other localities throughout the Dominion. There has been a tendency all fall on the part of the farmers to hold their wheat, and many of them are now sorry that they did not sell earlier, as the price has dropped considerably. Farmers in this locality have had a difficult time, especially on some of the branch lines, in getting cars in which to ship their wheat. This is especially noticeable on the lines of the Canadian National. Mercantile business cannot be taken just now as a barometer of real conditions, as during this period of price adjustment the merchants are the ones who are suffering at the present time, and this is general all over Canada.

All lines of business are struggling with collections, and while some report fair success, it is a very hard and difficult period for getting in money.

In the way of public buildings, Saskatoon has made considerable progress during the present year. The new Provincial Normal School has been pushed rapidly, and this building alone is costing $670,000. The new Science building of the Saskatchewan University in Saskatoon is nearing completion at the estimated cost of $500,000. The Canadian National Railways are erecting new shops in Saskatoon, also a new Steel Bridge, and their expenditure at this point runs up in the neighborhood of $800,000.

The Board of Trade is being reorganized in Saskatoon by the Canadian City Bureau of Toronto, and good success has been attained, and the membership in all probability will reach 700 before the campaign is concluded. The whole board will organize along broader lines, and with an adequate income of practically $12,000 the first year, this will give Saskatoon a splendid chance to carry on progressive work through its Board of Trade.

The Canadian Debentures Corporation, Ltd., incorporated under the laws of the Dominion of Canada, has been authorized to increase its capital from $250,000 to $500,000.

One of the oldest seats on the Toronto Stock Exchange was sold on December 4th, by F. J. Stewart for $12,500, the highest price paid for a seat on this exchange for a number of years. The purchase was made by Stuart Playfair, acting on behalf of some one whose name has not yet been disclosed. It is believed, however, that the seat will ultimately pass to another bond house.

Saskatchewan Has Surplus, But Debt Increases

Provincial Treasurer in Budget Speech Proposes to Abolish Supplementary Revenue Tax—Most of New Debt Is Revenue-Producing—Estimates Call for Expenditure of $24,383,420, of Which $10,151,000 Is on Capital Account

SASKATCHEWAN'S revenue for the year ended April 30, 1920, exceeded the expenditure by $1,934,625, and after deducting $133,529 for value of stocks on advances there remained a net cash surplus of $1,801,095. Details of the revenue and expenditure have already been given in *The Monetary Times*. In his budget speech on December 6 the Provincial Treasurer, Hon. C. R. Dunning stated that while a surplus was preferable to a deficit, yet he did not believe it was the business of a government to accumulate surpluses. There were several reasons why it had accumulated, he said. It would be remembered by the members of the House that as early as July, 1919, it became apparent that a very large area in the province would reap no crop, and that applications for relief began coming into the government. Confronted with conditions like these in July, the government anticipated that a very large outlay would be required to meet the situation; and it made arrangements to cut down its expenditures along every line.

How Surplus Had Accumulated

These efforts at curtailment had been fairly effective, as the figures showed. At the last session the assembly voted out of the consolidated fund the sum of $9,198,000 for the administration of the affairs of the province. The government spent of that sum only $8,225,913. It still had on hand $972,000. On top of this, a greater amount of revenue had been received than the estimates had provided.

Again, said Mr. Dunning, while the government expended what was necessary for relief last year, these expenditures were ultimately made not directly out of the revenues of the province. The ends which the government sought were attained through guaranteeing bank credits. The contingent liabilities resulting from such guarantees amounted to around $2,000,000. The treasury was thus left ahead at the end of the year.

The surplus would, however, be useful when in the next succeeding year extraordinary unforeseen expenditures have to be met. "A few days ago we were called upon to meet one of these expenditures when we voted in the supplementary estimates the sum of $380,000 to cover the cost of the anti-grasshopper campaign last summer." There was also, said Mr. Dunning, an unpaid account on the free freight policy adopted by the government last year, as a relief measure, of over $200,000.

Abolish Supplementary Revenue Tax

At the same time the government thought it was time, said the provincial treasurer, to look around and see in what way it might further assist the people of the province by grants and by the reduction of taxes. The government had determined to propose to the legislature that the Supplementary Revenue Tax be abolished. Another reason for abolishing the tax, said Mr. Dunning, was that the method by which it was levied was no longer desirable. There was no assessment of farm lands for municipal purposes in 1907. The acreage method of taxation had since passed away, however, with the single exception of the supplementary revenue tax. Taxes are now levied in accordance with assessments based on value of land. The supplementary revenue tax presented the anomaly of a tax still levied at the rate of one cent an acre wherever the land was or whatever its value might be.

Sources of Revenue

Turning to the question of the origin of the province's revenues and the disposition made of them, Mr. Dunning compared the receipts from the various sources for the fiscal year 1918-19 with those for the fiscal year of 1919-20, as follows: Out of the Dominion government, 32.3 per cent. of the total revenues of the province in 1918-1919 or $2,307,147, and in 1919-20, 31 per cent. or $2,654,839; out of taxation: 34.7 per cent. or $2,479,709 in 1918-19, and 41 per cent. or $3,513,199 in 1919-20; out of licenses: 13.7 per cent. or $979,155 in 1918-19, and 10 per cent. or $889,147 in 1919-20; out of fees: 12.8 per cent. or $918,672 in 1918-19, and 12 per cent. or $1,062,531 in 1919-20. The small balance of the revenue was obtained from repayment of advances and loans, institutional revenue, fines, forfeitures, and estreated bail, and miscellaneous.

The expenditures were distributed as follows: Administrative, 6 per cent. or $397,485 in 1918-19 and 5.5 per cent. or $412,426 in 1919-20; legislative, 2.4 per cent. or $160,897 in 1918-19 and 2 per cent. or $169,047 in 1919-20; protective (police, courts, jails, land titles and miscellaneous), 19.2 per cent. or $1,268,213 in 1918-19 and 20 per cent. or $1,518,289 in 1919-20; developmental (education, public health, neglected children and promotion of agriculture and commerce), 542.9 per cent. or $3,496,279 in 1918-19.

More for Education

Queries would undoubtedly be made, continued Mr. Dunning, as to what would become of the school grants formerly made out of the supplementary revenue fund. The government intended to so increase the educational grants that in 1921 they would aggregate for each and every institution more than would have been possible under the old scheme.

The supplementary revenue tax was imposed in 1907 to meet a condition then existent, when a considerable area of the province was not organized into school districts and consequently contributed nothing to the support of schools. The tax amounted to a levy of one cent an acre on all land outside the towns and cities and was designed to make these lands contribute to education. The proceeds of the tax went into the supplementary revenue trust fund and was divided annually, as follows: 80 per cent. to rural schools, 5 per cent to the college of agriculture, 5 per cent. to the university, and 10 per cent. to secondary education. This scheme worked well for several years.

The primary reason for instituting the tax had now ceased to exist, however. While there were still some areas not organized into school districts a glance at a map of the school districts would reveal the fact that the motive for the tax had very largely passed away, with further organization of school districts. The revenue of school districts from this fund in the earlier years of the tax was greater than the amounts raised by them by taxation. The reason for this was to be found in the fact that so much of the province was outside the organized school districts. The average annual receipts from the tax since 1907 was $472,643. This had been distributed each year according to the law. There were only 1,167 school districts in the province during the first year of the tax (1907-08) to participate in the receipts from it. To-day there are 8,640 districts. As the districts grew in number it became impossible for them to get the same sized grant out of a fixed revenue.

Debt Shows Large Increase

The public debt of the province, when he delivered his last budget speech, said Mr. Dunning, amounted to $34,946,404 gross, or $41.95 per capita. The corresponding debt this year was $41,549,480, or $49.86 per capita. This gross debt was made up of two different items—a dead weight expenditure and a debt incurred for the creation of revenue-producing utilities. The dead weight debt would have to be paid off from revenue derived from taxation. The other debt would be liquidated by revenue from the earnings of the utilities.

That portion of the gross debt which was revenue-producing amounted to $20,808,801. The net debt of the province consequently amounted to but $19,416,237, as compared with $17,742,236 last year. The per capita net debt was $21.30 in 1919 and $23.30 in 1920. These facts indicated, declared Mr. Dunning, that the government was going very slowly in regard to increasing the dead weight debt of the province; while it was willing to move much faster in regard to the revenue-producing debt. Considered either from the point of view of gross or net debt, Saskatchewan had, said Mr. Dunning, the lowest per capita debt among the provinces of western Canada.

Two Bond Issues Sold

The government had not taken advantage of all the sums voted at the last session of the legislature, continued the provincial treasurer; but it had made two bond issues. The first of these was a 6 per cent. debenture issue for $1,000,000, due in 1924, and was sold on May 1, 1920, to a syndicate headed by Messrs. A. E. Ames and Co., Toronto, at 102.20. It cost the province 5.38. The second was a 6 per cent. debenture issue, due 1940, for $3,000,000. It was sold on October 1 at 94.68, and cost the province 6.48. The interest and principal are payable in Canada only. While slightly better terms, on the face, could have been obtained for the issue had payment been permitted in the United States, the government decided, said Mr. Dunning, that this inducement was not sufficiently great to overcome the risks that would have had to be run in connection with American exchange.

The fixed procedure of the government in connection with all such loans was followed in the case of these issues. Tenders were called for and opened in public. While occasionally, a fluctuating money market offered opportunity to secure snap bargains, this procedure had been found to be the safest in the long run. It was the fairest to all, and gave no opening for the entrance of suspicions or complaints. The provincial treasurer said that he knew that the October issue was a good sale, as it had taken the bond dealers who purchased it considerable time to dispose of it, showing that they had paid more than would enable them to market it readily. They even came back and tried to make terms with him. The loan also compared very favorably with recent Ontario offerings—the latest Ontario offering to the public was at a rate that would cost the province 6.60.

This was a cause for congratulation, that Saskatchewan could get its money at a rate no greater than was demanded of the wealthiest province in Canada. He would not claim that the financial position of Saskatchewan was better than that of Ontario, said Mr. Dunning, but he could say that Saskatchewan had gotten away from a condition where it has to take much less than Ontario.

Railway Guarantees

Alluding to the province's contingent liabilities, Mr. Dunning stated that the total amount of the outstanding liabilities resulting from the government's guaranteeing Canadian Northern and Grand Trunk Pacific branch line bonds was $28,582,011. While this amount had to be carried as contingent liabilities, there was little likelihood of the province ever being called upon to make it good. The province was still responsible for and would have to meet the interest on these bonds if the railway companies defaulted; but the likelihood of the companies meeting the interest instalments was greater now than it had been a few years ago. The Dominion government now owned the lines, whereas for some years the status of the lines was uncertain. He did not think it would have been a calamity for the province if the Canadian Northern and the Grand Trunk Pacific had gone broke, said Mr. Dunning. The provincial government might have given better operation service than would be given from Ottawa. There was no use discussing these possibilities now. The province could not get the lines unless the companies defaulted. Should they do so, the province would have a right to the roads whose bonds it had guaranteed.

The C.N.R. had never defaulted in the payment of its bonds, said Mr. Dunning, but the G.T.P. did, with the result that the province had to meet interest instalments amounting to $810,000. After prolonged negotiations between the provincial and Dominion governments, this debt had been liquidated, with the exception of a small amount of interest on the money advanced by the province. There was always the remote danger of default in the future, and for this reason it was necessary to regard these guarantees as contingent liabilities.

Other Contingent Liabilities

The province had other contingent liabilities connected with assistance given to agriculture. There was a $2,000,000 line of credit for the Saskatchewan Co-operative Elevator Co., Ltd., which the government guaranteed. There was a sum of $240,000 guaranteed on account of the Saskatchewan Co-operative Creameries, Ltd. It had not been necessary this year to guarantee any credit for the Municipal Hail Insurance Association. So successful had been the association's year that it was able not only to finance itself but also invest a very considerable sum in farm loan debentures. Other contingent liabilities were $217,000 for drainage schemes; $244,000 on account of municipal seed grain advances; $150,000 for seed grain and relief in local improvement districts; $630,000 on account of seed grain advances by mortgagees, and $936,744 on account of relief extended by municipalities. The total amount of the government's outstanding guarantees for agricultural purposes was $4,419,564.

Relief Measures

The spirit shown by the municipal officials and by the people who had received relief indicated, said Mr. Dunning, that the liabilities incurred in connection with the relief measures taken by the government would be made good. The prospects were excellent. The total amount of the securities taken by the Dominion government in the winter of 1914-15 for relief and seed grain advances in this province was $8,655,000, as follows: Seed grain, $5,578,000, and relief, $3,077,000.

At the present time the Dominion government has collected $4,786,000 on the seed grain account and $2,018,000 on the relief account. It has outstanding on the seed grain account only $791,000 and on the relief account only $1,058,000. This means that it has collected nearly 86 per cent. of what it advanced for seed grain and over 65 per cent. of what it advanced for relief. When regard was had for what the Dominion government had accomplished with its loose and inefficient methods of collection, there was every reason to believe that with the more efficient methods being adopted by the municipalities the provincial government's outstanding liabilities would be cleaned up.

Owing to the fact that the end of the Farm Loan Board's financial year had not yet arrived, said Mr. Dunning, it was impossible for him to submit to the assembly a complete statement of its business for the year. He could say, however, that the situation indicated in the last report filed by the board continued during the year.

Estimates for 1921-22

Estimates for the fiscal year ending April 30, 1922, presented in the house on December 6, call for a total expenditure on all accounts of $24,383,420, as compared with $20,961,034 last session. Of this amount, $11,670,920 is chargeable to revenue account; $10,151,000 to capital account; $2,100,000 to telephone revenue account, and $461,000 to the Agricultural Aids Act. The principal capital expenditures are $3,276,000 for construction of public buildings, $850,000 for public improvements, $1,550,000 for telephones, and $4,475,000 miscellaneous. The public debt will require $2,446,874. The amount allotted for education is $2,632,050, and for the administration of justice $1,450,441.

Operations of the Dominion Bankruptcy Act

318 Trustees Have Already Been Appointed—Ontario Has 88 and Quebec Has 118—Authority Extends Throughout Provinces—General Operation Proving Satisfactory, but Some Changes Are Contemplated

(Special to *The Monetary Times.*)

Ottawa, December 16, 1920.

UNDER the Bankruptcy Act passed last year and amended at the last session of parliament, the secretary of state's department has now appointed 318 trustees to administer it in their respective provinces. They are mainly chartered accountants, trust companies and associations of business men formed for purposes which make them ideal trustees for bankrupt properties. In a number of cases the same company or the same association has qualified to act as trustee in most of the nine provinces of Canada, but it is entered separately as a new trustee each time, and has to put up a new bond of fifteen thousand dollars for each province in which it is appointed. In lieu of a bond they are allowed to deposit Victory bonds, specie, cash or any approved bond, but in the great majority of cases they send guarantee company bonds.

The 318 trustees already appointed are divided among the nine provinces as follows:—Nova Scotia, seven, Halifax having five; New Brunswick, four, St. John having three and Moncton one; Prince Edward Island, two; Quebec, 118, Montreal having 83, Quebec 13, Sherbrooke 14, and the other eighteen being scattered; Ontario, 88, Toronto having 48, Ottawa nine, Hamilton six, Fort William two, and the remaining 23 being scattered through the province; Manitoba 18, Winnipeg getting them all, though branch offices of eastern companies are represented, and doubtless branch offices of Winnipeg companies look after outlying districts; Saskatoon, 23, Regina having four, Moose Jaw three, Saskatoon five, and the remaining 11 being scattered; Alberta, 22, Calgary having eight, Edmonton five, and nine elsewhere, including five branches of Winnipeg companies; and British Columbia, 36, Vancouver having 27, Victoria three, and the rest of British Columbia having six, thus making a total for all Canada of 318 to date.

Some Changes are Contemplated

The act has now functioned sufficiently long for the business world to form its impressions of it. The action of the Dominion government in delaying the proclamation of its going into effect so that Canadians had until July 1st to study its provisions proved wise as it enabled Chambers of Commerce, mercantile associations, judges and bar associations to make various recommendations which led to a number of amendments being incorporated in the act during the last session, with the object of making it more simple and workable. Since then actual experience has led to a number of other recommendations being made to smooth out the working of the act, and before the commencement of the next session of parliament in February next there will be a conference between the secretary of state and interested people with regard to new amendments which are desirable.

Your correspondent is informed that the changes to be made have not yet been formulated, but that none of them are serious or drastic in their character. A few "kinks" have to be smoothed out so that the public may get the full benefit of the simplicity and uniformity created by having federal courts instead of provincial courts now superseded, so that a man in Nova Scotia may invoke the aid of a bankruptcy court in British Columbia. One court and one procedure throughout Canada is the ideal, but only experience can perfect the machinery, and one able parliamentarian states his belief that it will be necessary to make amendments for the next twenty years to this act according as growing experience with it shows how it can be made more effective.

Provinces are Administrative Districts

No bankruptcy districts have been named other than the respective provinces in which trustees are named, and each trustee can act throughout the province. Provision was made in the act for dividing the country into smaller bankruptcy districts, but for a time it was thought advisable to keep the working of the act a little more elastic. When circumstances show the need for it, smaller bankruptcy districts will be outlined. Very little of the administrative machinery of this act remains at Ottawa beyond the naming of the trustees by the secretary of state, and the naming by the minister of justice of the judges to preside on bankruptcy matters. The officials, such as the registrars of the courts, and others, are appointed by the chief justice of the province. After the act was passed, it was expected to stand on its own legal legs with the courts and the officers whose primary duty it is to look after the carrying out of its provisions. When the trustees are all appointed it will need very little administrative machinery at Ottawa. No statistics nor records of bankruptcy proceedings are kept here except that a notice has to be printed in the "Canada Gazette" of every failure by the trustee appointed in each case.

A Year Book for 1921, in the form of an office diary, with pages 6 in. by 9 in., has been issued by the United States Fidelity and Guaranty Co. Copies are being distributed by the Canadian office, Excelsior Life Bldg., Toronto.

TWO MILLION LOANED UNDER RURAL CREDITS

Extent of Manitoba Scheme—Winnipeg Bank Clearings Reflect City's Growth—Business Now Dull

(Staff Correspondence.)

Winnipeg, December 16, 1920.

THE Christmas business in Winnipeg is warming up considerably, but there are many sales on, and merchants are endeavoring to get rid of Christmas stocks as fast as possible. The weather has been very mild so far and not at all good for Christmas trade. Bank clearings in Winnipeg are keeping up well. In the month of October Winnipeg's clearings amounted to $414,840,605, an increase over the same month of a year ago of more than $114,000,000. The figures in October, 1919, were $300,069,261. It is significant that Winnipeg clearings for October this year were considerably in excess of those of Toronto for October, 1919, and are only $60,000,000 behind Toronto's bank clearings for last month.

A comparison of last year's figures and those of this year is interesting. It shows that Winnipeg has transacted, and is transacting, an enormous business, and that its business is on a solid foundation. These figures give a certain barometer to business in the metropolis of the west, and, when it is taken into consideration that western Canada's grain crop of this year is estimated at 664,000,482 bushels, it would hardly seem reasonable to be a pessimist.

Loans made by the provincial government under the Rural Credit Act this year have exceeded $2,039,000. Of this amount, $400,000 was loaned for the breaking of virgin soil, 33,300 acres of unbroken prairie land being brought under cultivation.

TWO MILLION FROM ALBERTA LAND SALES

The total proceeds from the recent school land sales throughout Alberta are now announced by the Department of Education as $2,040,183. This represents an aggregate of 115,608 acres of wild lands, which sold at from $7 to $70 an acre, with an average of $17.15. The entire proceeds of the sales go to Ottawa, and will be administered as part of the school trust fund, interest at five per cent. being credited to the province for educational purposes. All the sales were conducted by the Department of the Interior.

EMPLOYMENT PLACEMENTS CONTINUE TO DECREASE

The Employment Service of the Department of Labor reports that returns from the Dominion and Provincial offices of the Employment Service of Canada for the week ended November 13, 1920, show a decrease in placements when compared with returns for the preceding week. The offices reported that they had made 7,736 references to regular positions and that 6,432 placements were effected. This represents a decrease of 415 when compared with the report for the preceding week, and a decrease of 903 when compared with the corresponding week of last year. In addition, 1,450 casual jobs were supplied as compared with 1,593 reported during week ending November 6.

During the week 9,629 applicants were registered, of whom 8,457 were men and 11,722 were women. This represents a decrease of 185 in registration when compared with report for the preceding week when 9,814 applications were reported. During the week employers notified the Service of 7,333 vacancies, of which 6,390 were for men and 943 for women. When compared with the 7,845 vacancies reported during the preceding week this is a decrease of 512. Of the placements in regular employment 5,768 were of men and 664 of women.

REPORT ON QUEBEC INSURANCE COMPANIES

Those Operating Under Provincial Charter Had Assets of $6,149,419 on December 31, 1919

THE report of the Quebec Insurance Department for 1919, just published, deals with the following companies:—Nine stock companies, transacting fire insurance, life insurance, accident and all casualty insurance, plate glass and pension fund insurance; three mutual and stock companies transacting fire insurance under both mutual and cash systems; two cash mutual companies transacting fire under both mutual and cash systems; one mutual company transacting pension fund insurance; one stock and mutual company from Ontario transacting fire insurance under the cash system in the province of Quebec; six strictly mutual companies transacting fire insurance under mutual system; four ecclesiastical mutual companies transacting fire insurance under the mutual system (without deposit notes), on Roman Catholic churches, convents, seminaries, etc.; seven funeral insurance companies transacting funeral insurance.

There is also included in the report seven statements of marine companies that are not licensed by Ottawa for some other classes of business. The report also contains statements of twenty-one municipal mutuals and 125 parish mutuals.

The nine stock companies transacting different classes of business have total assets of $2,999,913, and total liabilities of $925,145, exclusive of paid-up capital. Their receipts amount to $1,200,938, and their disbursements, including claims, amount to $740,561.

The total assets of all the provincial companies doing fire insurance in the province amount to $6,149,419, and liabilities, including paid-up capital, to $742,909.

An amount of $1,107,072 has been collected in the province by the above companies for premiums in 1919, and from other sources, $62,655. A total amount of $502,440 has been paid in claims and $409,369 in general expenditure. The insurance in force at the end of 1919 was $203,028,633 for the above companies.

FIRE UNDERWRITERS' SEMI-ANNUAL MEETING

The semi-annual meeting of the Canadian Fire Underwriters' Association was held in Ottawa, December 7 to 10, the usual business being conducted. Lyman Root, manager for Canada of the Sun Fire, presided. A meeting of the Western Canada Fire Underwriters' Association, of which W. P. Fess, of Winnipeg, is president, was also held.

KITCHENER TO VOTE ON UTILITIES COMMISSION

A by-law will be submitted to the electors of Kitchener, Ont., at the next municipal elections providing for the election of a public utilities commission to operate the light and power plants, the street railway, the waterworks, and also to take over the work of the board of works, the parks commission and the cemetery committee. It is proposed that two of the commissioners be elected by the people every two years, and two appointed by the city council, and that the mayor be a fifth ex-officio.

The Dominion Steel Corporation has purchased a long-term lease from Cox's Bank, Ltd., on premises in St. Martin's Lane, Trafalgar Square, London, Eng. The property, which has a frontage of 64 ft. and a depth of 140 ft., is most centrally situated in the commercial district of the English metropolis. The new offices will be used for the accommodation of the London advisory board of the corporation and the European sales organization of the Canadian enterprise.

THE FINANCING OF FOREIGN TRADE

LIMITATIONS to the ability of Canadian banks to extend the long-term credits which are required to assist manufacturers in extending foreign trade have been from time to time referred to in this country, and have aroused among bankers the question as to whether a foreign banking institution would be practicable; while the banking law of Canada is liberal, it aims at meeting domestic needs. Sir Vincent Meredith, at the annual meeting of the Bank of Montreal last week, said: "The necessity for financing foreign trade has come very closely home, and, pending an international working scheme, I feel it would be well for Canada to move locally. I am still of the opinion that a corporation to foster foreign trade so as to keep our factories busy and give employment to labor is desirable, and sooner or later must be launched. If export trade can be revived, it will solve many of our difficulties."

Our experience in the granting of long-term credits for foreign purchases has been practically limited to the credits granted to Roumania, Greece, Italy, France and Belgium to a total of $125,000,000. This was an affair between the governments on both sides. The short period since the arrangement was made shows, however, that even the credit of the present European governments is none too safe; a recent despatch from Ottawa stated that Roumania, instead of meeting the interest payment now overdue, wished to add the interest to the principal. The financing of foreign trade is in fact a field of enterprise which is dangerous to the unversed, and the present unsettled condition of industry makes it difficult to estimate the limit of safety with buyers, even with governments themselves.

The subject is therefore one to be approached with caution. Canadian banks are straining their resources to meet domestic requirements, and in the general stringency of credit there is little room for the appropriating of capital for new enterprises. Such a foreign banking corporation would require a large capital to start with, though the building up of a sound business would be a slow process. The operations of the business are complicated. As was pointed out by A. T. Drummond, writing in *The Monetary Times* of October 20, 1916, they comprise the establishing of offices in the large exporting cities of Canada and in buying centres abroad, specializing in sterling and foreign exchange; handling both long and short-term paper; the issuing of bonds and treasury votes; the acceptance of deposits for the convenience of customers; and the flotation of loans.

A SAVINGS SYSTEM FOR INDUSTRIAL WORKERS

TO have a "little money in the bank" may now be the new sensation to numerous persons, both native and foreign-born, who work for salaries or wages. By these are meant principally those who carry too much loose change in their pockets, or who never think that they have enough money to make a bank account worth while, or who have too much pride to make a small deposit; also that large class of people who have been spending their earnings without stopping to think of the needs of to-morrow, and that a dollar saved to-day will be worth a dollar and a half or two dollars in six months or a year from now.

The American Bankers Association, Savings Bank Division, calls attention to the above facts and refers to a recent report in which it summarizes the various plans now in operation for assisting employees to pay themselves a dividend on each pay day by systematically sending to the bank some part (however small) of every payment of wages. Employers and the representatives of employees can obtain that report upon application to the association at its New York office, or through any local bank.

The report outlines the scope of the present discussion of industrial savings work and includes a concise statement of the method of operating present systems which include (a) a branch bank at the place of employment; (b) sending a teller or agent of the bank to solicit accounts and deposits; (c) deduction by the paymaster of deposits which are forwarded to the bank, all other transactions being direct between the depositor and the bank; (d) the vending of stamps or certificates which will be honored at the bank as deposits or cash. Where desired, any systems may be so operated as to make the actual results known only to the depositor and to his banker.

Service rather than profit is the motive back of this new plan banking, which has already been thoroughly tested. While it results in bringing to the bank a few large deposits of money which may have been hidden in the proverbial (but inflammable) mattress, the most of the accounts are small and are handled without profit under the usual savings bank rules. The expense to the employer is moderate and is contributed without expense to the employee.

TAX SALES vs. TAX SUITS

TAX arrears, in so far as the possibility of collection is concerned, are in Canada limited to the value of the property against which they are accumulated. This is the effect of laws which prevent personal action being taken for the collection of taxes. In the rapid flight of realty values, chiefly in the west, municipalities raised assessments and at the same time allowed taxes to accumulate to such a degree that the slump found some properties worth no more than the charges against them. As a solution of this difficulty the Calgary finance committee suggests that municipalities be allowed to sue for taxes.

In Australia property owners are expected to meet their tax payments promptly, and if they fail to do so the matter is at once taken to court and judgment given against the owner, if the debt to the municipality can be clearly established and the owner is solvent. There is practically no such thing as a tax sale, because the taxpayers toe the mark all the time and naturally follow the tendency of not speculating or buying more than actual requirements unless they are sufficiently well fixed financially to carry the load for an indefinite period. This system is working well in Australia. and apparently there is no reason why it could not be applied in some way or other here; it is pointed out, however, by W. G. Cameron, reverted land commissioner for Victoria, that the introduction of the scheme here would create a lot of trouble and would give rise to legal difficulties.

As a preventative of speculation such a law would no doubt be effective; it would be equally effective in hampering legitimate growth which is inseparably bound up with speculation. Western cities and towns cannot redeem their laxity by legislation, but only by a vigorous policy of tax collections, the wiping-off of arrears in many cases, and the prevention of further accumulations. The possibilities of raising revenue from real property are limited by the value of such property. The most that even the single tax could do would be to absorb the whole of the rent. The property tax, as its name implies, entails no personal liability on the part of the owner.

INSURANCE ORGANIZATION IN CANADA

NEW organizations formed during the past two or three years have increased the number of associations of insurance companies and insurance men in Canada to about 25. This does not include local branches of large organizations such as the Life Underwriters' Association and the Blue Goose. Underwriting practice and rates, educational work, and propaganda are the main lines of activity of these organizations. They have been rapidly increasing in number during the past few years as a result of developments in the casualty lines, and through the formation of agents' associations in some of the provinces

That this complicated organization is unnecessary, and possibly a burden to the insurance business as a whole, is a *prima facie* impression. There is some justification for it in the complicated character of the business itself, and also in the sectional character of the Dominion, the conditions affecting the insurance business being quite different in the east, in central Canada, the prairie provinces and the coast. Even in the United Kingdom, where conditions are more uniform, the variety of insurance organizations is large.

In the insurance, as in other fields, there is, however, too much of a tendency to adopt *holus bolus* the practice of the United States, assuming that, since geographic and economic conditions are similar, it is good policy for the younger country to follow in the footsteps of the elder. In the international insurance field, however, Great Britain has easily taken the lead, and there is little ground for believing that the United States has pursued the soundest line of development. The latter country, since the day when a written constitution was drawn up embodying the ideals of the new republic, has been a firm believer in the verbal expression of abstract principles; and in the insurance as in other business fields, wherever two or three find themselves engaged at similar work, they must needs gather together, form an association, have an annual meeting and a banquet, regardless of the fact that most of their resolutions and speeches never accomplish any result. There is on the other hand something solid in the more clumsy British method of plodding along in an unsystematic way, for the Britisher hates to express himself in general terms, knowing well that practice can only approximate the principles so expressed.

Objections registered against the operations of the Alberta Public Utilities Commission at the municipal conference held in Calgary last week may be a proof of good work on the part of the Board.

The prediction of the Texas commissioner of agriculture that prices of raw materials will move upward is about as sound as the arguments advanced last spring by manufacturers and wholesale houses that next year's quotations could not fail to be higher.

Public opinion did not start the downward movement of prices, says Dr. T. S. Boggs, of the University of British Columbia. This is undoubtedly true, but it must be admitted that once the movement is started, public opinion, as expressed in refusal to buy, is doing much to accelerate it.

Belleville, Ont., is considering municipal fire insurance, financed by the collection of premiums along with taxes. What provision is planned for disasters such as those which wiped out large sections of Wadena, Sask., Brockville, Ont., and Carp, Ont., during the past six months?

The finance minister has borrowed $25,000,000 in New York at 7 per cent. for Canadian Northern Railway purposes, while Victory Loan 5½ per cent. bonds are being redeemed at par. Why were Canadian investors deprived of the right of purchase in the open market, a privilege which those in the United States enjoyed?

SUPER-EFFICIENCY

An American was with gushing enthusiasm describing his new car to an English visitor. "It runs so smoothly," he said, "you can't feel it. Not a bit of noise; you can't hear it. Perfect ignition; you can't smell it. And speed, why it simply whizzes; you can't see it."

"My word!" exclaimed the astonished Britisher. "How do you know the bally thing is there?"

Travellers' Cheques

Convenience, security and economy are secured by the use of Travellers' Cheques issued by this Bank. They enable the bearer to identify himself and are readily converted into the current coin of any foreign country.

PERSONAL NOTES

W. H. Fairchild has resigned as city engineer for Galt, Ont., to take up the position of manager of the public utilities commission.

J. J. Banfield, of the Norwich Union Insurance Society, has been elected president of the British Columbia Automobile Underwriters' Association in place of E. P. Withrow, who resigned.

J. C. Breithaupt, secretary of the Breithaupt Leather Co., of Kitchener, Ont., and chairman of the Kitchener water and light commission, has been elected vice-president of the Ontario Equitable Life and Accident Insurance Company. J. A. Martin, manager of the Dominion Tire Factory, also of Kitchener, has also been elected to the directorate of the Equitable.

R. C. Vaughan has been appointed vice-president, in charge of purchases, supplies and stores, of the Canadian National Railways and the Grand Trunk Pacific Railway, with office at Toronto. His jurisdiction will also extend over the affiliated and subsidiary companies of the railways. F. P. Brady, general manager of eastern lines at Montreal, is appointed assistant to the executive with office at Toronto. W. A. Kingsland, assistant general manager of eastern lines at Montreal, succeeds Mr. Brady as general manager of eastern lines with office at Montreal. L. S. Brown, general superintendent of the maritime district at Moncton, N.B., succeeds Mr. Kingsland as assistant general manager of eastern lines with office at Montreal. J. C. O'Donnell, superintendent at Winnipeg, succeeds Mr. Brown as general superintendent of the maritime district with office at Moncton, N.B. W. R. Devenish, superintendent of the Moncton Division at Moncton, N.B., is appointed general superintendent of the Ontario district with office at Toronto. A. C. Barker superintendent of telegraphs at Moncton, N.B., succeeds Mr. Devenish as superintendent of the Moncton division with office at Moncton. W. N. Rippey, superintendent of car service at Moncton, N.B., is appointed superintendent of transportation, maritime district, with office at Moncton.

David Nicholson Finnie, a prominent manufacturer of Winnipeg, has been elected to the directorate of the Union Bank of Canada. With Mr. Finnie's election, immediately following the selection of W. R. Allan, of Winnipeg, as vice-president and the election of G. M. Black, of Winnipeg, as a director, the bank's directorate is now complete. Mr. Finnie is an Ontarian, a native of Arnprior, Ont. He is a son of a former general manager of the Bank of Ottawa, and himself received his early business training in a banking institution.

John Galbraith Scott, K.C., Master of Titles, with offices at Albert and Chestnut Streets, Toronto, has announced his retirement from the office at the end of the year, and also the completion of fifty full years in the Ontario Civil Service. Mr. Scott has also announced that an order-in-council has been passed by the Ontario government appointing George W. Holmes of this city to the position, the change to take effect at the end of this month.

G. J. A. Reany, who has been manager of the Mutual Life Assurance Company in Edmonton, Alta., for some time, has been appointed to the position of superintendent of agencies for the company at Waterloo, succeeding Sydney C. Tweed, who has organized the Ontario Equitable Life and Accident Insurance Company. In 1913 Mr. Reany organized the Northern Saskatchewan branch of the Mutual Life of Saskatoon, and remained there until the spring of 1917, when he went to Edmonton in charge of the Mutual Life office there. He has also been an active worker in the Life Underwriters' Association.

F. J. Coombes, partner in the company of A. E. Ames and Company, investment bankers, Toronto, has just returned from a visit abroad. Mr. Coombes is of the opinion that all countries will have to pay higher rates for money than they have been paying. As to British sentiment on the Canadian embargo against sending securities back to Canada, Mr. Coombes said that those who have been active in the business had doubtless found it irksome, but he did not think it was an important factor in the London market, and that when it was withdrawn it would probably be regarded by British financiers as having been a necessary part of the Canadian financial program.

OBITUARIES

W. D. Woodruff, a prominent man in the paper industry of this country, died at St. Catharines, Ont., this week. He entered the employ of the Lincoln Paper Mills in 1881, and practically devoted his entire business life to that one industry. For several years he had been the vice-president and general manager of that company, which a quarter of a century ago inaugurated the wage bonus system for employees.

R. C. Jennings, a financial man of extensive service in the province of Ontario, died in Toronto recently. Mr. Jennings was born on May 1, 1843, and received his advanced education in Upper Canada College. He began his banking career with the now extinct Ontario Bank, in 1862, but later transferred his services to the Canadian Bank of Commerce, in connection with which he was manager successively in branches at Barrie, Paris and West Toronto, now ward seven of the city of Toronto. He retired on a pension in 1906, and devoted himself subsequently to private financial work. During that time he served as auditor of the York County Roads Commission, and also for the corporation of Weston.

THE STERLING BANK
OF CANADA

Believing that the Banker is the logical financial authority, we are ever ready to place our time and experience at the disposal of Sterling Bank clients—for discussions that will tend to the betterment and expansion of their business.

VANCOUVER ISLAND WOULD BE FREE

Claim Progress is Hampered by Dominion Relations—Aim at Development Similar to that of England

By Oscar C. Bass

Bass and Bullock-Webster, Barristers, Victoria, B.C.

IT would appear like imagining the impossible to speak of any part of Canada seceding from Confederation, but such seems to be the fact.

Out on the Pacific Coast is that wonderful portion of Canada known as Vancouver Island, a place famed for its glorious climate, especially in the southern portion, its great fertility, its immense natural resources and the general solid wealth of its people. Yet on Vancouver Island there is a strongly-growing dissatisfaction with Ottawa rule. The feeling has been evident ever since Confederation, but within the last ten or fifteen years it has grown in intensity, until now there is a well-defined movement, backed by a good proportion of public opinion, in the direction of separation and a return to the status of a Crown colony, with free ports, free trade, as in England, and the adoption of English laws generally.

It is felt that, geographically, commercially and politically, while the continental, or mainland, portion of British Columbia is a necessity to Confederation, yet Vancouver Island made a fatal mistake by entering into it.

Election Promises the Only Benefits

When the advocates of the change mention the matter to the average easterner, the latter is apt to ridicule the idea at first. The thought of secession from Canada strikes him as little short of political sacrilege, but the arguments put forward in its favor are very strong. The people out there complain, and with some show of reason, that they are ignored by Ottawa except at election time, when some promises are made, to be forgotten when the votes are counted. This, of course, is more or less the case in other parts of Canada, but the Vancouver Islanders, who contribute heavily in taxes and revenue in proportion to their population, consider that they are not fairly treated under a political system which, while they have to live under it, they do not approve of. They state that their natural wealth is boundless; their ocean ports are open the year round; their territory is the gateway to the broad Pacific, opening out to Russia, China, Japan, South America, Hawaiian Islands and Australia; they are hampered by Canadian tariffs, Canadian trade restrictions and Canadian laws; their demands for development are swamped by the greater political influence of other portions of Canada which are capable of enforcing their demands, and that, as a part of Canada, they are prevented from becoming the England of the Pacific, which, they believe, they would be if free of Canadian rule.

From the year 1856, and continuing for a decade later, Vancouver Island enjoyed representative institutions, but not responsible government, British Columbia having a governing body, set in motion later. Vancouver Islanders, well up in British Columbian history, will likewise recall that it was from British Columbia that the appeal for union with Vancouver Island came prior to Confederation.

Pays Tribute to Mainland

Particularly, with regard to the latter fact, it is suggested by the sponsors of the movement that the supporting reasons in the minds of the applicants for union more than half a century ago were prophetic of action that has fully justified the move for including Vancouver Island as an integral part of British Columbia. But the local stand to-day is based upon the belief that a time has come when Vancouver Island should call a halt on the passive acquiescence in a policy which permits the rest of the province to wax fat in benefits at her expense.

With Victoria a free port and Vancouver Island free to manage her own ship of state, it is claimed that she would be in a position to develop her vast resources and to raise her head to a position which was originally mapped out for her, but which prospects she virtually passed on to the mainland when she entered the union with British Columbia, and later with Canada.

It should also be borne in mind that one of the advantages of the consummation of the "separatist" movement would be direct representation at Whitehall and direct association with an accredited representative with the Colonial Office. Under present conditions the interests of Vancouver Island and British Columbia, as a whole, can only be looked after, through her agent-general, through the avenue of the Canadian High Commissioner's office.

Would be Blow to Dominion

It would be wise on the part of statesmen at Ottawa to take notice of this movement and ascertain if there is not some ground for it. The statesmen of Downing Street in olden times treated the complaints of the American colonists with a degree of studied contempt which led to disastrous consequences. The loss of Vancouver Island to Canada, territorially speaking, might not be so serious, but there is on the Island a class of people who are sturdy (if easy-going in appearance), intelligent, wealthy, and, when the time arrives, are as likely to be as aggressive in their movements as the American colonists of a century or more ago. Politically, of course, the blow to Canada would be serious, as it would be tantamount to proving that Confederation had been a failure.

On the whole, it would be well for Ottawa to take time to look at the west in a spirit of more than the ordinary interest evoked by the fact that Vancouver Island is merely a spot on the Pacific, three thousand miles from the seat of government.

The American colonies were only about that distance from Downing Street, but Downing Street lost them on account of a long period of indifference to and contempt for their requirements and representations. Vancouver Island is too valuable a portion of Canada to let drift away.

STREET RAILWAY FARES

A statement issued by Nesbitt, Thompson and Co., Montreal, makes the claim that over 80 per cent. of the people of the United States served by street railways are now paying higher fares. In Canada the highest street car fare is seven cents, or four tickets for 25 cents, with the exception of three municipal street car lines in Western Canada, which are charging a 10-cent fare. In the United States the higher fares are effective in the following number of cities: Six cents, 134 cities; seven cents, 211; eight cents, 68; nine cents, 4; ten cents, 110.

AGRICULTURAL INSURANCE CO.'S FIRST YEAR

Reports of the first year's operations of the Agricultural Insurance Co., Ltd., presented at the annual meeting held in Regina on December 10, show that the company had a very successful year's business. A cash dividend of eight per cent. was declared on the paid-up capital of the company and there is now $53,000 invested in securities within the province.

The meeting was presided over by George M. Bell. This is the first co-operative insurance company to be organized in the world. Every shareholder must be a farmer. The policy of the company is to invest all its money within the province. Business during the past year was carried on in both hail and fire insurance.

George M. Bell was re-elected president of the company for the ensuing year with Hon. Charles A. Dunning as vice-president. These two, with James Robinson, of the Co-operative Elevator Co., were appointed members of the executive. J. H. Mitchell was appointed secretary-treasurer. Three directors were elected for three years as follows: H. E. Meilicke, of Saskatoon; W. J. Orchard, of Tregarva; and E. J. Laxdale, of Dafoe.

BANK BRANCH NOTES

Five New Branches Announced This Week—Sterling Bank Has Opened Fifteen in Past Year

The following is a list of branches of Canadian banks which have been opened recently:—

Bridgetown, Barbados	Canadian Bank of Commerce
Calle Callao, Buenos Aires	Royal Bank of Canada
Halifax (Willow Tree)	Bank of Montreal
Montreal (McGill St.)	Bank of Hamilton
Cloverdale, B.C.	Royal Bank of Canada

The Molsons Bank has erected a new office building at the northeast corner of Flora and Talbot Streets, St. Thomas, Ont.

With the intention of erecting a bank and office building, the Dominion Bank has purchased about 100 ft. of property fronting on the south side of King St. at Wentworth St., Hamilton.

The Royal Bank of Canada has purchased the I.O.O.F. block on Delta St., Ladner, B.C., and will remodel the interior.

Sterling Bank Appointments

The Sterling Bank announces the following:—

A. W. Dorland has been appointed acting manager at Jordan Station, Ont.; H. Morden has been appointed acting manager at Richmond Hill, Ont., and E. L. Brown, who was temporarily in charge, has been transferred to Parkdale as accountant. W. A. Hay has been appointed acting manager of Stevensville, Ont., branch; C. O. Monroe, who was manager at that point, has been transferred to Watford, Ont., as manager; E. A. Hanley, who was for some time at head office, has now been appointed acting manager at Auburn, Ont., branch. S. V. Steele, formerly teller at Fort Erie, Ont., has been transferred to Uxbridge, Ont., branch in the capacity of accountant; M. C. Buchanan, formerly teller at Sudbury, has been promoted to the position of accountant to replace L. G. Fox, who has been transferred to head office.

Philip Dumoulin, who has been manager of the Bank of Montreal, at Kelowna, B.C., has been transferred to Kingston, Ont.

Bank of Montreal Changes

The Bank of Montreal announces the following appointments: J. Brydges, acting manager at Abbotsford, B.C., appointed manager at that branch; R. N. Bell, acting manager at Belmont, Man., appointed manager at that branch; R. G. Ross, acting manager at Bloomfield, Ont., appointed manager at that branch; F. J. Daniels, acting manager at Esquimalt, B.C., appointed manager at that branch; E. M. E. Parsons, acting manager at Ferryland, Nfld., appointed manager at that branch; W. T. Sprague, acting manager at Kingsville, Ont., appointed manager at that branch; F. N. Smith, acting manager at Magog, Que., appointed manager at that branch; L. F. Gibsone, acting manager at Papineau Ave., Montreal, appointed manager at that branch; H. M. Morrison, appointed acting manager at 21 St. Catherine St. E., Montreal; C. J. E. L. Benedict, appointed manager at Windsor St., Montreal; H. P. Emerson, acting manager at St. George's, Nfld., appointed manager at that branch; J. C. D. Rochette, acting manager at St. Sauveur, Que., appointed manager at that branch; G. E. Morin, acting manager at Danforth and Carlaw Avenues, Toronto, appointed manager at that branch; C. Inglis, acting manager at Stock Yards, Toronto, appointed manager at that branch; F. A. Macrae, acting manager at Granville and Nelson Streets, Vancouver, appointed manager at that branch; E. Stonham, acting manager at Douglas St., Victoria, appointed manager at that branch.

Three charges against J. S. Bancroft, assistant manager of the Granville St., Vancouver, branch of the Merchants Bank, involving alleged shortages of nearly $50,000, were heard in police court on December 10. After hearing evidence in three separate charges against Bancroft, Magistrate Shaw announced he would suspend formal committal. The charges against Bancroft include the theft of $45,000 of Victory bonds, falsifying the ledger of the bank to the extent of $15,432, and conspiracy jointly with Phil. M. Gevurtz, of the Gevurtz Lumber Co., making alleged entries for the purpose of bolstering up the credit of Gevurtz and his company.

Since November, 1919, the Sterling Bank has opened the following fifteen branches, the managers being as indicated: Barrie, W. A. Sawtell; Aurora, A. M. Kirkwood; Craighurst, T. E. Brett; Golden Lake, R. C. Cameron; Lakefield, R. W. Douglas; Lansing, W. A. Young (acting); Minesing, W. L. Bishop; Newtonbrook, J. B. Thompson (acting); Norwood, J. H. Hartle; Phelpston, W. E. C. Jones; Queensville, H. S. Ivey; Richmond Hill, H. Morden; St. Williams, R. E. Nevison; Varna, W. T. Maize (acting); Wilno, G. C. Garvin (acting).

EXCHANGE QUOTATIONS

Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates as follows:—

	Buyers.	Sellers.	Counter.
N.Y. funds	17 pm	17¼ pm	....
Mont. funds	5c. dis.	Par.	⅛ to ¼
Sterling—			
Demand	$4.0750	$4.0850	....
Cable transfers	4.0850	4.0950	....

Bank of England rate, 7 per cent.

New York quotations of exchange on European countries, as supplied by the National City Co., Ltd., Toronto, as at December 16, 1920, are as follows: London, cable, 349¾; cheque, 349; Paris, cable, 5.93; cheque, 5.92; Italy, cable, 3.50; cheque, 3.49; Belgium, cheque, 6.21; Swiss, cheque, 15.35; Spain, cheque, 13.05; Holland, cheque, 31¼; Denmark, cheque, 15.10; Norway, cheque, 14.85; Sweden, cheque, 19.65; Berlin, cheque, 1.35; Greece, cheque, 16.00; Finland, cheque, 7.45; Roumania, cheque, 2.40; Poland, cheque, 1.32.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended December 16, 1920, compared with the corresponding week last year:—

	Week ended Dec. 16, '20.	Week ended Dec. 18, '19.		Changes

and that the same will be payable on and after Monday, the 3rd day of January, 1921.

The Transfer Books of the Corporation will be closed from Wednesday, the 15th day of December, until Friday the 31st day of December, 1920, both days inclusive.

By Order of the Board of Directors,

A. D. LANGMUIR
General Manager.

Toronto, November 23rd, 1920.

Financing of Exports

Four Well Known Methods of Payment, But Attaching Draft to Shipping Documents is Most Common—Trade and Bank Acceptances—How to Ascertain Credit of a Customer, and How Protection is Possible in Doubtful Cases

By C. R. HILL,
Managing Director, Hill and Co., Ltd., Toronto

(This is the sixth of a series of articles on Practical Exporting, the first of which was published in The Monetary Times of November 12, 1920.)

SEVENTY-FIVE per cent. of the world's foreign commerce is financed by means of either bank or trade acceptances. In Great Britain and in many countries of continental Europe practically every domestic and foreign commercial transaction is financed by means of a time draft, known as a bill of exchange. The draft is drawn by the seller of the mechandise and presented to the buyer, who, if he finds it satisfactory, writes across its face the word "Accepted," signs his name and returns the draft to the seller. It then becomes a trade acceptance—a sound, circulating medium of finance, which commands a low rate of interest and which the seller, if he desires, may discount at his bank. A trade acceptance is an obligation of the buyer, endorsed by the seller, and the bank discounting it is secured by two names instead of one, as in the case of a promissory note.

A bank acceptance is a bill of exchange, of which the acceptor is a bank or trust company, or a firm, person, company or corporation engaged in the business of granting bankers' acceptance credits.

It has, therefore, come about that practically all export business is financed through drafts attached to shipping documents.

Four Methods of Payment

To speak broadly, there are four methods of paying for goods purchased abroad:—

1. The purchaser remits with the order. This needs no explanation—the manufacturer, at any rate, can see the advantages of that mode of procedure. But it can be readily understood that, unless a dealer has a very large amount of surplus cash, he cannot make remittances with his order for goods which will not arrive until at least five months afterwards, and a part of which, at any rate, may remain in his store for a year.

2. The purchaser opens a bank credit in favor of the manufacturer. Here also there are drawbacks, from the purchaser's point of view. In the first place, he, like the manufacturer, needs all his local credit to keep his store fully stocked. Apart from that, in addition to the interest charges from the date the bank pays for the goods until he pays for them, the bank charges a commission for opening the credit.

3. The manufacturer ships the goods on open account and awaits remittance from the purchaser. Here all the brunt of financing the business falls on the manufacturer, and this method does not appeal to him any more than remitting with the order appeals to the dealer in South America.

4. The manufacturer draws a draft on the purchaser. This method is the most popular, because, by means of a draft, neither purchaser nor manufacturer (provided they be of good standing) need wait for his money, but by combining their signatures they can jointly obtain the additional credit that they are both in need of The *modus operandi* is as follows:—

Drawing a Draft

The manufacturer draws a draft, payable to his own order, on his customer, and attaches thereto the full set of bills of lading, marine insurance policy, invoices and consular invoices (where such are required), the insurance policy, invoices and consular invoices being made out in duplicate. The draft also should be drawn in duplicate, so that two complete sets can be made up and despatched by different steamers, thus preventing possible loss in the mails. This documentary draft, on being endorsed by the manufacturer, who thereby guarantees its payment, can be sold or discounted in Canadian banks at a rate of discount very little higher, if at all, than the banks charge for discounting commercial paper signed by firms doing business solely in this country. The draft is probably drawn at ninety days' sight, that is, payable in ninety days after it has been accepted by the customer, who, by writing his signature and the date across the face, agrees to pay it on those conditions, the banker having agreed to deliver the shipping documents to the customer against his acceptance of the draft. It is plain now how the credit has been obtained. The foreign banker is secured, pending the acceptance of the draft, by having possession of the goods (represented by the bills of lading) and the manufacturer's signature. When the draft is accepted he received an additional signature in exchange for the goods.

When a shipper is to draw on consignee for value, with documents, he should consign the goods on both the bills of lading and the consular invoices (when such are required) to "order," and, having endorsed the full set of both documents "in blank," they should be presented with his draft (arranged in duplicate) and certificate of insurance to the banker through whom collection is to be made.

The banker through whom a draft is to be collected should always be instructed under what conditions the documents are to be surrendered—that is, whether they are to be delivered upon "acceptance of draft" or only after "payment of draft." Unless instructed to the contrary, unpaid or unaccepted drafts will not be "protested."

Canadian Banks Have Foreign Connections

Despite the lack of Canadian banks abroad, it is not so difficult to arrange foreign credits as many manufacturers suppose. The agencies of foreign banks in Canada are in a position to collect money against consignments in most countries of the world. The endorsement of the bank with which a Canadian manufacturer does business will enable the latter to obtain practically the same accommodation from these foreign bank agencies as is granted to the manufacturers in Europe. Until more Canadian banks are established abroad it will be necessary to transact the business through their foreign connections, and it would be to the advantage of the Canadian manufacturer to become better acquainted with the facilities that now exist.

The merits and methods of drawing on buyers with shipping documents attached has been dealt with generally, but the point of the credit justification is very important.

Care About Credit

Assuming that a Canadian manufacturer has decided on an export policy, he subsequently finds customers whose standing in the commerical and financial world is unknown to him, and the question as to whether he will fill their orders is largely a matter of certainty in settlement. Unless each order is accompanied by an irrevocable letter of credit, carrying a banker's acceptance of his draft, he will be wise to obtain credit reports before shipping. The proper interpretation of common phrases used in credit reports on for-

Safety and Profit

are all-important considerations in the selection of a depository for
a business reserve,
a sinking fund,
a personal account.

The UNION TRUST COMPANY'S resources and its conservative management establish the element of safety;

Its method of adding 4% interest regularly to the account, gives a maximum return on the sums involved.

All accounts are subject to cheque

Enquiries solicited in connection with either Export or Import business

EXPORT ORDERS

The Canadian Manufacturer to-day does not doubt the necessity for Export business. To take up the problem seriously, he needs:—

First—An Export Department.

Second—A Foreign Sales Organization.

Each have distinct functions.

We can provide him with either or both.

Particulars will be furnished by letter or by a personal visit from one of our representatives.

HILL & COMPANY (EXPORTS AND IMPORTS) LTD.

74 YONGE STREET ARCADE - - - - TORONTO, CANADA

(Established in all the principal trading countries of the world).

eign individuals or firms is often a difficult matter for Canadians who are just beginning to market their products abroad. Correspondent bankers of Canadian financial institutions frequently sum up their opinion as to the financial standing and moral responsibility of a firm in their territory by a single sentence. Such brevity is somewhat disconcerting at first, in view of the great amount of detail to which one is accustomed in Canada.

In order to help exporters who have found themselves in this predicament, there are given below various phrases used by British banks and their branches throughout the world, together with the significations usually attached to each phrase in banking circles:—

"A1."—Highest class standing. Their drafts would discount at the most favorable rates.

"Undoubted."—Not quite up to "A1" standard, but undoubted for their engagements.

"Highly respectable—good for their engagements."—Good class firms, who would not undertake business beyond their means.

"Keep satisfactory account."—A term often used by bankers, which leaves the amount of credit to be settled by the inquirer.. Usually small firms of respectable repute.

Suit Method to Firm's Credit

Assuming that the manufacturer and his banker are aware that the buyer is rated in the highest class standing, it would be an insult to the buyer to intimate that his signed order would not be filled unless a letter of credit was established to cover it. However, the wealthiest of buyers are accustomed to purchasing on basis of trade acceptances and having shippers protect themselves by consigning goods to order, endorsed in blank, and bills of lading attached to drafts. Such bills of exchange with high-class buyers are as negotiable as if letters of credit had been established with the order.

In the case of orders from new customers whose foreign credit rating cannot be established to the satisfaction of the manufacturer, it is advisable to request the establishment of a letter of credit and ship in accordance with the terms of it.

Forms of Letters of Credit

Letters of credit are almost as unlimited in their variety as there are banks to issue them. No set standard or general form has yet been adopted, but they are divided into two general classes, viz., Revocable and Irrevocable. In the first class the buyer has the opportunity of changing his mind and cancelling the order, which might prove extremely embarrassing to the manufacturer and banker, particularly after goods are shipped and draft discounted. In most cases the Canadian banks will not negotiate a bill of exchange against a revocable letter of credit, and are justified in their stand. An irrevocable letter of credit, whether established by cable or mail, is a document which is issued by the buyer's bank, and authorizes their branch in Canada (if they have one) or a Canadian bank to accept the draft of a specified Canadian firm on receipt of invoices and shipping documents covering a specified shipment, and stating that such authority holds good until a specified date. With this authority in its possession, the Canadian bank is in a position to have draft made on it instead of the buyer, on receipt of which they write their acceptance of it across the face, making a document as negetiable as Bank of England notes. Such a system of bankers' acceptances releases the manufacturer from further liability in the matter.

There is no cleaner business in the world than shipping against letters of credit, but a continual demand for them will restrict Canadian export business very seriously, owing to the fact that American, British and continental shippers are willing to take a chance without them. As a result, foreign buyers are not going to tie up their credits with their bankers when they do not have to.

There is another feature in financing export shipments that should be mentioned. The principle of consigning goods to order and endorsing the ocean bills of lading in blank has the legal effect of making the possessor of the bills of lading the potential owner of the goods. Therefore, the Canadian bankers and foreign associate banks handling the draft hold possession until the buyer "accepts" the draft. In cases where the banks have actually provided the funds for purchase and transportation, they often protect themselves by demanding a letter of hypothecation from the shipper, which provides authority for the bank to take all necessary steps to protect the interests of shipper and bank, even to the extent of sale at any price, in the event of draft not being accepted.

UNION OF MANITOBA MUNICIPALITIES

Hail Insurance and Local Assessments Discussed—John Haddow, of Rosser, Elected President

TWO hundred and fifty delegates attended the annual meeting of the Union of Manitoba Municipalities held in Brandon, November 30, December 1 and 2. The president, J. A Marion, of St. Boniface, recalled that it was in Brandon that the union had originated 17 years ago. Among the legislation which it had been influential in securing was the following: Inclusion of machinery as part of good roads cost; power to pass special by-laws and taxes for destruction of grasshoppers and locusts; and amendments providing for licensing of commercial travellers.

Robert Forke, secretary-treasurer, said the membership was satisfactory, though there were still a few outside, and the small number of resolutions presented indicated that the municipal legislation was considered fair.

Hail Insurance

R. Hingley described the work of the Municipal Hail Insurance Association, and C. Ivens, of Wallace, gave a resume of the Hail Insurance Act that will be voted on by Manitoba municipalities shortly. It is necessary, he pointed out, that 35 municipalities vote in favor of the act to make it operative.

The election of officers resulted as follows: President, John Haddow, reeve of Rosser municipality; vice-president, reeve of Couling of Oak Lake; secretary-treasurer, Robert Forke. The executive is as follows: Lt.-Col. C. E. Ivens, Reeve W. C. Wroth, R. D. Willis, D. D. McDonald, Ald. J A. Marion, A. R. Henderson and J. Mitchell. Next year's meeting will be in Portage la Prairie.

The resolutions passed at the convention asked chiefly for legislative amendments, such as changes in the Assessment Act, assessments not to be made in towns and villages until March 1, for disposition of taxes on grain elevators on government property, and for governmental assistance to charitable institutions.

E. A. Weir, administrator of the provincial savings banks, addressed the convention, explaining the system employed in the institution and its purpose. Money deposited is used, he said, to finance the rural credit societies through the consolidated revenue fund, the farm loans association, school districts and rural municipalities. "At the present time we have not enough money to purchase municipal bonds, but we will be prepared to buy up some school district debentures," Mr. Weir said.

In the Winnipeg branches a checking system is used, the whole transaction being similar to a regularly conducted bank. Agencies are or will be established in Brandon, Dauphin, Neepawa, Portage la Prairie, Stonewall and Carman. Interest at 4 per cent. is allowed and the government guarantees all deposits. They are endeavoring, he said, "to conduct the institution as economically as possible for the province." Mr. Weir believes that the farmers will support the bank, which is necessary "if the institution is to be made to go." At present they are "operating on a very narrow margin. We want to make this office carry itself. We do not want it subsidized by outside contributions, and we will be prepared to pay a higher interest rate when we are fully established," said the speaker.

By order of the Board.
JOHN R. LITTLE,
Managing Director.

WHOLESALE PRICES CONTINUE DOWNWARD MOVEMENT

September Index Number Lower—Recoveries in Some Articles

THE movement of prices was again downward in September, 1920. Many of the important changes were seasonal and due to large crops and better supplies on the market, but the tendency to lower levels for raw materials and for some manufactured goods was still evident. In some cases there was a slight recovery in the prices of raw materials, indicating that for such articles the usual fluctuations might now be expected, rather than the steadily rising and falling markets which had characterized the movement since 1914.

In wholesale prices the index number was lower at 326.6 for the month, as compared with 330.2 for August, 346.8 for July, 349.3 for June, 356.6 for May, 301.5 for September, 1919; 141.3 for September, 1914; 134.4 for September, 1913. The chief decreases were in grains, foods, textiles, hides, leather and lumber, with the chief increases in dairy products and fruits.

The following table, as prepared by the Department of Labor, gives the details:—

(DEPARTMENT OF LABOUR FIGURES)	No. of Commodities	Index Numbers *Sept. 1920	*Aug. 1920	*Sept. 1919	Sept. 1914

BUILDING PERMITS INCREASE IN OCTOBER

But Show Decrease as Compared With a Year Ago—Montreal and Winnipeg Report Declines

THE value of building permits issued in fifty-six cities showed an increase during October as compared with the preceding month, the total value of building permits rising from $8,921,374 in September to $9,660,538 in October, an increase of $739,164 or 8.3 per cent. Nova Scotia, New Brunswick, Ontario, Saskatchewan and Alberta registered increases in this comparison, that of $1,755,977 in Ontario being the most pronounced. Of the reductions recorded in the remaining provinces, that of $1,418,954 in Quebec was the largest.

The following are the details as prepared by the Department of Labor:—

DEPARTMENT OF LABOUR FIGURES CITY	September 1920 $	October, 1920 $	October, 1919 $

DEFICIT FOR DOMINION IN NOVEMBER

Expenditure Increased by Interest Payments on War Loans —A Surplus for Eight Months

NOTWITHSTANDING a handsome increase in revenue, the Dominion government had a deficit in November. The reason for this was the payment of interest on war loans, which brought ordinary expenditure up to nearly $58,000,000 for the month, as compared with less than $28,000,000 for the previous month. The showing for the eight months, however, has a very healthy appearance, there being a surplus of about $58,000,000. Expenditure on capital account is more than $224,000,000 below the figure of last year. The net debt increased nearly $25,000,000 last month, as against $40,000,000 last year and a decrease of $2,634,356 in the previous month.

The above statement represents only the receipts and payments which have passed through the Books of the Finance Department up to the last day of the month.

The gross debt of the Dominion of Canada at the end of November was $3,042,587,983, compared with $3,045,508,861 at the end of October, according to the monthly statement just issued by the finance department. The net debt was $2,298,784,803, compared with $2,273,881,806, an increase of $24,902,997. Last year the increase in the net debt during November was $39,644,657.

The funded debt payable in Canada is shown as $2,070,899,668, as compared with $2,062,919,864 at the end of the previous month. A comparison of last month's report with former statements this year also shows slight differences.

In a statement to *The Monetary Times* the finance department gave the following details regarding this increase:—

	Increase.	Decrease.
5% debenture stock, 1919	....	$ 2,000.00
5% debenture stock, 1922	$1,017,000	....
War savings loan	....	556,351.20
Dominion of Canada savings certificates	....	30,349.25
War savings and thrift stamps	......	42,094.82
Victory loan, 1918	....	100,000.00
Victory loan, 1919	7,693,600	....
Net increase, $7,979,804.73	$8,710,600	$730,795.27

The increase of $1,017,000 in 5 per cent. debenture stock due 1922, is due to an issue of this stock on account of School Lands Fund of the provinces of Alberta, Saskatchewan and Manitoba.

The increase of $7,693,600 in Victory loan, 1919, is due to an adjustment from Victory loan, 1919, suspense account made during the month. At the close of the fiscal year all subscriptions to this loan, which were not fully paid up, were transferred to this suspense account. These included several large special subscriptions on which most of the payments were completed on October 31.

Regarding the decreases, these are due to redemptions. Prior to November, the funded debt payable in Canada had shown monthly declines, which are accounted for in the redemption of three-year war savings certificates issued during 1917 and war savings and thrift stamps.

The revenue for the month was $39,517,313, and the expenditure $57,957,995. Included in the latter was $34,964,102 of interest on public debt.

NORTHERN LIFE REVISES FIELD METHODS

In connection with its field work, the Northern Life Insurance Company announces that it has arranged a contract for full-time agents that pays a lower first commission and three comparatively higher deferred commissions with a renewal commission as well. In addition to this it has adopted a pension scheme at the end of twenty years, and has included a bonus scheme in conjunction with the pension.

The field organization has been changed so that there will be twenty main offices, each one with a complete equipment for the service of policyholders, being a duplicate throughout of the head office records with regard to every policy in the given area. These areas are under the charge of capable and experienced men who have a successful history behind them, and the whole authority for the development of men, either as district managers or whole-time agents, and the whole service to policyholders is in the hands of the agency managers. All superintendents and inspectors which are in the nature of a superstructure between the field and direct head office contact have been eliminated. Starting with January 1, this company will not have on its books any contracts with men who are not holding our regular standard full-time contract, and it has adopted methods that include a probational period of ninety days for proving up and instructing part-time men who are desirous of undertaking the life insurance business. From January 1 on it will charge a fee of $10 for a contract with the company and for the service and instruction.

DIVIDENDS AND NOTICES

International Petroleum Company, Limited

NOTICE OF DIVIDEND No. 1

Notice is hereby given that a dividend of 25 cents United States Currency per share has been declared by the Directors of the International Petroleum Company, Limited, and that the same will be payable on or after the 3rd day of January, 1921, in respect of the shares specified in any Bearer Share Warrants of the Company upon presentation and delivery of coupons No. 1 attached to the said Bearer Share Warrants at the following Banks:—

The Royal Bank of Canada, 60 Church Street, Toronto, Canada.

The Farmers' Loan and Trust Co., 16-22 William Street, New York, N.Y.

The Farmers' Loan and Trust Co., Limited, 26 Old Broad Street, London, England, or

The Offices of the International Petroleum Co., Ltd., 56 Church Street, Toronto, Canada.

The payment to shareholders of record whose shares are fully paid up at the close of business on the 31st day of December, 1920, and whose shares are represented by Registered Certificates will be made by cheque, mailed from the offices of the Company on the 31st day of December, 1920.

By Order of the Board.

J. R. CLARKE,
Secretary.

56 Church Street, Toronto, Canada.
1st December, 1920. 300

DIVIDEND NOTICE

Notice is hereby given that Dividends have been declared by **Provincial Paper Mills, Limited,** as follows:—

Regular Quarterly Dividend 1¾% on Preferred Stock.
Regular Quarterly Dividend 1½% on Common Stock.
Special Dividend 1% on Common Stock.

All payable on January 1st, 1921, to Shareholders of record at close of business December 15th, 1920.

(Signed) S. F. DUNCAN,
309 Secretary.

THE BANK OF TORONTO

ANNUAL MEETING

The Annual General Meeting of Shareholders of this Bank will be held at the Banking House of the Institution, corner of King and Bay Streets, Toronto, on Wednesday, the twelfth day of January next, the chair to be taken at noon.

THOS. F. HOW,
General Manager.

The Bank of Toronto,
Toronto, November 20th, 1920. 323

The Royal Bank of Canada

ANNUAL MEETING

The Annual General Meeting of the Shareholders of the Bank will be held at the Head Office, 147 St. James Street, in the City of Montreal, on Thursday, the 13th day of January, 1921, at 11 o'clock a.m.

C. E. NEILL,
General Manager.

Montreal, December 1, 1920. 297

Tenders for Capital Stock

OF

The Consumers' Gas Co. of Toronto

Sealed Tenders, addressed to The Consumers' Gas Company of Toronto, 19 Toronto Street, Toronto, Ont., and marked "Tender for Capital Stock," will be received by The Consumers' Gas Company of Toronto until 12 o'clock noon of the 5th day of January, 1921, for the purchase of twelve thousand seven hundred and eighty-six (12,786) shares of the unissued capital stock of the said Company (each share having a par value of $50.00), subject to certain conditions and terms of sale, the particulars of which, together with the form of tender to be used, may be had on application at the office of the Company at the above address.

Dated at Toronto, this 10th day of December, 1920.

By order of the Board of Directors.

ARTHUR HEWITT,
General Manager. 321

DOMINION TEXTILE COMPANY, LIMITED

Continuous Economical Service

IMPERIAL Lubricants have honestly earned their reputation for high uniform quality and dependable service through years of use in Canada's foremost industries.

Through perfect lubrication of all machinery parts, Imperial Lubricants reduce friction and increase power. Greater production, minimum depreciation and real savings in fuel and oil result.

Plant operation is made more profitable by the standardized use of Imperial Lubricants. Each grade performs a definite lubrication function. Ample supplies—all grades—are always conveniently available. Prominent manufacturers use and recommend Imperial Lubricants.

Thirty Years of Satisfaction

We have used Imperial Lubricants continuously for 30 years or more and have found them uniformly satisfactory.

—Christie Brown Co. Limited.

Cuts Lubricating Costs 20%

We find your lubricants of high standard and uniform quality. We have standardized on Imperial Solar Red Oil for general use throughout our mills. It has cut our lubricating costs approximately 20%.

—Provincial Paper Mills Limited.

Reciprocity's Effects Would Now be Different

Great Change in Canada-United States Trade Relations Alters Situation, says United States Tariff Committee—Our Imports Now $126,000,000—In 1911 They Were $33,500,000 — Political Factors Also Changed

RECENT tariff concessions made by Canada in favor of the West Indies, and the movement for preferential treatment for Imperial trade have revived the inquiry in the United States as to what further reciprocal agreement that country can secure with Canada. The proposed revision of the Canadian tariff is considered as making the present time opportune, especially as some revisions in the United States tariff are also expected shortly. Notice is also being taken of the demands of the Liberal and Farmer-Labor parties for a renewal of reciprocity with the United States. Meanwhile, the United States' offer of reciprocity to Canada still stands upon the statute books, although a bill for its repeal passed the House of Representatives last year.

The United States Tariff Commission has just completed a careful study of the effect on commerce that the measure would have had if it had been accepted by Canada in 1911. At the same time the vast changes in trade which have taken place since that year are pointed out.

The commission outlines at some length the political situation in the United States and Canada at the time of the passage of the act by congress and notes what appears to be the present feeling towards reciprocity in the Dominion. In the Uinted States reciprocity was in accord with a movement against high duties which was felt in both parties. The Republicans who were opposed to the tariff of 1909 might have been expected to follow President Taft in his support of the measure. These so-called "insurgents" came, however, largely from agricultural constituencies, and because the chief duties removed were on agricultural products, many of them voted against the bill as a discrimination against the farmer. Both the "insurgent" and the "regular" Republicans showed a majority against the bill; but sufficient Democratic votes were cast for it to effect its passage. Reasons for the defeat of the measure in Canada, in addition to the opposition of the interests directly affected, were numerous. Among them were resentment arising from the earlier attitude of the United States towards reciprocity, the strength of the idea of imperial unity and the fear, however ill-founded, that the agreement was prompted by political motives, and would lead to an ever-growing dependence of Canada on the United States. Present Canadian support of reciprocity comes from the Liberal party, which was defeated on this issue in 1911, and the Farmer-Labor party, which has shown political strength in the Dominion during the past year.

Probable Effects of Reciprocity

The report contains an extended statistical study of the effect which the agreement would had, if adopted (1) at the time it was drawn up, and (2) at present. . . . At the first date the value of imports into the United States from Canada which would have been put on the free list or reduced in duty was $43,000,000; of these in the opposite direction, $33,590,000. The proportion of trade affected would have been, however, very different for the two countries. Of imports into the United States from Canada, 45 per cent. would have been changed, ⅚ of these going on the free list, the remaining sixth being reduced in duty; of imports into Canada from the United States, 15 per cent. would have been changed, 1/3 of these being made free, 2/3 reduced in duty. In the second comparison, trade figures for 1918 are used as indicative of the present situation. The changes which the adoption of the treaty would make under the rates now in force in each of the countries differ from those just given, most markedly so in the case of imports into the United States. For Canada, the rates taken are those in force since May 19, 1920, not considering the excise taxes laid by the Dominion parliament and enforceable from that date, falling upon imported goods as well as those made in the Dominion. In 1918 imports into the United States from Canada which would have been affected amounted to $31,000,000; those in the opposite direction, to $126,000,000. The proportion of trade affected is not so markedly different as before; of imports into the United States from Canada, 7.2 per cent. would have been affected, 23/24 of these being made free, the remaining twenty-fourth reduced in duty; of imports into Canada from the United States, 16 per cent. would be affected, 1/4 of these going on the free list, the remaining ¾ being reduced in duty. . . . The United States, the commission concludes, would to-day be granting less of a concession to Canada through the adoption of the agreement now than at the time proposed, Canada a somewhat greater one.

The reason for the differences pointed out between the effect of the agreement to-day and when proposed have been due, to a great extent, to the fact that the tariff of the United States has undergone a thorough revision, while the same tariff is in force in Canada as at the earlier date. Many changes, it is true, have been made, but these are slight as compared with the differences between the tariff acts of 1909 and 1913. A second cause for the difference lies in the large increase in the value of the trade between the two countries since the outbreak of the war in Europe, an increase largely attributable to the rise in prices, although to some extent due to an increase in the commodities exchanged by the two countries.

Articles Specially Affected

The articles which would be especially affected by the present adoption of the proposed rates are flaxseed, oats, hay and barley. The last of these is not of great importance. The bulk of the imports of hay into the United States from Canada go to the northeastern sections of the country, since the transportation costs for such a bulky commodity are high. As to oats, it may be noted that a portion of Canada's production is of fine grade, suitable especially for the manufacture of rolled oats. Although she produces only ⅓ as much as the United States, her annual exports are greater. With the present duty of 6c. per bushel, which is more than the pre-war freights from Montreal to England, the bulk of the exports go to Great Britain, except in years of crop shortage in the United States. The removal of the duty, as contemplated in the reciprocity agreement, would, the commission concludes, result in increased imports and in increased returns to the Canadian farmers, although not greatly affecting general oat prices in the United States.

Flaxseed, which, from the point of view of the value of the imports into the United States, is the most important of those articles now dutiable to be made free by the reciprocity agreement, presents unique features. It is essentially a frontier crop, the cultivation of which is now being extended rapidly in the prairie provinces of the Dominion. It is not profitable when raised continuously on the same ground, is not a "weed fighter," and for these and other reasons is not a popular crop with the farmer. The present United States duty is 20 cents per pound, equivalent to 6½ per cent. ad valorem on the 1918 imports. With this duty, one-half of the United States requirements are imported. Canada's surplus has not been sufficient to meet the growing American shortage, and Argentina has become the chief source of foreign supply. The most marked effect which would result from the removal of the duty, the commission concludes, would be an increase in the prices the Canadian grower would receive for his flaxseed rather than a reduction in the American price.

ACTION ON AUTOMOBILE INSURANCE POLICY

Insurance Company Not Liable Where Motor Car Fell Into Water from Ferry at Wharf

In an action upon a policy of automobile insurance issued by the British Empire Underwriters Agency, insuring one Wampler against loss in respect of an automobile, Justice Orde, of the Ontario Supreme Court, held that damage to Wampler's car while being unloaded from a ferry boat, caused by the boat backing away and allowing the car to drop into the water, was not covered by the policy, the loss not having been caused by the stranding, sinking or collision or burning of the ferry boat.

The facts of the case and decision of his lordship are as follows: "The action is brought to recover the loss sustained by the plaintiff in respect of a motor car upon which he was insured by the defendants. The car at the time of the accident was in charge of a son-in-law of the plaintiff. He and his wife were crossing with the car from the mainland to Walpole Island upon a ferry which was operated by means of a chain. When the ferry reached the island he was told it was all right to go ahead, and he proceeded to drive the car off the ferry on to the land. While he was doing so, after the front wheels had reached the land, the ferry began to move away, with the result that the car dropped into the water.

"The car was manufactured by Dodge Brothers, of Detroit, and after being raised from the water was taken to Detroit to be repaired. The cost of raising the car and of the repairs and new parts, together with duty and exchange, came to $1,202. By the statement of claim the plaintiff claims to recover $1,131."

What the Policy Covered

The material part of the endorsements of the policy is as follows:—

"In consideration of $28.05 premium . . . it is hereby understood and agreed that this policy is extended to cover the insured to an amount not exceeding $1,700 on the body, machinery and equipment while within the limits of the Dominion of Canada and the United States, including while in building, on road, on railroad car or other conveyance, ferry or inland steamer, or coastwise steamer between ports within said limits, subject to the conditions before mentioned and as follows:—

"(A) Fire, arising from any cause whatsoever, and lightning.

"(B) While being transported in any conveyance by land or water—stranding, sinking, collision, burning or derailment of such conveyance, including general average and salvage charges for which the insured is legally liable.

"(C) Theft, robbery or pilferage, excepting . . ."

One of the defences is that the loss is not covered by the policy, not having been caused by the stranding, or sinking, or collision, or burning of the ferry boat from which the car slipped into the water. I have given this question much thought, and have come to the conclusion that this defence must be sustained.

"Clauses (A), (B) and (C) are intended, in my judgment, to define the three kinds of risk assumed by the insurers: (A) Covering fire, that is, fire destroying or damaging the car itself, and lightning; (B) covering loss while being transported in any conveyance by land or water; and (C) covering 'theft,' 'robbery' and 'pilferage.' It must be observed that in clauses (A) and (C) the nature of the risk is definitely described by nouns, namely, 'fire,' 'lightning,' 'theft,' 'robbery' and 'pilferage.' The corresponding words in clause (B) are 'stranding,' 'sinking,' 'collision, 'burning' and 'derailment.' And the risk which the policy assumes is the stranding, sinking, collision, burning or derailment of the conveyance containing the motor car while being transported by land or water. It is not the stranding, sinking, etc., of the motor car itself which is covered, but of the conveyance; and any damage to the motor car resulting from any such accident to the conveyance would be covered by the policy. The opening words of the clause are to be interpreted solely as marking the occasion upon which any of the specified accidents to the conveyance will entitle the insured to recover.

"For these reasons I am of the opinion that the peculiar accident which in the present case caused damage to the plaintiff's motor car was not contemplated by the terms of the policy, and is not covered by it."

BANK OF TORONTO WINS CASE

In the Ontario Supreme Court the action of the Bank of Toronto against Caleb Green, Margaret Green, Harold D. McCormick and Taylor McVeity, arising out of a mortgage and the payment of moneys on notes, has been decided against Mr. and Mrs. Green. McCormick was the endorser of the note, and Mr. McVeity occupies part of the premises in question. The court ruled that Mr. and Mrs. Green were primarily responsible as to the payment of money to the bank. If they fail, Mr. McCormick as endorser of the note would be next liable. The court also gave the applicants a decision whereby they can on one month's notice cause Mr. McVeity to vacate the premises in question.

ACTION REGARDING SUSPICIOUS FIRE

The action of Campbell Quinn, former garage owner, of Perth, Ont., against the North British and Mercantile Fire Insurance Co., arising out of the payment of a fire insurance policy for $1,500, came before the Supreme Court of Ontario a few days ago. The testimony of witnesses showed that the fire started from an unknown origin on the 8th of July, 1919, eighteen days after insurance had been placed on the property. Campbell Quinn estimated his loss at $3,500. He said he had only seen the insurance agent once after the fire and that he had not read the terms of his insurance policy.

A Bowser gasoline tank and pump, a Delco lighting system, four storage batteries and other garage equipment were destroyed in the blaze, according to witness. In cross-examination Quinn said he had been in business three years and had not insured his plant until about eighteen days before the fire occurred. He had not, he told the court, the "slightest idea" as to how the fire started. A. E. Fripp, K.C., M.P., counsel for the insurance company, asked witness if he had not told his partner, Empey, that both of them had their money sunk in the business and that as they were not getting on very well they could put on insurance and set fire to the place. Witness denied this. He also denied that he had told a Mr. Daniels that he (witness) could set the place on fire by some wires, gasoline and a motor. He also denied he had ever told Daniels he had ever done such a thing in Newark. Ralph Nephew, owner of the building, said he had been in the garage on the night in question and that everything he saw about the conduct of the place had been the same as usual.

Charles H. Finn, the adjuster for the insurance company, told of having asked Quinn to give him a complete report as to losses and Quinn had not done so. Quinn in his evidence said he had made such a report to the insurance company.

Charles Empey, a partner of Quinn in the garage business, was placed on the stand. He said that some time in February, 1919, Quinn had suggested to him that they get their money out of the business. "I told him (Quinn) if he could get a buyer to sell out. He said we could get the business insured and burn it," said Empey. Witness said that when this suggestion had been made to him he had pointed out to Quinn the possibility of the fire spreading and thought of the safety of the town. "He (Quinn) suggested we could take the tools away, so he could start up somewhere else," said witness. "I told him to leave me out of anything like that," concluded Empey.

News of Industrial Development in Canada

Textile Business Slowing Up—New England Companies Reduce Wages With Hope of Stabilizing Prices—Pulp Company Will Build at Arnprior if Concessions are Granted—Dominion Shipbuilding Plant to be Operated by Collingwood Company—American Concern to Establish at Woodstock

WHETHER the Canadian textile industry will be affected to such an extent as that of Britain and New England, it is not possible to say, but indications are that the market for our goods is becoming stagnant, and is likely to remain so for some time. Several weeks ago two companies announced that their plants were running at full capacity and spoke of the outlook as being bright. It was also announced that workers from Lancashire and New England were being engaged here, as further illustrating a plentiful supply of orders. Evidently the situation has changed since then. The announcement by the Canadian Cottons, Ltd., of the reduced working hours at the Marysville, N.B. mill, and at Cornwall, St. John and Hamilton, Ont., would seem to indicate anything but an abundance of work. The plant of the company at Milltown, N.B., which manufactures finer ginghams, will continue to operate at capacity, as there is sufficient business in that line to warrant such.

The slacking down of operations in this industry is merely in accordance with the general situation. To expect otherwise, when the textile business is practically at a standstill in other parts of the world, is unreasonable. In New England, companies are being enforced to reduce the wages of employees. The refusal of buyers to purchase goods on a high basis of cost has led to the stagnation of the market, as a result of which many mills have been obliged to close down entirely. At a conference of textile manufacturers in Boston recently, the hope was expressed that the wage reduction would permit the stabilization of prices, so that merchants would feel secure in placing their orders for goods and the mills may thus continue operations.

Pulp and Paper

If ratepayers are favorable to granting McLachlin Bros., Ltd., a fixed assessment of $150,000 for ten years, Arnprior, Ont., will have the opportunity of growing in significance as an industrial centre. The construction of a dam by McLachlin Bros., Ltd., has long been discussed, more particularly because the development of motive power means the development of an industry that will utilize the power. The proposition definitely decided upon now is the construction of a dam across the Madawaska River, about 150 yards upstream from the present mill bridge.

At the dam will be developed 2,000 h.p.; by conservation this can be increased to 4,000 h.p. When this becomes insufficient, the company can develop the Flat Rapids for another 2,000 h.p., and by further conservation they can procure 2,000 h.p. more, so that the immediate objective is 2,000 h.p., with 8,000 h.p. in sight. There will be erected an electric plant and the power will be transmitted to the point near the mouth of the Madawaska, where is to be erected a pulp-grinding mill. The first unit to be installed will have a capacity of 30 tons of pulp per day and this will utilize most of the 2,000 h.p. to be developed. It is hoped to steadily develop the pulp industry until a mill of 120 tons per day capacity will be operated.

McLachlin Bros., Ltd., have large areas of pulpwood, and the proposed mill will not only require that camps be operated in the woods every winter, but the industry will provide employment to a large number of men all the year round. The construction of a dam cannot be commenced until the low water season, but plans and materials are now being made ready and anticipating the pulp mill, McLachlin Bros., Ltd., now have men in their limits taking out large quantities of pulpwood.

The Brompton Pulp and Paper Co. announces that it has purchased extensive pulpwood limits in the Lake St. John district, Quebec. The new limits have an area of 634 square miles, or 405,760 acres. Prior to the most recent acquisition, Brompton owned or controlled by lease, timber limits of 311,768 acres in the St. Francis River district, so that its holdings have been more than doubled with the addition of the 405,760 acres and now total 717,528 acres.

Shipbuilding Plant to Open

The plant of the Dominion Shipbuilding Co., Toronto, which has been idle since the company went into liquidation some time ago, will resume operations for at least another five or six months. Osler Wade, liquidator, has announced that at a conference with the minister of marine and fisheries, Hon. Mr. Ballantyne, arangements has been completed for the finishing of work upon the two Dominion government ships in the yards. The work will be taken over by the Collingwood Shipbuilding Co., which will employ about a thousand men. Places will be found for a large percentage of the old staff and wherever possible preference will be given to returned men. The two vessels are of 4,000 tons each and it is estimated that they will provide employment for a large number of men on into the spring or early summer.

Iron Industry for Woodstock

The American Ironing Machine Co., of Chicago, Ill., manufacturers of the "Simplex electric, gas and gasoline ironers and equipment," have decided to locate their Canadian factory at Woodstock, Ont. The negotiations for the establishment of this industry were initiated and carried through by the industrial department of Heaton's Agency, Toronto, with whom the city of Woodstock has had an agreement for some time. By the agreement the American Ironing Machine Co. take over on March 1, 1921, occupation of the factory building now occupied by the Woodstock Worsted Spinning Co., which they have leased for one year from that date, with the option of purchase at any time prior to the expiration of the lease. It is intended to start installing machinery, etc., early in March and to commence manufacturing by April 1. Between forty and fifty hands will be employed at the outset.

The Maritime Nail Co., of St. John, N.B., are curtailing operations, and have laid off twenty men for an indefinite period.

Discoveries of veins of high-grade gold and copper, running at least 4 per cent. in the same veins, have been reported by W. J. Davey from the Beaver Lake district in the north of Saskatchewan. A body of asbestos has also been discovered, the fibre in some cases being 15 inches in length.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended December 3rd:—

O'Brien Mine, 64,000; Temiskaming Mine, 109,624; total, 173,624.

The following are the shipments of ore, in pounds, from Cobalt Station, for the week ended December 10th:—

H. F. Strong, 9,548; La Rose Mine, 86,793; Kerr Lake Mine, 59,715; Dominion Redn., 63,000; total, 219,056. The total since January 1st is 24,943,455 pounds or 12,471.7 tons.

INSURANCE NOTES

The Halifax Fire Insurance Co. has been authorized to transact throughout Canada the business of fire insurance.

At the next session of the Dominion legislature the Fidelity Co. of Canada will apply for power to conduct a general business of insurance.

CANADIAN STEWART COMPANY CASE

On December 4 a petition in bankruptcy against the Canadian Stewart Co. was set aside in the Ontario courts. Col. R. Boyd Magee had issued a writ against the Canadian Stewart Co., claiming $95,000 under a $100,000 contract for services in connection with the Toronto Harbor Development scheme. The writ also called for an injunction restraining the Toronto Harbor Commission from issuing a cheque to the Canadian Stewart Co. for $60,000.

In addition to the issuance of the writ the plaintiff secured from the registrar in bankruptcy on petition an order appointing a receiver, the purpose of the application being to prevent any possible transfer of the assets of the Canadian company to the American branch of the company. For defendants Mr. A. C. McMaster, K.C., showed that the company had over $1,500,000 assets in Canada and had other contracts to complete. Pending the argument of the injunction proceedings, Mr. Justice Kelly allowed the company to continue their ordinary course of business.

INDEPENDENT TELEPHONE ASSOCIATION MEETING

"Public-owned telephones" was the slogan at the 15th annual convention of the Canadian Independent Telephone Association, which was held in Toronto, December 1 and 2. The association favored the plan of government-owned trunk lines, and of the municipality owning and operating the local exchange. The telephone systems should be operated by and for the people," declared Mayor Church, who welcomed the delegates.

M. A. Gee, in his presidential address, referred to the Bell Company's application for increased rates and said the association had been asked to favor the application. "But," he said, "when the Independents remembered the number of times that they were given encouragement to believe that a franchise would be granted them in a city or town, and then were thrown down after they had helped drive a better bargain out of the Bell, they declined being used as a 'cat's-paw' any longer." Ontario, he said, has a fairly good start for a provincial telephone system, "if this is what is ahead of us." He went on to say that "telephone and newspaper men are operating at nearer pre-war prices than any other class of business. We both deserve fair and generous treatment."

Francis Dagger, telephone expert of the Ontario Railway and Municipal Board, addressed the convention on the subject of "The Telephone Systems and the Public." Mr. Dagger expressed regret that the association had given the public indication that it intended to follow the Bell in the matter of increasing its rates and said the result of any application to the board for increased rates would depend on the efficiency of service given by the company applying.

The officers of the association elected for the year 1920-21 are: Honorary president, Myron A. Gee; president, A. MacLean; vice-president, Dr. F. Routley; secretary, A. Hoover; treasurer, F. D. McKay; auditors, George Tait and H. E. Robinson. The executive committee will be: Col. J. R. Mayberry, J. M. Govenlock, S. Suddaby, G. W. Jones, James McEwing, Anson Groh, J. R. Forbes, C. J. Johns, F. E. Webster, George Tait, W. R. Wadsworth, Dr. W. Doan, P. R. Craven, Dr. A. N. Hotson, L. G. Campbell, D. Campbell, R. Burton, M. Rathwell, O. R. Forster, W. C. Moore, Mr. Elliott, A. R. Chapman and F. S. Scott.

STRIDING AHEAD

These are wonderful days for life insurance salesmen, particularly North American Life men. Our representatives are placing unprecedented amounts of new business. All 1919 records are being smashed.

"Solid as the Continent" policies, coupled with splendid dividends and the great enthusiasm of all our representatives tell you why.

Get in line for success in underwriting. A North American Life contract is your opening. Write us for full particulars.

Address E. J. Harvey, Supervisor of Agencies.

North American Life Assurance Company

"SOLID AS THE CONTINENT"

HOME OFFICE TORONTO, ONT

Insuring the Motive Power

The object of Business Insurance is to insure the "brains" of an organization. Knowledge combined with administrative ability, is invaluable. Every business large or small, depends primarily upon one or more experienced leaders. The death of any one of them would result in a heavy financial loss. There would be heavy going until the deceased official was replaced by someone of equal ability. The possession of a policy of insurance payable to the firm in the event of the death of such a leader is essential. Joint policies payable on the death of the first partner, or (preferably) separate policies on the lives of the individual partners in favor of the survivors are issued by The Mutual Life of Canada. It will be the object of the Company to adapt each Business Policy to the particular requirements of the insuring firm. Consult our representative. He will be glad to advise you regarding business insurance.

The Mutual Life Assurance Co. of Canada

Waterloo Ontario

HUME CRONYN, M.P., President. CHARLES RUBY, General Manager.

CONTINUITY

Life Insurance gives continuity to one's Life Plans.

Plans for the home—for the education of children for business development - may all be destroyed by death—unless safe provision has been made beforehand for such a contingency. For most men the only sure way to so provide is by means of Life Insurance.

The Great-West Life Policies are inexpensive, liberal, profitable. Their value is shown by the wide demand for them.

Ask for personal rates.

NEWS OF MUNICIPAL FINANCE

Suing for Tax Arrears Discussed in West—Moose Jaw's Interim Statement Shows Land Assessment Greatly Reduced and Business Assessment Producing Results

A PROPOSAL has been put forward by the finance committee of the city of Calgary, Alta., of suing citizens who are in arrears of taxes. This proposition is meeting with strong opposition from many quarters. It is argued that all governments generally are opposed to the idea of suing their citizens for debts wherever it can be avoided. The Alberta government avoids suing farmers for the return of seed grain loans when they are in arrears, and the same thing is true of the federal government, with regard to oil leases. Thousands of oil leases have been cancelled in the Calgary district, with the accumulations of back rentals on them, but the Dominion government does not sue for the return of the rentals so long as it gets back the leases.

It is also contended that a policy of bringing suit to recover arrears of taxes would bear most heavily on the small property owners. In thousands of cases, men of small means acquired several lots during the real estate boom days and were unable to hold them. They let everything go and concentrated on holding their homes. If Calgary now proceeds to sue them for these arrears of taxes on lands, it will work a great hardship on the small owner. The idea that the city should sue for taxes in cases where it has already acquired the property by tax sale, is also regarded as wrong. It is the opinion that the only effect it will have will be to drive the people from the city.

Moose Jaw, Sask.—In accordance with the custom of some western municipalities, the city has issued a financial statement for the ten months ended October. Geo. D. Mackie, commissioner, in introducing the report states: "The city itself, speaking from a municipal standpoint, has had an extremely busy year. Although no schemes involving large capital outlays have been inaugurated, the work of maintaining the various departments of municipal enterprise has been greatly extended. During the period of the war, expenditure in all the municipal departments were cut down to the lowest figure and only work which was absolutely essential to the smooth running of the various civic departments, was carried out. In the year 1919, owing to the fact that the war had just closed and conditions were not yet stable, no great increase in the necessary expenditures was made, but with the beginning of 1920, it was felt that the city could now undertake and carry out many needed repairs to the various public utilities and other works.

"With the large reduction in the valuation of land from the peak year of 1913, when the assessment was approximately $44,000,000, to 1919 when this assessment was $14,887,000, the margin of borrowing power left to the city was found to be very small indeed, and, as a consequence the council decided, at the end of 1919, to revert from the system of taking business by way of business license, to placing the business on the assessment by way of tax. This had the effect of increasing the assessment by approximately $1,600,000."

The report gives the following comparisons of assessment:—

	1913.	1919.	1920.
Land, 100%	$44,037,931	$11,887,533	$14,874,425
Improvements, 45%	4,934,320	5,725,045	5,804,325
Business	2,883,993	509,697	2,102,385
Income	141,042	271,963	195,075
Totals	$51,997,286	$21,394,238	$22,976,210

Another factor which induced the city to revert to the business tax, was that a large amount of property which has been sold for arrears of taxes would shortly revert to the city, and as all lands belonging to the city are exempt from taxation this will have the further effect of considerably reducing the taxable assessment of the city.

The city is allowed to create a debt equal to 20 per cent. of the taxable assessment, so that after deducting the value of the property acquired by the city under the arrears of taxes act, the limit of the city's debt is $4,521,242, whereas in 1913, when the city's assessment was at its peak, the debt could have reached a figure of nearly $10,400,000. The gross debt as at October 31, was $6,133,325, from which can be deducted the following in order to arrive at the borrowing power of the city: Sinking fund, $930,406; secondary education, $142,102; owners' share of local improvements, $779,883; leaving net of $4,280,932. From these figures it will be seen that the city's borrowing power amounts to only $240,309. The sinking fund of $930,406, compares with $832,920 at the end of October, 1919.

Tax collections did not come up to a year ago, the percentage of current to levy being 50 per cent., as against 56 per cent. last year. Collection of arrears of taxes also show a falling off, the figure being $111,411, as compared with $127,588 in 1919, $138,272 in 1918 and $192,110 in 1917. Tax arrears at the end of October, 1920, amounted to $695,846, as compared with $595,783 in 1919, $521,385 in 1918 and $376,946 in 1917. The reason for the large amount of tax arrears is due to the fact that in the boom days of 1912-13, the assessment of land in the city was placed at a very high figure, and as a result, when the period of depression came in 1914-15, a very large proportion of the owners of these lands, which were held almost exclusively for speculation purposes, declined to pay the taxes on these lands, consequently, these lands are now in process of being acquired by the city under the arrears of taxes act. At the same time the city has had to go on assessing these lands for taxes year by year, knowing full well that the taxes on the land would not be paid, and this has naturally resulted in placing a much greater burden on the improved property of the city. As these lands are taken possession of by the city, the land must still further decrease in amount, and the burden on the improved portion of the city increase.

As an offset against these taxes which the city felt would not be paid, a levy amounting to $50,000 a year was added to the municipal taxes each year since 1915, and, as a result, at the end of 1919, the city had a revenue surplus available as a reserve for uncollectible taxes of $398,162, thus making it possible for the city to wipe off its books at least 33 per cent. of the taxes outstanding.

Bank loans on current account for 1920 amounted to $429,236, as compared with $274,849 in 1919, $241,000 in 1918 and $386,500 in 1917.

Woodstock, N.B.—At the town council meeting last week, R. F. Armstrong, town manager, said that nearly all the departments would close the year with a surplus, and all bills would be paid. The three town banks are disputing their taxes, and if they paid before the end of December there would be a substantial credit balance. He also anticipates that next year's assessment would be some $6,000 lower than the assessment made this year. Excepting the banks, the taxes are approximately all collected. The receipts from sewers are more than last year, and the water tax is fairly well collected, and but few water services will be turned off this year because of non-payment of bills.

OWEN SOUND BOARD OF TRADE

The Owen Sound, Ont., Board of Trade at its annual meeting on December 2 elected the president, E. W. McQuay, for a second term. W. T. Harris is vice-president, and the following members compose the council: J. R. McLinden, H. Fleming, J. A. Simpson, J. R. Cunningham, Geo. Menzies, John Parker, J. E. Keenan, M. D. Lemon, J. H. McInnis, C. H. Thompson and E. T. Macdonald. During the past year eight new concerns have been added to Owen Sound's industrial family, and one of the new plants has already doubled its initial capacity. The board will hold its annual banquet in January, and an invitation is being sent Hon. F. C. Biggs to attend. A membership campaign will be carried on this month.

Government and Municipal Bond Market

Improved Trend of Victory Loans, but Three Issues are Slightly Lower — Toronto Disposes of One Million of Securities — Alberta Savings Certificates—Victoria Selling to Local Investors

WITH the approach of the Christmas holidays the municipal bond market has settled into a state of quietness from which it is not expected to awaken until the new year. The prices received by Walkerville and Renfrew this week would seem to be anything but an encouragement to other municipalities to come on the market just now.

There is good demand for the recent province of Ontario bonds, and as a result these securities are now selling to yield 6.40 per cent., as compared with the initial offering rate of 6.60 per cent. and last week's rate of 6.50 per cent. Toronto's issue is also meeting with a good reception.

Victory bonds continue to absorb most of the interest in the government securities market, but the activity was not as great this week as previously, although prices strengthened somewhat. The following figures illustrate the trend of prices:—

	Control price.	Last week. High.	Last week. Low.	This week. High.	This week. Low.
1922	98	97⅝	96⅜	98	96¾
1927	97	98	96¾	97¼	95½
1937	98	97⅞	94½	97¾	96½
1923	98	96¾	94¼	97	94½
1933	96½	96⅜	93⅜	95½	94½
1924	97	94½	93½	95¼	94
1934	93	93¼	90⅞	94½	91⅞

Alberta Savings Certificates

Since the inauguration of the system about four years ago by the provincial treasurer, the savings certificate plan of the Alberta government has attracted over $6,000,000 in small investments from people in this and other countries. According to Hon. C. R. Mitchell, provincial treasurer, and Deputy Minister Newson, the demand for these provincial savings certificates has been growing at such a rate it is difficult to keep abreast of the enquiries and applications. People in the United States have been attracted by the plan of investment by the thousands, many of these investors having payments due in this country and ordering their agents to turn the moneys into Alberta certificates, thus avoiding the exchange rate tolls of the present time.

Mr. Newson says the deposits have been largely of $500 and $1,000 denomination in the totals, which comprise the six million dollars' worth issued to date. Obviously, there has not at any time been anything like $6,000,000 in these certificates outstanding at one time, the total covering the scope of operation since the scheme was started. The rate of interest paid is 5 per cent., compounded semi-annually for deposits from $5 upwards, payable at any time.

The new plan of the government is the offering of yearly issues of 6 per cent. ten-year bonds in denominations of $100 and upward, it being the intention of the provincial treasurer's department to have these sold to general investors in and outside the province. Probably about $1,000,000 worth of these bonds will be offered the public annually.

Coming Offerings

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues:–

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
St. Jerome de Matane, Que.	$ 100,000	5	5-years	Dec. 20
Iroquois Falls, Ont.	45,000	6	20 years	Dec. 21
Bienville, Que.	25,000	6	10-yr. ser.	Dec. 27
Kenora, Ont.	82,320.25	6½ & 7	Various	Dec. 29

Verigin S.D., Sask. The board of trustees is offering $15,000 8 per cent. 20-instalment debentures. J. Z Walten, Verigin, Sask.

Bienville, Que.—Tenders will be received until December 27, 1920, for the purchase of $25,000 6 per cent. debentures, which are redeemable by series and mature in ten years. J. Ruel, secretary.

Kenora, Ont.—Tenders will be received until December 29, 1920, for the purchase of the following debentures, totalling $82,320.25: $10,000 7 per cent. 15-instalments, for electric utility; $20,000 7 per cent. 20-year, for waterworks; $13,564.87 6½ per cent. 33-year, for consolidation of debt; $6,000 7 per cent. 10-years, for electric; $25,000 7 per cent. 20-instalments, for public improvement; $7,755.38 7 per cent. 20-instalments, for local improvement. F. J. Hooper, clerk and treasurer.

Debenture Notes

Avonmore, Ont.—By-law will be submitted January 3 to authorize the borrowing of $9,000 for Hydro-Electric plant.

Midland, Ont.—At the January elections ratepayers will be asked to approve of a money by-law authorizing the raising of $100,000 for a new town hall.

Ottawa, Ont.—City council has approved of the submission of debenture by-laws to the ratepayers in January for $60,000 for a municipal quarry and $200,000 for a central fire station.

Portage la Prairie, Man.—On December 21 ratepayers will be asked to vote on a by-law authorizing the borrowing of $14,000 for the purchase of additional fire-fighting equipment.

St. Thomas, Ont.—A by-law providing for the raising of $233,000 by way of debenture issue for the erection of a concrete dam across Kettle Creek and for improvements to the waterworks department will be submitted to ratepayers on January 3.

Middlesex County, Ont.—On the recommendation of the finance committee the council has authorized the borrowing of $80,000 in order that the engineer's department can meet the expenses of the county road system until the government grant is received.

Saskatchewan.—The following is a list of debentures authorized by the Local Government Board from November 25 to December 1, 1920:—

Rural Telephones.—8 per cent. 15-years annuity: Bredenbury, $5,500; Blucher, $3,500; Springside, $4,300; North Hazenmore, $700; Shell River, $9,500; Gowan Brae, $1,100; Northfield, $14,000; Bromhead South, $4,500; Twin Valley, $3,500.

Kuroki S.D., $1,060 8 per cent. 10-instalment.

British Columbia.—The inspector of municipalities has issued the following certificates of authorization for borrowing:—

Saanich District, $25,000, for war memorial, debentures maturing March 1, 1930, with interest at 5½ per cent.

Armstrong, $10,000, for fire protection, maturing September 1, 1940, with interest at 6 per cent.

Summerland, $3,000, for school purposes, maturing November 1, 1930, with interest at 6 per cent.

Manitoba.—Good roads projects to cost approximately $400,000 are to be voted on in eight rural municipalities in Manitoba, December 21, according to announcements made in the "Manitoba Gazette." The largest is that of Morris district, which is asking authority to float debentures amounting to $110,000, with interest at 6 per cent. for twenty years.

Other schemes include: Louise, $52,000 6 per cent. 30-year debentures, for good roads; Ste. Rose, $61,900 6 per cent. 20-year debentures, for good roads; Ste. Rose du Lac, $23,000

Are Your Funds Profitably Employed?

If your funds are not earning from 6.40% to 7.25% while surrounded by the highest grade of security, we suggest that you consider the wisdom of placing them in Canadian Government and Municipal Bonds.

No other investment offers more attractive features,—principal is safe,—interest is prompt and sure, and should necessity demand immediate cash, these bonds will be found readily marketable.

Write for a list of these bonds. It will interest you.

Siglunes, $40,000 6 per cent. 30-year debentures for roads and bridges.

Saskatchewan.—The following is a list of debentures reported sold from November 25 to December 1, 1920:—

Schools.—Bergheim, $3,200 10-years 8 per cent.; H. L. Martin Lumber Co. Langenburg, $1,500 10-years 8 per cent.; W. G. Suechsschlaf, Langenburg. Bertdale, $2,000 15-years 8 per cent.; Andrew Dickson, Indian Head. Clarendon, $700 10-years 8 per cent., Constance, $800 8-years 8 per cent.; town of Biggar sinking fund. Grandy, $6,000 20-years 8 per cent.; Waterman-Waterbury, Regina. Belleville, $2,000 20-years.; S. Cummins, Kennedy. Knapton, $2,500 15-years 8 per cent.; local purchaser. Gowan Brae, $1,200 6-years 8 per cent.; J. R. Taylor, Kinistino.

Towns.—Yellow Grass, $8,000 10-years 7 per cent.; R. Wheeler and J. Haller, Yellow Grass. Strassbourg, $4,000 15-years 8 per cent.; W. E. Sayles, Brantford, Ont.

Bond Sales

Victoria, B.C.—The city is now selling to local citizens $336,500 6½ per cent. debentures, maturing from one to ten years. The debentures are being sold in denominations as low as $50 as an inducement to the small investor. The prices will vary from 93.36 for ten-year bonds to 99.52 for the one-year variety. The average issue price is 97.934.

Toronto, Ont.—The city has disposed of $1,055,000 5½ per cent. serial coupon bonds, dated July 1, 1920, and due July 1, 1922 to 1930, inclusive, to a syndictae comprising the Dominion Securities Corporation, Harris, Forbes and Company, Inc., the National City Company, Ltd., R. A. Daly and Company and W. A. Mackenzie and Company. The sale was made privately, and the syndicate was composed of the same bond houses which handled the previous issue of the city. The cost to the city is not known, but apparently it was a little greater than previously. The securities are now being sold to yield 6.60 and 6.70 per cent.

Walkerville, Ont.—A. E. Ames and Company have been awarded $300,000 6 per cent. 15-instalment housing debentures at a price of 94.094, which is on a basis of about 6.93 per cent. The following tenders were received:—

A. E. Ames and Co.	94.094
Wood, Gundy and Co.	94.07
Dominion Securities Corporation and Housser, Wood and Co.	93.09
W. A. Mackenzie and Co., the National City Co., Ltd., and Geo. Carruthers and Co.	93.22
R. C. Matthews and Co.	92.78

Renfrew Town, Ont.—Wood, Gundy and Co. have purchased $45,016 6 per cent. 20 and 30-instalment debentures at a price of 91.13, which is on a basis of about 7.10 per cent. The following tenders were received:—

Wood, Gundy and Co.	$41,023.00
R. C. Matthews and Co.	40,865.00
W. L. McKinnon and Co.	40,841.96
C. H. Burgess and Co.	40,501.79
A. E. Ames and Co.	40,554.91
Turner, Spragge and Co.	40,500.89
Brent, Noxon and Co.	39,731.00
Dyment, Anderson and Co.	39,627.58

La Ville de Chicoutimi, Que.—The Municipal Debenture Corporation has been awarded $100,000 5½ per cent. 10-year debentures at a price of 91.75. Other offers were:—

Provincial Securities Co.	91.65
Versailles, Vidricaire and Boulais	89.87
Rene T. Leclerc	89.05
Credit Canada, Ltd.	88.56

St. John, N.B.—The city has disposed of $230,000 6 per cent. bonds. Of this amount $140,000 mature December 1, 1930, and $90,000 mature December 1, 1935. These securities are now being offered by the Eastern Securities Co., Ltd., J. M. Robinson and Sons and the Mahon Bond Corporation, Ltd., at a price of 97½, yielding about 6.35 per cent. for the ten-year bonds and 6.25 per cent. for the 15-year bonds. Denominations of $500.

Saskatchewan.—The result of the province's issue of farm loan debentures has just come to hand. Securities maturing in 1927 have been disposed of to the extent of $1,596,700. It also transpires that farm loan debentures maturing in 1950 are now being disposed of, and $378,700 has already been sold. From what can be understood, the debentures bear 5 per cent. interest, and have been disposed within the province at par.

York Township, Ont.—A. E. Ames and Co. have purchased $129,610.77 6 per cent. 10-instalment debentures at a price of 95.303, which means that the township paid slightly more than 7 per cent. for its money. Tenders for the securities were as follows:—

A. E. Ames and Co.	95.303
A. Jarvis and Co.	94.836
Wood, Gundy and Co.	94.468
R. C. Matthews and Co.	94.30

In addition the township sold $37,000 6 per cent. 20-instalment debentures privately.

PROTEST SECURITIES EMBARGO

The British Columbia Bond Dealers' Association held a meeting last week to consider the present embargo on the importation of foreign-held Canadian securities. The president, A. C. Flumerfelt, has been requested to advise the minister of finance for Canada and the Canadian Bankers' Association that the association as a body object to the restrictions placed upon the conducting of their business and recommend that they be removed, but that so long as the minister of finance and the association request that the embargo be observed that the association will to the limit of their ability observe their wishes. The action of the association was taken after advice had come that the eastern dealers were making a protest along similar lines.

CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the week ended December 10, 1920, in provinces, as compared with those of previous weeks and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1919.
Dec. 10	12	17	0	1	2	2	1	7	0	42	16
Dec. 3	5	19	0	0	1	1	0	4	0	30	16
Nov. 26	8	14	0	0	2	0	0	1	0	25	19
Nov. 19	5	7	0	3	3	4	0	1	0	23	21

MANITOBA-KELLY AWARD CUT DOWN

The Manitoba Appeal Court on December 1 cut $615,213 from the award made to the provincial government by an Arbitration Board against the firm of Thomas Kelly and Sons for alleged faulty construction of caissons under the new Manitoba Parliament Buildings. The case has been dragging through the courts for the past five years. Practically half the award made by the government was set aside by the Appeal Court.

The judgment means a loss to the province of approximately $1,000,000. Interest on the sum for the past five years amounted to over $300,000. The amount now owing the government by Kelly is $588,139 with interest at 5 per cent. since 1915. The province may take an appeal to the Supreme Court of Canada.

Corporation Securities Market

Canadian Stocks Continue Same Irregular Movement of Past Weeks—Prices Chiefly Lower—Good Demand for Investment Securities—Consumers' Gas Company Calling for Tenders on Shares—Loew's Theatres to Consolidate—K. & S. Tire Bond Offering

IRREGULAR and dull, with the price movement chiefly downward, the Canadian stocks continued the same course which they have been pursuing for some weeks past. There were some slight rallies this week, but these were not significant. The industrial and commercial situation does not yet warrant any improvement in stocks, and until it does there will be no upward movement. Occasionally traders have the opportunity of boosting certain issues, but reaction invariably follows. The market must continue its course until the readjustment has been fully discounted, and in the meantime speculators must exercise caution. Perhaps one favorable feature of the market this week was its dullness. The turnover as compared with previous weeks was small, but this prevented any great fluctuations. There is a decided lack of buying power at the present time, and the less selling the better the market will be able to stand up.

On the other hand there is said to be a good demand for strictly investment securities, such as bank stocks and bonds. With Victory bonds growing strong investors are turning their attention to this side of the market, which should be very helpful to prices.

The volume of day to day trading on both Toronto and Montreal exchanges, for the week ended December 15, is shown in the following table:—

	Montreal.		Toronto.	
	Listed stocks.	Bonds.	Listed stocks.	Bonds.
Thursday ...	4,543	$ 534,630	2,216	$ 484,200
Friday	4,261	381,150	2,817	421,000
Saturday ...	1,135	332,400	1,292	290,450
Monday	7,596	251,800	2,539	251,500
Tuesday	8,027	274,100	1,299	594,900
Wednesday .	5,345	250,200	1,415	507,200
Totals ..	30,907	$2,024,280	11,578	$2,549,250

The figures for the previous week were: Montreal, listed stocks, 56,320; bonds, $1,984,950; Toronto, listed stocks, 14,302; bonds, $3,461,700.

The Consumers' Gas Co., Toronto, is asking for tenders until January 5, 1921, for the purchase of 12,786 shares of unissued capital stock, each share having a par value of $50. The practice of the company in the past has been to place its stock either by auction, sale, by public tender or by allotment at a fixed premium. Owing to existing conditions the last-mentioned plan is not feasible in this instance. At the present time the stock is selling on the open market around 135, to yield about 7.35 per cent.

In 1917 $478,700 was allotted at 150. There has been no stock issue since then. The highest price ever received by the company for its shares was in 1919, when the average price realized was 215.47.

Capitalization Changes

At a special meeting of the shareholders of the Wayagamack Pulp and Paper Co., Ltd., held at the head office at Three Rivers, Que., last week, unanimous ratification was given to the proposals authorizing an increase in the capital stock of the company. By the proposals the capital stock of the company will be converted from 50,000 common shares of a par value of $100 into $100,000 common shares of no par value. These will be offered to shareholders in the proportion of two new shares to one of the old.

The Kaministiquia Power Co. has declared a stock dividend of 13½ per cent. in common stock, payable on December 23 to common shareholders of record December 17. As the paid-up capital of the company in common stock amounts to $2,198,018, the amount distributed would be equal to $296,732, or little more than $5,000 short of the full authorized amount of capital at $2,500,000. The company at present is paying a dividend of 8 per cent., which was begun with the quarter commencing with November 1, 1917.

Directors of the Canadian Car and Foundry Co., Ltd., at a meeting in Montreal this week, decided to liquidate the 22¾ per cent. dividend arrears on the cumulative preferred stock of the enterprise through the issue of 6 per cent. negotiable script maturing in seven years. The distribution will be made before the end of the current year to shareholders of record December 24 next.

The Currie Manufacturing and Lumber Co., Ltd., of Brandon, Man., which was recently incorporated with a capital of $100,000, is offering shares at $100 each. Already fifty per cent. of the stock has been subscribed for and paid up. The company is well situated as a wood working industry.

Lamontagne, Ltd., manufacturers of harness and trunks, Montreal, Quebec, incorporated under the laws of the Dominion, has been authorized to increase its capital stock from $400,000 to $2,000,000 by the issue of 16,000 new shares of $100 each.

Loew's Theatres Merger

Subject to the approval of shareholders and bondholders, the Canadian Loew's Theatres enterprises will combine under one large organization of Loew's (Canada) Ltd., which will have a capital of $20,000,000, comprised of $5,000,000 8 per cent. preferred, and $15,000,000 common shares of a par value of $10 each.

—for the good of the community.

72 Years
Strong

FOR seventy-two years we have paid dividends to shareholders without interruption.

And for seventy-two years there has not been, at any time, any general interruption in the supply of gas to the citizens of Toronto.

These two facts we think will have a distinctly favourable bearing upon the public subscription for the unissued portion of our present Capital Stock. We are now inviting tenders for this stock in blocks of ten shares or multiples thereof; the par value of the shares being $50.00 and the dividend rate 10%.

If interested, write for the Conditions and Terms of Sale, and a Form of Tender.

CORPORATION SECURITIES MARKET

(*Continued from page 42*)

There are now seven companies operating, and it is understood that offers will be made to all but Hamilton, which will continue to operate independently. The others are: Toronto, two theatres; Montreal, two theatres; London, Ottawa and Windsor. The Toronto theatres are owned by one company, but the two Montreal properties are owned separately, the newer one (Metropolitan) not yet being in operation.

The new company will acquire all the assets of the theatrical enterprises mentioned, giving in exchange for the 7 per cent. preference stock of the individual theatres par for par, 8 per cent. cumulative preference shares of the new company. Payment for the common stock of the separate theatres will be as follows:—

For each $100 par value of Marcus Loew's Theatres, Ltd. (the Toronto theatres), 80 common shares of $10 par value in new company. For each $100 par value common stock of Loew's Montreal Theatres, Ltd., 25 shares of $10 each par, in new company. For each $25 par value common stock of Loew's Ottawa Theatres, Ltd., 5 common shares of $10 par value, new company. For each $25 par value common stock of Loew's Metropolitan (Montreal), Ltd., 3¾ common shares of $10 par, new company. For each $10 par value common stock of Loew's Windsor Theatres, Ltd., 1½ common shares of $10 par, in new company.

K. & S. Tire Bonds

An offering of $300,000 7 per cent. first mortgage 15-year sinking fund bonds of the K. & S. Tire and Rubber Goods, Ltd., is now being made by Richardson, Sheppard and Thorburn, Ltd., Toronto, at par and accrued interest, with a bonus of 50 per cent. common stock. A sinking fund will be set aside each year, commencing November, 1923, of 5 per cent. of the amount of the bonds outstanding. The securities are redeemable at 105 and interest and are subject to call on the same terms after November, 1923, or any interest, after 30 days' notice.

The K. & S. Tire and Rubber Goods, Ltd., was incorporated under the Ontario Companies Act, in September, 1919, to take over the K. & S. Tire and Rubber Co., Ltd., which company is surrendering its charter. The efforts of the company have been mainly extended in the manufacture of druggists' rubber sundries, and it is the intention to make the present plant more comprehensive so as to supply the drug trade with their entire rubber equipments. Since its inception in 1913, the growth of the company has been considerable, sales increasing from $65,000 to $1,060,000 in 1920.

The Eastern Securities Company, Ltd., are offering $200,000 8 per cent. cumulative participating preferred shares of the Lounsbury Company, Ltd., at par, $100 per share, and accrued dividends. The Loundsbury Company was started originally in 1891, and is one of the largest dealers in the maritime provinces in farm machinery, furniture and automobiles, having offices at many of the principal points in New Brunswick. Proceeds of the new issue will be used to finance the increased business, which is evident from the volume of sales, which have increased from $178,700 in 1910 to $900,000, approximate for the first nine months of 1920.

L. E. Waterman Company, Ltd., incorporated under a Dominion charter, has been authorized to increase the capital stock from $100,000 to $500,000. New shares are to be of $100, par value. The company manufactures high-grade fountain pens and ink at St. Lambert, Que.

Sugar Shareholders Approve Financing

No opposition whatever, and but little comment, characterized the special meeting of shareholders of the Atlantic Sugar Refineries, Ltd., held on December 4 in Montreal, to pass upon the two by-laws enacted some time ago by the directors of the enterprise in the effort to meet the difficulties arising out of the recent demoralization of the sugar market. In submitting the two by-laws to the meeting for approval, D. Lorne McGibbon, president, who had just returned from New York, stated that it was not considered advisable in the interests of the company at the present juncture to make public the extent or detailed nature of the new financing projected. The public and the shareholders generally, he said, were familiar with what had happened in the sugar industry, not only in Canada, but in the United States and elsewhere as well. What the future would be could not be forecast, but the adoption of the two by-laws submitted was absolutely necessary if the Atlantic Sugar Refineries Company was to be financed successfully through the present crisis.

The two by-laws, already given in detail in these columns, give the board of directors complete authority to effect whatever financing they may deem necessary, and in whatever form and terms may be decided upon.

Sharp Drop in Profits of Canadian Car and Foundry Company Due to Unsettled Conditions During Early Part of the Year—Increased Earnings by Canada Iron Foundries—Financial Statement of Dominion Glass Company Reflects Prosperous Year—Halifax Shipyards Outlook Promising

Dominion Foundries and Steel, Ltd.—In connection with the offering of $800,000 7 per cent. cumulative preferred stock of the Adirondack Steel Foundries Corp., of Albany, N.Y., the following statement of the company's affairs has been issued by the parent company as at November 30 last: Cash and accounts receivable, $109,426; raw material and work in process, $72,239; fixed assets, $890,270; deferred assets, $10,655; total assets, $1,082,592; accounts payable, $75,581; bills payable, $175,000; deferred, $2,944; common stock, 40,000 shares, no par value, carried on books at value of $200,000; preferred stock, $610,000 ($10,000 sold during interim); profit and loss (first four months' operations), $19,067. The $190,000 unissued Adirondack preferred is included in the present offering. This amount, not shown in the statement, will accrue to the Adirondack company and the balance of sale $600,000 will accrue to the Dominion company.

British Columbia Electric Railway Co.—In a deal by way of debenture guarantees representing between $7,000,000 and $8,000,000, and stock purchase, the company is acquiring control of the Western Canada Power Co. In New York City on December 23 the Western Power directorate will resign, to be replaced by administrative officers of the British Columbia Electric Railway Co., headed by George Kidd, general manager. All arrangements for the transfer have been completed. The option given representatives of British Columbia Electric Railway Co. by the majority shareholders of the Western Power Co. of Canada on Western Power of Canada preferred at $70 per share and on Western Power of Canada common at $35.10 per share has been exercised. Payment for the shares deposited will be made on December 23 next.

The British Columbia Electric Co. has agreed to accept up to May 15 next additional Western Power preferred and common shares that may be deposited up to that time, at the same price and on the same terms governing purchases of stock already deposited. It is felt that the completed arrangement which was carried through by Royal Securities Corporation, places the securities of Western Power Co. of Canada in a much stronger position than before.

Halifax Shipyards, Ltd.—The annual meeting of the company was held in Montreal a few days ago, when H. B. Smith, president, reported a satisfactory year. The net result of the year, as disclosed in the annual report, showed a substantial surplus, with the outlook for the coming year of a most promising nature.

President Smith, in his address to the shareholders present, stated that the Canadian "Signaller," constructed for the Canadian Government Mercantile Marine, a ship of 8,300 tons dead weight carrying capacity, had been constructed, launched and delivered during the period covered in the report. The vessel, he stated, had conformed to the highest classification of Lloyd's, and a sister ship would leave the way at Halifax on December 18, when Sir Robert Borden would act as sponsor of the new craft.

Two other ships, Mr. Smith said, of 10,500 tons capacity each, were in course of construction at the shipyards of the company, and it was anticipated that delivery of these would be made by June of next year. In addition, the Halifax concern has a large volume of repair work on hand. Mr. Smith also reported that the company has in prospect orders for the construction of five large oil tankers, the booking of which is almost consummated. This work will be sufficient to keep the Halifax yards, as well as those of the Davie Co. at Levis and the Tidewater Co. at Three Rivers, busy during the whole of the coming year.

Dominion Glass Co., Ltd.—The financial statement of the company for the year ended September 30, 1920, reflects prosperity. Profits for the 12 months amounted to $757,989, an increase of $126,265, or slightly in excess of 20 per cent. over those of the preceding fiscal period. After deducting bond interest, preferred and common dividends, which aggregated the same as in the previous statement, there remained a balance from the year's operations of $235,989, compared with $109,724 at the end of the previous period. The amount available for application to the common shares is shown in the statement at $405,989, representing earnings at the rate of 9.55 on the securities, against 6.58 per cent. in 1919. Profit and loss balance carried forward was $725,544, compared with $489,555 a year ago, although in the latter period a reserve fund of $500,000 was established.

The working capital position is slightly below that of a year ago. Sir Charles Gordon, president, points out in his report that the showing is more noteworthy, in view of the fact that extensive additions and improvements were effected during the year. The figures compare as follows:—

	1920.	1919.
Current assets	$2,485,966	$2,048,166
Current liabilities	1,027,057	520,727
Working capital	$1,458,909	$1,527,439

The balance sheet, as a whole, is a commendable one, as the following comparisons will illustrate:—

	1920.	1919.
Properties, etc.	$ 4,720,173	$ 4,292,208
Patents, goodwill, etc. ...	4,600,920	4,600,000
Inventories	1,051,359	834,369
Accounts receivable	1,297,879	937,182
Cash	92,604	268,855
Investments	220,880	120,188
Total assets	12,066,350	11,092,079
Bonds' account	1,578,300	1,650,800
Accounts payable	584,389	207,399
Accrued charges	354,668	225,322
Depreciation reserve .	907,549	674,388
Sinking fund	446,765	374,040

Canadian Car and Foundry Co., Ltd.—A sharp reduction in profits is shown in the statement of the company for the year ended September 30, 1920. Subject to government taxes, profits for the year under review were $539,397, as against $1,887,634 in the previous period. The surplus carried forward was also reduced, the figure being $6,243,603, subject to government tax, as compared with $7,061,556 for 1919. The profits of the company were severely affected by strikes in the plants of the company, and more particularly by the congestion in the American steel mills, which followed on the strikes in the United States. These developments greatly retarded shipments from the various plants.

On the other hand, the report shows that the company entered the new fiscal year with the greatest amount of business on hand in its history, the value of unfilled orders totalling $26,000,000, as compared with $8,500,000 at the end of the previous year.

The general statement of assets and liabilities shows some important changes. This is probably due to the large amount of unfilled orders on the books of the company, which are now being filled. These large orders are reflected more particularly in the inventories of manufactured and partly manufactured products, and these now stand at $14,788,960, as against $7,394,225 a year ago. Accounts and bills receivable amount to $4,105,888, up from $2,326,184; temporary

Sterling Coal Co.
Limited

Notice to Bondholders

By a resolution passed by the Bondholders of the Company at a meeting held on 19th February, 1915, it was resolved to cancel the liability of the Company to pay the interest on the bonds maturing 1st January and 1st July, 1915, and 1st January and 1st July, 1916, until such time as the Directors of the Company should elect to pay the same, with a proviso that the Directors should not declare any dividend upon the capital stock before such interest on such bonds should have been paid in full, together with interest upon such interest at 6 per cent. per annum, compounded yearly.

Coupon No. 10 having been paid on and after July 2nd, 1920, **NOTICE IS HEREBY GIVEN** that the second of the Coupons mentioned in the above resolution, namely, **Coupon No. 11, due July 1st, 1915,** will, on **presentation and surrender to the Company, be paid AT THE COMPANY'S OFFICES, 95 BAY STREET, TORONTO,** on and after January 3rd 1921, with compound interest thereon from 1st July, 1915, to 1st January, 1921.

By order of the Board of Directors,
H. G. RATCLIFFE,
Secretary.

Toronto, December, 10, 1920.

NOTE.—In respect to each Coupon No. 11, bearing face value of $3.00 the amount of $4.13 will be paid; in respect of each Coupon No. 11, face value $30.00, the amount of $41.30 will be paid.

Current liabilities	12,219,602	2,074,647
Reserves	5,032,922	5,123,455
Properties	22,954,205	22,373,964
Current assets	20,720,183	12,438,623
Deferred charges	154,561	104,848
Total assets	43,828,950	35,017,435

In his report to shareholders, W. W. Butler, president, made the following comment: "As stated in the previous report, the outlook at the commencement of the year was uncertain, and the high cost of labor and materials caused the 1920 equipment program of the Canadian railroads to be considerably delayed and eventually greatly curtailed. In order, therefore, to keep the various plants operating during the earlier months of the year, your directors undertook substantial contracts for repairs to cars at a relatively low margin. Retarded operations caused by delay in the receipt of materials was especially responsible for the accumulation of large inventories and for the increase in current liabilities. This condition of affairs, however, is but temporary, and the execution of the business remaining unfilled at the close of the year will, it is considered, satisfactorily restore the liquid capital of the company and materially strengthen its resources."

Canada Iron Foundries, Ltd.—A very satisfactory year was concluded by the company on September 30, 1920, both as regards earnings and profits. Earnings for the twelve months, before depreciation and other charges, amounted to $603,562, an increase of $114,619 over the preceding period. After making provision for depreciation, interest on debentures, for the maintenance of non-operating plants and for the proportion of expenditure on the company's plants charged against revenue, there remained an amount of $183,611 available for dividend purposes, or equal to 4.7 per cent. on the outstanding preferred stock of the enterprise which during the year was placed on a 4 per cent. basis. When all deductions were made and the balance carried over from the previous year added, there remained the sum of $194,855 at the credit of profit and loss account. Of this amount $50,000 was transferred to reserve and the balance of $144,855 carried forward, as compared with $166,356 carried forward last year.

The balance sheet shows reductions in investments and cash, and in preferred and common stock. In regard to the latter two, the president explains that readjustments in connection with the winding-up of the accounts of the liquidators of the Canada Iron Corporation caused such changes. Inventories are very much higher. Comparisons are as follows:—

	1920.	1919.
Real estate, buildings, etc. ..	$4,911,553	$5,197,763
Inventories	1,090,634	736,122
Accounts receivable .	1,100,614	840,142
Investments . .	636,340	683,859
Cash	85,543	129,993
Total assets	8,119,330	7,604,927
Preferred stock	3,877,800	3,965,800
Common stock .	1,598,900	1,800,000
Debenture stock	809,298	793,298
Bank loan	402,365	......
Reserve fund	700,000	650,000

RECENT FIRES

College of Ste. Anne de la Pocatiere, Valued at $500,000, was Destroyed by Fire—Several Stores in Quebec Damaged with a Loss of $50,000

Beverly, Alta.—December 5—The residence of W. A. Traux was destroyed by fire. The fire started in the kitchen.

Ladysmith, B.C.—December 3—The shingle mill of the New Ladysmith Lumber Co. was damaged by fire. The loss of property is $31,000, with insurance of $13,750.

London, Ont.—December 13—Cigarette smoking did damage to the extent of $2,000 to the Aged People's Home.

Moncton, N.B.—December 10—The plumbing shop of Wm. Watson, Main Street, was damaged by fire, as well as the rear of the residence. The loss is $1,800, with $1,000 insurance.

Montreal, Que.—December 11—Residence of J. A. Maynard, 1474 Chabot Street, was damaged by fire. The fire was of incendiary origin.

Quebec, Que.—December 9—A fire broke out in the shoe store of Louis Deschenes, 58 St. John Street, and damaged the adjoining stores. The loss is estimated at $50,000.

December 15—The College of Ste. Anne de la Pocatiere, situated on the River St. Lawrence, about 70 miles from here, was destroyed by fire. The college was valued at $500,000.

Tilbury, Ont.—December 9—The Tilbury flax mill, which was owned and operated by the Ontario Flax Co., was damaged by fire. The loss is estimated at $7,000.

Toronto, Ont.—December 10—A fire broke out at 21 Prescott Avenue, occupied by the Ivy Storage Battery Co., causing $325 damage to building and contents. Residence of Julius Weiner, 164 Brunswick Avenue, was damaged to the extent of $2,000 when a fire broke out, caused by a defective furnace.

Winnipeg, Man.—December 14—A fire broke out in Main Street, opposite the city hall. Four business places, including the Manitoba and City Hotels, suffered loss.

Woodstock, Ont.—December 13—A fire broke out in the bindery department of the "Sentinel-Review," doing damage to the extent of $10,000.

ADDITIONAL INFORMATION CONCERNING FIRES

Gravenhurst, Ont.—November 30—The Muskoka Free Hospital for Consumptives, owned by National Sanitarium Association, suffered a total loss by a fire which was caused by the wiring.

Orillia, Ont.—December 4—Factory and part of the contents of the Electro Foundries was destroyed by fire. The loss is $22,500, with insurance of $30,000.

Ottawa, Ont.—November 23—Residence of Ero. D. Wright, K.C., was damaged by a fire which was caused by matches. The loss is estimated at $1,158.50 on contents and $1,611 on building. There was insurance of $7,100 in the Phœnix and Mercantile Insurance Companies.

Sydney, N.S.—November 22—The building belonging to J. F. Merchant and Sons was damaged by a fire which was caused by electric irons. The loss on contents is $125,000 and $13,700 on the building.

Vancouver, B.C.—The fire chief's report for the month of November shows that during the month there were 82 alarms. The total loss sustained by fire for the month, exclusive of the "Ballena" marine loss of November 13th, was $14,208, of which $10,168 was covered by insurance. The following shows the cause of fire: Backfiring autos 1, cigarettes 2, matches 2, chimney fires 34, defective chimney 1, defective fireplaces 1, electrical origin 5, smoking in bed 2, sparks 3.

A vast reservoir, costing approximately $400,000, is to be constructed immediately west of Melville, Sask., by damming Mud Creek. The reservoir has been decided on by officials of the Canadian National Railways. This will give Melville a permanent supply of water.

War Time Expansion Was Largely a Delusion

Figures Which Seem to Indicate Growth More Often Really Show Reduction in Business—Currency Inflation and Decreased Purchasing Power of Gold Are Responsible—A Comparison of Some Trade, Banking, Insurance and Other Figures

IT was easy for business to expand during the war. Anyone who could acquire a little property, whether it be a factory, a house or a motor car, found his wealth increasing of its own accord. Assets which were physically unchanged could be written up in value at the end of each year, because the dollar, in terms of which they were valued, was going down. But the United States, and even the Canadian dollar, are among the soundest units of currency in use today. The greater depreciation of the pound, of the franc, the lire, the mark and the rouble have expanded nominal wealth in European countries to amazing totals.

The public, which at first was dazzled by the apparent buoyancy of personal and public finances during the war, soon found that the apparent prosperity was visionary. Money was plentiful but its purchasing power was daily becoming less. Material goods to satisfy human wants were becoming scarcer, and the real income of the average individual was decreasing. Nominal profits and wages, it is true, increased, but few companies or wage-earners found themselves making any real progress. Meanwhile investors, salaried employees and others with a fixed money income found themselves slipping back at a disheartening rate. It was easy to cite figures of national prosperity, but difficult to convince the individual.

In Canada the purchasing power of the dollar is measured fairly well by the index number of wholesale prices, compiled monthly by the department of labor. The number for May, 1920, was 356.6, compared with 136.3 for May, 1914. This is an increase of 161 per cent. over the war and post-war period. It represents the weighting which must be applied to the present Canadian dollar to find how many of them would buy what one dollar would in 1914; that is, $1.61 of our present money will buy the same amount of a representative group of commodities as would $1 in 1914. When this decline in purchasing power is applied to some of the figures commonly quoted as showing expansion, actual decreases are found, for one dollar at present is the equivalent of no more than thirty-eight cents in 1914.

A correct comparison, therefore, of monetary figures for the year 1914 requires that this decline in the real value of the dollar be taken into consideration. As most of the figures used below are for the calendar years 1914 and 1919, or for financial years ending early in 1915 and 1920, the best index numbers to use as a basis will be those for December, 1914, and for December, 1919, coming at the end of the respective years or during them. These numbers are respectively 137.3 and 322.7, showing an increase of 135 per cent.; in other words, the dollar in December, 1919, would buy just about what 42.5 cents would buy in December, 1914.

Trade figures have expanded greatly during the past six years. When the present figures are reduced in proportion to the reduced purchasing power of the dollar, however, our actual trade has contracted, as the following comparison of figures for the fiscal years ended March 31, shows:—

	1914	1920	1920 (weighted).
Imports	$ 619,065,728	$1,064,516,169	$ 453,000,000
Exports	455,437,224	1,286,658,709	547,000,000
Total	1,074,503,052	2,351,174,878	1,000,000,000
Exp. to U.K.	215,253,969	489,151,806	208,000,000
Imp. from U.K.	132,070,362	126,269,274	54,000,000
Exp. to U.S.	163,372,825	464,029,014	197,000,000
Imp. from U.S.	395,565,328	801,632,849	341,000,000

The trade figures for the fiscal year ended March 31, 1914, have been used in this comparison, as those for the year ended March 31, 1915, were abnormally low. The index number changed very little between December, 1913, and December, 1914. The comparison shows that after the 1920 dollar has been reduced to its 1914 equivalent, exports, including exports to the United States, have really increased. Our total trade, and our imports, have all been reduced.

Banking Business has Contracted

A similar comparison of the more important banking figures gives the following results:—

	March, 1914.	March, 1920.	March, 1920 (weighted).
Circulation	$ 96,848,384	$ 231,220,770	$ 98,000,000
Demand deposits ..	345,590,642	657,412,028	280,000,000
Savings deposits ..	646,143,604	1,197,719,570	510,000,000
Deposits abroad ...	114,523,736	318,277,881	135,000,000
Current loan in Canada	838,381,265	1,322,267,030	562,000,000
Current loans elsewhere	53,279,411	183,642,658	78,000,000
Call loans in Canada	69,088,240	128,233,210	55,000,000
Call loans elsewhere	145,218,223	205,202,133	87,000,000

A similar comparison of bank net profits shows:—

	1914.	1919.	1914 (weighted).
Montreal	$2,496,451	$3,314,227	$1,410,000
Commerce	2,668,233	3,074,892	1,308,000
Royal	1,886,142	3,423,264	1,456,000

It is evident, therefore, that of the above principal banking accounts, only deposits and current loans abroad have grown to any extent, and there has been a slight increase in circulation. As regards profits, the real value of these is greatly reduced, and even more than as indicated above because the 1919 profits include those of some banks absorbed since 1914.

Insurance Also Reduced

Insurance is another branch of finance which has expanded greatly. As has been pointed out already in these columns, however, it is doubtful if it has kept pace with the changed conditions. The comparison below would indicate that it has not:—

	1914.	1919.	1919 (weighted).
Fire premiums	$ 27,499,158	$ 39,914,398	$ 17,000,000
Fire losses paid	15,347,284	16,642,172	7,000,000
Fire insurance in force	3,456,019,009	5,904,396,461	2,512,000,000
Life premiums .	53,835,737	94,574,689	40,000,000
Life payments .	28,207,981	53,006,830	23,000,000
Life insurance in force	1,242,160,478	2,176,432,846	964,000,000

Similar comparisons might be applied to many other figures. Bank clearings were $8,087,728,595 in 1914, and $16,701,279,382 in 1919; but if the dollar in the latter year be considered as the equivalent of 42.5 cents in the former, it is found that clearings, instead of having increased as might be inferred, have actually decreased in terms of commodities.

Some Profits Increased

The same qualifications may be applied to the net earnings and profits of corporations, as the following illustrates:—

	1914.	1919.	1919 (weighted).
Bell Telephone	$ 2,212,617	$ 2,153,324	$ 954,000
Canadian Cottons	573,877	1,563,103	665,000
Canada Cement	1,517,059	1,907,969	812,000
Canadian Car	394,958	2,424,751	1,032,000
Canadian Locomotive	334,114	848,683	361,000
Dominion Steel	3,571,058	5,532,529	2,354,000
Steel Company	539,811	2,897,075	1,233,000
Price Bros.	594,010	2,055,782	913,000
Spanish River	31,579	1,296,921	552,000
Can. Cons. Rubber ..	479,181	2,397,577	1,019,000
Totals	$10,248,264	$23,077,714	$9,995,000

In the case of the assets of a few industrial companies the figures work out as follows:—

	1914.	1919.	1919 (weighted).
Bell Telephone	$ 40,852,099	$ 56,527,751	$ 24,500,000
Canadian Cottons ..	14,484,144	14,863,442	6,300,000
Canada Cement	35,447,514	35,143,610	14,900,000
Canadian Car	25,401,357	35,017,435	14,900,000
Canadian Locomotive	5,583,106	7,871,474	3,300,000
Dominion Steel	81,844,651	102,545,204	43,600,000
Steel Company . . .	31,302,811	47,660,389	20,300,000
Price Bros.	17,244,020	24,675,567	10,500,000
Spanish River	14,693,842	31,603,104	13,400,000
Can. Cons. Rubber ..	14,128,095	28,172,519	12,000,000
Totals	$280,981,639	$384,090,495	$163,700,000

As measured by commodities rather than by money, the above calculations show that Canadian business as a whole has contracted during the six years since the beginning of the war. Exports of Canadian produce are the only trade figures which show a real growth. Bank deposits, although in actual money they have increased enormously, have not so great a purchasing power as they had in 1914; the deposits and loans abroad show a real increase, however. Both fire and life insurance have failed to keep up with the general inflation. Bank clearings, representing the volume of business transactions as a whole, indicate that this volume has actually been reduced. Out of a representative list of ten industrial companies, none show an increase in assets, but several show an increase in net profits

In some cases the actual position may be better than these figures would indicate. Many industrial companies have not written up their assets to their full market value, fearing that this would make drastic reductions necessary in the future at a time when profits were not good. The banks have pursued the same conservative policy in the valuation of their premises. Even if the figures are approximately correct, however, they show that the Dominion is to be congratulated more for its self deception than for its progress; and that shareholders in prominent industrial companies are now receiving less real return from their investment than they did in 1914.

How do figures of the actual amounts of commodities produced, exported or imported, where they are available, bear out the above results? A comparison is as follows:—

	1914.	1919.
Wheat production (bushels) ..	161,280,000	193,260,400
Oats production (bushels)	313,078,000	394,387,000
Barley production (bushels) ...	36,201,000	56,389,400
Corn production (bushels)	13,924,000	16,940,500
Potatoes production (bushels)..	85,672,000	125,574,900
Hay and clover (tons)	10,259,000	16,348,000
Number of horses	2,947,738	3,667,369
Number of milch cows	2,673,286	3,548,437
Number of other cattle	3,363,531	6,536,574
Number of sheep	2,058,045	3,421,958
Number of swine	3,434,261	4,040,070
Gold production (oz.)	773,178	767,167
Silver production (oz.)	28,449,821	15,675,134
Copper production (lb.)	75,735,960	74,124,653
Lead production (lb.)	36,337,765	43,895,888
Nickel production (lb.)	45,517,937	44,542,953
Pig iron production (tons) ...	783,164	38,457
Coal production (tons)	13,637,529	13,586,300
Cement production (bbl.)	7,172,480	4,991,340

Regarding the crop figures, it is important to remember that 1914 was not a good year, while 1919 was a fairly good one, making the comparison more favorable to the latter. The production of livestock and of some metals was stimulated by the high prices resulting from the war. In several cases, however, the actual quantities produced were less in 1919 than in 1914.

A comparison of some exports, in quantities, is as follows:—

	1914.	1919.
Wheat (bu.)	120,426,579	41,808,897
Wheat flour (bbl.)	4,832,183	9,205,439
Oats (bu.)	34,996,664	17,879,783
Hay (tons)	191,515	492,208
Bacon (lb.)	23,859,754	120,622,092
Butter (lb.)	1,228,753	13,659,157
Cheese (lb.)	144,478,340	152,207,037
Silver (oz.)	36,758,276	19,758,478
Copper (lb.)	83,250,198	65,612,400
Nickel (lb.)	50,580,536	79,164,400
Coal (tons)	1,498,820	1,826,639

The steam railways carried 46,702,280 passengers and 101,393,989 tons of freight in 1914, compared with 78,371,716 passengers and 116,699,572 tons of freight in 1919. The corresponding figures for electric roads were 614,709,819 passengers and 1,845,923 tons of freight in 1914, and 686,124,263 passengers and 2,474,892 tons in 1919.

JUDGMENT ON DOMINION STEEL CASE

Judgment in the claim of the Dominion Iron and Steel Corporation against the Dominion government for rolling 100,000 tons of steel rails ordered by the government during the war was delivered by Sir Walter Cassels in the exchequer court on December 16. The president, in his judgment, fixed the price to be paid at the rate of $65 a ton for No. 1 rails and $63 for No. 2 rails. The claim of the company for interest and profits lost through the fulfilment of the government order was disallowed. Each side was ordered to pay its own costs.

The prices arrived at were those which had been estimated by the minister of railways, and the judgment upholds the opinion of the minister. The claim of the company was for the price rails plus compensation for profits lost through the necessary cancellation of contracts with the imperial munitions board. The company's claim for interest on profits lost was disallowed. The suit involved the sum of $1,116,000.

Remove Luxury Tax to Stimulate Business

Statement Issued by Government Maintains That Objects of Tax Have Been Accomplished—Took Effect on December 20—Sales Tax Remains in Force

(Special to *The Monetary Times.*)

Ottawa, December 23, 1920.

BY an order-in-council passed on December 18, the luxury taxes imposed at the last session of parliament were abolished, commencing December 20. The order was passed under authority of section 92 of the Consolidated Revenue and Audit Act, which empowers the government to remit any duty or toll. Exceptions are made in the case of spirituous and alcoholic liquors, medicated wines, patent and proprietary preparations containing alcohol, lime and fruit juices, fortified spirits and strong waters, perfumery and toilet preparations, playing cards and confectionery, on which the tax will still be collected. The sales tax, collected from manufacturers, wholesalers and importers, remains in force. An official statement referring to the order says:—

Official Statement

"Many important industries are completely shut down, while others have laid off their employees by the hundreds and thousands due to lack of orders, a condition brought about largely by the idea generally held by the public that this method of taxation was intended to be of a temporary character and must sooner or later be abolished. Having this idea in mind, the public had practically stopped buying, with the result that factories in many important lines could not operate and their organizations were seriously dislocated. With the winter upon us these serious and extraordinary conditions were accentuated, and it appeared clear to the government that immediate action was necessary in the interests alike of employees, manufacturers and the general public.

"Sir Henry Drayton, after an exhaustive study of the problem, reached the undoubtedly sound conclusion that the main and exceedingly necessary and useful purposes for which these taxes were imposed namely, that of curtailing extravagance, reducing prices and causing the people to think and reflect upon conditions and prices had been well attained, and that it would be unwise in the public interest to continue the taxes in face of the grave unemployment situation, and in view also of the fact that conditions and prices are steadily becoming more normal. He feels that the sooner business of all kinds can be stabilized and steadied down to normal the better it will be for everybody, and toward that end he considers it to be his duty to take prompt and extraordinary action, as in this case, to meet extraordinary conditions.

Merchants in Difficulty

"He also had in mind the situation of merchants who, in many cases, were unable to stand up under the double burden of falling values of their stocks and luxury taxes. In this connection there is no doubt the operation of the taxes checked purchases by merchants of high-priced stocks and, to that extent, was beneficial to them.

"The order was passed under authority of section 92 of the Consolidated Revenue and Audit Act, which empowers the governor-in-council to remit any duty or toll. The Laurier government exercised this power on two occasions, once in 1901, when they remitted the duty on seed wheat for the farmers in the west, and again in 1911, when, to meet a serious shortage of coal in the west, they remitted the customs duty on all coal imported at all ports west of Sault Ste. Marie. The same authority was also exercised by the last government in remitting the duty on cattle and tractors.

"The order providing remission of these excise taxes means that the taxes will not be collected on sales and importations made on and after Monday, December 20."

When Sir Henry Drayton, finance minister, brought down his last budget, there was a certain curiosity as to whether the Business Profits Tax would be included or not. Special provision was made for its continuance for twelve months, but Sir Henry Drayton said with reference to severe criticism directed against this method of obtaining revenue: "It may possibly be that with another year business will be more normal and that no business profits tax should be levied."

When the next budget is brought down there will be tremendous interest in the announcement with regard to this excess profits tax, and not alone because it was indicated that this is a temporary tax, and that it might possibly be eliminated this year. That interest received great stimulus from the government's action last Saturday in ordering the collection of luxury taxes to cease last Monday. Luxury taxes were also introduced as temporary taxes, but it is worthy of note that while the luxury taxes were introduced with the avowed object not only of providing revenue, but of checking extravagance and wasteful buying, and helping to bring about deflation, the exemption of profits from the operation of the Excess Profits Tax was increased from 7 to 10 per cent. of the paid-up capital, with the avowed object of enabling firms "to set aside more of their profits to reserves or plant extensions, and to put their business in a better position to meet the deflation period, while a check will still be held on abnormal profits."

The tax put on to help produce deflation has now been taken off, in consideration of unemployment produced partly as a result, and because it is claimed a certain deflation has been produced. As further deflation is expected in many lines, the query put insistently to the Finance Minister is as to whether the conditional promise made last year of removing the Excess Profits Tax if business became more normal will be fulfilled this year. The government has admitted the force of most of the arguments made against the Excess Profits Tax, claiming only that it is a rough-and-ready method of getting revenue at a time when it is greatly needed from those who have had exceptional prosperity in the country. They admit that it bears unjustly on some companies and on some kinds of business as compared with others; that methods of capitalization differ; that profits required in different industries differ, and that it leads many firms to spend far more in salaries, in extravagant purchases and on their business than they would otherwise do.

Luxury Tax Not Productive

The great difficulty is revenue, however. November's luxury tax collections amounted to $1,200,000, and the whole amount collected to date is about five million dollars, and would not exceed fourteen or fifteen million dollars in the best of years. It is a more serious matter with the Excess Profits Tax, which produced a revenue of $32,970,061 for the fiscal year 1918-19 and $14,145,184 for 1919-20. Up to December 20 the amounts collected this year had fallen to $23,129,455, and, with the 10 per cent. exemption coming into play for the profits earned during this year, the collections in 1921 will not come anywhere near the high levels hitherto attained, and it would be a long time before they would do so. Yet thirty or forty million dollars from luxury and excess profit taxes is a great deal of revenue to lose, even when total collections approximate the six hundred million dollars which the Dominion hopes to have received by the end of the fiscal year. If collections from other sources keep up, the Excess Profits Tax will go, however. The problem is to make up the loss. An eye has to be kept on the United States in any income tax legislation, and the customs cannot be hoped to bring greater amounts when the government is doing its best to get a favorable balance of trade to help out the exchange situation. The sales tax will probably be extended, if not to the retail trade, yet to more articles handled by manufacturers, wholesalers and importers. The idea of a federal land tax to be collected by municipalities as a super-tax on their own tax bills or on accompanying bills in return for a small percentage of receipts as commission is growing in favor here, although officials are against it as being difficult to collect. That taxation source will not be tapped in 1921, however. Stamp taxes of all kinds will probably persist for some years, and excise taxes will have to be the chief reliance for some years to come of finance ministers faced with the need of getting an increased revenue.

GOOD INVESTMENT SITUATION IN WINNIPEG

City Receives Fair Price for its Bonds, and There is Steady Local Demand for Victories—Farmers Feel Low Prices

(Staff Correspondence.)

Winnipeg, December 23, 1920.

MONEY for investment seems fairly plentiful in Winnipeg, according to T. R. Billett, a member of the local stock exchange. He states that business in connection with that institution did not indicate that there was any great scarcity of money in Winnipeg. On the contrary, there seems to be no limit to the volume of funds which were brought to light when attractive offerings were presented. Mr. Billett stated that the situation with reference to Victory bonds was very satisfactory and that there was ready absorption for all Victories, with a demand for more. The extremely high premium on United States funds made these securities attractive to United States investors. The latter were taking bonds of short maturity, in the expectation that when these were payable the rate of exchange would be much more nearly normal.

The city of Winnipeg has just made a sale of $600,000 6 per cent. thirty-year debentures. The sale was made to A. E. Ames and Co. and the Dominion Securities Corporation, the price obtained being 91.33. The sale compares favorably with recent issues. The price received for these Winnipeg bonds is higher than that received two weeks ago by the province of Ontario for its fifteen million dollars' worth of government bonds. Proceeds from this sale will be devoted to the city light and power department, regarding which, in connection with the financial powers of the city of Winnipeg, there was some criticism in *The Monetary Times* last month from a Winnipeg barrister.

Collections are Slow

Collections in the west are reported rather dull for this time of the year. Charles H. Gifford, who is in charge of the rural credits department of the Manitoba government, has stated that repayments in connection with loans were not coming in any too good. Farmers are getting very poor prices for their cereal products this year, also livestock has dropped to such a price that there is scarcely anything left for the farmer. Prices, said Mr. Gifford, for oats and barley in districts where loans had been made, were very low, being down in some cases under pre-war quotations. In districts like these where farmers have been hard hit, it will be necessary to exercise great care to secure the repayment of rural credits outstanding in the next two or three months. Premier Norris and members of the Manitoba government, who have just returned from the east, report that as a result of the conference regarding natural resources of the three western provinces, that some progress has been made towards settlement, but that it would take some time yet before anything definite was done.

Christmas business has been quite brisk this week in Winnipeg, as compared with last, caused to some extent by the removal of the luxury tax. Sales are very prevalent and goods are being sacrificed in many cases.

CANADIAN BANK OF COMMERCE PROGRESSES

The fifty-third annual report of the Canadian Bank of Commerce just issued further demonstrates the soundness of the Canadian banking system. An appreciable increase in its cash assets, a general development of business, and a net profit for the year, or roughly a quarter of a million in excess of last year, can be considered a satisfactory showing.

After paying a bonus of one per cent., in addition to the regular payment of twelve per cent., on stock, the bank is able to carry forward $1,783,979, or $356,244 more than last year, a record which should be regarded with satisfaction by the executive. In addition the bank has written off $500,000 on bank premises, an amount double that of last year, thus bearing this year a very heavy part of the cost of increasing its business. There has also been set aside $150,000 for the pension fund to provide for the increase in the number of its officers.

The extent to which the bank is facilitating Canadian manufacturing and agricultural interests is illustrated in the good increase in current loans in Canada, while the part it is playing in developing our foreign trade is shown in the foreign loans account.

An increase in cash assets is a healthy indication. These assets represented by specie and Dominion notes show an advance of $4,519,215. Another factor, which is also indicative of the general confidence in the institution, is the increase in interest-bearing deposits. These amounted to $285,665,493 at the end of November last, as against $241,916,674 at the end of the previous year. The decrease in demand deposits is directly traceable to the cessation of war financing by the Dominion government, as a year ago very large sums were held by the banks as a result of the last Victory loan campaign. There was a considerable drop in holdings of Dominion and provincial government securities. This also is no doubt due to the cessation of war financing by the Dominion government. The following figures show the trend of the principal accounts since 1916:—

	1920.	1919.	1916.
Net profits	$ 3,306,243	$ 3,074,892	$ 2,439,415
Total assets	480,760,624	479,644,205	288,427,579
Quick assets	204,017,440	219,911,724	129,341,420
Liabilities to the public	448,372,665	447,762,467	258,598,176
Capital	15,000,000	15,000,000	15,000,000
Rest account	15,000,000	15,000,000	13,500,000
Current loans in Canada ...	231,114,772	213,189,170	133,738,131
Current loans elsewhere	26,863,226	24,938,269	16,504,418

On the whole, the position of the bank is strong, and the latest statement is evidence of the careful and sound management which has brought the institution up to its present standing.

GREAT NORTH INSURANCE COMPANY

W. J. Walker, manager of the Great North Insurance Co., which is operating under the laws of the province of Alberta, with head office at Calgary, has sent the results of the company's business up to December 1, 1920. The company, which was incorporated in 1910, has total assets of more than $270,000, according to the last annual statement, and is carrying on a good business in the west, as the following figures for the eleven months of 1920 will indicate:—

	Premiums.	Losses.
Livestock	$ 25,862.43	$10,700.00
Hail	118,953.85	25,546.27
Fire	37,082.42	25,555.55
Total	$181,898.70	$61,801.82

ANOTHER "REGULATION" MEASURE GONE

A WELCOME Christmas box to the country as a whole was presented on Monday, when the finance department announced that the luxury tax had been repealed. This tax was a sound tax in many respects, as it was a direct tax, paid by those best able to pay it. But the method of collection was defective, and the cost in confusion and in actual outlay on the part of merchants added greatly to the one per cent. cost of the finance department.

The tax was another of the "regulative" measures which characterize the Drayton administration at Ottawa. Along with control of commodity prices and the security market, it has not only failed to achieve its purpose, but has also caused great inconvenience and dissension. True enough, the government maintains that the tax had accomplished its "exceedingly necessary and useful purposes . . . of curtailing extravagance, reducing prices, and causing the people to think and reflect upon conditions and prices," but in so doing it takes upon itself the credit for bringing about a movement which is world-wide in scope, and which has gone farther in the United Kingdom and across the border, where there are no similar taxes, than in this country.

The repeal of the tax is nevertheless sound, in view of present industrial conditions. Now that business is dull, a government effort to restrict business, as represented by a luxury tax, is very inadvisable. The removal of the tax has already produced a noticeable improvement, though it is a relatively small factor in the volume of business as a whole. The actual amount of revenue raised by this tax, along with that on sales and manufacturers, has been about fifty millions, and the government is this much to the good. It is important, however, that this lightening of taxation be not taken as a precedent. The maintenance of adequate revenue for many years to come is essential to sound national finance, for the debt charges and railway burden, along with that on sales and manufactures, has been about must be met annually.

THE PROPOSED UNITED STATES TARIFF

NEW customs measures now before the United States congress provide for import duties of thirty cents a bushel on wheat, fifteen cents a bushel on corn, and duties on other grains and on livestock of up to thirty per cent. This "Emergency Tariff Bill" is one of the first measures of congress under the Republican administration, and is being watched closely here, not only because of its obvious effects on this country but also as an indicator of policy. Any measure which might give rise to a discussion of retaliatory action on the part of Canada would be regrettable.

The removal of the extra 7½ per cent. war duty this year has operated to save about $100,000,000 to American exporters to this country, and in some quarters the suggestion is made that it ought to be applied anew. A more likely measure, or at least a supplementary one, would be to increase the British preference, and thus direct to British channels much of the business that now goes to the States. It is in Europe that the main hope lies of building up an export trade, and facility of importations would tend to simulate the compensating movement the other way. A sentimental preference exists throughout the Empire by reason of the common war effort, and an extended tariff preference might be in the logical order of things.

It is hoped, of course, that the ominous legislation now proposed will not pass at Washington, and there is little belief that it will this session or before the Harding Administration is installed. A certain nervousness is nevertheless displayed, and it is due to the injurious effect which an embargo against Canada would produce, particularly under the conditions that now prevail with Europe buying little wheat, and the cattle embargo keeping out Canadian cattle. The principle of reprisal is not at all favored, and it is hoped that it will be avoided; but it is very possible, if the situation should become particularly aggravated. This certainly will be the case if the new tariff proposals now under advisement at Washington should go on the statute.

THE UNEMPLOYMENT FARCE

WHILE some of the leading industries of this country are still experiencing a shortage in labor, notably the pulp and paper and the mining industries, workers remain crowded in the cities clamouring for employment, or failing that—in some cases preferable to that—support from public grants. The immediate cause of this condition is the depression being experienced by some manufacturing industries, due to the falling off in demand. The province of British Columbia and the city of Toronto have already authorized grants to relieve distress, thus prolonging a condition which is not good for the country as a whole.

If this development is but the first step in a movement from the congested cities to the rural districts, and to the north where our mining and lumbering industries are located, it will be distinctly beneficial. If, on the other hand, it is followed by an effort to force city growth, and by measures which are burdensome to industries, which are prosperous, without really helping the unemployed, it is to be deplored. The artificial condition created by war-time growth must soon be removed, and the fundamental industries of this country, which are farming, mining, lumbering and fishing, must be looked to for the solution. So long as there is hope of public support, workers will remain in the cities and demand assistance. What is needed is not charity, but work, for which there is ample scope in Canada.

THE BANK AND ITS ARMAMENT

JUST recently a Chicago bank set up in its front wall a revolving turret set with machine guns, so placed that it commanded the main banking room, tellers' cages and vault entrance on the inside and the street on the outside. Whether the battery has ever been turned loose has not been reported, but the spectacle may at least have prevented one of the daylight holdups which have been so frequent of late.

What a contrast there is between the modern bank with its electrically protected vaults, its automobile burglar alarms and its minor defensive equipment, and the older institution which placed its money in a drafty vault and protected it with a rusty shotgun. Yet even in those days the dazzle of wealth and the appeal of adventure were sufficient to cast a ray of romance over the bank. A writer in the Sterling Bank's *Teller* for December recalls how it was that his decision to enter banking resulted from a friendship with a bank junior, cultivated in the bank's quarters, where he learned to smoke, but where, most important of all, he examined the system of defence. "To a lad of my age at that time," he says, "it was wonderful to be sitting in a room knowing that the wealth of the residents of that particular village was safely stowed away in a big vault just one floor directly below. I admired my pal for his courage in guarding that treasure every evening. But my inquisitiveness led me to inquire what his plans were in the event of robbers or a safe blower. He showed me.

"It was a huge, heavy, rusty revolver. I couldn't hold it straight in my grip. It drooped like a heavy laden apple bough; and when the trigger was pulled the creak of rusty mechanism I swear would have scared any robber to death. Not a bullet in the place—just this huge weight of metal was all he had for protection.

"A radiator opened in the floor above the vault built purposely for protection afforded a wonderful opportunity for revolver play. He could easily have dropped his weapon on the robber's head. It would have killed him. Or he could have pulled the trigger once. The weird squeal of the machine would have sent him yelling for help. What a chance this lad had for catching robbers! What a work he would be doing if he could only help rid our land of such robbers. Immediately I saw a vision. I joined the staff of the Sterling Bank—but unfortunately, or fortunately, I have never yet put any lead into anything but an Eversharp pencil."

* * *

"Shop early and pay a luxury tax," was not a popular motto in this year's Christmas trade.

* * * * *

Five new licenses in one week is an indication that this country is now a very promising insurance field.

* * * * *

The drop in average wholesale prices in October from 326.6 to 317.6 is an indication of further reductions in retail prices.

* * * *

The November trade statement, with a favorable balance of $49,000,000, is one which sets a good example for the next few months.

* * * * *

The record of Victory loan bonds in the open market is a severe criticism of the policy of control enforced by the finance minister up to November 29.

* * * * *

Vancouver has just had another report on its finances. What the municipalities of the province need, however, is fewer reports and more revenue.

* * * * *

Attention to the details of shipping and packing, as outlined in an article on page 18 of this issue, will more than repay, in new orders, the amount of money spent.

* * * * *

The decision of the Supreme Court of Canada that a province can levy a succession duty on property outside of it is an important one to Ontario and Quebec, where there is a growing population of resident investors.

* * * * *

The remarks of the Saskatchewan Department of Municipal Affairs to the effect that the municipalities of the province have had a successful year is not borne out by the record of municipal defaults.

* * * * *

In the promotion of foreign trade the question of method must be subordinate to that of the field. Whether the goods can best be sold direct or through an agent depends upon the character of the market.

* * *

Any process which will make lignite a satisfactory fuel will be of great value to Canada. The project would be regarded with more hope, however, if private capital were developing it; government experience in industry in Canada has not in the past been successful.

* * *

The contention of Tom Moore, president of the Dominion Trades and Labor Congress, that the present price reductions have been engineered by combines in order that wage reductions must be enforced is too flattering to the "combines." It can scarcely be that they are responsible for both the increase and the decrease in prices.

* * *

A Case on Compensation

A Belgian woman, who lost her husband in a railroad accident, received from the company $2,000 by way of compensation. Shortly afterwards she read of a traveller getting twice as much for the loss of a leg. She went to the company and protested that the difference was unfair.

"Madam," said the official, "the two awards are perfectly fair. Four thousand dollars won't provide the man with a new leg, but for $2,000 you can easily get a new husband."

PERSONAL NOTES

W. S. Falls was recently appointed vice-president of the Sherwin-Williams Company of Canada, Limited, marking another step in his successful career. Previous to his appointment he was managing director of the company. He started with the company in 1889 as a traveller in western Ontario; in 1900 he was transferred to the maritime provinces and Newfoundland and two years later he was appointed special representative to the West Indies. In 1903 he was appointed special European representative with headquarters in London, England, where he developed extensive trade throughout the British Islands and many European countries. He returned to Canada in 1905, and upon the creation of a district in western Canada with headquarters in Winnipeg, he became sales manager. In 1912 upon the formation of the Canadian company, he was appointed manager of the western district, which position he held until 1918, when he was elected managing director with headquarters in Montreal. He is also a past president of the Canadian Credit Men's Association.

Clayton R. Burt was recently appointed manager of the Willys-Overland Company, Limited. Previous to this appointment he was assistant general manager of the Russell Motor Car Company, Limited, Toronto, and was also associated with its subsidiary companies. Mr. Burt began his business career as an apprentice with the firm of Brown and Sharpe Manufacturing Company, Providence, R.I., builders of accurate machine tools. After holding several important positions with that company for twelve years, he went to Europe in the interests of the firm. In September of 1905, he became general superintendent of factory and manager of the small tool department of the Barber-Colman Company, Rockford, Ill. During eight years with that company he designed and developed the Barber-Colman gear hobbling machine. In 1913 he came to Canada and joined the Russell Motor Car Company, and in 1914 was appointed assistant general manager.

J. B. Leadley, who for a number of years has been connected with the Bell Piano and Organ Company, Guelph, Ont., has been appointed city clerk of Guelph, to succeed the late Mr. Moore.

Geo. M. Duck has been officially appointed as manager of the Canadian Salt Co., Windsor, Ont., to succeed the late G. E. Henderson. For twenty years, Mr. Duck has served the company in various capacities, and was closely associated with Mr. Henderson in the management of the company.

Ernest Wood, who for years has been the provincial superintendent in Ontario for the Ocean Accident and Guarantee Corporation, Limited, is leaving after the close of the year for California, where he will be associated for three or four months with the Columbia Casualty Company of New York a subsidary of the Ocean Accident.

OBITUARY.

Lieut-Col. H. G. Prior, lieutenant-governor of British Columbia, died this week. He was appointed lieutenant-governor of British Columbia December 9, 1919, succeeding Sir Frank Barnard. Col. Prior was born in Yorkshire, Eng., in 1853, and came to British Columbia 20 years later. He sat in the British Columbia legislature for two years, and in January, 1886, was returned to the House of Commons by acclamation, being re-elected in the general elections of 1890, 1896 and 1900. He was sworn in as a member of the privy council and as controller of inland revenue in Sir Mackenzie Bowell's ministry in December, 1895, and held the same portfolio in Sir Charles Tupper's ministry until its resignation in July of the following year.

BANK OF HOCHELAGA

The La Banque d'Hochelaga, one of the most important French-Canadian chartered banking institutions, and whose operations are carried on largely in the province of Quebec, has just issued its report for the year ended November 30, 1920. The statement shows a situation which is in keeping with the progress usually reported by the bank each year.

Profits for the twelve months ended November 29 last amounted to $649,739, compared with $611,105 in the 1919 fiscal period, an increase of $38,634, and represented net earnings at the rate of 16.24 per cent. on the outstanding capital stock of the institution and 8.22 per cent. on capital and reserve combined.

After payment of dividends at the increased rate of 10 per cent. on the capital stock of the bank, against 9 per cent. in the previous exhibit, and deducting all allowances, including $100,000 to reserve account, bringing capital and reserve up to $4,000,000 each, there remained a balance to be carried over into the current year's accounts of $7,739, bringing the total amount standing to the credit of profit and loss account up to $83,804, against $76,064 at the conclusion of the previous twelve months.

The balance sheet section of the statement shows an increase in savings, or notice, deposits of upwards of nine millions, but those of the demand category declined by nearly $3,200,000, leaving the total $5,801,034, in excess of the aggregate contained in the previous statement, the decline in demand deposits being due to the withdrawal by the federal government of the proceeds of the last Victory loan.

Principal accounts compare as follows:—

	1920.	1919.
Total assets	$75,693,920	$71,517,806
Quick assets	29,315,275	33,907,261
Liabilities to public	67,505,480	63,448,711
Current loans	40,503,753	32,030,872
Total deposits	56,276,330	50,475,296

ROYAL BANK ESTABLISHES A RECORD

WHILE the Royal Bank of Canada is not the oldest bank in the Dominion, it has built up for itself during its fifty-two years of operation a very creditable record. The report for the year ended November 30, 1920, is a commendable one, and reflects credit upon Herbert S. Holt, president, Edson L. Pease, managing director, C. E. Neill, general manager, and on the executive as a whole.

The policy of the Royal Bank has always been a progressive one, and at the present time it has more than 709 branches in operation. The part it plays in our foreign trade is well demonstrated in the fact that it has 77 branches in the West Indies, 13 in South America, 2 in Central America, 2 in Continental Europe, one in the United Kingdom and one in the United States. The extent of its foreign business can be seen in the amount of loans abroad, which totalled $102,674,210 at the end of the year under review, and in outside deposits which amounted to $164,106,090. Both accounts showed substantial increases over the previous year.

While the bank is paying considerable attention to the foreign situation, the home field is not by any means being neglected. There has been a large increase in the accommodation afforded to Canadian business, and as a result current loans in Canada have advanced to $183,747,409, compared with $143,259,518 last year.

The principal accounts of the bank as at November 30, 1920, with comparisons, bear out the above statements:—

	1920.	1919.	1916.
Total assets	$594,670,013	$533,647,084	$253,261,427
Liquid assets	279,197,713	273,908,862	121,127,663

Call loan abroad	44,962,994	33,812,751	21,372,026

Notwithstanding the heavy demand for loans, the bank has maintained a strong liquid position, quick assets being more than 50 per cent. of liabilities to the public. From a banking standpoint nothing could be more satisfactory than the strong liquid position shown, and especially the large cash reserves which are being carried at a time when the bank is handling the largest business in its history and when the commercial and financial condition of the country and the places in which the bank operates, is under severe strain.

The shareholders' side of the statement also reveals a very favorable situation. During the year the capital of the bank has been increased by over $3,000,000 by an issue of new shares, which have been absorbed by the shareholders, and an addition of $3,134,010 has been made to the reserve fund, the capital and reserve now being each $20,134,010.

The profits for the year, after making full allowance for all bad and doubtful debts and providing for every possible contingency that may arise, amounted to $4,253,649, compared with $3,423,264 for the previous year. To a great extent the larger profits undoubtedly reflect the great business handled, as well as the larger capital which was employed. The profits, added to the balance brought forward from the previous year, made a total amount available for distribution of $5,350,067. This amount was appropriated as follows: Dividends, $2,153,159; bonus of 2 per cent. to shareholders, $402,680; transferred to officers' pension fund, $100,000, written off bank premises' account, $400,000; war tax on bank note circulation, $180,295; transferred to reserve fund, $1,[illegible],005, leaving a balance to be carried forward of $546,928.

UNION BANK SHOWS STRONGER POSITION

A contraction in loans and a stronger position is shown by the Union Bank of Canada in its annual report for the year ended November 30, 1920. Quick assets show a ratio to liabilities to the public of 54.4, as compared with 49.5 per cent. last year. The cash position of the institution was also improved, gold, subsidiary coin and Dominion notes, amounting to $18,586,316, as against $14,678,725 last year.

Current loans in Canada show a reduction from $86,529,156 to $69,849,784, but a new account under the heading of "Demand loans in Canada secured by grain," shows a balance of $10,732,755. Call loans in Canada increased by about $2,000,000, while call loans abroad were reduced by nearly $4,000,000. On the whole, the loans accounts are lower, indicating deflation which is now taking place.

As an institution which operates largely in the west, the Union Bank has made good progress in its fifty-six years of operation. An illustration of the rapid strides made during the past few years is seen in the following figures:—

	1920.	1919.	1916.
Capital stock	$ 8,000,000	$ 7,968,150	$ 5,000,000
Rest account	6,000,000	5,600,000	3,400,000
Note circulation	12,673,644	12,508,819	8,815,117
Deposits not bearing interest	49,714,051	51,119,804	29,122,848
Deposits bearing interest	85,610,464	84,376,709	60,144,940
Gold, sub. coin and Dominion notes	18,586,316	14,678,725	10,105,021
Canadian municipal and British foreign colonial securities	11,900,843	15,818,016	14,445,701
Dominion and provincial government securities	8,790,636	13,048,913	2,100,547
Current loans in Canada	69,849,784	86,529,156	49,173,367
Current loans elsewhere	4,496,251	3,672,372	846,117
Demand loans in Canadian securities by grain	10,732,755	....	....
Call loans in Canada	5,418,177	3,439,410	7,616,488
Call loans elsewhere	3,119,133	7,956,854	8,484,897
Liability of customers under letters of credit	3,450,511	7,186,940	512,281
Total assets	169,205,445	174,989,057	109,040,228

The profit and loss statement of the bank has not yet been made public, it being the custom to issue such a report at the annual meeting, which in this case, will be held in Winnipeg on January 10, 1921. From all appearances, however, the shareholders have reason for satisfaction, as a bonus of 2 per cent. was distributed in addition to the regular dividend.

STREET RAILWAYS WANT SEVEN-CENT FARES

An application of the Port Arthur Street Railway and the Fort William Street Railway for permission to increase their fares from five to seven cents was heard by the Ontario Railway Board on December 20. Both roads are municipally owned. The receipts are divided between the two municipalities by the system of using alternate fares boxes for every two runs.

PURCHASE STOCK EXCHANGE SEAT

J. F. Stewart and Co., bond dealers, Toronto, have purchased a seat on the Toronto Stock Exchange at a price of $12,500. The seat was formerly standing in the name of Charles T. Stark, of John Stark and Co. This was an extra seat in the possession of that company, the other being held by E. B. Freeland. Application is being made by J. F. Stewart and Co. for membership on the exchange.

TO PAY GRAND TRUNK RAILWAY

The Interstate Commerce Commission of the United States on December 17 authorized the Central Vermont Railway Co. to issue $1,359,016 in 5 per cent. refunding mortgage gold bonds to pay an indebtedness to the Grand Trunk Railway Co. of Canada. The Vermont road applied for permission to issue $15,000,000 in bonds, but the commission found that this amount, with $12,000,000 previously authorized, would pay the road's principal indebtedness.

AN ALLIANCE FOR LIFE

Many of the large Corporations and Business Houses who bank exclusively with this institution have done so since their beginning.

Their banking connection is for life—yet the only bonds that bind them to this bank are the ties of service, progressiveness, promptness and sound advice.

399 Branches in Canada, extending from the Atlantic to the Pacific
New York Agency: 63 and 65 Wall Street: W. M. Ramsay and C. J. Crookall, Agents
London, England, Office, 53 Cornhill: J. B. Donnelly, D.S.O., Manager
Bankers in Great Britain: The London Joint City & Midland Bank, Limited, The Royal Bank of Scotland

BANK BRANCH NOTES

T. T. Horner, formerly of the Kentville branch of the Royal Bank, has been appointed manager of the new branch at Wedgeport, N.S.

The Royal Bank of Canada has opened a branch at Coxwell and Small Streets, Toronto.

The Bank of Montreal has opened a branch at 2440 Park Ave., Montreal, to be known as "2440 Park Avenue Branch."

After some months of preparation the new superintendent's office for the Bank of Commerce at Calgary has been opened for business under the direction of J. B. Corbett, formerly of Winnipeg. Very extensive changes were made in the building in Calgary, the second and third floors now being used for the general purposes of the bank.

CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the week ended December 17, 1920, in provinces, as compared with those of previous weeks and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1919.
Dec. 17	5	17	0	1	3	1	0	5	0	32	20
Dec. 10	12	17	0	1	2	2	1	7	0	42	16
Dec. 3	5	19	0	0	1	1	0	4	0	30	16
Nov. 26	8	14	0	0	2	0	0	1	0	25	19

EXCHANGE QUOTATIONS

Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates as follows:—

	Buyers.	Sellers.	Counter.
N.Y. funds	17¾ pm	18 pm	....
Mont. funds	Par.	Par.	⅛ to ¼
Sterling—			
Demand	$4.1550	$4.1650	....
Cable transfers	4.1650	4.1750	....

Bank of England rate, 7 per cent.

New York quotations of exchange on European countries, supplied by the National City Co., Ltd., as at December 23, 1920, follow: London, cable, 354; cheque, 353¼; Paris, cable, 5.95; cheque, 5.94; Italy, cable, 3.45; cheque, 3.44; Belgium, cheque, 6.26; Swiss, cheque, 15.28; Spain, cheque, 12.95; Holland, cheque, 31.40; Denmark, cheque, 15.30; Norway, cheque, 15.30; Sweden, cheque, 19.80; Berlin, cheque, 1.39; Greece, cheque, 17.00; Finland, cheque, 7.50; Roumania, cheque, 2.80; Poland, cheque, 1.18.

RAILROAD EARNINGS

The following is the approximate gross earnings of Canada's transcontinental railways for the first two weeks in December:—

Canadian Pacific Railway

	1920.	1919.	Inc. or dec.
December 7 .	$5,215,000	$3,797,000	+ $1,418,000
December 14 .	5,179,000	3,935,000	+ 1,244,000

Canadian National Railway

December 7	$2,678,306	$2,050,134	+ $ 628,172
December 14 .	2,550,249	1,898,694	+ 651,555

Grand Trunk Railway

December 7	$2,460,523	$1,845,848	+ $ 614,675
December 14	2,441,248	1,832,822	+ 608,426

BANK OF TORONTO'S GROWTH

At the close of the first year of operations of the Bank of Toronto in 1857, the principal accounts of the institution stood as follows: Capital and reserve funds, $439,148; deposits, $263,100; loans and investments, $1,103,078; assets, $1,268,413. A comparison of these figures with the present statement is a good illustration of how the bank has grown. About thirty-two years ago the Bank of Toronto was represented in but eight cities and towns. To-day it has 163 branches scattered throughout the country.

The annual report for the twelve months ended November 30, 1920, compares favorably with a year ago, although the reduction in holdings of securities has brought the total assets down slightly. The cash position, however, has been greatly improved, such assets amounting to $18,571,886, as compared with $14,705,222 last year. Savings deposits show a healthy increase, while current loans are also higher. Call loans have been reduced by more than $1,000,000, but a new account, call loans abroad is shown with a balance of $1,000,000.

As far as profits were concerned, the bank had a good year. The regular dividend of 12 per cent. was paid, taking a sum of $600,000; reserve for taxes took $100,000; officers' pension fund, $25,000; written off bank premises, $100,000.

A comparison of the principal figures with a year ago, and with the figures for 1916, shows the following results:—

	1920.	1919.	1916.
Total assets	$103,819,889	$109,285,118	$73,114,554
Cash assets	18,571,886	14,705,222	10,420,236
Total quick assets ...	43,021,649	49,911,625	26,957,700
Liabilities to public...	91,833,535	97,491,135	61,606,564
Current loans in Canada	56,753,148	53,888,701	42,127,316
Dep. bearing interest..	62,542,753	53,614,588	41,175,722

WEEKLY BANK CLEARINGS

The following are the Bank Clearings for the week ended December 23rd, compared with the corresponding week last year:—

	Week ended Dec. 23, '20.	Week ended Dec. 25, '19.		Changes.
Montreal	$132,456,714	$136,311,509	—	$ 3,854,795

TORONTO GENERAL TRUSTS CORPORATION

DIVIDEND No. 98

Notice is hereby given that a Dividend of Three Per Cent. has been declared upon the Paid-Up Capital Stock of this Corporation for the quarter ending December 31st, 1920, being at the rate of

TWELVE PER CENT. PER ANNUM,

and that the same will be payable on and after Monday, the 3rd day of January, 1921.

The Transfer Books of the Corporation will be closed from Wednesday, the 15th day of December, until Friday the 31st day of December, 1920, both days inclusive.

By Order of the Board of Directors,

A. D. LANGMUIR
General Manager.

Toronto, November 23rd, 1920.

Filling Orders from Customers Abroad

Services of Freight Forwarding Firms Should be Utilized in Early Stages of Exporting—Buyers' Instructions Should be Carefully Followed—Packing, Marking and Numbering—Preparation of Shipping and Other Documents

By COL. C. R. HILL
Managing Director, Hill and Co., Ltd., Toronto

(This is the seventh of a series of articles on Practical Exporting, the first of which was published in The Monetary Times of November 12, 1920.)

THE technicalities of export shipping, including the preparation of documents, are matters which are usually left in the hands of freight forwarding firms. The largest ones maintain offices of their own at the principal seaports of the world, and where they do not they have agencies or connections. The following is but a partial list of the services a forwarder may perform for his client:—

(a) Supplying information on ocean freight rates and approximate sailings.
(b) Obtaining railroad shipping authorities.
(c) Looking after storage of freight after arrival at the port.
(d) Effecting steamer bookings.
(e) Clearing shipments through custom house.
(f) Arranging deliveries to steamers.
(g) Effecting insurance for the protection of the goods.
(h) Securing bills of lading.
(i) Effecting collection of drafts.
(j) Prepare consular invoices and other documents.

At first sight, it would appear that the commission payable for this work would be high, but their fee on each shipment only runs from $2 to $5, exclusive of disbursements, and if there is a large but fluctuating amount to be done each month the services of one company may be arranged on a monthly retaining fee basis on a yearly contract.

Work May be Done by Exporter

This method is following the line of least resistance, and, while it is strongly recommended at the initial stages of export shipping, there is nothing mysterious in the procedure. Export managers and their staffs should make themselves familiar with the requirements of each customer and each country so that they may check the work of their freight forwarders and eventually take on the entire responsibility themselves as their work develops.

It is impossible in an article of this length to go into all the details of shipping routes, consular regulations, etc. One encyclopaedia on this subject uses 1,500 pages in one volume. The purpose of this article is more to furnish Canadian manufacturers with a summary of the essentials in preparation and forwarding of export traffic, dealing with the more mechanical work following the receipt of an order from abroad.

Requirements in Filling Orders

The primary requirements in successfully filling an export order are:—

First—Careful packing and preparation for shipment in accordance with details received with order.

Second—Correct execution of shipping documents.

Third—Use of best routes and rates.

It may be taken for granted that no other country in the world has the same customs regulations as Canada nor exactly the same mercantile conditions, with the possible exception of the United States, with which this series of articles does not deal. Therefore, too much attention cannot be paid to the purchaser's specifications or the terms of a letter of credit.

To save buyers paying customs penalties, specific documents must be prepared with each shipment. Nothing should be omitted because the purpose of certain specifications are not understood. The data requested may be of the greatest importance to consignees in foreign countries. Also, errors in shipping by specified routes may prove very discouraging and expensive to purchasers, as the line they specify may have greater facilities for delivery at their end, although two or more lines may look equally good at the shipper's end.

While on this general subject, it is suggested to export managers that they have their firm's name placed on the mailing list for the monthly sailing sheet of one or more of the freight forwarding houses. From this, they will be able to judge how much time they have to spare in getting a shipment away on a particular boat. These lists include sailings from both Canadian and U.S.A. ports. The Weekly Bulletin published by the Department of Trade and Commerce contains weekly lists of Canadian sailings.

Government Licenses

In war time particularly the Canadian government requires a license to export certain commodities to certain countries. Up to quite recently this applied on flour and wheat. At the time of writing there is an export embargo on coal. Generally speaking, though, the Canadian government is only too anxious to facilitate export of every commodity when such sales do not bring about domestic suffering.

Packing

On export shipments all goods which are liable to breakage should always be boxed and strapped with band iron. Crates and such like containers will often be accepted by steamship lines, but usually at owner's risk, while the extra expense of boxing and strapping will always be justified by the customer's satisfaction and repeat orders. Protection against water and dampness is of the greatest importance. The hold of any ship is very damp, while, at the other end of the journey, climatic conditions can only be guessed at. Any light articles that are susceptible to moisture should be packed in sealed cases and lined with wax paper. Machinery should be covered with a heavy grease. Ordinary initiative will dictate the best method to follow in individual cases. Occasionally it will be noticed that two or more complete cases are required to be made up, each marked and addressed, and all to be encased in one outer package. This may look unnecessary, but probably means that the buyer wishes to facilitate breaking bulk at some reconsigning point, thereby saving expense and delay at his end. For instance, a buyer in Cape Town may have a customer for one package at Durban and reship by boat while another package goes by rail to Kimberley. As each sale to these customers may have been of small bulk and his sale price a delivered one duty paid, the Cape Town buyer finds it economical and convenient to instruct shippers to place the individual consignments in one outer case consigned to him at Cape Town.

Goods of One Class

Shippers are also warned to note any specifications from buyers respecting packing one class of goods separate to another. Some customs regulations demand payment of duty on a case based on the highest tariff payable on the

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

Write for free specimen copies

THE BOND BUYER

highest rated article in the case. Therefore, if a few silver articles are included in a case containing a large number of iron articles, the customer is liable to pay duty for silver on the iron.

Marking and Numbering Packages

Each package must be plainly marked and numbered with stencil or brush. Shipping tags are useless, as they are worn off or torn off before a journey could be completed. The details of marking required differs with various countries, but it is safer to put on too much information than too little. With each order the customer usually specifies the marks required, but he does not go into any great detail, as he takes it for granted that the manufacturer's shipping department has had sufficient experience not to overlook generalities.

A correctly marked package that would fill the requirements of any country would contain the following particulars on at least two of its six surfaces:—

(a) Length in inches or millimetres.
(b) Height in inches or millimetres.
(c) Width in inches or millimetres.
(d) Cubic measurement result.
(e) Gross weight in pounds or kilogrammes.
(f) Net weight in pounds or kilogrammes.
(g) Consignee's name and address or specified mark.
(h) Shipper's name and address.
(i) Number of shipment and consecutive number of case when there are two or more cases to a shipment.
(j) Name of steamship line.
(k) "Made in Canada."
(l) Top versus bottom.

With reference to numbers, it is pointed out that the consecutive numbers shown on packages must appear on all bills of lading and other documents relating to the shipment. They will subsequently be reproduced on the ship's cargo records and form the principal means of identification when loading and discharging.

Documents

The documents required in connection with a shipment to one country may not be the same in detail as to another, and export managers who are doing their own freight forwarding work will find out individual requirements by enquiry at the proper sources of information, viz., customs, railway, steamship, insurance and foreign consular offices and at the bank where documents are to be presented for negotiation of draft.

To commence with, arrangements must be made to contract for space with the steamship company, whose boat is to perform the required ocean transportation, and the ocean charges can be settled. This contract is binding, and if shipment cannot be made in time, the company should be notified as early as possible to prevent the contracting shipper being billed with dead weight. To exchange an inland railway bill of lading for an ocean bill of lading, the former must have the steamship company's permit number endorsed on the railway receipt. In the case of combined rail and ocean carriers like the Canadian Pacific, a through bill of lading can be arranged for at an inland point covering the transportation to the foreign port. This "Received for Transportation" bill of lading differs somewhat in value from a "Shipped on board" bill of lading, inasmuch as the latter is issued at the port of sailing and indicates that the goods are actually on board. This difference is important in negotiating a draft, as some letters of credit specify that they will not accept a draft unless accompanied by an "On Board" form of bill of lading. Ocean bills of lading should only be made out direct to the consignee when goods have been paid for in advance or when the manufacturer is not collecting by draft with documents attached. Otherwise the goods should always be shown as consigned to shipper's "Order" and endorsed in blank, i.e., the shipper simply endorses his name on the back of all copies of the bill of lading, the result being that the possessors of the bills of lading are the owners of the goods until surrendered to the receiving transportation agent. There are some countries which refuse to allow shipment "To Order."

Insurance is Necessary

The next important document is an insurance certificate which has been touched on previously and which will be dealt with in greater detail in the next and last article. Suffice it to say that no bank will negotiate or accept a draft covering an export shipment unless it is protected by an insurance certificate for marine contingencies. Insurance documents should be endorsed in blank to allow for settlement of loss being made to the potential owners.

Invoices accompanying export shipments are not the common and simple forms used in domestic sales. A good deal of certificated information must be shown thereon and it would be well to obtain the blank forms sold by leading stationers. These forms show on the face the information that has to be filled in, and the certificates on the back can be filled in and signed very easily. In addition to this form information, some countries require special certificates endorsed on the face of the invoice. For instance, the South African Customs Regulations require a declaration on the cost of packing and the cost of transport, certification that prices are the open market value for home consumption, etc.

Consular invoices are required for all Central and South American countries. The forms can be secured from the respective resident consular offices in Canada. The consular invoices are merely extracts of the invoice rendered by shippers to buyers and are vised or certified to by the consul of the country to which goods are destined. The purpose is to guarantee the shipper's statements on contents and values.

When a shipment is ready to leave the factory, an export entry form must be prepared covering details required by the Canadian customs for statistics on exports. These forms may be obtained from the customs offices. They must be signed in triplicate and attached to the Inland Bill of Lading or Through Bill of Lading as the case may be. Subsequently one copy signed by the customs is returned to shipper.

DOMINION GOVERNMENT SAVINGS BANKS

A much better showing was made by the Dominion government savings banks in November, 1920, deposits during the month being $181,132, as compared with $155,350 in October. Withdrawals increased by slightly less than $1,000. The details for last month are as follows:—

Managing Director.

Exports Grow While Imports Decrease

November Trade Statement Shows Favorable Balance of $49,000,000—Export of Field Crops Showing Effects—Eight Months' Adverse Balance Being Reduced—Falling Off in Exports of Wood and Wood Products

THE trade statement issued by the Department of Customs for the month of November shows exports of domestic merchandise amounted to $147,508,002, as against $129,348,220 in October, an increase of more than $18,000,000. The reason for this showing, of course, was the increase in exports of agricultural and vegetable products, which amounted to nearly $21,000,000 for the month. Since the end of September the value of field crops which have been sent out of the country has increased by $58,000,000.

Turning to other exports, shows a decline of about $6,000,000 in wood, wood products and paper for the month, and an increase of about $1,000,000 in iron and steel. The value of exports of animal and animal products has declined considerably since a year ago. Imports on the whole show a decline of more than $7,000,000, the principal decreases being in ores, metals and non-metallic minerals, fibres and textiles and iron and steel.

Another feature of the report is that imports are only $6,000,000 in excess of the figure of November a year ago, while exports have increased about $28,000,000. Since April 1st there is an adverse balance of about $92,000,000, compared with the unfavorable balance of more than $164,000,000 at the end of September last.

Details are as follows:—

JOHN GALT, President. **H. B. SHAW, General Manager.**

Report of the Auditors to the Shareholders of the Union Bank of Canada.

In accordance with the provision of sub-sections 19 and 20 of Section 56 of the Bank Act, we report to the Shareholders as follows:

We have audited the above Balance Sheet, with the Books and vouchers at Head Office, and with the certified returns from the Branches.

We have obtained all the information and explanations that we have required, and are of the opinion that the transactions of the Bank which have come under our notice have been within the powers of the Bank.

In addition to our verification at the 30th November, we have during the year checked the cash and verified the securities representing the investments of the Bank at its chief office and principal branches, and found them to be in agreement with the entries in the books of the Bank relating thereto.

In our opinion the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the affairs of the Bank, according to the best of our information and the explanations given to us, and as shown by the books of the Bank.

UNION BANK OF CANADA

WHOLESALE PRICES AGAIN LOWER IN OCTOBER

Index Number is 317.6, Compared with 326.6 for September—Raw Materials Prominent Among Reductions

WHOLESALE prices continue to move downward. In October, the index number was 317.6, as compared with 326.6 for September, 299.6 for October, 1919, and 138.7 for October, 1914. The chief decreases appeared in the groups of grains and fodder, animals and meats, miscellaneous foods, building materials and chemicals. The group index numbers were lower than a year ago in grains and fodder, fruits and vegetables, woollens, cottons, silks, jutes, hides, leather, boots, paints and oils and raw furs, but were higher for the other groups.

The following figures, prepared by the Department of Labor, illustrate the trend of prices between the months mentioned:—

MANITOBA TO INSURE CIVIL SERVANTS

Group Scheme is Now Being Worked out—Belgo Company Makes Contract—Westmount Employees will Also Benefit

DURING the past few weeks several important announcements in the group insurance field have been made. The Belgo-Canadian Pulp and Paper Co. has concluded negotiations with the Metropolitan Life Insurance Co. for insuring its employees under the group plan. The amount of insurance varies from $500 to $3,000, according to the length of service. The insurance benefits do not in any way interfere with the Quebec Accident Compensation Act, and are over and in excess of any sums that are due to the dependents under the provisions of this act. Should an employee leave the company, he has the privilege to continue the insurance at his own cost without any medical examination, but subject to rates and conditions of the Metropolitan Life Insurance Co.

A system of group insurance for the nurses has been favored by the Hamilton Board of Hospital Governors, and arrangements will be made to carry out such a plan early next year. It is stated that when arrangements have been completed each nurse in training would be insured for a substantial amount, without cost to herself.

A resolution that group insurance be effected with the Canada Life Assurance Co. to cover all Westmount, Que., city employees, with the exception of the principal officials, was moved by Alderman Brown, seconded by Alderman Rutherford, and carried unanimously at the meeting of the council last week. The plan provides insurance of $500 for each employee of from 6 months to 1 year's service, $600 from 1 to 2 years, $700 from 2 to 3, $800 from 3 to 4, $900 from 4 to 5, $1,000 from 5 to 6, $1,100 from 6 to 7, $1,200 from 7 to 8, $1,300 from 8 to 9, $1,400 from 9 to 10, and $1,500 in the case of each employee who has served 10 or more years. This insurance is actually in effect at present, and the resolution passed merely added the official seal of approval.

For Manitoba Civil Servants

Definite assurance that the Manitoba government stands committed to the policy of providing free group insurance for all members of the civil service has been given by Hon. J. W. Armstrong, provincial secretary. "The general policy is adopted," said the minister, "but final details of the scheme have to be worked out. Data is being collected upon which the government will call for tenders from insurance companies desirous of handling this class of business. Already a large number of concerns have expressed a wish that they be afforded an opportunity in this regard."

Explaining the general terms of the insurance tentatively accepted, Mr. Axford said employees of the government would benefit to the extent of $500 a year as soon as they had been three months in the service. The original suggestion of $250 insurance on entering the service has been discarded. After six months of service, the benefit is increased to $750, and after one year, to $1,000. Thereafter, policies will be augmented $250 a year until the maximum of $3,000 is reached in five years.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended December 17th:—

Bailey Mine, 76,277; Coniagas Mine, 141,397; total, 217,666. The total since January 1st is 25,161,121 pounds or 12,580.5 tons.

Messrs. Rorie and Small announce that they have opened a branch office in Prince Rupert, B.C., and that Mr. George Rorie, C.A., will be the resident partner in charge of this office for the time being.

AUDITORS' CERTIFICATE

We Report to the Shareholders of The Royal Bank of Canada:

That in our opinion the transactions of the Bank which have come under our notice have been within the powers of the Bank.

That we have checked the cash and verified the securities of the Bank at the Chief Office at 30th November, 1920, as well as at another time, as required by Section 56 of the Bank Act and that we found they agreed with the entries in the books in regard thereto. We also during the year checked the cash and verified the securities at the principal branches.

That the above Balance Sheet has been compared by us with the books at the Chief Office and with the certified returns from the Branches, and in our opinion is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs according to the best of our information and the explanations given to us and as shown by the books of the Bank.

That we have obtained all the information and explanations required by us.

JAMES MARWICK, C.A.,
S. ROGER MITCHELL, C.A.,
of Marwick, Mitchell and Co.
JAMES G. ROSS, C.A., of P. S. Ross & Sons
Auditors.

Montreal, Canada, 18th December, 1920.

WANTED.—An active young man to take a partnership interest in an old and well-established financial and insurance business in British Columbia. Would be expected to take charge of office. Apply in the first instance to Jas. J. Salmond, President, *Monetary Times*, 62 Church Street, Toronto. 339

EXPERIENCED FIRE MEN WANTED.—The Motor Union Insurance Company, Limited, which is about to transact general fire insurance business throughout Canada, invites applications for an important position at Canadian Chief Office. Fire underwriting, field and office experience essential. Apply by letter, marked "Confidential," stating age, experience and salary, to Mm. MacInnes, Assistant Manager for Canada, 59 Yonge Street, Toronto. 336

A new city, whose name, Saguenay City, is already incorporated, is to be built, beginning next spring, near Kenogami Lake, St. John County, Quebec, by the Price Brothers Lumber Co. This firm intends to establish a very large pulp plant there. The contractors say they will need at least 4,000 men next spring.

LETHBRIDGE WILL HAVE CITY MANAGER

The citizens of Lethbridge on December 13 voted in favor of a change in the form of government from the straight Elective Commission of three to the City Manager form with an elective unpaid commission to serve in an advisory capacity. Lethbridge has had commission government since 1914, and it has been much more satisfactory than aldermanic government, but the citizens evidently think that the city manager plan will work a still further improvement. It will be a year at least before the change can be made.

BRITISH COLUMBIA ELECTRIC TARIFF

The Board of Railway Commissioners has approved the supplementary tariff of the British Columbia Electric Railway filed with the board. In an order signed by the chief commissioner, Hon. Frank B. Carvell, the company's supplement No. 1 to its tariff of maximum fares is approved. The new tariff must be published for two consecutive weeks in "The Canada Gazette." Approval is granted upon the report and recommendation of the chief traffic officer of the Railway Commission.

PORT ARTHUR BOARD OF TRADE

At the regular meeting of the Port Arthur, Ont., Board of Trade, on December 14, the officers were elected for 1921, as follows: J. L. Routly, president; W. G. Hurrell, vice-president; F. B. Allen, chairman, municipal government committee; F. D. Roberts, chairman, finance committee; E. E. Bonin, chairman, industrial committee; Wm. Scott, chairman, timber and wood committee; F. S. Wiley, chairman, home industry committee; E. T. Ross, chairman, colonization and good roads committee; W. R. Telfer, chairman, transportation committee; Stuart Coulter, chairman, publicity committee; C. Mellor, chairman, house and program committee; J. N. Robb, chairman, grain committee; Col. Ray, chairman, mining committee; A. H. Weever, chairman, membership committee; T. N. Andrew, chairman, social welfare committee; L. J. Fallis, chairman, fisheries committee; A. G. Pounsford, chairman, tourist committee; Dr. McComb, chairman, luncheon and speakers committee; A. H. Knutson; Dr. Chas. Powell.

LARGE OIL COMPANY ACQUIRED

A large commercial transaction just consummated is the purchase of the assets and business of the Winnipeg Oil Co., Ltd., with its head office in Winnipeg and over 100 branches and distributing stations throughout the prairie provinces. The purchaser is the British American Oil Co., Ltd., of Toronto. The latter company's business has rapidly expanded in eastern Canada during the 15 years of its existence. By this deal the British American comes into the western field with a business already well developed. The western business, on the other hand, will have the benefit of the British American's experience and refinery facilities, as well as connections on this continent and abroad.

Before the war, when oil products from the Far East were available, the British American sold, in addition to their own lines, certain products of the Asiatic Petroleum Co., controlled by the Shell Co. of London, for whom they acted as agents in Canada. The active officers of the British American Oil Co., Ltd., are S. R. Parsons, president, a former resident of Winnipeg, and A. L. Ellsworth, secretary-treasurer. The capital will be enlarged sufficiently to provide for the purchase just made, as well as to include large areas of prospective oil-producing territories in the Canadian northwest. Should crude petroleum be found in commercial quantities, refineries will later be established at convenient points in western Canada.

PROPERTY SUBJECT TO PROVINCIAL SUCCESSION DUTIES

Supreme Court of Canada Holds Quebec Can Levy Tax on Movable Property Outside Province Belonging to Testator Domiciled in it

THE succession duty imposed by the Quebec Succession Duty Act upon "all transmission within the province, owing to the death of a person domiciled therein, of movable property locally situate outside the province at the time of such death" is direct taxation within the province and *intra vires* the Quebec Legislature under sec. 92 (2) of the B.N.A. Act. This is the substance of the Supreme Court of Canada's decision in the case of Barthe vs. Alleyn-Sharples, on appeal from the Court of King's Bench of Quebec, on February 3, 1920.

The facts of the case were: Amongst other assets, the estate of the late John Sharples, who died domiciled in the province of Quebec, in July, 1913, comprised shares in various companies (most of them foreign), whose head offices were not in that province, of which the aggregate value was $213,039.75. The defendant Margaret Alleyn-Sharples is the universal legatee in ownership. The plaintiff Barthe, as collector of provincial revenue, sues to recover succession duties in respect of this property.

The article in question, of the Quebec Succession Duty Act, reads:—

"1387 (b). All transmissions within the province, owing to the death of a person domiciled therein, of movable property locally situate outside the province at the time of such death, shall be liable to the following taxes, calculated upon the value of the property so transmitted, after deducting debts and charges as hereinafter mentioned."

Decisions of Lower Courts

Davies, C.J., in his judgment says:—

"The Superior Court, acting upon and applying the well-known rule *mobilia sequuntur personam*, gave judgment for the plaintiff *es-qualité* for the amount of the duties levied and payable under the statute. This judgment was reversed on appeal by the Court of King's Bench in a majority judgment of that Court which held that 'the powers of the provincial legislature are not plenary but limited to "direct taxation within the province;" (British North America Act, sec. 92 (2); and that any attempt to levy a tax on property locally situate outside the province is not taxation within the province and is beyond the competence of the provincial legislature; that the taxation of transmissions within the province of property locally situate outside the province is an attempt to do indirectly that which the legislature is forbidden to do directly and is in effect taxation of property within the province; and that the property and shares in question in this case are locally situate and have a situs outside the province."

"I agree with that part of this judgment which declares the powers of the provincial legislature not to be plenary but to be limited to 'direct taxation within the province.' And I further agree that the taxation of 'transmissions within the province' of property locally situate outside it is an attempt to do indirectly that which the legislature cannot do directly, but I differ from the conclusion reached by the Court that the property and shares in question in this case are locally situate and have a situs outside of the province and so beyond the jurisdiction of the province legislature in levying succession duties. The judgment now in appeal ignores the application of the rule making the domicile of the deceased owner in questions arising out of succession and legacy duties, the test of the situs of the property and shares in question and adopts that which allots the situs to the location of the head office of the respective companies and so carries this intangible property outside of the province of Quebec.

"I may say that owing to the grave and great importance of the question I have deemed it right in this appeal again to reread all these authorities with the result that I am more firmly convinced than ever, that, in construing the powers of 'direct taxation within the province' granted to provincial legislatures by our Constitutional Act, so far as the levying of succession and legacy duties are concerned, the true rule is that which existed alike in Great Britain as in the province of Quebec at the time such act was passed, namely, that the domicile of the deceased owner of the property, and not its actual location at his death, determined which province could impose succession and legacy duties upon it. That rule is not applicable in the construction of statutes levying probate and estate duties or other taxes, but is confined to succession and legacy duties. The whole question was thoroughly thrashed out and determined in the House of Lords in the appeal case of Winans vs. Attorney-General where the rules respecting succession and legacy duties and estate and probate duties are clearly laid down and the reasons for the application of the mobilia rule to the two classes of duties, succession and legacy are given and for its non-application to estate and probate duties. I was greatly tempted to embody in these reasons of mine some extracts from the judgments of the noble lords who decided that case. They were unanimous in their reasons for the judgment they delivered in determining that so far as succession and legacy duties were concerned the domicile of the deceased owner, and not the local situation of the property, must be taken as the controlling factor."

OWNERSHIP OF CANNING PLANT

Court action involving the ownership of the Garden City Canning Co.'s canning factory in St. Catharines, Ont., was tried on December 9, and Justice Orde reserved judgment. Thomas E. Flynn and his son, J. J. Flynn, both of Buffalo, claim they own the business, and suit was brought against them by John A., Joseph M., and Catherine Flynn, brothers and sister of Thomas.

Some years ago, when the St. Catharines brothers found business bad, they appealed to Thomas and he paid over sums aggregating about $12,000, he stated in his evidence and in return he was given a deed of the factory property. The plaintiffs testified that the plant is worth fully $40,000, being capable of turning out 75,000 cans a day, and that they had merely given their brother the deed as security for the money he had loaned them. They said they were ready to pay him back any time. Both the Buffalo Flynns testified that the business had been theirs for some time, and they had financed it, and they claimed it as their own.

CLAIMS BANK CAUSED HIM LOSS

A suit for $200,000 damages has been entered against the Bank of Toronto by E. D. Barlow, Toronto. The question whether a cheque for $200 was accepted by the bank for deposit to the account of Barlow, or whether it was merely taken for collection, is the point upon which the case hinges. Barlow asserts that when he deposited the cheque he explained to the bank that he was negotiating the purchase of property in Waterbury, Conn. He says that on October 15 he cashed the cheque for $200 with the Bank of Nova Scotia. The Bank of Toronto refused to honor it. He says he was afterwards detained by the police, forced to disburse the $200, with the result that he lost the sale of property upon which he expected to make a profit of $10,000.

The Bank of Toronto says the cheque Barlow left with them was drawn in favor of a man named Shields on the American National Bank at Richmond, Va., and endorsed by him to Barlow. The bank claims the cheque was left with it for collection, and that it had refused to honor any cheque for Barlow for more than $50 till the collection had been made. At the time Barlow's cheque was presented by the Bank of Nova Scotia there were no funds to meet it. It alleges this cheque was signed "E. W. Barlow," not in accordance with E. D. Barlow's specimen signature.

News of Industrial Development in Canada

Lignite Plant at Estevan to Become a Valuable Industry — Motor Car Company for Winnipeg—Pulp Mill and Power Plant Practically Assured for Prince George—Steel Company of Canada Closes Part of Plant at Hamilton

POSSIBILITIES of a new Canadian industry, which may be very helpful in relieving our coal problems, were outlined by R. A. Ross, of Montreal, at a meeting of the Federal Council of Scientific and Industrial Research, of which he is chairman, at Ottawa recently. He gave details of what has been done and what is planned. For the past two years he has investigated the possibilities of making the large deposits of lignite coal in Saskatchewan of commercial value, and has found that lignite promises to become, through a briquetting process, a fuel equal to anthracite and at half its cost.

The plant which has been established at Estevan by the government has already demonstrated that the deposits of lignite in that district can be made of commercial value. Lignite which is young coal, half-way between peat and the ordinary bituminous variety, has in its raw state about half the fuel value of ordinary coal. Two tons of lignite, through briquetting process, can be made equal to a ton of anthracite, Mr. Ross declares. The water, which is about 33 per cent. of the lignite, is driven off and the gas contained by the coal is drawn out and used in the process. There remains a finely ground powder which has the same heat value as the powder of anthracite coal. A binder of tar, sulphite pitch or a similar substance is used and the powder is compressed into briquettes which, besides rendering the lignite valuable as a fuel, decreases the bulk of the raw product, making shipping charges less. This scheme was initiated by the research council, and it has been found that the same process can be applied successfully to the coal dust ordinarily thrown away in Canadian and American mines. It is expected that when the Dominion plant at Estevan further demonstrates the feasibility of the scheme, groups of mines throughout Canada will install similar but larger plants to make use of their waste products, while the vast deposits of lignite in the western provinces will become valuable to the nation.

"The buildings at Estevan," said Mr. Ross, "are almost complete. The machinery is all ordered and much of it is on the ground. The plant will be in full operation by April and will turn out 30,000 tons a year. This is a mere beginning. The total requirements for relieving the coal situation of the west would be several million tons. The west will naturally be the first to benefit by this process. For some years yet it will be cheaper for Ontario and Quebec to import from the United States. The great distances over which the coal has to be shipped in the west are largely responsible for the very high prices there, and if the deposits of lignite and the waste products of mines can be made useful, the coal difficulty will be relieved to a large extent.

Pulp Mill Practically Assured

Definite announcement that a new pulp and paper mill, together with a sawmill and a hydraulic power plant capable of developing approximately 50,000 h.p., the whole representing an investment of $6,000,000, would be established in the vicinity of Prince George, B.C., was made to the members of the board of trade of that city last week by Angus McLean, president of the Bathurst Lumber Co., when speaking on behalf of a new syndicate now being formed, backed by ample eastern capital.

It was announced by Mr. McLean that the plant would cover about 200 acres and would employ at least 1,000 men in the woods and at the plant when it was in full operation. It was stated by members of the party that although they had options already on about 200 square miles of pulp timber lands, they would seek shortly to secure control of about three times this amount as it would be needed in order to assure supply for the next five years at least to continue the manufacture of pulp and paper on the large scale planned.

This deal has been pending for some time, but the syndicate of capitalists has visited several sites in Prince George, and was impressed with all of them, and the location of the new mill in the district is now practically assured.

Those chiefly interested in the enterprise, as announced in *The Monetary Times* recently, include: Lord Beaverbrook, Alexander Maclaren, president of the St. Maurice Paper Co., of Quebec; Angus McLean, president of the Bathurst Lumber Co., Bathurst, N.B.; Frank Jones, president of the Canada Cement Co.; Senator Edwards, Molson McPherson, of the Molsons Bank, and Sir Chas. Gordon, of the Dominion Textile Co.

Sawyer-Massey Reopened

The plant of the Sawyer-Massey Co., Hamilton, Ont., which was closed down for a few days, has reopened. The company took the men back on condition that they accept a 20 per cent. reduction in wages. A few refused, but the majority accepted.

Seven of the eleven open-hearth furnaces of the Steel Co. of Canada at Hamilton, Ont., were closed down this week temporarily. As a result the whole plant will be greatly affected, as the open-hearth department is said to be the basis factor.

A new industry is being added to Winnipeg, Man., through the incorporation of the Winnipeg Motor Car, Ltd., with a capitalization of $1,000,000. The company has acquired properties which are being refitted for the purpose of the manufacture of motor cars. Operations are expected to commence in the near future.

The new industrial plants of Brockville, Ont., Machinery and Foundries, Ltd., is almost ready for operation. General foundry and machine shop products will be turned out, and there will be special attention paid to the manufacture of both power and hand pumps.

Trenton, Ont., electors at the municipal election will vote upon a by-law to encourage an industry for the manufacture of silver-plated ware and other metal goods by the Benedict Manufacturing Co., of Syracuse, by giving it a fixed assessment of $2,000 on all municipal rates, excepting school and local improvement, on the industry and extensions thereof for ten years.

The Webster Dry Cleaning Co., Ltd., a company which has been operating for some years at Port Elgin, N.B., has moved its plant to Moncton, N.B.

The Coleman Lamp Co., one of the largest manufacturers and wholesalers of gasoline and kerosene table lamps and lanterns in the United States, has established a branch factory and office in Toronto, Ont., to manufacture and distribute their products throughout the Dominion of Canada. The company does a large export business throughout the world, shipping six thousand of these lamps per month to London, England, five thousand to China, and the same amount to England, and have agencies in nearly every country of the world.

Announcement has been made that the Northumberland Paper and Electric Co., Ltd., and the Canada Boxboard Co. have amalgamated under the name of the Canadian Paperboard Co., Ltd. The new company operates at Montreal, Frankford and Campbellford.

The National Paper Products Co., with head office in New York City and operating a paper mill and works at Carthage, N.Y., will reopen its branch plant at Brockville, Ont.

MERCHANT MARINE TO DO BUSINESS HERE

Employers' Liability Chief Agents of British Company—United States Fidelity Has Scope Extended—Three Provincial Licenses

TWO licenses have been issued by the Dominion government, announcement to this effect having been made during the past week. The United States Fidelity and Guaranty Co. has been authorized to transact in Canada the business of forgery insurance, in addition to the classes for which it is already licensed.

The Merchants Marine Insurance Co., Ltd., has been authorized to transact here the business of fire and automobile insurance. C. W. I. Woodland, of the Employers' Liability Assurance Co., Ltd., Montreal, Que., has been appointed chief agent. The Merchants Marine is an English company, with a total annual premium income of about $2,000,000 and assets of about $7,000,000.

In addition to these licenses, three provincial authorizations have been granted. In Quebec, the Northwestern Mutual Insurance Association has been registered to transact fire and automobile insurance. M. Lapointe, Montreal, has been appointed chief agent.

In British Columbia the Union Fire and Casualty Co. has been registered to transact health and accident and automobile insurance. Head office for the province is at Vancouver, and Gorden Bell, 1332 Standard Bank Bldg., is attorney for the company. The National Fire Insurance Co. of Hartford, has also been licensed to transact tornado, explosion, inland transportation, marine and automobile insurance. The head office for the company is at Victoria, and H. T. Barnes is attorney.

New Incorporations

Three companies have been incorporated under the laws of the province of Saskatchewan, legislation having been enacted by the provincial government. The companies are: The Midwest Fidelity and Guarantee Co., Ltd., to carry on all classes of insurance business with the exception of life; the Saskatchewan Guarantee and Fidelity Co., to carry on fire and wind storm, inland transportation, inland marine, accident, employers liability, steam boiler, sickness, automobile, burglary, sprinkler, hail, livestock insurance; the Agricultural Insurance Co., Ltd., to carry on fidelity and guarantee insurance.

In Manitoba, the Farmers' Mutual Hail Insurance Co. has been incorporated with a capital of $250,000.

The Strathcona Fire Insurance Co. will apply at the next session of the Quebec legislature to empower the company to transact the business of general automabile accident, riot, water reservoir, accident, aeroplane accident, general marine, burglary and larceny, surety insurance, and to act as agents for any insurance companies and for other purposes.

Hardware and Implement Underwriters

The Retail Hardware Mutual Fire Insurance Co., of Minneapolis, the Minnesota Implement Mutual Fire Insurance Co., of Owatonna, and the Hardware Dealers' Mutual Fire Insurance Co., of Stevens Point, Wisconsin, which companies recently obtained licenses from the Dominion government, after making the necessary deposit with the Receiver-General of Canada of $50,000 each, are now ready to solicit fire business with the hardware and implement trade, on the same scale as they have been doing in the United States.

These companies were organized a number of years ago as a protest against excessive insurance rates charged by stock companies. They have been successful in the United States, for besides returning substantial dividends the three companies have accumulated over $1,800,000 in net cash surplus (assets over $3,800,000), and have insurance in force of [illegible] $[illegible]00,000,000. The licenses have been registered in Manitoba, Saskatchewan and Alberta, and business can be accepted immediately in these provinces. The companies report that inside of thirty days it is expected business may be accepted in Ontario. The companies will operate under the name of "The Canadian Hardware and Implement Underwriters," with head office at 802 Confederation Life Building, Winnipeg.

NEW INCORPORATIONS

Ed. Lacroix, Ltd., $1,000,000—Ontario Western Petroleum, Ltd.—Riverside-Silk Mills, Ltd.—Menjobagues Lumber Co., Ltd.

The following is a list of companies recently incorporated under Dominion charter, with the head office and authorized capital:—

Keystone Transports, Ltd., Montreal, $5,000; Century Roof, Ltd., Ottawa, $50,000; A. J. Reach Co. of Canada, Ltd., Toronto, $250,000; Ontario Silver Black Foxes, Ltd., Brantford, $100,000; Story Lumber Co., Ltd., Ottawa, $50,000; Canadian Perfect Wheels, Ltd., Listowel, $100,000; Geo. W. Peck and Co., Ltd., Montreal, $100,000; A. G. Spalding and Bros., of Canada, Ltd., Toronto, $300,000; Wonder Securities, Ltd., Montreal, $165,000; Boulanger, Bergevin and Co., Ltd., Lachine, $100,000.

Provincial Charters

The following is a list of companies recently incorporated under provincial charter:—

British Columbia.—Mission Public Service Co., Ltd., Vancouver, $150,000; Rupert Wine and Liquor Co., Ltd., Prince Rupert, $25,000; B.C. Bonded Attorney, Ltd., Vancouver, $10,000; Rossland Velvet Mines, Ltd., Rossland, $300,000; Wilson and Jelliman, Ltd., Victoria, $10,000; Vanderhoof Lumber Co., Ltd., Vancouver, $10,000; J. W. Campbell Co., Ltd., Vancouver, $25,000.

Manitoba.—Coliseum Theatre Co., Ltd., Winnipeg, $30,000; L'Association Fraternelle de Grande Clairiere, Ltd., Parish of Grande Clairiere, $4,000; Dauphin Theatres, Ltd., Dauphin, $200,000; Kerr's, Ltd., Brandon, $30,000; D. Coughlin and Co., Ltd., Winnipeg, $20,000; Matlock Community Building Club, Ltd., Winnipeg, $10,000.

New Brunswick.—Hampton Flour Mills, Ltd., Hampton, $24,000; Albert Mercantile Co., Ltd., Albert, $9,950; G. A. Stackhouse and Co., Ltd., St. John, $9,000; United Bakeries, Ltd., Moncton, $24,000.

Ontario.—Candy Specialties, Ltd., Hamilton, $40,000; Thompson Bros., Launderers, Ltd., Kingston, $40,000; Casey Mountain Operating Syndicate, Ltd., Toronto, $100,000; Chas. A. Branston, Ltd., Toronto, $100,000; E. S. Bryant Pattern Works, Ltd., Windsor, $40,000; Ontario Western Petroleum, Ltd., Windermere, $500,000; O'Neill Motor Sales Co., Ltd., Chatham, $150,000; National Show Car School, Ltd., Toronto, $40,000; Beau Monde Tailoring Co., Ltd., Toronto, $50,000; Routery Dresses, Ltd., Toronto, $40,000; Mack Furnace Co., Ltd., Chatham, $250,000; United Growers Packages, Ltd., Niagara-on-the-Lake, $75,000; Mead Co., Ltd., Toronto, $100,000; Pine Point Park, Ltd., Oshawa, $33,500; Ye Paris Printe Shoppe, Ltd., Paris, $40,000; Riverside Silk Mills, Ltd., Galt, $500,000; Charcoal Supply Co., Ltd., Toronto, $40,000; Canadian Dolls, Ltd., Grimsby, $50,000; Ontario Fuels, Ltd., Toronto, $40,000; Braun and Bonnick, Ltd., Toronto, $40,000.

Quebec, Que.—Ed. Lacroix, Ltd., St. George's Est, $1,000,000; Menjobagues Lumber Co., Ltd., Three Rivers, $500,000; Club des Charpentiers Menuisiers, Locale 134, Montreal, $50,000; Le Club Social des Trois-Rivieres, Three Rivers, $10,000; Queen Asbestos, Ltd., Montreal, $50,000; Laurentian Iron Co., Ltd., Montreal, $20,000; Montreal Motors Corp., Ltd., Montreal, $99,000; Barwick, Ltd., Montreal, $99,000.

Saskatchewan.—Bell Insurance Agency, Ltd., Saskatoon, $20,000; North-West Farmers and Threshers, Ltd., Sceptre, $5,000; Thompson and Co., Ltd., Shaunavon, $5,000; Shaunavon Motor Co., Ltd., Shaunavon, $20,000; Keewatin Club, Prince Albert, $5,000.

Insuring the Motive Power

The object of Business Insurance is to insure the "brains" of an organization. Knowledge, combined with administrative ability, is invaluable. Every business, large or small, depends primarily upon one or more experienced leaders. The death of any one of them would result in a heavy financial loss. There would be heavy going until the deceased official was replaced by someone of equal ability. The possession of a policy of insurance payable to the firm in the event of the death of such a leader is essential. Joint policies payable on the death of the first partner, or (preferably) separate policies on the lives of the individual partners in favor of the survivors are issued by The Mutual Life of Canada. It will be the object of the Company to adapt each Business Policy to the particular requirements of the insuring firm. Consult our representative. He will be glad to advise you regarding business insurance.

News of Municipal Finance

History of Calgary Light and Railway Departments Outlined—Net Surpluses Since Inception—Street Railway Has Deficit This Year—Taxation Measures Recommended for Vancouver—Toronto's Collections Eighty-Seven Per Cent. of Total Levy—Kitchener Tax Arrears Are Small

Kitchener, Ont.—Tax arrears are smaller than they have been for years. The total outstanding is $12,629. Last year the amount was $22,000, and in 1918, $25,000. The total levy is $563,570.

Regina, Sask.—Judgment for $27,440, obtained in Ohio courts by trustees of the Regina public schools against Spitzer, Rorick and Company, bankers, of Toledo, will stand as a result of the Supreme Court's refusal to review the case. The action arose out of a breach of an alleged contract entered into by the investment company to purchase from the school board $500,000 in debenture bonds.

Hull, Que.—The value of property in the city of Hull is placed at $15,918,425, according to the sixth annual report of the assessment department. The value af assessable property is $11,269,035 and exempted property, $4,649,390. This of the assessment department. The value of assessable property amounted to $9,641,127 and the exempted property, $4,159,722. The report gives the area of the city as 4,000 acres and its population as 32,766, and the real estate per capita is placed at $485.82. The population shows a gain of 2,180 in the year.

Swift Current, Sask.—A deficit of $148,430 in the city's sinking fund is shown in the annual report of the city commissioners for the ten months ended October 30 last. The deficit has increased from year to year. In 1918 it was $91,540, and in 1919, $119,297. The city commissioners recommend that the necessary measures be taken to reduce this shortage. The city also has a bank loan amounting to $269,142 outstanding, an increase on this item of about $18,000 over last year.

Toronto, Ont.—Finance Commissioner Ross, in his annual report on taxes collected during the year, says: "The taxes collectable in 1920 amounted to $21,242,951, an increase of $1,780,654 over the levy for 1919, due to increased assessment and rate. The total amount actually received was $18,479,117, or 86.99 per cent. of the total due, as compared with 86.10 per cent. in 1919, there being an increase of $1,722,699, or .89 per cent."

Although there were 3,828 parcels liable for sale, against which taxes outstanding amounted to $334,374, there was received prior to the date of sale no less than $281,492 in respect to 3,462, and only 300 parcels, covering $31,691, were actually sold for taxes. In thirty-five parcels the taxes against which amounted to $7,973, the prices offered were below the arrears outstanding, and were, therefore, acquired by the city. No offers were made for twelve lots.

Victoria, B.C.—The city is putting into effect a scheme which will net a little revenue from the property recently acquired at the tax sale. Two of the houses that reverted with land to the city at the 1919 sale will be repaired at a cost approximating $700, and it is expected that tenants will be found for them. The city also proposes to rent the twenty or more houses that were bought in at this year's sale. They will be repaired and put in a condition that will bear the approval of the health department, and will then be offered to tenants at prevailing rent prices.

The city budget for 1921 shows an increase from $2,291,101 to $2,106,202. The principal increases are shown under city debt, $552,903, as compared with $475,035 for 1920, and education, $583,234, as compared with $488,626 for 1920.

Hamilton, Ont.—A movement is afoot for the establishment of unified control of civic expenditures and the appointment of a commissioner of finance, who, it is contended, would save the citizens annually huge sums of money. In a bulletin just issued, the Citizens' Research Institute of Canada, which has a local advisory committee, point out that the citizens of Hamilton spend each year on current account more than an average of $4,000,000, and borrow, on an average, $1,000,000 per year. "Such expenditures," reads the bulletin, "demand unified control."

The duties of the suggested commissioner of finance are stated to be, among others, the determining of the financial capacity of the community, in order that the city may not be committed in any year to greater undertakings than it can properly finance; the compiling and submitting to the Board of Control and city council of the annual budget recommendations of the city, with recommendations and supporting data; advising the Board of Control and city council how best to fit the budget requirements to the financial capacity of the city.

Vancouver, B.C.—Dr. Horace L. Brittain, who was engaged to advise the city on taxation measures, has issued a lengthy report, outlining the situation. The main features of the plan he recommends for Vancouver are: A real property tax, as at present; a share in provincial income tax on all personal incomes, at increased rates if necessary; a business tax at a flat rate—at two flat rates, in fact, according as to whether the business is incorporated or not. He suggests a minimum income or service tax, applicable to both sexes, this to be substituted for the present provincial poll tax, and the proceeds to be made available to municipalities at least to the extent of 50 per cent. of the amount raised within their limits. Half of the provincial taxes on automobiles and theatres should also go to the cities, claims the expert.

Primarily, the investigator declined to treat with Vancouver taxation as a subject of individual character. Local problems are also provincial and national ones, and all are so closely interwoven that they are treated jointly in the report. He urges upon the authorities of this city their opportunity to perform a great national service by initiating a movement for co-operation in taxation among national, provincial and civic interests.

Calgary, Alta.—Before the Board of Trade recently, R. A. Brown, superintendent of the Calgary municipal railway, outlined the development of the civic light and railway departments since their inception. Speaking of the electric light venture, Mr. Brown stated that the beginning was made in the year 1905, when a by-law was passed to cover the cost of the original equipment. This was for the sum of $60,000, and since that date by-laws have been passed and the equipment added to until to-day the total expended amounts to $2,896,967, less depreciation and sinking fund reserve, making the total value at the end of December, 1919, of $2,181,749. The underground system was then covered by the speaker, showing its present value at $2,481,749. Mr. Brown dealt at some length with this system and showed its real value to the city. The total book value of the electric light plant as to-day he placed at $2,481,794.

With respect to revenue derived by the city from this system, Mr. Brown quoted figures to show the growth of the plant. In the year of its inception the revenue was $23,166 and the surplus $6,648, while in 1920, for the first ten months the revenue amounted to $582,592 and the surplus $25,481. For the whole year he estimated the revenue would amount to $850,000 and a surplus of $50,000 after paying all charges. The net surplus for the fourteen years and ten months of the life of the plant, according to official figures, amount to $301,271. In 1905, when operations first began, the charge for power was 14 cents per k.w. for light and 10 cents for power, while in 1919 the charges were 7 cents for light and for power 1 to 2 cents, depending upon the amount consumed. From a careful study of figures charged by private concerns in different cities in the United States, he estimated that Calgary, during the life of the plant, had saved more than $1,500,000 by running and operating the

plant themselves. He held that in this respect the city had used good judgment.

Mr. Brown then took up the question of the street railway. This was started in the year 1909, when a by-law was passed for $250,000, and the total raised by by-laws since that time brings the sum to $2,711,053 and the total expended on capital of $2,707,713. The net book value of the plant on October 31, 1920, is placed at $1,848,158. The system now has 83 cars, one scenic car and fourteen snow sweepers; single track and trolley line, 83 miles, together with repair shops, barns and Bowness Park. Mr. Brown then went on to show the revenue and expenditures of the street railway. In the year 1909 the revenue was $59,061, while in 1920, up to October, the revenue amounted to $755,201, and the net surplus up to that date $132,440.

He pointed out that the street railway department was at present facing a serious situation, as a certain part of its equipment, having lived out its natural life, now requires rebuilding. The city also has to face the matter of replacing a new foundation under the tracks in that part of the city where paved streets exist. While this was a serious situation and rather expensive, yet, he claimed, it was not serious enough to cause alarm.

The street railway finished November with a deficit of $3,621 for the month. This makes the accumulated deficit for the eleven months $31,875. In considering the probable $30,000 deficit for 1920, however, there must be taken into consideration the fact that an additional amount of more than $16,000 for depreciation will have been laid aside this year as compared with last, and a further accident damage sum, amounting to more than $3,000, which accounts for some $20,000 of the probable deficit. While fares were raised, the full increase has been in effect only about four months.

By means of the tax sale which the city has conducted there has been taken in through arrears of taxes paid up and sales of tax arrears the sum of approximately $250,000. In other words, the city has improved its tax arrears position by about a quarter of a million dollars through the instrumentality of the tax sale. This is a small amount, however, when compared with the total arrears, which aggregate more than $4,000,000.

Property owners, whose property was sold for taxes at this sale, or which reverted to the city when it was not sold to other individuals, will still have a year in which to redeem it by paying 10 per cent. interest before it goes entirely into the city's possession. The result, of course, will be that a further larger sum of the arrears, plus the interest, will be paid up before the last penalty date expires next year.

After all this is taken into consideration, however, the city will still come into possession of an enormous quantity of vacant property for the arrears of taxes. Unfortunately, practically all of these arrears have been previously hypothecated, that is, money borrowed against them, which must be repaid. While the land nominally comes into possession of the city sinking fund, there is really a first lien against it in the form of these borrowings which must be paid off before the city will own the land free of encumbrances.

Government and Municipal Bond Market

New Brunswick to Float Loan at End of Month—Winnipeg Disposes of $600,000 Securities — Victory Loan Issues Less Active and Slightly Irregular—Ratepayers to Vote on Large Municipal Expenditures in January

WITH 1920 drawing to a conclusion, a good deal of speculation as to the trend of the bond market in the new year is being made. It is confidently predicted in many quarters that there will be a favorable turn. An easing of money is expected, due to a slowing up in industry, relieving the demand on the banks, and the liquidation of loans by borrowers, many of whom, it is thought, will liquidate their inventories after the holidays, swallowing losses from this source, and try to go into the spring with a clean slate. In addition, it is believed that farmers will have just about disposed of their crops, and the banks will be further relieved from this end. Such factors will be favorable to the investment situation.

As far as known, there is one more event in the government and municipal bond market, viz., the flotation of a $1,750,000 New Brunswick loan. There are a few municipal issues, but these are not of very much account.

Bond dealers are still busy with Victories, but the activity in this regard was not so great during the past week as previously. The price movement also tended to become slightly lower and irregular. The following figures illustrate the trend:—

	Control.	Last week.		This week.	
	price.	High.	Low.	High.	Low.
1922	98	98	96¾	97⅞	95¼
1927 ..	97	97¼	95½	96½	95½
1937 ..	98	97¾	96½	98⅛	97
1923	98	97	91½	97⅛	96⅜
1933	96½	95½	94½	95⅛	94⅝
1924	97	95¼	94	95	94⅛
1934	93	94½	91⅞	93⅛	92¼

A number of issues were disposed of during the past week, among which Winnipeg, Man., was the most important. The city received a pretty good price for its securities and the bonds will be shortly offered in Canada. Oshawa and Oakville both got good prices for their debentures. The opinion was that both municipalities received a rate which was above market. The list of bids in both cases, it will be noticed, shows a considerable difference between the highest tenderer and the others.

Money By-laws in January

Each January, which is the principal municipal election month in the year, finds ratepayers confronted with numerous money by-laws, calling for expenditures on local works. January, 1921, will be no exception to the general rule, as already large expenditures are slated to which electors must give their approval. The following list, no doubt, will be much larger before the end of the year. In addition, a number of municipalities are applying to the legislatures for borrowing power without the assent of ratepayers:—

Municipality.	Amount.	Purpose.
Avonmore, Ont...	$ 9,000	Hydro-electric plant.
Midland, Ont. ...	100,000	New town hall.
Ottawa, Ont.	260,000	Fire station and quarry.
St. Thomas, Ont..	233,000	Concrete dam.
St. Thomas, Ont..	50,000	Gas mains.
N. Walsingham, Ont.	5,000	Municipal hall.
Brantford, Ont. ..	460,000	Schools, collegiate and water.
Sarnia, Ont.	94,000	Water mains and waterworks.
Vancouver, B.C...	3,666,000	Roads, streets, schools and water.
London, Ont.	257,000	Street railway.
Hamilton, Ont.....	6,114,600	Municipal gas plant.
Hamilton, Ont.....	1,500,000	Hospitals, nurses' home, road.
Mimico, Ont.	14,000	Purchase of town park.
Scarboro, Ont.. ..	25,000	Township cemetery.
Toronto, Ont.. .	700,000	Athletic stadiums and motor busses.

Why Not Select a Convenient Investment?

When you have money to invest, it is advisable for you to place it in a security where principal is safe, where interest is promptly paid and easily collected, and which you can readily convert into cash.

Then why not buy Canadian Government or Municipal Bonds? These bonds offer the highest grade of security, are easily marketable and the interest coupons, which are attached to each bond, need only be clipped off and deposited in your bank on the due date.

At existing prices, these bonds yield from 6.70% to 7.25%.

Coming Offerings

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Bienville, Que.	$ 25,000	6	10-yr. ser.	Dec. 27
Kenora, Ont.	82,320.25	6½ & 7	Various	Dec. 29
New Brunswick	1,750,000	6	15-years	Dec. 30
Scarboro Tp., Ont....	130,000	7	30-instal.	Jan. 6
Decker S.D., Man. ...	40,000	7	......	Jan. 7

Scarboro Township, Ont. — Tenders will be received until January 6, 1921, for the purchase of $130,000 7 per cent. 30-instalment debentures. (See advertisement elsewhere in this issue.)

Decker S.D., Man.—Tenders will be received until January 7, 1921, for the purchase of $40,000 7 per cent. debentures, particulars of which will be found advertised elsewhere in this issue.

New Brunswick.—The province is calling for tenders up to December 30, 1920, for the purchase of $1,750,000 6 per cent. 15-year debentures, dated January 1, 1921. Particulars will be found in the advertisement elsewhere in this issue. One million of this flotation will be expended by the province in the development of the Musquash Falls power, near the city of St. John. This power will be sold to the municipality for distribution. A customer is, therefore, assured. Seven hundred and fifty thousand is for the purpose of paying 60 per cent. of the cost of building permanent roads, now being built in accordance with federal government specifications. Good roads are good assets, and provision is made by statute for the payment of interest and sinking fund in respect to the issue.

Debenture Notes

Eastview, Ont.—The council has decided to offer $50,000 7 per cent. water main debentures.

Fort William, Ont.— In January ratepayers will be asked to give their approval of raising $200,000 for additional school buildings.

Brockville, Ont.—The town council has authorized the issue of debentures to cover the cost of paving work amounting to $143,964.

Stamford Township, Ont.—A by-law will be submitted to ratepayers, authorizing the raising of $100,000 for a grant to the Niagara Falls hospital.

Chatham, Ont.—T. E. Cottier, city treasurer, informs *The Monetary Times* that early in January the municipality will offer $80,000 6 per cent. 15 year waterworks debentures locally in January.

Quebec, Que.—The city will seek power from the provincial legislature to borrow $876,000, made up as follows: Permanent works, $451,106; to cover exhibition deficit, $100,691; waterworks, $50,000; for reimbursement of contract guarantees, $14,203; to cover rate of exchange on redemption of loans, $260,000.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from December 1 to 4, 1920:—

Rural Telephones.—8 per cent. 15-years, annuity: Dafoe Copeland, $2,400; Reford, $1,450; Naseby, $3,000; Victor, $1,000; East End, $12,500; Elbow, $11,900; Prairie Lea, $5,000.

Scotsguard S.D., $2,800 8 per cent. 10-instalment.

Windsor, Ont.—Three money by-laws will be submitted to the ratepayers at the January elections, viz.: $175,000 for new quarters for the police department, $50,000 for purchase of an asphalt plant, and to raise a portion of the $250,000 required to build a technical school for the Border Cities. The amount of money which each municipality will contribute will be determined upon an assessment basis. The provincial government will add an equal amount to the sum raised by the municipalities, which will bring the sum total to $500,000. Sandwich, Ojibway, Walkerville and Ford will vote upon similar by-laws.

Montreal, Que.—The Catholic School Commission will apply to the provincial legislature at its next session for additional borrowing power of $700,000, for the purchase of land and the construction of new schools.

Halifax, N.S.—Local brokers are now offering $525,000 6 per cent. bonds, due January 1, 1931, at 96.365 and interest, to yield 6½ per cent., in denominations of $1,000. The city allows a commission of 1½ per cent. to all dealers .

Ford City, Ont.—Wood, Gundy and Company have purchased $52,604.59 6½ per cent. 15-instalment debentures at a price of 96.69, at which price the municipality pays about 7.05 for its money.

Saskatchewan.—The following is a list of debentures reported sold by the Local Government Board from December 1 to 4, 1920. Interest rate on all debentures is 8 per cent.:—

School Districts.—Tribune, $6,500 10-years, Touchwood Hills, $3,900 10-years, Glen Eden, $4,500 15-years, Sand Creek, $3,000 10-years; Waterman-Waterbury Manufacturing Co., Regina. Jaroslaw, $1,750 7-years; Chas. Reusch, Yorkton.

Rural Telephones.—Long Creek, $250 15-years; Regina public school sinking fund. Pilger, $21,300 15-years, Gregherd, $5,000; W. L. McKinnon and Co., Regina. Arlington, $1,050 15-years; E. B. Seargant, Grenfell. Kindred, $800 4-years; Dr. J. L. Miller, Chicago. Montmartre, $2,900 15-years; J. Burnett, Regina.

Oshawa, Ont.—Wood, Gundy and Company have been awarded $33,126 6 per cent. 20-years and $10,665 30-year debentures at a price of 93.42, at which price the town pays about 6.80 per cent. for its money. Tenders were as follows:—

Wood, Gundy and Co.	93.42
C. H. Burgess and Co.	91.95
A. E. Ames and Co.	91.91
Dyment, Anderson and Co.	91.59
United Financial Corporation	91.37
A. Jarvis and Co.	90.59

Oakville, Ont.—Wood, Gundy and Company have been awarded $111,000 6½ per cent. 20-instalment debentures at a price of 98.27, which means that the town pays about 6.72 per cent. for its money. Tenders were received as follows:—

Wood, Gundy and Co.	98.27
A. E. Ames and Co.	98.14
Dyment, Anderson and Co.	96.93
Turner, Spragge and Co.	96.38
United Financial Corporation, Ltd.	96.31
Brent, Noxon and Co.	96.26
C. H. Burgess and Co.	96.21
R. C. Matthews and Co.	95.75
Harris, Forbes and Co., Inc.	95.697
T. S. G. Pepler and Co.	94.14

Winnipeg, Man.—A. E. Ames and Company and the Dominion Securities Corporation have purchased $600,000 6 per cent. 30-year bonds at a price of 91.33, which means that the city pays about 6.68 per cent. for its money as the bonds are payable in Canada. Tenders received were as follows:—

A. E. Ames and Co. and the Dominion Securities Corporation	91.33
The National City Co., W. A. Mackenzie and Co., R. A. Daly and Co. and R. C. Matthews and Co.	91.27
Wood, Gundy and Co.	90.87
A. Jarvis and Co.	90.45
C. H. Burgess and Co., N. A. Macdonald and Co. and the Canadian Debentures Corporation	90.33
Royal Securities Corporation	87.95

An option on another $400,000 has also been taken by the purchasers.

Corporation Securities Market

Stock Values Again Undergo Considerable Impairment — Selling Pressure Increased—Riordon Bonds Offered in New York on 8.10 Per Cent. Basis—Mount Royal Hotel New Financing—Barcelona Traction Securities Offered in London

CANADIAN stock values again underwent considerable impairment this week. As far as known, there was no particular change in the general industrial and financial situation, but the stock markets here have become sensitive enough to yield to the most insignificant reports. Early in the week the report that the steel merger had been abandoned, brought about declines in several issues, among which the Dominion Steel and Canada Steamships were the most notable.

The break which occurred on December 21, however, was more serious in its effect. Prices suffered heavy declines in nearly all issues, and the only influence which can be accounted for was the collapse in Wall Street. The New York market, like in Canada, is ready to discount any bearish news, no matter how small, but fails to work in any other direction. The theory that it was the money situation which was holding the stocks back last summer, was apparently wrong, as money is becoming easy, but there is no reflection of this in present prices. Easy rates are essential to a constructive market, but they have very little influence in a movement such as at the present.

Following the break on the Montreal exchange on Tuesday, it is understood that a meeting of some of the largest brokerage houses in the city met to consider plans for the protection of stocks and the prevention, as far as possible, of further impairment in values. The meeting was not under official sanction of the Stock Exchange, and is probably preliminary to others, and nothing was given out as to what transpired. It is felt that stocks are already far below their intrinsic value in the majority of cases, and should not further be made a target for bears.

Selling Resumed

The dullness which kept the prices fairly steady last week, was replaced by rash selling, and it was because of this that values went so low. Securities were thrown on the market apparently without regard to price. The following are the figures of day-to-day trading at both Montreal and Toronto:

	Montreal.		Toronto.	
	Listed stocks.	Bonds.	Listed stocks.	Bonds.
Thursday	8,206	$ 187,800	2,643	$ 615,960
Friday	15,211	551,200	2,897	876,650
Saturday	8,648	223,800	2,309	239,650
Monday	14,624	170,150	2,583	293,300
Tuesday	17,591	175,218	2,150	287,150
Wednesday	24,713	362,850	3,072	411,850
Totals	89,023	$1,671,018	15,654	$2,754,560

The figures in the previous week were: Montreal, listed stocks, $30,907; bonds, $2,024,280; Toronto, listed stocks, 11,578; bonds, $2,549,250.

Riordon Bonds Sell Well

Offering was made this week in the United States of $6,500,000 8 per cent. 20-year first mortgage bonds of the Riordon Co., Ltd., by a syndicate composed of the Royal Securities Corp.; Harris, Forbes and Co., Inc.; E. H. Rollins and Sons; Parkinson and Burr, and Coffin and Burr. The securities are selling at 99 to yield 8.10 per cent., and in view of the Christmas season the offering is meeting with a good reception.

The new financing rounds out the Riordon Company's program, commenced earlier this year, with an issue of 8 per cent. preference stock, made by the Royal Securities Corporation. The proceeds from the sale of the bonds will place the pulp and paper enterprise in a comfortable position with respect to working capital, the issue being made partially to reimburse the company for the expenditure of approximately $14,000,000 on its Kipawa mill, which has now been completed and is operating under most profitable conditions.

Mount Royal Hotel Company Bonds

To meet the urgent demand on the part of residents, transportation and other business interests of Montreal, commercial travellers and tourists, it is proposed to construct upon the most desirable site in the city a modern fire-proof hotel of 1,036 rooms. This hotel, the Mount Royal, will be operated as a link in the chain of twenty hotels in Canada and the United States which are managed by the United Hotels Company of America.

In connection with the construction of this hotel, a company has been formed under the name of the Mount Royal Hotel Co., Ltd., with a capitalization as follows: 8 per cent. debentures to be converted into 8 per cent. cumulative preferred stock, $4,000,000, authorized and issued; common stock par value $100, $5,000,000 authorized and issued; 8 per cent. preferred stock, $5,000,000 authorized, of which $4,000,000 is to be used in payment of a like amount of debentures and $1,000,000 to remain in the treasury of the company. This capital to be subject to a first mortgage or bond issue of $3,000,000, to be increased to $4,000,000 on completion of a 400-room addition. It was found impossible to make a preferred issue at the outset with any guarantee of a dividend payment, which can be done with debentures with interest guaranteed, or practically so.

Our Service to Investors

IDLE MONEY

In these prosperous days the earning power of money is great. Industrial and Municipal expansion is calling for huge appropriations, offering investors high returns on fully secured capital.

Those whose savings are lying by, stagnating at merely nominal interest, have now an opportunity to place their funds "Idle Money"—to great advantage, assured of considerable profits practically without risk.

We have listed a number of these sound investments in which we strongly advise the placing of "Idle Money." A letter marked "Service to Investors" will put you in possession of facts concerning these certain sources of income. Address:—

Canadian Fur Auction Sales First Report—Famous Players Corporation Presents Initial Report—Increase in Consumers' Gas Prices Justified, State Civic Officials—Grand Trunk Net Earnings Lower

Quebec Railway, Light, Heat and Power Co.—Earnings of the company are making an excellent showing. Those for the first three-quarters of the present calendar year, by quarters, compare as follows: First quarter, $165,900; second quarter, $198,200; third quarter, $233,500.

Whalen Pulp and Paper Mills, Ltd.—The Reliance Mill and Trading Corporation, of New York, has been appointed to take charge of the manufacturing end of the business. John Ball, who is president of the Reliance company, was formerly with Price Bros., Quebec, and the securing of his services by the Whalen organization is regarded with satisfaction.

Loew's Theatres, Ltd.—Two of the five Loew's theatre companies operating in Canada held meetings on December 22 to consider the creation of a new company to be called Loew's (Canada), Ltd., with a capital of $5,000,000 8 per cent. cumulative preference shares of $100 each, and $15,000,000 common shares of $10 each. These were Loew's Toronto Theatres, which approved of the reorganization, and Loew's Windsor Theatres, which, after a stormy meeting, decided upon an adjournment until Tuesday, December 28th, to give the shareholders an opportunity to more fully acquaint themselves with the merits of the proposal put forward by the directors.

Grand Trunk Railway.—Earnings for the first ten months of 1920, according to revenue statements issued from London, show an increase in gross receipts of £1,897,400 and of expenses £2,511,200, leaving a decrease in net earnings of £613,800, compared with the same period in 1919. Net receipts for October showed a decrease of £63,000. The following table shows the revenue statement month by month:—

	Gross.	Net.	Decrease.
January	£1,038,500	£167,100	£ 20,000
February	957,700	*102,500	38,800
March	1,182,800	54,500	118,200
April	1,125,600	59,600	95,700
May	1,208,000	68,100	69,300
June	1,365,500	102,500	†40,200
July	1,560,000	210,100	22,900
August	1,595,400	306,300	38,100
September ...	1,669,300	98,300	188,000
October	1,796,600	219,000	63,000

Debtor. †Increase.

Consumers' Gas Co.—Finance Commissioner Ross and City Auditor Scott, of Toronto, have reported to the city council that the increase in the price of gas from $1.10 per 1,000 ft. to $1.25 was justified if the financial position of the Consumers Gas Co. was to be unimpaired and the reserve fund restored. Should the price of gas be kept at $1.10 the depleted reserve fund, it is estimated, would be entirely exhausted by 1921. It was not desirable, either from the company's standpoint or that of present and future consumers, that this should come about. On the other hand, the company could only rehabilitate the reserve fund out of any surplus left after paying dividends on the par value of the stock. Anything left after that must be applied to reducing the price of gas.

The officials say that the company must make provision for an increased expenditure of $942,869 in 1921. It will have an overdraft in the reserve fund of $89,890. The increase of 15 cents in price would give $597,457, a balance of $507,567. The 5 per cent allowed for plant renewal has not been sufficient to pay for repairs and renewals. The reserve fund in October, 1912, was $913,886. The company has power to draw from this fund if the profits do not warrant a 10 per cent. dividend. Due to this condition from 1913 to 1920 $437,781 was withdrawn from the fund.

Canadian Fur Auction Sales Co., Ltd.—Shareholders of the company held their first annual meeting in Montreal on December 15, when the report and balance sheet covering the initial year's activities was submitted. The result of the twelve months' operations, it was explained, had been adversely affected by the changes in the fur trade during the period, but an early improvement was looked for and the future of the company regarded with optimism. No action was taken on the preferred dividend, the directors having come to the decision to await a clarification of the situation before announcing the usual quarterly payment of 1¾ per cent.

There was a good representation of shareholders at the meeting, during which was discussed the conditions prevailing in the fur market. The opinion was expressed that furs would continue in demand, and that, notwithstanding the fact that values had suffered considerably from a period of speculation, prices would gradually be re-established. The fur business, it was pointed out, was essentially a Canadian basic one, and while, like other trade lines, has been subjected to the recent depressing influences, was capable of being developed along highly prosperous lines in the near future. The company held a successful auction sale in March of this year, and will probably hold another in January.

Famous Players Canadian Corporation.—The first annual report of the company, which is now in the hands of shareholders, is in accordance with the forecasts made recently. The consolidated balance sheet covers operations for the twelve months' period ended August 28, 1920, and shows profits including surpluses of subsidiary companies as at September 1, 1919, of $324,196, out of which were paid preferred dividends of $180,000, leaving $144,196 to be carried forward to the credit of profit and loss. As is indicated in the report, these earnings were derived almost entirely from the operation of the sixteen theatres purchased by the corporation out of the proceeds of its second preference share issue. These earnings were therefore obtained practically without benefit of earning-power resulting from the construction and acquisition of new theatres, for the financing of which public issue of the first preference shares was made, and cannot therefore but be regarded as satisfactory.

Total assets are placed at $13,756,000. Current assets total $2,786,154, including $981,684 call loans and cash, while current liabilities total only $114,091, leaving net current assets of $2,672,063, a strong showing, and one reflecting the holding by the corporation of large sums in cash for expenditure on the completion of new theatre buildings now in course of construction. It was felt that these theatres could probably be completed at a less cost in 1921 than if they had been rushed to completion in 1920; for the best authorities are looking for some recline in building costs next year. The report places the number of theatres now operating at twenty, with seating capacity of 19,500.

Referring to the corporation's extension program and to its future earnings, Adolph Zukor, president, says in part:—

"Actual realization of the corporation's chain of motion picture theatres from coast to coast is well within sight, and such satisfactory results from the operation of the sixteen nucleus theatres now in operation, and with earnings from the larger theatres under construction becoming available with the commencement of the year 1921, it is expected that the profits of your corporation for the ensuing year should be satisfactory."

DEBENTURES FOR SALE

SALE

PROVINCE OF NEW BRUNSWICK DEBENTURES

$1,750,000 Fifteen-Year Six Per Cent.

Sealed Tenders endorsed "Tenders for Province of New Brunswick Debentures," addressed to the undersigned, will be received for the purchase of $1,750,000.00 (one million seven hundred and fifty thousand Dollars) fifteen-year Debentures of the above Province, to be dated January 1st, 1921, bearing interest at the rate of six per centum per annum, payable half-yearly on the 1st of January and 1st of July.

1,000	Debentures numbered J1 to J1,000, for Electric Power Development.	$1,000,000
750	Debentures numbered K1 to K750, for Federally Aided Permanent Roads.	750,000
	Total	$1,750,000

Full payment for Debentures with accrued interest to date of payment to be made at the Bank of Montreal, Fredericton, on delivery of Interim Securities at said Bank. Interim Securities to be exchanged for definite debentures on completion. by the Purchaser of the Issue.

Tenderers are requested to submit two bids—one for Debentures payable in Canada and New York, and one for Debentures payable in Canada only.

Tenders to be delivered to the undersigned not later than 3 o'clock p.m. on 30th December, 1920. Tenders must be for the whole amount offered, and must be accompanied by marked cheque for $10,000, to be applied in the case of the successful Tenderer in payment for the Debentures.

All bids must be made in Fredericton Funds.

The Right is reserved to reject any or all Tenders. Tenders containing conditions varying from above will not be considered.

THE PROVINCIAL TREASURER,
Province of New Brunswick,
Box 540,
Fredericton, N.B.

Fredericton, N.B.,
15th December, 1920.

329

TOWNSHIP OF SCARBOROUGH

Tenders will be received by the undersigned up to and including the Sixth day of January, one thousand nine hundred and twenty-one, for the purchase of One hundred and thirty thousand Dollars ($130,000.00) Township of Scarborough debentures.

The debentures are issued for water works purposes, and are payable at the Dominion Bank, Market Branch, Toronto, in equal annual instalments of principal and interest during thirty years, commencing December 15th, 1921, and bear interest at seven per cent. per annum (coupons), payable yearly.

The By-laws and Debentures may be seen at the Dominion Bank, Market Branch.

No tender necessarily accepted.

Address tenders to

J. H. RICHARDSON,
Township Treasurer,
West Hill, Ont.

330

December 16th, 1920.

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 29th day of December, 1920, for the right to cut pulpwood and pine timber on a certain area situated on the North Shore of Lake Superior, and territory adjacent thereto, in the district of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet board measure on pine, that they are prepared to pay as a bonus in addition to dues of 80c. per cord for spruce and 40c. per cord for other pulpwoods, and $2.50 per thousand feet board measure for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council for the right to operate a pulp mill and a paper mill on or near the area referred to.

The successful tenderer shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honourable the Treasurer of the Province of Ontario, for twenty-five thousand dollars ($25,000), which amount will be forfeited in the event of their not entering into agreement to carry out the conditions, etc.

The highest or any tender not necessarily accepted.

General terms and conditions of sale, together with particulars and description of territory, may be had on application to the undersigned.

BENIAH BOWMAN,
Minister of Lands and Forests.

Toronto, 1920.

N.B.—No unauthorized publication of this notice will be paid for. 312

CONSOLIDATED SCHOOL DISTRICT OF DECKER, No. 320

DEBENTURES FOR SALE

Sealed tenders addressed to the undersigned will be received up to 6 o'clock p.m. of Friday, January 7th, 1921, for the purchase of the following debentures and interest accrued from the first of August, 1920:—

Nineteen debentures for $1,000.00 each, maturing, one on the first day of February of every year from 1922 to 1940, inclusive.

One debenture for $21,000.00, maturing on the first day of February, 1941.

These debentures, to a total of $40,000.00, are coupon-bearer, and carry interest at 7% per annum from the first day of August, 1920. The first coupon is payable February 1st, 1922, and the remainder annually on February 1st.

Principal and interest are payable at the Bank of Hamilton, Decker, Manitoba. Debentures will be delivered and must be settled for at the same place.

The highest or any tender not necessarily accepted.

For any further information, address

HERBERT THOMPSON,
Secretary-Treasurer,
Decker, Manitoba.

CORPORATION SECURITIES MARKET

(Continued from page 42)

N. A. MacDonald and Co., Ltd., Montreal, Toronto and Ottawa, are handling the financing of the company. At present the $4,000,000 8 per cent., convertible debentures are being offered at par an accrued interest, with a bonus of 40 per cent., common stock. The debentures are in denominations of $100, $500, $1,000 and $5,000, are dated December 1, 1920, with coupons payable semi-annually January and July 1, first coupons bearing interest for seven months. All debentures are to be converted into 8 per cent., cumulative preferred stock (fully paid and non-assessable), on July 1, 1923. The preferred stock is redeemable in whole or in part at the option of the company at any time upon payment of capital paid-up thereon plus 10 per cent., and all accrued and unpaid dividends.

Capitalization Changes

The following companies, which are operating under Dominion charters, have been authorized to increase their capital stock. In each case the new shares to be issued will have a par value of $100:

Company.	Former capital stock.	Increased to.
Georgian Bay Lumber Co., Ltd. ..	$ 200,000	$1,500,000
Norris Grain Co., Ltd.	150,000	500,000
J. H. Ashdown Hardware Co., Ltd.	2,000,000	8,000,000
Sheet Metal Products Co. of Canada, Ltd. Toronto, Ont	5,000,000	3,500,000

Capital decreased.

In order that there should be no misunderstanding, E. F. Fream, secretary of the United Grain Growers, Ltd., Calgary, Alta., has stated to *The Monetary Times* that the capital stock account of the organization has not been increased from $12,000,000 to $15,000,000, but that this refers to the borrowing power of the company. The capital stock authorized under the charter is $5,000,000, and of that amount a little more than $3,000,000 has been subscribed. It is not the intention of the company to make any public offering of stock, although sales are being made direct to farmers at all times.

The board of directors of the Asbestos Corporation of Canada met in New York on December 18, and according to information received, decided to declare the usual dividends of 6 per cent., on the common and 7 per cent. on the preferred stock of the enterprise, together with a bonus of 2 per cent. on each, all payable January 15 to shareholders of record January 1.

W. A. Green and Co., London, Toronto, Hamilton and Windsor, are offering 7 per cent., preferred stock of the Canadian Vitex Feed and Milling Co., Ltd., which company has its head office and plant at Toronto. The capital of the company is $1,000,000, and the preferred stock is being offered at par, with a bonus of common.

Barcelona Traction Bonds

An offering of £1,050,000 8 per cent. secured debentures is being made in London on behalf of the Barcelona Traction, Light and Power Co., Ltd., with head offices in Toronto. This is part of an authorized issue of £1,100,000, and is being offered at 94 per cent., redeemable within twenty years. President E. R. Peacock, in a letter to the Spanish Securities Co., Ltd., of London, which is handling the issue, states that the £1,050,000 offering has been created for the purpose of enabling the company to reduce its liability in respect of [illegible]915,[illegible]00 of its own prior lien "B" bonds, issued at par in the year 1915 to French banks and other creditors of the company in settlement of previous cash advances, an operation now rendered possible by the fall in the French franc.

Concerning the operations of the company, he said that the earnings of the operating companies should be greatly increased in future by the sale of electricity from additional hydro-electric works, which had recently come into operation, and also by the fact that existing power contracts, shortly expiring, would be renewed on more favorable terms.

Hamilton Carhartt Cotton Mills, Ltd., operating under an Ontario charter, has been authorized to increase its capital stock from $100,000 to $500,000 by the creation of 4,000 new shares, of which 2,000 shall be preference.

Shareholders of the Winnipeg Electric Railway Company have authorized an issue of $3,000,000 7 per cent. preferred shares and an increase the common capitalization.

A dividend of 1¾ per cent. on preferred, on account of arrears for the quarter ending September 30, 1918, has been declared by Wm. A. Rogers Company, together with the dividend for the current quarter. This payment will leave the outstanding arrears on preferred at 8¾ per cent., and it is expected that with each regular quarterly dividend there will be a similar disbursement of back dividends.

W. M. Aitken and Company, which is operating under the laws of the province of Quebec, has been authorized to increase its capital from $1,000,000 to $3,000,000.

RECENT FIRES

Aylmer, Ont.—December 20—The buildings on the farm of George N. Walsh, on the Aylmer Road, were destroyed by fire. The loss is $8,000.

Bracebridge, Ont.—December 18—The store on Main Street, owned by J. H. Burton, was damaged by fire. The loss on the stock is $3,000, partly covered by insurance.

Chatham, Ont.—December 16—The barn on the Park Avenue property of John Howe, just outside the city limits, was destroyed by fire.

Cheltenham, Ont.—December 18—A large barn belonging to W. H. Henry was destroyed by fire caused by a spark from a crushing engine. The loss is $6,000.

Craik, Sask.—December 22—A six-roomed school was destroyed by fire, with a total loss of $30,000.

Hamilton, Ont.—December 17—The rear of the Calvin Presbyterian Church on James Street North, near McCaulay Street, was damaged by fire. The loss is $1,000.

Jasper, Alta.—December 1—Twenty business houses and ten residences were destroyed by fire. The loss is $250,000.

London, Ont.—December 22—A lighted cigarette stub is blamed for a fire which did $12,000 damage to the buildings and stock of the London Union Rag and Metal Co., corner of York and Adelaide Streets. The insurance is $7,000. The residence of F. Cornwell, of 176 Egerton Street, was damaged by fire. The loss is $2,000.

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of one and three-quarter per cent. (1¾%) on the Preferred Stock of the **Dominion Textile Company, Limited**, has been declared for the quarter ending 31st December, 1920, payable **January 15th, 1921**, to shareholders of record December 31st, 1920.

By Order of the Board.

JAS. H. WEBB,
Secretary-Treasurer.

Montreal, 6th December, 1920. 342

WANTED.—Special Agent and Inspector, Provinces Manitoba and Saskatchewan. Headquarters, Regina. Represent three large American Companies. Good salary. Replies will be treated confidentially. Box 371, *Monetary Times*, Toronto.

Current Loans Continue to Decrease

November Bank Statement Shows Large Reduction in This Account—Savings Deposits Up Twenty Millions—Strong Cash Position and Heavy Increase in Call Loans Abroad Reflect Easier Money Conditions in Canada

	November, 1919.	October, 1920.	November, 1920.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$ 728,657,589	$ 687,651,781	$ 686,754,094	— 5.8	— 0.15
Deposits after notice	1,137,858,277	1,271,275,751	1,292,009,008	+13.6	+ 1.7
Current loans in Canada	1,189,408,523	1,405,401,227	1,357,973,118	+14.1	— 3.4
Current loans elsewhere	149,302,293	193,749,657	169,677,657	+13.4	—12.4
Loans to municipalities	52,703,363	71,374,060	65,487,171	+25.0	— 8.4
Call loans in Canada	121,751,469	113,135,902	108,471,340	—10.8	— 4.4
Call loans elsewhere	169,626,880	188,367,459	218,183,191	+29.0	+16.0
Circulation	248,073,385	252,882,760	253,576,531	+ 4.0	+ 0.5

A substantial reduction in all the Canadian loans accounts and a substantial increase in savings deposits are the principal characteristics of the November bank statement, which has just made its appearance. That savings deposits should advance $20,000,000 in one month in the face of industrial depression and increasing unemployment is perhaps remarkable, but at any rate it should indicate that conditions are not as bad as painted by some.

The change in demand deposits last month was not significant. These deposits have been pursuing an irregular course during the past year, and are now considerably below a year ago. The Dominion government drew rather heavily on its account during November, and as a result its credit balance has been reduced by about $24,000,000. Foreign deposits increased by about $12,000,000, so that, on the whole, the deposits accounts were but slightly ahead of the previous month.

The trend of notice and demand deposits in Canada during the past thirteen months is shown in the following table:—

	Deposits payable on demand.	Deposits payable after notice.
1919—November	$728,657,589	$1,137,858,277
December	703,329,292	1,138,086,691
1920—January	621,408,024	1,163,297,037
February	620,069,555	1,187,027,307
March	657,412,028	1,197,719,570
April	652,918,760	1,209,573,990
May	645,957,229	1,229,073,515
June	659,622,583	1,243,700,977
July	639,415,025	1,253,170,443
August	640,361,707	1,261,647,732
September	677,286,905	1,270,194,097
October	687,651,781	1,271,275,751
November	686,754,094	1,292,009,008

During the past six years the movement has been as follows:—

Nov.	On demand.	After notice.	Total.
1915	$406,735,171	$ 714,219,286	$1,120,954,457
1916	459,277,454	836,593,269	1,295,870,723
1917	538,869,362	1,008,657,874	1,547,527,236
1918	666,366,359	939,329,271	1,605,695,630
1919	728,657,589	1,137,858,277	1,866,515,866
1920	686,754,094	1,292,009,008	1,978,763,102

With the exception of call loans abroad, all other loans accounts showed substantial reductions. Current loans in Canada decreased by more than $45,000,000, current loans abroad dropped by nearly $24,000,000, while call loans in Canada declined by nearly $5,000,000. Municipal and provincial advances were also lower. The full extent of the business deflation which is now taking place is not clearly illustrated by these figures, however, as the current loans account has been augmented by seasonal demands.

The course of the current and call loans in Canada during the past thirteen months is given in the following figures:—

Loans.	Current in Canada.	Call in Canada.
1919—November	$1,189,408,423	$121,754,469
December	1,207,109,046	125,888,760
1920—January	1,226,962,963	132,015,334
February	1,257,015,902	127,251,919
March	1,322,267,030	128,233,310
April	1,347,238,230	125,644,859
May	1,349,079,981	119,114,493
June	1,365,151,083	115,272,587
July	1,377,276,853	115,360,894
August	1,385,470,153	113,598,923
September	1,417,520,756	114,669,611
October	1,405,401,227	113,135,902
November	1,357,973,118	108,471,340

The monthly movement of call loans abroad since January, 1917, is illustrated by the following figures:—

	1917. $	1918. $	1919. $	1920. $
January	155,747,476	132,687,066	140,819,656	170,206,805
February	162,344,556	160,239,494	155,983,681	184,469,882
March	161,616,735	167,296,701	160,116,443	205,202,133
April	159,156,054	179,818,531	155,533,666	206,229,451
May	168,692,675	172,259,879	157,176,325	213,964,182
June	159,309,133	170,034,476	167,236,045	219,214,431
July	151,875,676	167,112,836	178,098,434	203,045,209
August	176,610,625	160,544,990	174,176,578	193,888,245
September	166,480,004	159,680,810	169,532,489	186,962,960
October	151,018,747	157,040,858	158,194,085	188,367,459
November	139,832,552	171,035,732	169,626,880	218,183,194
December	134,483,482	150,248,322	172,232,161	....

Principal loans accounts, both in Canada and abroad, show the following trend in recent years:—

Nov.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1915	..$ 777,162,563	$ 55,240,955	$ 83,203,787	$135,530,562
1916 ...	813,791,947	76,087,370	89,395,370	183,250,389
1917 ...	868,973,714	95,954,524	72,178,345	139,832,552
1918 .	1,082,709,655	110,010,815	85,675,063	171,035,732
1919 .	1,189,408,523	149,302,293	121,754,469	169,626,880
1920	1,357,973,118	169,677,657	108,471,340	218,183,194

As a result of the big falling off in loans, money has apparently become easy. An increase in call loans abroad during the month of about $30,000,000 is rather significant in this connection. For the past four months this account has shown a steady decline, and the fact that in one month the increase should be almost equal to the decrease during four months would seem to indicate a sudden relaxation in the credit stringency.

The banks, no doubt, will be criticized for their policy in sending such sums to New York in view of the effect that it will have on exchange, but the proposition is purely a business one, and, as in any other trade, the banks cannot afford to have large amounts of idle stock. At the present, the demand for funds in Canada is small, due to the quietness in business; therefore the banks must employ their surplus money as best they can. Canada is, indeed, fortunate in having such a place as New York handy where such surplus funds can be sent and instantly recalled if necessary. As a result of this increase in call loans the banks' liquid position has been greatly improved.

Another factor which contributed to this increase in ratio was the good improvement in the cash position. The extent to which cash assets increased can be seen from the following figures, which show the changes for the month:—

Gold and sub-coin in Canada	— $ 2,303,136
Gold and sub-coin elsewhere	+ 4,594,411
Total change	— $ 6,897,547
Dominion notes in Canada	+ $11,723,246
Dominion notes elsewhere	— 4,260
Total change	+ $11,718,986

Of the deposit in Central Gold Reserves $9,502,533 is in gold coin; the balance is in Dominion Notes.

J. C SAUNDERS. *Deputy Minister of Finance*

Capital and Reserves

Additions to capital and reserves last month were made largely by the Royal Bank, as the following figures will show:—

Bank.	Capital subscribed.	Capital paid up.	Reserve.
Royal	$406,500	$547,120	$1,840,565
Hamilton	33,000	56,590	28,295
Merchants	......	29,712	......
Provinciale	....	10,760	......
Sterling	......	2	......
Hochelaga	......	.....	100,000
Union	......	.....	400,000
Totals	$439,500	$644,184	$2,368,860

A decline in the account, "Canadian municipal and British, foreign and colonial securities," of more than $5,000,000 was chiefly due to the repayment by the British government of the loans obtained from Canadian banks early in the war for the purchase of wheat and munitions. These loans will be paid off at the rate of $5,000,000, and sometimes $10,000,000, a month, in the future, according to arrangements recently made, so that the above-mentioned account will show reductions accordingly.

The "greatest amount of circulation during the month" was about $1,000,000 above the total in the month of October, but the figure at the end of the month was only $234,339,923, as compared with $249,165,707 at the end of the previous month.

Deposits in Central Gold Reserves decreased from $119,202,533 at the end of October to $114,902,533 at the end of November, in accordance with the change in circulation.

Five banks report a good year's business. 1921 will, however, be one which will put them to a more severe test.

NATIONAL DEBT WILL BE REFUNDED

Time For Repayment Must Extend Far Beyond Maturities of Bonds—Receipts and Expenditures Now on Greater Scale

(Special to *The Monetary Times*.)

Ottawa, December 30, 1920.

FROM a financial standpoint the year 1920 has been a critical year for the Dominion government, although it is beginning to turn the corner. For the first time since 1914 it had to renounce national borrowing as the means of meeting extraordinary expenditures. It had to get somehow enough revenue to meet current expenditures of administration, interest charges and works undertaken on capital account. For that purpose new taxes were levied, the so-called luxury taxes which have now been abandoned, and the sales tax collected from manufacturers, wholesalers and importers. This was breaking new ground for Canada, and the government could not tell just how much money these taxes would bring in. It was estimated that they would add about $85,000,000 to the national revenue, but it is believed that the budget address of Sir Henry Drayton at the session of parliament, which is expected to commence during the week of February 14-18 next, will show an increase of well over $100,000,000 in revenue received. This is in spite of the abandonment of the luxury taxes, the increased exemption of profits from the Excess Profits Tax, and the decreased receipts from sales, customs and other taxes as a result of the declining prices for many articles.

However, against this increase he will also be obliged to set increased expenditures on account of larger interest charges than had to be paid last year, and a heavier drain for pensions, soldiers' civil re-establishment and in general expenses. Soldiers' Land Settlement expenditures, however, will be about a million dollars less a month than they were last year. Ordinary expenditures will probably be thirty million dollars more than last year.

War Expenses Over

The great difference in the situation, of course, is that the Dominion no longer has to pay hundreds of millions of dollars each year on account of the war. Aside from the indirect expenditures resulting from the war, there will be less than ten million dollars directly spent on the war in 1920. Anxious eyes, however, view the railway situation, as one that may possibly open up other avenues of increasing the public debt. It is commonly expected here that the Canadian National Railway deficit this year will not be far from sixty million dollars. This will have to be made up by the Dominion government either in the form of a loan, as it has done in recent years, or by simply making up the deficit. The last few months have shown better results than earlier in the year as a result of the increased freight rates, but it was taken from the company before they began to earn it in order to pay the increased wages retroactive to May 1 last, allowed the men under the agreement by which they would be given increases similar to those accorded under the McAdoo award. The huge debt piled up on account of the railways is not included in the three billion dollar gross debt of the Dominion of Canada, as these are treated as debts of the railways. Yet the Dominion government will now have to foot the bill for all deficits and meet all principal and interest payments which the companies cannot meet out of receipts. There will be a demand at the coming session of parliament for a statement as to the exact situation with regard to all railways owned by the Dominion government, including the Grand Trunk Railway, the whole cost of which will not be known until the arbitration board makes its award. Unless there is a quick betterment in the situation, the Dominion will have to stop making annual loans to its railways unless it provides the money out of taxation in addition to a sinking fund to write off the national debt.

Debt Will be Refunded

It is thoroughly understood here that the payment of the national debt is a refunding proposition. Finance department officials have estimated that the national debt can be extinguished in seventy-five years by the setting aside of seven and a-half million dollars a year into a sinking fund each year, and left to increase at compound interest, until such times as payments become advisable. The present interest payments are $141,000,000 a year. While the department has not decided on the seven and a-half million dollars a year as a hard and fast policy, that amount is regarded as a minimum. Next year two amounts fall due, the Dominion having to pay in New York, or renew, a 5½ per cent. loan for $15,000,000, falling due on August 1, 1921, and a 5 per cent. loan of $25,000,000 falling due on October 1. The experience of this year shows that these can be met if exchange conditions make payment advisable, or if gold supplies are sufficient to permit a shipment. Otherwise these also can be refunded.

The situation, however, is such that the Canadian people can advance into 1921, knowing that though the load is heavy, it is well within their strength, and that increasing population from decade to decade will make it progressively lighter and lighter in its individual incidence.

NATIONAL CITY COMPANY'S CANADIAN BOARD

The National City Co. announces the appointment of a purely Canadian advisory board. The personnel of this advisory board, drawn in part from among five of the leading banking institutions in Canada, is as follows: Rt. Hon. Lord Shaughnessy, K.C.V.O., Montreal, chairman of the board of the Canadian Pacific Railway, and a director of the Bank of Montreal, who will act as chairman of the advisory board; Sir Lomer Gouin, K.C.M.G., former premier of Quebec province, director of the Bank of Montreal and the Laurentide Co., and president of the University of Montreal; Martial Chevalier, the general manager of the Credit Foncier and Chevalier de la Legion d'Honneur; Lt.-Col. Herbert Molson, C.M.G., M.C., Montreal, director of the Bank of Montreal and the Royal Trust Co.; Sir John Aird, Toronto, vice-president and general manager of the Canadian Bank of Commerce; Edson L. Pease, managing director of the Royal Bank of Canada; W. N. Tilley, K.C., counsel for the Dominion government in the Grand Trunk arbitration proceedings; Sir Augustus Nanton, Winnipeg, senior member of the firm of Osler, Hammond and Nanton, and president of the Winnipeg Electric Railway Co.

As a Canadian organization the history of the National City Co. began in December, 1918, when Norman L. C. Mather joined the company in the capacity of manager for Canada. The Montreal office was opened in January, 1919, and the following month a branch office was opened in Toronto.

While the original purpose of the entry of the company into the Canadian field included the distribution in Canada of some of the more active securities of United States origin, the embargo and exchange have combined to limit the activities of the company to the purchase and distribution of Canadian securities. It is to this field that the National City Co. will devote its energies, and endeavor to open the way for the investment of United States capital in this country and otherwise to promote the distribution of Canadian securities through its other widespread connections.

THE INDUSTRIAL SITUATION AND OUTLOOK

THE end of 1920 finds the world in an economic turmoil more vexing than any hitherto experienced. The momentum of business due to the speeding up during war time carried industrial expansion to unsafe heights. Now the pendulum has swung perhaps too far the other way, with prices that still trend sharply downward, resulting in stagnation of trade and industry, reduction of wages and output, and an uncomfortable amount of unemployment. The extent of the shrinkage in market values, as measured by one index table, is nearly twenty-five per cent., compared with the high figures of February. Naturally a decline so abrupt has caused distress and loss, and the business world is anxious and irritable. Cancellation of orders and repudiation of contracts has become so general as to receive serious attention from business organizations and others, who point out that a return of old-fashioned morality is necessary if the integrity of business relations is to be maintained.

Some of the causes of deflation are readily apparent. The tremendous ascent of prices placed a world-wide strain upon credit, resulting in a climax which forced the liquidation of commodities. Depreciation of foreign exchanges, making it expensive for other nations to buy in America, slowed down export trade, making it necessary for sellers of merchandise to seek local markets. Consumers hesitated to buy when prices were going down, hoping and expecting they would go still lower. Added to this condition, the unprecedented decline in grain, livestock and other farm products cut off a great part of the spending power in agricultural areas, which resulted in a curtailment of trade, diminished orders for goods, cessation of work at factories, and the laying off of thousands of workmen. The stream of commerce, bearing merchandise smoothly and in orderly fashion to points of consumption, jammed, backed up, and became a lake.

How long this situation will continue can only be conjectured. Many observers believe the period of transition is almost past, that a new trading level has been established and the stream will soon move on again in a normal way but with flow somewhat diminished. People must continue to eat and wear clothes and go to the movies and write with fountain pens and ride in flivvers, and the normal volume of business required to satisfy their wants is very large. Standards of living are not likely to be lowered except under dire necessity. There is plenty of nearly everything, including credit, to give all a reasonable share, and the country is not going to the dogs. Maybe it will be necessary to buckle down to hard work, but that is salutary after the rather easy conditions of the past few years.

WHAT GOVERNMENT COSTS

CANADA, being far removed from the scene of the recent world war, escaped direct property loss from it, and being one of the less active participants, did not incur expenditures in proportion to those incurred by the larger belligerents. These factors, together with the industrial activity which obtained here, prevented our war burden from becoming too cumbersome. Nevertheless, a comparison prepared by the League of Nations shows Canada to stand fairly high as regards cost of government. This comparison, as summarized in the Liberty National Bank of New York *Index*, is as follows:—

(In Millions)

Nation.	Unit of currency.	Pre-war expenditure.	Estimated expenditure 1920.	Percentage increase in expenditure.
Germany	Mark	[3,520.9]	[52,400]	+1,488
France	Franc	[5,066.9]	48,995.4	+ 867
Italy	Lira	[2,765]	24,670	+ 792
U.S.A.	$	[735.1]	[5,032*]	[+ 684*]
United Kingdom	£	[197.5]	1,184	+ 500
Canada	$	[144.5]	[537]	+ 272
Japan	Yen	[573.6]	1,563.9	+ 172

Note: Figures in brackets are not from governmental sources.

*Based on actual expenditure during first four months, current fiscal year.

The extent to which this increase is due to war debt is shown by the following comparison:—

	Int. and S.-F. of Pre-War Debt.	Required for Int. and S.-F. of Debt in 1920.	Percentage of estimated 1920 expenditure required for Int. and S.-F. of Debt
Germany	[239.4]	[12,400]	23.6
France	[1,287]	11,463	23.4
Italy	[688]	5,346	21.7
U.S.A.	[26.9]	1,052	[20.9]
United Kingdom ..	[32.7]	345	29.1
Canada	[14.75]	....	....
Japan	[142.6]	94.5	6.0

The position of France is due not only to the great rise of prices in that country, but also in part to the fact that fourteen billions of francs are included in the estimate of expenditures for 1920 for restoration of war devastated areas. There are other variables with respect to other countries, but on the whole the comparison is a reasonable one.

The following table shows the combined direct and indirect taxation per head in six of the principal nations. These figures, with the exception of the last column, are also derived from publications by the League of Nations in connection with the Brussels Financial Conference.

	Unit of currency.	Taxation per head.	Taxation per head in $ at par of exchange.	Taxation per head in $ at present exchange.
Germany	Mark	174.9	115.1	6.5
United Kingdom ...	£	22.2	107.	76.5
France	Franc	416.8	80.4	24.5
U.S.A.	$	56.5	56.5	56.5
Italy	Lira	94.8	19.3	3.3
Japan	Yen	11.3	5.6	5.7

THE TARIFF AND FINANCE

FINANCIAL institutions have no cause to fear any tariff reduction movement which may attain political power in Canada. Apart from fixed investments already made, capital can in fact stand aloof from the protectionist strife. In the final analysis it makes no difference to the investor whether his funds go towards the development of primary industries or manufactures; what he does look for, however, is a reasonably stable public policy, so that an industry may not enjoy substantial protection in one year, and be suddenly faced with open competition the next year; and he is also interested in maximum productivity, for the greater the return from industry the greater will be his interest or profits.

Whether the expansion of the next few years is in the country or in the city is not of great concern to insurance companies. Life and most lines of casualty insurance are written for individuals, while fire insurance is equally advantageous to the farmer and to the manufacturing and trading company. During the past few years, in fact, better results have been obtained from fire insurance in rural communities than on city mercantile and manufacturing risks, while a healthy rural development holds forth good prospects for a larger per capita average of life insurance and a lower death ratio.

In banking also there is equal scope for expansion in country and in city. Bank credits are liquid, and readily move to wherever the demand for funds is the greatest and the opportunities for profit the best. Even if some of the banks may be closely tied up with manufacturing enterprises which might be dealt a severe blow by tariff reduction, the fact that their security is the stock in trade rather than the fixed capital would protect them from loss. Loan companies look to the farms for a profitable investment field. Other financial institutions, such as trust companies and security houses, are finding the farmers some of their best customers at present.

While, therefore, those who are directly interested in manufacturing enterprises may well look with concern at the rising power of the low tariff interests, there is no identity of interest between capital as a whole, or financial institutions, and manufacturing. The shrewd investor will merely keep an eye to the future, knowing well the uncertain basis upon which a large part of our manufacturing rests, and the tremendous impetus which would be given to agricultural development, and to the industries of the forests, the mines and the fisheries, by a tariff reduction with its resulting lower costs of operation.

KEEP ACCOUNTS FOR INCOME TAX

AS the new year approaches, the Royal Trust Company, which has had great experience in the making of income tax returns for its clients, issues a timely warning. Many of the difficulties which taxpayers find themselves in, as the company says, are due to defective bookkeeping. Now the Income Tax Act expressly declares that "If a taxpayer fails or refuses to keep adequate books or accounts for income tax purposes, the minister of finance may require the taxpayer to keep such records and accounts as he may prescribe."

Don't wait for Sir Henry Drayton to "prescribe" for you. Make up your own prescription, and take it. Now is the time to begin, for the tax has to be calculated on the income of every calendar year, opening on January 1.

Wholesale prices are now below their level of a year ago. The post-war rise in prices, which was the most rapid if not the most extended, will soon be entirely lost.

* * *

Contraction in business is already indicated by the November bank statement. Savings deposits, call loans outside of Canada and circulation are the only important accounts to show increases.

* * *

Falling prices are sure to bring a reduction in trade, banking and other measures of business activity. It is not the monetary value but the actual amount of commodity trading which counts, however. As the article in last week's issue shows, much of the supposed war-time growth was merely a matter of figures, emphasizing the famous remark that "there are three kinds of lies, namely, ordinary lies, damned lies, and statistics."

* * *

REDUCTIO AD ABSURDUM

The Scarboro', Ont., Public Utility Commission, in an effort to relieve local unemployment, has decided to lay water mains by hand this winter, instead of by the quicker and more efficient method of the ditching machine. This brilliant solution may be effective locally, but let us hope that it is not carried too far. It recalls the following story:—

With a clatter and a roar the steam shovel dug its relentless claws into the bank, picked up about a carload of earth and dumped it into a waiting truck.

"That's just it," sneered a tired-looking man who was standing by. "It makes me wild to see a piece of machinery taking the bread out of honest men's mouths."

"Don't quite see how you make that out!" remarked the foreman in charge of the gang.

"Well, isn't that machine doing the work quicker than 100 men with picks and shovels could do it?"

"That's so," agreed the foreman. "And, according to that argument, wouldn't it be better still to employ 10,000 men with toothpicks and salt spoons?"

Valuable Documents

Bonds, insurance policies and other valuable documents should not be kept at home where they are likely to be lost or mislaid.

The Safety Deposit Boxes of this Bank provide at a moderate cost an excellent means of keeping valuable papers.

PERSONAL NOTES

Sir William Mackenzie returned home from London, England, on December 23.

A. H. Williamson, manager of the Winnipeg office of Wood, Gundy and Company, investment bankers, has been elected a member of the Winnipeg Stock Exchange.

R. J. Follis, of Carmangay, Alta., has been appointed treasurer of the town of Bassano, Alta. Mr. Follis was president of the board of trade and justice of the peace at Carmangay.

W. C. Muir was recently appointed general manager of the Canadian National Express Company, with headquarters at Winnipeg. He was formerly general superintendent of the company. The Canadian National Express Company's business has been adjusted in accordance with the reorganization of the Canadian National Railway, and it will handle business to all destinations on the lines of the National railways. Mr. Muir has been in the service for many years and now becomes the active head of this important branch. The connections of the National Railways in the west are extensive, and an immense volume of business is handled annually.

J. B. Hall has been appointed manager of the Toronto branch of the Manufacturers' Life Insurance Company. Mr. Hall has been continuously in the city in business for twenty-one years. He has been an energetic worker on behalf of the Life Underwriters' Association of Canada, being at present, chairman of the executive committee. With Mr. Hall will be associated Walter B. Peace as inspector who also is a well known life insurance man of the city.

OBITUARY

William J. Vale, for 29 years deputy superintendent of insurance companies and loan corporations for Ontario, and registrar of lodges and societies, died this week at his home in Toronto. He had been suffering from heart trouble for some months past. Mr. Vale was born in Woolwich, England, 71 years ago. He came to Canada as a boy, attended school in Hamilton and later became associated with the *Hamilton Times*. Twenty nine years ago he moved to Toronto and had lived in this city ever since.

The contract for the construction of the drydock at Esquimalt, B.C., has been let. The firm of P. Lyall and Son, Montreal and Vancouver, were the successful bidders on the [illegible], the accepted tender being approximately $1,[illegible] [illegible] $[illegible]000,000 less than the government estimate.

NEW MONTREAL BROKERAGE FIRM

Announcement has been made that Major Hartland B. MacDougall and R. E. MacDougall have formed a partnership to engage in the brokerage business in Montreal early in the new year. The name of the new company has not yet been decided upon.

Both men are well known in financial and stock circles of Montreal. Major MacDougall was born in Montreal March, 1876. He was with the Bank of Montreal in 1894, joined the stock brokerage house of C. Meredith and Company in 1899, and has been a partner since 1908. He was elected a member of the Montreal Stock Exchange in 1906, was made governor in 1909, and was president in 1914. He went to France in 1915 as captain in the 42nd regiment, and was recalled in January, 1918, to proceed to the United States as D.A.A.G. to the British Military Mission. R. E. MacDougall is with O'Brien and Williams, stock brokers, and has been connected with the brokerage business in Montreal for a number of years.

The organization of this firm is another indication of financial activity in Montreal, numerous changes of this kind having taken place during the past year. While bond trading in Toronto is greater than in Montreal, the amount sold on the two exchanges during the week ended December 22 being $2,754,500 and $1,671,018 respectively. The leadership of Montreal as a stock centre is shown by the fact that during the same week 89,023 shares were handled on the Montreal exchange, compared with 15,654 in Toronto.

Hartland B. MacDougall

R. E. MacDougall

BAD MONEY IN WINNIPEG

Hundreds of dollars in worthless money is believed to have been passed in Winnipeg recently. Ten business firms reported the receipt of altered money on December 20, and a steady flow of complaints continued. The money was passed during the rush hours, and consisted of altered $1 United States currency bills. The alterations were made by obliterating the one and pasting in the bill a 10 or 20 taken from an inland revenue stamp.

FISHERIES PRODUCTION IN CANADA

Decrease in 1919 from $60,250,544 to $56,485,579—Salmon Heads List in Respect to Value

THE total value of fish marketed fresh and of fish products in Canada in 1919 was $56,485,579, compared with $60,250,544 in 1918, according to a statement of the Dominion Bureau of Statistics. Sardines and herring showed the largest decreases both in value marketed and quantity caught. The catch of haddock, halibut and cod was greater in 1919 than in 1918, while the value marketed was less. Salmon, lobsters and mackerel showed increases both in quantity caught and in value marketed. British Columbia fisheries had a value of $25,301,607, which is a decrease from 1918 of nearly two million dollars. Nova Scotia fisheries were valued at $15,171,929, a slight increase over 1918. Prince Edward Island, Ontario, Saskatchewan and Alberta showed increases in value, while New Brunswick, Quebec, Manitoba and Yukon showed decreases.

Canned Salmon Chief Product

Of the principal fish products, canned salmon is given at 1,394,215 cases valued at $13,842,140 in 1919, a slight decrease both in quantity and value from 1918. Canned lobsters were reported at 128,759 cases valued at $4,095,934 in 1919, compared with 107,812 cases valued at $2,254,690 in 1918. The quantity of canned sardines was 119,225 cases valued at $593,811 in 1919, compared with 177,193 cases valued at $1,227,988 in 1918. Increases in quantity and market value are noted in dried cod and salted mackerel, and decreases in green salted cod and pickled herring. Of fish marketed for consumption fresh, the principal varieties in point of value were halibut, 240,728 cwt., valued at $5,114,416; salmon, 460,413 cwt., valued at $3,824,158; whitefish 196,953 cwt., valued at $1,845,854; lobsters, 85,340 cwt., valued at $1,224,882. Other varieties which showed large quantities marketed for consumption fresh were mackerel, herring, cod, smelts trout and haddock.

The following table gives a brief summary of the statistics of production for 1919 with comparative figures for 1918.

QUANTITIES CAUGHT AND VALUES MARKETED OF CHIEF COMMERCIAL FISHES, 1918 AND 1919

	1918.		1919.	
Kinds of fish.	Quantity caught.	Value marketed.	Quantity caught.	Value marketed.
Salmon, cwt. ..	1,531,773	$17,869,517	1,688,653	$17,889,913
Cod, cwt.	2,206,666	10,083,562	2,606,770	9,986 837
Lobsters, cwt. .	264,096	3,531,104	345,806	5,338,343
Halibut, cwt. ..	207,139	5,490,226	243,449	5,119,842
Herring, cwt. ..	1,973,669	4,719,561	1,573,986	3,346,580
Haddock, cwt. ..	554,366	2,796,171	564,574	2,048,746
Mackerel, cwt. .	196,781	1,937,211	229,877	2,035,849

Hake, cusk, cwt.	245,051	844,565	244,749	645,570
Pickerel, cwt. ..	70,088	649,180	61,727	582,744

CANADA COPPER PLANT CLOSED

Canada Copper Corp. has shut down its new plant at Allenby, B.C. This is due to low price of copper, which at present does not permit operation at satisfactory profit. During the six weeks that the mill has been in operation, operating results have proved quite satisfactory, considering the short time that the plant had to get tuned up. At the time of shutting the mill down, December 12, 1,200 tons of ore were being treated a day. Average grade of ore was 2 per cent. copper, recovery 80 per cent., and grade of concentrates 29 per cent. copper

GOVERNMENT CURRENCY

An increase of nearly $7,000,000 in the circulation of Dominion notes and specie, is shown in the November statement, which has just been issued by the federal government. Gold held for the redemption of Dominion notes increased from $95,222,381 at the end of October, to $96,021,001 at the end of November. The increased circulation was issued largely against approved securities, which increased from $166,715,125 to $173,689,025. Details of the November statement are as follows:—

Provincial	$ 27,743 25

INSURANCE REGULATIONS IN BRITISH COLUMBIA

At a meeting of the Vancouver Island Life Underwriters' Association, held on December 13, H. G. Garrett, provincial superintendent of insurance, spoke briefly on "The Licensing of Agents," and in opening his remarks he said that the matter had been mooted in British Columbia, but that nothing definite had as yet been done. His statements were not official, he declared. As far as he knew, the government had no policy in the matter.

Insurance, he pointed out, is not merely getting a living, but it is beneficial. Life insurance always is regarded as a public utility, and he declared that if companies are controlled, there are arguments in favor of agents being controlled also. There are laws in all the other provinces of the Dominion of Canada, and similar ones in the United States. Generally speaking, no agent is allowed to make a contract unless he is licensed, and he must be a resident of the province or state in which he is working. Also, he must have a written communication from his company. Mr. Garrett said that there are various offences mentioned, as being incompetent, untrustworthy or dishonest, and the agent is expected to state his experience and knowledge of life insurance. It seemed to him that these laws were aiming at agents who were untrustworthy, or dishonest, or transients. All over Canada he said that pleasure had been expressed over these regulations, but with regard to British Columbia, the only law in force is the one that was passed this year, licensing real estate agents.

He was of the conviction that if insurance men want such laws passed, that they must show the real necessity for them, and also that they are aware of the evils that exist. Then they would have a means of dealing with them. If passed, they should benefit, first, the public, then the agent, and also should tend to elevate the general standard of public business.

BANK BRANCH NOTES

A. W. Hyndman, manager of the Royal Bank of Canada at Charlottetown, has been appointed assistant supervisor for the Maritime provinces, with headquarters at Halifax.

N. W. Murray, who was the accountant in the office of the Royal Bank in Saskatoon, has arrived in Winnipeg, and has taken over a position in the office of the supervisor of western branches.

The new premises of the Kelvin St., Elmwood, branch of the Canadian Bank of Commerce in Winnipeg, has been opened for business.

The Molsons Bank has moved from the premises in the Fulton Block, Chesterville, Ont., into the new offices in the building recently purchased from Mrs. Chester Casselman.

The Sterling Bank of Canada at Sombra, Ont., was completely demolished on December 25 by an explosion of natural gas which had escaped into the building from a gas main.

EXCHANGE QUOTATIONS

Glazebrook and Cronyn, exchange and bond brokers, Toronto, report local exchange rates as follows:—

	Buyers.	Sellers.	Counter.
N.Y. funds	15⅜ pm	15⅝ pm	....
Mont. funds	.54 dis.	Par.	⅛ to ¼
Sterling—			
Demand	$4.06	$4.07	....
Cable transfers	4.07	4.08	....

Bank of England rate, 7 per cent.

New York quotations of exchange on European countries, supplied by the National City Co., Ltd., as at December 30, 1920, follow: London, cable, 353½; cheque, 352¾; Paris, cable, 5.94; cheque, 5.93; Italy, cable, 3.47; cheque, 3.46; Belgium, cheque, 6.22; Swiss, cheque, 15.20; Spain, cheque, 13.50; Holland, cheque, 31.35; Denmark, cheque, 15.65; Norway, cheque, 15.65; Sweden, cheque, 19.85; Berlin, cheque, 1.37½; Greece, cheque, 17.00; Finland, cheque, 7.25; Roumania, cheque, 3.05; Poland, cheque, 1.25.

RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the first three weeks in December:

Canadian Pacific Railway	1920.	1919.	Inc. or dec.
December 7	$5,215,000	$3,797,000	+ $1,418,000
December 14	5,179,000	3,935,000	+ 1,244,000
December 21	4,484,000	3,715,000	+ 769,000
Canadian National Railway			
December 7	$2,678,306	$2,050,134	+ $ 628,172
December 14	2,550,249	1,898,694	+ 651,555
December 21	2,600,174	1,982,080	+ 618,094
Grand Trunk Railway			
December 7	$2,460,523	$1,845,848	+ $ 614,675
December 14	2,441,248	1,832,822	+ 608,426
December 21	2,231,757	1,767,231	+ 464,526

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended December 24:—

La Rose Mine, 60,691; McKinley Darr., 168,530; O'Brien Mine, 136,675, total, 365,896. The total since January 1 is 25,527,017 lbs., or 12,763.5 tons.

CANADIAN BUSINESS FAILURES

The number of failures in the Dominion, as reported by R. G. Dun and Co. during the week ended December 24, 1920, in provinces, as compared with those of previous weeks and corresponding weeks of last year, are as follows:—

Date.	Ont.	Que.	Man.	Alta.	Sask.	B. C.	N. S.	N. B.	P.E.I.	Total.	1919.
Dec. 24	10	15	2	1	6	0	0	3	0	37	..
Dec. 17	5	17	0	1	3	1	0	5	0	32	20
Dec. 10	12	17	0	1	2	2	1	7	0	42	16
Dec. 3	5	19	0	0	1	1	0	4	0	30	16

INSURANCE COMMISSIONS TO BE LIMITED

At a conference of fire insurance company managers with the Ontario superintendent on December 16 it was agreed that agents' commissions should be limited along the lines set forth in the superintendent's statement, recently printed in these columns. According to the proposed legislation submitted from July 17, 1921, agency charges of the fire insurance companies respecting applications for insurance received from or through the agency of any licensed agent or broker from any calendar month shall not exceed in value an amount equal to 15 per cent. of the total amount of the premium paid or payable by the assured in respect of such assurance.

WEEKLY BANK CLEARINGS

The following are the Bank Clearings for the week ended December 30, compared with the corresponding week last year:—

	Week ended Dec. 30, '20.	Week ended Dec. 31, '19.		Changes.

Further Points in Promoting Foreign Trade

Marine Insurance is Essential—Classes of Marine Insurance, and the Indemnities they Provide Refund of Duties—Getting Over the Language Difficulty—Thorough Familiarity with Foreign Business Comes Only from Experience

By Col. C. R. HILL,
Managing Director, Hill and Co., Ltd., Toronto

(This is the last of a series of eight articles on Practical Exporting, the first of which was published in The Monetary Times of November 12, 1920.)

THERE are a few points with regard to marine insurance that should be studied by the exporting manufacturer for his own protection, as one slip may prove expensive. The ordinary policy covers the risk only when the goods are actually on board ship and terminates with discharge at port of destination, but is limited to certain occurrences and does not include damage from chafing or wear and tear. Exceptional risks and extended protection must be specified when application for insurance is made. For instance, if it is noted that the ship's bill of lading indicates that the goods are stowed *on* deck and not *under* deck, special insurance protection must be made. General Average clauses should also be checked over as they are not applicable on certain classes of goods such as grain, unless paid for as extra protection. General Average clauses are important, as the following interpretations will indicate:—

Free of Particular Average under 5 per cent.—means that no claim for partial loss or damage will be allowed by the insurance company unless the actual loss or damage amounts to 5 per cent. or more of the amount for which the shipment has been insured, as set forth in the policy.

"Free of Particular Average" (English conditions)—means that no claim for partial loss or damage will be allowed by the insurance company unless the vessel, craft or lighter carrying the goods be burnt, stranded, sunk or in collision.

"Free of Particular Average" (American conditions)—means that no claim for partial loss or damage will be allowed by the insurance company unless the loss or damage is caused by the vessel, craft or lighter having been burnt, stranded, sunk, or in collision.

General Average—a loss arising from a sacrifice or extraordinary expense purposely made or incurred for the preservation of the ship and contents from danger, and including the cost of measures taken for the prevention of a greater loss. A loss sustained for the benefit of all, to equalize which all contribute.

Adjustment of Losses

Owners of insured merchandise are reimbursed by the underwriters on presentation of general average adjustment statement. Goods not insured are held until the general average is satisfied or its owners give bonds for this satisfaction. This means that the insurance company pays the proportion of the expense charged against a shipment when it has been insured, and that the legal owner of the shipment must pay this proportion of the expense in case insurance has not been effected. The assessments are made on the appraised value of goods at the port of destination, not on the insured value.

In practically all cases of general average, the payment of deposits by the merchant can be avoided, if he is insured, by having his insurance company furnish to the average adjusters a guarantee that all proper general average and salvage charges will be paid on completion of the adjustment.

When a manufacturer has commenced exporting to an appreciable extent, he should take out an "open policy," [illegible] contract by which the insurance company undertakes to protect all his export shipments from the time they leave the factory in the interior until they have been delivered to consignees' warehouses. On this arrangement the exporter reports particulars of each shipment as made and pays all premiums monthly in accordance with the schedule of rates attached to the policy. These policies are specially written to cover the requirements of each shipper and class of mechandise. When the open policy has been granted, the insurance company furnishes the shipper with a number of certificates which he uses and countersigns as needed, thus always being in a position to turn in to his bankers attached to a draft without delay.

War risk insurance is still often called for, but when a letter of credit does not specify it, the shipper should not attach such a certificate to his draft, as the bank may refuse to negotiate or accept it on account of possible complaint from the buyer. In self-protection, however, the shipper might well take out war risk insurance and retain such policy.

Drawback—Refund of Duties

Many Canadian products require imported ingredients to complete their manufacture, and the duty paid on the imports are refundable when the manufactured article is exported. It is plain that such a refund makes certain goods more economical to export than to sell on the domestic market and helps the Canadian manufacturer to meet competition in foreign markets. All Canadian manufacturers should take advantage of this refund system, particulars of which may be obtained on application to Ottawa.

All countries in the Postal Union have very liberal weight and bulk allowances for parcels, and shippers of small weight or bulk articles should obtain copies of the regulations in effect for countries in which they are interested. Sometimes it will be found cheaper to make up one small shipment into two or more parcels, acceptable to the postal authorities, rather than one case by freight. This particularly applies to samples or small trial shipments.

"Made in Canada"

There is one point which every country's custom officials must satisfy themselves on every shipment, i.e., the country of origin. Therefore, there cannot be too strong an effort made to see that every outside packing-case containing Canadian exports should have "Made in Canada" written on it in large letters; every cardboard, paper or tin container within the case should have "Made in Canada" printed boldly on it. This is necessary with certain countries, particularly India, where the Marks Act is very emphatic. But quite apart from that—if a Canadian manufacturer is proud of his goods and proud of his country, let him insist that all his lithographed labels include the words "Made in Canada." Let him lay down the law to the tin can and glass bottle manufacturers that "Made in Canada" shall appear on all his containers. That brings real export orders. The wholesaler in Cape Town who receives a case of Canadian jam breaks up the case, but the tin can or glass bottle eventually finds its way to the farmer's wife, who reads the "Made in Canada" sign, and, because of it, orders more of that brand from her village grocer. When a thing is necessary, patrio-

[illegible] and remunerative, there should be no argument, and the words "Made in Canada" are all three.

Foreign Correspondence

Nearly all Canadians are accustomed to cut down their commercial correspondence to the limit of politeness, and sometimes below it, for the sake of brevity. It is usual to start with "Dear Sir" or "Gentlemen" and plunge into the subject, winding up abruptly with "Yours sincerely," or its equivalent. Probably our American cousins are more abrupt than we are, and our English brethren not much better, but in corresponding with foreign firms, particularly if of Latin tongues, it is good policy to meet their own excessive politeness to some extent. A letter in French, Spanish or Italian always sends "salutations" to the recipient, so that a reply which expresses the writer's "great pleasure," "best wishes," etc., will have a much more favorable reception than one which confines itself to strict essentials. Another point with regard to foreign correspondence is the courtesy of writing in the other man's native language. This is always appreciated and leads to more cordial relations, although the correctness of the translation should be ensured, especially on quotations and technical facts. It is customary in foreign correspondence to write all letters with a carbon copy, which is mailed one week or ten days later than the original, thus insuring against loss in mails.

Accommodating Foreign Requirements

It is always well to ask foreign customers or agents for their suggestions and criticisms on a product. Otherwise, politeness may prevent the receipt of valuable information. For instance, a Brazilian buyer of patent medicines can best suggest the terms on a label that will carry the greatest conviction to native neurasthenics. Another product may fail to attract through an unpopular color effect.

This last article of the series has been intended to clear up various matters which could not be dealt with in the logical sequence of preceding articles. There are also many other topics relating to export work which have been left untouched because they are not of general application or are only incidental to those already discussed.

In concluding this last article it is again pointed out that the series has been written with the object of stimulating a desire for export business and of helping to clear away the fogs that surround the subject. It is quite appreciated that a haze will still exist in the mind of the manufacturer, so far as details are concerned, but they can only be cleared away by commencing business. The greatest essential is patience, combined with active effort and initiative in meeting new conditions.

The rewards are rich, and more than compensate for the initial delays, irritations, and even occasional losses, while the final result will be that steady export sales will render the manufacturer independent of worry over domestic markets.

PUBLICATIONS RECEIVED

The Farmers in Politics.—By William Irvine. McClelland and Stewart, Toronto. 253 pages; $2.

Although the author says in his preface that this book is in part an economic history of the organized farmers, yet he devotes practically the whole of it to a justification of the political action of the farmers. Nevertheless he points out that it is not an official pronouncement by, or on behalf of, the farmers' movement, but rather "the earnest and sincere effort of a student of current events to afford some elucidation of pressing questions of economics and politics in Canada at the present time."

Mr. Irvine strongly criticizes the reformer who harps on destruction, but points to some of the deficiencies in industry and politics. In fact he goes so far as to say that the economic thinking of recent years has amply demonstrated that the whole aim of modern production is wrong." Production, he maintains, should not be for profit. He is especially hard on the "plutocrats" who, he alleges, run the country; not only the state, but also such adjuncts as high schools and universities, "exist for the wealthy. These places of learning, although financed by taxes imposed on the poor, are but additional privileges for the rich." How can Mr. Irvine maintain that the financing of a school or university by taxes, which relieve the student of the necessity for paying high fees, can shut the door to the poor?

Much space is devoted to arguments in favor of group representation rather than the old party system, and in this respect Mr. Irvine has the practice of European countries in his support. The farmers' movement in politics he believes to be sound, representing neither of the extremes for which labor and capital respectively stand. "The United Farmers," he says, "have become the apostles of co-operation; they have captured the imagination of the nation by combining true radicalism with scientific moderation, and it is safe to say that they are the most hopeful factor in Canadian national life to-day."

Government Control of Sugar.—By Joshua Bernhardt. Macmillan Co. of Canada, Toronto. 272 pp. with index; $3.

Sugar is one of the commodities, the price fluctuations of which have been so wide as to puzzle students of economics and as to draw forth from the public a demand for government control. Up to a few months ago it was the high price of sugar which caused trouble, now it is the low price, and Canadian refiners have appealed to the government for assistance. This book is therefore timely, and the information given is thorough. The full title is "Government Control of the Sugar Industry in the United States, an Account of the Work of the United States Food Administration and the United States Sugar Equalization Board, Inc." The author was sugar statistician in the United States Food Administration, and chief of the Statistical Department of the United States Sugar Equalization Board, Inc. Dividing his book into the War Period and the Reconstruction Period, he describes the mobilization of the sugar industry, the workings of government control, the premature attempt at "demobilization," and the final ceasing of control. He concludes that "government control of the sugar industry and trade in the war period and in the year of reconstruction which followed is an interesting example of wholesome and effective co-operation between business, the general public, and a government organization, functioning in a period of national stress and world upheaval. In order that the experiences and information derived in the period of control might not be lost to the general public, the directors of the United States Sugar Equalization Board have authorized the publication of this book."

Readings and Problems in Statistical Methods.—By Horace Secrist, Ph.D. Macmillan Company of Canada, Toronto. 427 pp. with index; $3.

Efforts to analyse economic development in a statistical way are arousing increasing interest. At the same time the collection of figures of no value, or which are presented in a misleading way, are to be avoided. "The collection, use, and interpretation of statistical data," says Mr. Secrist, "are justified largely, if not solely, in the service which they have for planning, whether it is related to questions of social control, business policy, or statecraft." This book discusses how statistics may intelligibly and usefully be presented. The chapter headings are: Meaning and Application of Statistics and Statistical Methods; Sources and Collection of Statistical Data; Units of Measurement in Statistical Studies; Illustrations of Methods in Collecting Statistical Data; Classification-Tabular Presentation; Diagrammatic and Graphic Presentation; Averages as Types; Principles of Index Number Making and Using; Description and Summarization—Dispersion and Skewness; Comparison-Correlation.

The Law of Bankruptcy in Canada.—By J. A. C. Cameron, K.C. Compiled for the National Trust Co., Ltd. Published by Canada Law Book Co., Ltd., 84 Bay St., Toronto. In this book of 148 pages the author takes up the

Transfer books will be closed from December 15th to 31st inclusive.

By order of the Board.
JOHN R. LITTLE,
Managing Director.

Bankruptcy Act by sections, with notes on each section as subdivided under the various headings. There is also a thorough index to the Bankruptcy Act and general rules and forms thereunder. The measure in question, which came into force on the first day of July of the present year, is the third Bankruptcy Act which the parliament of Canada has passed. The first act was passed in 1869 and this was repealed by the Insolvency Act of 1875, which, after being in operation for about five years, was retired, chiefly on the grounds that its administration was too expensive and cumbersome. Since the repeal of the Act of 1875, several other bankruptcy measures were introduced into the House of Commons, but they never reached the final reading, one, at least, being promptly killed by the financial interests because it provided for the abolishment of preference to creditors. Bankruptcy law has two objectives; one the expeditious and economical distribution of the debtor's assets, and, secondly, a release of the debtor from his creditors when the debtor has not been guilty of any misconduct or fraud, and has surrendered all his assets.

Life Insurance Contracts in Canada.—By H. J. Sims, LL.B. Published under the auspices of the Mutual Life Assurance Company of Canada. 121 pp., with index to cases.

Many cases have arisen in the past fifty years, says the company in a preface to this book, where inconvenience and real hardship have occurred in dealing with beneficiaries through lack of knowledge of laws affecting life insurance contracts. "A great difficulty in the way of making such knowledge more general has been the varying enactments on the subject by the different provinces of the Dominion. Recent years have shown a commendable tendency towards uniformity of legislation in this respect, and it is to be hoped this desirable movement will receive further impetus. With the object of making available a working knowledge of the laws of Canada bearing on life insurance contracts, especially for life insurance agents who are largely the advisers of the insuring public in disposing of their life insurance benefactions, this little work is sent on its mission of use."

Mr. Sims has been the company's solicitor for 21 years, and in this book he reviews all Canadian legislation to date and also has referred to the leading cases decided in the courts. There are eleven chapters covering "The Application, Policy and Completion of Contract," "The Premium," "Agents," "Beneficiaries," etc.

Digest of the Canada Grain Act.—By Charles Birkett, secretary, Fort William Port Arthur Grain Exchange. 61 pp., with index; 30c. This booklet, copies of which may be secured from the author, will be of great use to all who produce, deal in or handle in any way the wheat crop of the west. From 1912 to 1917, Mr. Birkett was secretary of the Board of Grain Commissioners, when he had ample opportunity for studying the Canada Grain Act of 1912, and seeing how its provisions worked out in practice. "Seventy five per cent of the complaints received by the board during the five years," he points out, "might have been eliminated, if the complainants had known the act and the rules and regulations promulgated by the board. This, however, was not the most serious matter. A large number of producers suffered financial loss through dealing with traders who were not licensed, or entering into contracts that were not provided for in the act. These losses totalled many thousands of dollars, and the result was the amending of the Canada Grain Act to provide for these different transactions under a Primary Grain Dealer's bond."

Natural Resources of Nova Scotia. Published for free distribution by the Natural Resources Intelligence Branch, Department of the Interior, Ottawa. This 70-page booklet is the latest of a series dealing with various sections of the Dominion, the booklets previously issued having dealt with New Brunswick, the Peace River, New Manitoba, Saskatchewan, etc. The opening paragraph of Nova Scotia clearly indicates the scope of the series when it says: "The facts in this booklet are compiled for the use of the homeseeker, merchant, manufacturer, capitalist and visitor. They purpose to be up-to-date, authoritative, concise." Each booklet forms a basis of standard official information and is revised as each edition is exhausted.

In the booklet now before us a welcome absence of verbiage allows space for valuable specific facts. Thus there is a list of products reshipped from Halifax which could easily be manufactured in Canada; a special section on West Indian and British Guiana trade, details about oil-shales, coal, limestone and iron, aeronautics, merchant marine, clays, salt, land prices and wages—all subjects of present interest. Statistics are made palatable by an interesting style and suggestive touches. Nova Scotia is crossing the threshold to great activities, and the booklet will be a reminder that the chances in Nova Scotia now seem as bright as is its summer beauty.

MONTREAL AND QUEBEC SAVINGS INSTITUTIONS

Another large reduction in Dominion government demand deposits is the principal change in the statements of the Montreal City and District Savings Bank and the Caisse d'Economie de Quebec, for the month of November. This account, in the case of the former institution, is now under the $100,000 mark, as compared with nearly $3,000,000 last year, while in the latter, the account has been wiped out altogether, from a balance last year of more than $500,000. The large balances in November, 1919, were due to the Victory loan receipts, which the government placed on deposit with all Canadian banks.

Other changes in the report are not very significant. The Montreal bank considerably strengthened its cash position, as a result of reduced loans and increased deposits. The cash account of the Quebec institution was slightly lower, while notice deposits also showed a decrease.

The following figures give a comparison of the principal accounts:—

Montreal City and District Savings Bank

	Nov., 1920.	Oct., 1920.	Nov., 1919.

AUDITORS' REPORT TO THE SHAREHOLDERS:

We have examined the Books and Accounts of the Canadian Car & Foundry Company, Limited, and its Subsidiary Companies for the [illegible] ending September 30, 1920, and have obtained all the information and explanations which we required. The Inventory at September [illegible], consisting principally of materials [illegible] for specific [illegible] has been prepared from the books records and has been valued at cost. And we certify that, in our opinion, the above Balance Sheet at September [illegible], 1920, is properly drawn up so as to exhibit a true and correct view of the state of the combined affairs of the Canadian Car & Foundry Company Limited, and its Subsidiary Companies, according to the best of our information and the explanations given to us, and as shown by the Books of the Companies.

PRICE, WATERHOUSE & CO.
Auditors.

Montreal, November [illegible].

WHOLESALE PRICES STILL FALLING RAPIDLY

Index Number for November Drops to 304.2 From 317.6 In Previous Month—Increases In Some Commodities

WHOLESALE prices continue to fall, their being large declines in many commodities. In November, the index number fell to 304.2, as compared with 317.6 in October, 307.7 in November, 1919, 290.9 in November, 1918, 137.5 in November, 1914, and 135.8 in November, 1913. This is a continuation of the rapid downward movement which began several months ago, and which seems to be gaining headway.

The chief declines last month were in grains and fodder, fish, textiles, hides, leather and boots and shoes, metals and implements, building materials, and a steep decrease in raw furs. At the same time there were increases in animals and meats, dairy products, fruits and vegetables, groceries and fuel and lighting.

The following table, compiled by the Department of Labor, shows index numbers of wholesale prices during November, 1920, as compared with previous periods:—

DEPARTMENT OF LABOUR FIGURES)	No. of Commodities	Index Numbers *Nov 1920	*Oct. 1920	*Nov. 1919	Nov. 1913
I. Grains and Fodders:					
Grains, Ontario	6	265.9	325.8	340.1	141.3

CANADA'S TRADE HAS INCREASED $464,000,000

Past Twelve Months Have Witnessed Large Expansion in Imports—Exports Have Also Grown

DURING the twelve months ended November, 1920, Canada's trade increased by more than $464,000,000, according to the latest statement issued by the Dominion Bureau of Statistics. The large advance has been due largely to the increase in imports, although exports are somewhat higher than they were a year ago.

The increase in imports can be traced to the United Kingdom and the United States. Purchases from the latter country have grown to a figure closely approaching $1,000,000,000. The Dominion is also buying more heavily from the East and West Indies, Cuba, France and Japan.

Exports to the United States show a healthy increase, but this good showing has been offset by a large decline in sales to the Mother Country. Foreign trade has made big strides, the principal increases being in Belgium, Netherlands, Italy and China. France and Japan have been buying considerably less here.

Details are as follows:—

	Twelve Months ending November 1918 $	1919 $	1920 $
Imports for Consumption			
Dutiable Goods	508,216,550	585,913,046	893,264,041
Free Goods	389,995,363	334,169,881	452,318,259
Total imports (mdse.)	898,211,913	920,082,927	1,345 582,300
Duty collected	153,738,173	164,987,730	207,412,637
Exports			
Canadian	1,256,916,718	1,198,585,465	1,256,914,922
Foreign	43,844,317	52,419,375	32,621,528
Total exports (mdse.)	1,300,761,035	1,251,004,840	1,289,536,450
Imports by Countries			
United Kingdom	71,012,000	84,638,900	229,925,844
Australia	5,201,146	1,788,993	1,694,439

THOMAS GREEN,
Cashier.

New Glasgow, Nova Scotia, December 20, 1920. 345

Old and New Methods in Bank Advertising

Keen Interest in Publicity Methods Shown by Change in Policy by Some Financial Institutions — The Purpose of Modern Advertising—Two Examples Compared—How Far Can Commercial Methods be Adopted ? — The Preparation of Copy

By NORMAN S. RANKIN

AN interesting article on Canadian Bank Advertising, published in a recent issue of *The Monetary Times*, by Mr. W. F. Dorward, manager of one of the Royal Bank of Canada's branches in New Brunswick, points out that Canadian banks have been the last of large Canadian institutions to adopt modern advertising copy and methods, and while there are nevertheless exceptions to this rule, as a whole his statement is correct.

Advertisements of two centuries ago were more or less limited to brief announcements of the sale of certain commodities at certain places. Their object was to bring consumer and manufacturer together, and as such they evidently served their purpose. Undoubtedly the demand in those days for the manufactured output was greater than the supply, but in any case, the idea that a manufacturer or business man should create a demand for his products and thus increase his output and his profits had not crystallized.

Spend Four Millions a Day

Selling on credit through travelling salesmen, marketing by telegraph, foreign trade assistance from the banks and general and special advertising campaigns have developed only with the latter half of the past century, the first half of which was almost wholly taken up with difficulties of production and transportation. Available statistics tell us that year in and year out United States advertisers in practically all lines of trade are spending $1,500,000,000 a year, or over $4,000,000 a day, and if this is a fact, it is clear that the object of their advertising is not only to sell their manufactured products, but to increase the demand for them.

That advertising is creative is granted—there is no room for argument. Increase in business means increase in employment; increase in employees, increased demand for homes, and food and clothing; more homes built, more groceries required, more clothing demanded and so on down the line, and as an afterthought, I might add, where does the employer and the employee look for each other's aid? Why, in the advertising columns of the daily, weekly and monthly press.

Details Swing Business

I know the case of a man who changed his business account because, when he was overseas, the bank in which his wife kept her savings were particularly obliging to her—gave her personal service in settling her insurance, rent and other bills when they fell due; of another, in which a depositor switched his account because the blotting paper on the public tables was invariably scarce, pen scratchy and ink thick; and of a third, because of the discourtesy of a bank employee.

The finest kind of an advertisment for any public service corporation is a satisfied customer, for he is a living, transient, voluntary, enthusiastic advertiser. One of Canada's leading chocolate manufacturers told me not long ago that he had built up a large trade in a certain section of the country through a satisfied, grateful customer. The man had written the manufacturer that whilst eating one of his chocolates he had broken a tooth on a piece of nutshell. The manufacturer accepting the truth of the statement without quibble, wired the man to go to the best dentist he could find and send the bill to him for settlement. The customer, appreciative and bubbling over with enthusiasm, spread the news broadcast with most gratifying results to the manufacturer.

You may say, well, this is service and not advertising, but are not they synonomous—one verbal and the other published—and you will agree, at any rate, that one leads to the other? What I'm getting at in this roundabout way is advocation of service in advertising, not mention only of the goods or product, their quality, etc., but the service offered to the public by the bank, manufacturer or corporation. That it is being done to some extent is a fact, but it is equally a fact that much advertising is being carried which omits all reference to service.

A Difference in Method

The following advertisements of Canadian banks—picked at random from the daily press—are indicative of ancient and modern styles and furnish food for thought to progressive bank executives. Judged by the ethics of advertising, one is attractive, logical and well displayed; it interestingly outlines its commodity, graciously offers its service and appeals for mutual benefit through co-operation. The other is a survivor of the advertising copy of the 18th century; it limits itself to a brief statement of facts and lets it go at that. It is not a business-getter; it is non-creative; if it is read at all, it leaves the reader cold and unsympathetic.

PERSONAL BANKING SERVICE

to Professional Men

In your various professions—legal, dental, medical, ministerial—you are accustomed to having your clients consult you regarding their problems. You realize that it is the proper thing for them to do, for few outside of your profession have the knowledge and experience in it that you possess.

Yet do you follow the same principle in your affairs? In financial matters, for instance, do you consult your banker—the logical financial authority—as often as you might? No one is better fitted to give such counsel, both from position and experience, as he.

Following the policy of PERSONAL SERVICE, the ...... Bank will gladly render helpful service of a financial or investment nature, or obtain, if possible, any information you require along these lines which we do not already possess.

Any ...... Bank manager will be glad to meet you at any time, in your office or ours.

THE BLANK BANK

Established 1781

Capital Paid-up	$0,000,000
Reserve Fund	0,000,000

Efficient Service in all departments of banking. Drafts bought and sold. Letters of Credit and Travellers' Cheques issued.

Both banks are paying for space and doubtless, expecting results. A bank advertisement is the bank speaking to its customers or prospective customers. Its object is, through sympathy, confidence, ability and service, to retain, induce or create business. It is just as though the bank manager was conversing with a client in the manager's office, and to a great extent, in accordance with the measure of the elements above mentioned in the bank manager's conversation—to which should be added courtesy—will the bank be successful in holding its customers and building up a larger clientele. The copies are shown herewith; judge for yourself.

While it is true that the advertisements did not occupy the same amount of space, or make equal expenditure, it does not take any great advertising knowledge to decide which is most likely to bring return for money invested. You may think that it is not quite fair to compare two advertisements of such diverse conditions, but both represent space paid for and both advertisers are investing money unsentimentally. Is it better to make larger expenditure with every prospect of results or smaller expenditure with negligible expectations? The question answers itself? And I'm not arguing for larger rather than smaller space. That depends on funds available and character of product advertised; there is no doubt, however, that much money is injudiciously expended through poorly written copy, which otherwise would in all probability bring satisfactory returns.

IN THE DAYS OF THE STRONG BOX

In the 16th Century, gold and silver were almost the sole medium of commercial exchange. Unemployed capital earned nothing. The merchant kept his idle money in a strong box at home, or, for greater security, at the goldsmith's. It took nearly three hundred years to develop deposit banking, the cheque and clearing-house system, and the many other facilities and services offered by modern financial institutions.

MODERN DEPOSIT BANKING

Important as is the function of the modern bank in making possible the transfer of money through the use of credit instruments, it is only one phase of the service which it offers to the public.

The wealth entrusted to the bank does not remain idle like gold in coffers, but is constantly employed as a basis of credit for the legitimate enterprises of industry and commerce, and thus is in continuous service of the community.

The Company invites deposits. It pays interest on daily balances of checking accounts and on time deposits. It extends credit, and makes loans on collateral. It seeks to employ its resources in the development of industry along broad, conservative lines to meet the needs of American business of today and to-morrow.

Awakening of Interest

It is apparent, nevertheless, that Canadian banks are awake to this fact, for their advertisements are more and more laying stress on personal service and featuring foreign trade connections. In a competition and general exhibit of financial advertising displayed at the last annual convention of the Associated Advertising Clubs of the World, advertising copy from banks in all sections of the United States was submitted and analysed. Nine prizes were offered, the competition being under the auspices of the Financial Advertisers' Association, one of the largest "departmentals" included in the Associated Advertising Clubs.

The premier award went to a New York trust company who displayed five panels on which were attached samples of the bank's publicity—advertising, booklets and pamphlets expressing clearly details of art, topography, printing, illustrations, etc. Nowhere, it was declared, has bank publicity gone further in excellence of topography, copy and arrangement. Part of the body matter of one of these winning advertisements is shown herewith. It is headed by a pen-and-ink reproduction of a 16th century merchant sitting quill in hand in a candle-lighted cellar surrounded by brass-bound chests and ancient, musty tomes.

It is, of course, purely a matter of opinion as to whether the foregoing copy or the first Canadian bank advertisement quoted has the strongest word values, and indeed, a fair comparison is difficult since one occupied but a 4 x 6-inch space, and the other a space three times the size. It was, however, the choice of the experienced advertising committee of the Advertising Clubs of the World, and as such is quoted for what it is worth.

Supplementing the Papers

Many Canadian banks now publish monthly magazines, house organs or folders, which, in addition to matters of current interest to members of the banks' staffs, contain valuable articles of particular interest to the public in general. Some of them go further and publish handsome illustrated booklets which are distributed broadcast.

Bank advertisements to be effective should be local, suitable in character, language and taste to those to whom the appeal is made. What appeals to the financial man is ineffective with the farmer; what interests the small shopkeeper fails to attract the wholesaler and vice-versa. There is material in modern banking for the production of excellent advertising copy, known in the phraseology of the profession as "pull."

Advertising is a never-failing power when employed intelligently, whether it be by banks, manufacturers or departmental stores. As much care and consideration should be devoted by the banks to the wording and display of their advertisements as they give to organization and operation. Copy writing is an art attained by constant study and practical experience. To only such men should be given the writing of advertisements if Canadian banks wish to place their advertisements on a par with manufacturers and commercial organizations and institutions.

FIFTY YEARS OF FIRE INSURANCE

"The Past, Present and Future of Fire Insurance" was the subject of an address given by G. D. Finlayson, Superintendent of Insurance for the Dominion of Canada, at a meeting of the members of the Montreal Fire Insurance Brokers' Association on December 16. The period covered by the address extended from 1869 until 1919. At the beginning of this period there were only five Canadian-controlled firms in operation out of nineteen insurance firms which were in operation throughout the country. In 1919 there were thirty-nine Canadian-controlled firms out of a total of 134 insurance firms carrying on business in the Dominion. In the time that has elapsed many of the companies which existed in the old days have disappeared. In the case of many of these companies a small amount of capital would have saved them, but their appeals seem to have been unheeded by capital.

The speaker also spoke of the duties of insurance agents, and said that he was of the opinion that the time was coming when agents would not be needed, and that all business outside of the cities would be carried on by the managers at their head offices. He also suggested the formation of a Dominion Fire Insurance Association that could meet once a year to compare and discuss business in the past and their arrangements for the future.

DIVIDEND NOTICES

International Petroleum Company, Limited

NOTICE OF DIVIDEND No. 1

Notice is hereby given that a dividend of 25 cents United States Currency per share has been declared by the Directors of the International Petroleum Company, Limited, and that the same will be payable on or after the 3rd day of January, 1921, in respect of the shares specified in any Bearer Share Warrants of the Company upon presentation and delivery of coupons No. 1 attached to the said Bearer Share Warrants at the following Banks:—

The Royal Bank of Canada, 60 Church Street, Toronto, Canada.

Condensed Advertisements

"Positions Wanted," 3c per word: all other condensed advertisements 5c. per word. Minimum charge for any condensed advertisement, 65c per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent. extra if charged.

YOUNG MARRIED MAN, with sixteen years' Fire Insurance experience, would like to secure position either on road or office. Alberta or British Columbia preferred. Box 369, *Monetary Times*, Toronto.

WANTED.—Special Agent and Inspector, Provinces Manitoba and Saskatchewan. Headquarters, Regina. Represent three large American Companies. Good salary. Replies will be treated confidentially. Box 371, *Monetary Times*, Toronto.

A FAST-GROWING GENERAL AGENCY, with excellent organization, requires additional representation in their office for the Provinces of Alberta and Saskatchewan. Experienced underwriters of proven ability. We have three inspectors in this field. An exceptional opportunity for the company just entering this territory. Box 373, *Monetary Times*, Toronto.

REGINA LIFE UNDERWRITERS' ASSOCIATION

A successful year was reported by J. H. Taylor, retiring president of the Life Underwriters' Association, Regina, which held its annual meeting on December 11. L. E. Yingst, of the Sovereign Life Insurance Co., was elected president of the association for the coming year. Other officers elected were: Vice-president, M. B. Farr; secretary-treasurer, K. P. Dunstan; executive committee, C. A. Hughes, C. F. Dumfee, W. Clause, C. Woodley and G. A. Robinson. Mr. Taylor announced that the first general meeting of the provincial association will be held in Saskatoon in March. The secretary-treasurer's report showed finances to be in a good condition, and membership on a firm basis.

The London and Scottish Assurance Corporation, Ltd., have sold their office building in Montreal and have purchased another one at the corner of St. John and Hospital Streets.

WHEN TRUSTEE ACTS FOR INFANT BENEFICIARY

Alberta Supreme Court Holds Trust Company is Liable For All Profits Made Less Remuneration

In the application, in re Eamer, it was held that a trust company which has been appointed guardian of the estate of an infant by an order of the Court, without special directions as to investment, is bound to keep the ward's funds invested, and in case of failure to do so is liable for interest thereon, and is not allowed to make a profit out of the office, but is bound to act in all things for the infant's benefit, subject to its right to a reasonable remuneration for its care and supervision of the estate.

Mr. Justice Stuart, in stating the law applicable to the case, says:

"In 21 Cyc., p. 87, it is said: 'It is the duty of a guardian to keep the ward's funds invested and in the case of failure to do so he may become liable for interest thereon.' And in Simpson's Law of Infants, p. 289, it is said: 'From the doctrine that a guardian is a trustee it follows at once that he can make no profit out of the office, but is bound to act in all things for the infant's benefit.'

Was Merely a Guardian

"In this case the guardian received the estate of the infant into its hands under an order of the Court which gave no special or any direction as to investment. In those circumstances the guardian became subject to the general duties of a guardian of an infant's estate. A consequence of the principle enunciated in the passages above quoted seems clearly to be that the guardian has no right to act in the double capacity of guardian and as a person with whom the money is invested. In other words, without special authority from the Court the guardian has no right to invest the infant's money with itself (being a company) and by the use of the money so invested with itself to make a profit thereon. The very fact that the company is known as a company whose business it is to receive money for investment seems to emphasize this view.

"Whatever the situation may have been, therefore, if the guardian made no investment at all but simply kept the money in its own hands, when it appears that it did invest the money, it seems to be absolutely clear that it must account for the interest actually received subject to its right to a reasonable remuneration for its care and supervision of the estate.

"The moneys of the infant were apparently mingled with other trust fund, and these were invested by the company in its own name. It should obviously be chargeable with the interest which it in fact received on the mingled funds so invested. Of course, a small proportion of this general fund seems to have been retained, and it was no doubt legitimate in the circumstances to retain uninvested a small proportion of this infant's estate. What was the proportion actually retained is of course difficult to determine upon the evidence, but the best the Court can do is to make such allowance for this as would seem to be fair to the company."

MERCHANTS BANK WINS SUIT

Judgment for the plaintiff in the case of the Merchants Bank v. T. McAuley has been given in the Manitoba Court of King's Bench. The judgment was for the amount of the note, with interest at [illegible] per cent., with the amount received from a sale of the defendant's goods to be credited on the note. A counterclaim entered by the defendant was dismissed.

[illegible] sued for the amount of their note, which was [illegible] the defendant in his defence alleged that the [illegible] the chattels at a certain value.

APPEAL ON SUCCESSION DUTIES

The Privy Council on November 30 granted leave to appeal in the Royal Trust Co. versus the Finance Minister of British Columbia case which involves questions relating to the succession duties of the estate of the late Sir Wm. Van Horne.

SUIT AGAINST COBALT TOWN

The town of Cobalt which recently emerged from lengthy litigation is again faced by a lawsuit. The municipality which won a legal fight with the Temiskaming Telephone Co., after the case had been fought over a number of years and was carried to the Privy Council, is now named as one of the defendants in an action for damages brought by St. Joseph's College, North Cobalt. The latter is asking for $150,000 in connection with damages alleged to have been done to its property, due to the pollution of Mill Creek.

ACTION ARISES FROM EXCHANGE SITUATION

A legal dispute, said to be without precedent in Canada, has arisen through the issuance of a writ against the Somerville Paper Box Co., Ltd., of London, Ont., by the American Chicle Co. of New York for the sum of $50,000. It seems that in 1910 the business and plant of the Somerville Paper Box Co. was bought from the Sen-Sen Chiclet Co., which latter firm was later absorbed by the American Chicle Co. The sales arrangements involved a transaction whereby the Somerville Co. assumed a mortgage for $50,000 payable in legal money of Canada, or in gold if demanded by the mortgagee. The present exchange conditions have prompted the American Chicle Co., which holds the mortgage, to demand payment in gold.

The American Chicle Co. has agreed to accept the amount of the mortgage payable in American funds, which would mean that the local firm would have to pay practically $57,000 in Canadian money at the present rate of exchange. This, it deems, is contrary to the original agreement, and accordingly it is contesting the American Chicle Company's demand.

ONTARIO POWER CO. MUST PAY TAXES

The Ontario Hydro-Electric Commission has again appealed its assessment in Niagara Falls and had it dismissed. Many interesting points showing the relation of the hydro with the Ontario Power Co. were brought out. It is said that the hydro will carry the appeal to a higher court. The case came up on December 9.

Judge Livingstone said: "This is a very serious issue, and no matter what my decision is, it is not likely to be the final decision. I am convinced that as matters stand the assessment should not be disturbed. The Ontario Power Co. is a legally incorporated company. It still exists. It still owns and controls its own assets. True, the Hydro Commission acquired all the shares in the company and can get profits from the business.

"The directors are from the hydro office, but when they act for the Ontario Power Co. they do not act as hydro officials. It is not contended that the Ontario Power Co. is out of business, but, it is contended that the lands are under the control of the hydro. My answer to that is that, so long as they are controlled by the Ontario Power Co. there is a doubt, and where there is a doubt, exemption should not apply. It is clear that the Ontario Power Co. does control the lands. In the Hamilton case cited the act clearly applied, as it was a local commission; this case is different. There is no substantial difference between this case and the last and I dismiss the appeal."

News of Industrial Development in Canada

Backus Interests Secure English River Timber Limits—Will Spend Large Sum in the Development of That Region—Deal is Profitable to Ontario Government -- Nova Scotia Steel Industry Reports Few New Orders

AFTER a great deal of controversy, the Ontario government has awarded the E. W. Backus interests the English River pulpwood limits. Tenders were called for these limits, and when opened last week, it was found that the Backus offer was $50,100, or more than double the second highest bid. The limits are estimated to have about 1,000,000 cords of spruce, from 10 to 12 million cords of poplar and enough jackpine to make about 25,000,000 railway ties.

The amount of government dues expected from the limits is $10,000,000. The Backus syndicate not only must pay these dues, but will have to invest in pulp and paper mills, electric power plants, railways and sawmills at least $12,000,000. Work will be provided for more than a thousand men, the sawmills at Kenora will resume operations, the municipal power plant will be taken over at a cost of $350,000, and a contract assumed that will mean a loss of $600,000 over a period of years; and more than 100 miles of railway will be built.

Summing up the results of the purchase, Premier Drury stated:—

"It will ensure to the treasury, from territory which is now unproductive, a yearly revenue ranging from $150,000 to $200,000, and eventually from the timber now standing an aggregate amount of from $8,000,000 to $10,000,000. This estimate is based upon the existing dues, which will undoubtedly increase in years to come. I am confident that the public will appreciate the immense advantage at this critical time of dealing promptly and energetically with this matter. There can be no doubt that the action of the department will help materially at once in relieving the unemployment situation, and that it will for many years to come contribute to the prosperity of the whole province."

Although at first the selling of these limits to an American syndicate was frowned upon, it is now generally considered, in view of the agreement between the government and E. W Backus, that the deal will be beneficial to the province, and more particularly to the town of Kenora, which will obtain a valuable new industry. According to the agreement, the first step necessary for the Backus interests is to erect a mill at Kenora and develop the Lake of the Woods limits which they now hold. The government also grants a lease to the Backus people of the water power at White Dog Rapids on the Winnipeg River, subject to such "rentals, reservations and conditions," as the minister of lands and forests may deem in the public interest. Mr. Backus, who is the owner of the Norman dam at the outlet of the Lake of the Woods, which is an essential work for the regulation of the level of the Lake of the Woods, consents, as a further term of the agreement, to submit to such regulations as to this dam as may be imposed by the minister of lands and forests. The government has also made a stipulation with Mr. Backus that any portion of the newsprint product must be available for sale to Canadian publishers at the instruction of the government. The amount is left open, but it is said that the government could order 100 per cent. to Canadian publishers under the agreement.

Pulp and Paper Notes

Letters patent have just been issued by the Quebec government to the "Canadian International Paper Co.," of Three Rivers, Que., with a capital of $20,000,000. The new company possesses large buildings in Three Rivers, where it has commenced to manufacture sulphite. The manufacture of [illegible] will begin next summer. The company has timber [illegible] the St. Maurice district, sufficient for all needs dur[illegible] the [illegible] hundred years, it is stated. The temporary [illegible] Philip T. Dodge, president of the International Paper Co., of New York; Robert F. Grant, manager of the St. Maurice Lumber Co., Three Rivers; Hon. Jacques Bureau, K.C., M.P.; Philippe Bigue, K.C.; Hon. Wilfrid Gariepy, K.C., of Three Rivers. The company has the right to manufacture and deal in all kinds of wood, pulp and paper.

Speaking in Montreal this week with regard to the new pulp mill on the Fraser River, British Columbia, some particulars of which have already been given in these columns, F. J. Jones, of the Canada Cement Co., said: "There is no doubt that a mill will be constructed, the size of which will depend upon the extent of the government leases. The forests of British Columbia are unsurpassed, and a very great future awaits the pulp industry there; consequently there need be no hesitation in building a mill of considerable dimensions. The lumber business in British Columbia is not prosperous at present, due no doubt to prevailing world depression. Indeed it is almost at a standstill. The high cost of rail haulage has contributed to make the industry unprofitable, and a very large number of employees have been thrown out of work. Unemployment generally has become a grave problem in the province, having reached an acuter stage than the rest of Canada has yet experienced. An explaination frequently offered locally for these conditions is the rush of returned soldiers to British Columbia on demobilization. Though partially causative of labor conditions, this will shortly cease to have any marked effect by the gradual return of these men to their own provinces."

The plant of the Mattagami Pulp and Paper Co. at Smooth Rock Falls, Ont., has been closed down, and all operations there have been suspended until the new year. According to authentic reports, wages for bushmen then will be cut to $40 per month and board, this representing a considerable decrease in the scale formerly paid.

Iron and Steel

The plate mill at the plant of the Dominion Iron and Steel Co. opened on December 21, and is now giving employment to about 140 men. This will not increase the number of men employed on the plant. Some of the men who have been walking the streets since the advent of the strike have been given their jobs at the plate mill, and the remainder are composed of men who have been employed at other capacities on the plant. It is not known how long the mill will continue operations. Enough work is at hand, it is thought, to keep it in operation for several weeks at the least. The mill may have to close when these orders have been filled unless further ones are received after the holidays.

Within a short period it is expected that a considerable number of the men at present employed on the plant of the Dominion Iron and Steel Co. will be laid off. An official has announced that it will be impossible for the company to keep up operations at their present scale for any great length of time. No further orders have been received by the company, and those at hand will not keep the plant going long even at its present capacity.

That employees of the Nova Scotia steel industries should be demanding settlement of wage differences is considered ridiculous in the face of present conditions. If there is any adjustment at all, it will be most likely downward. Following such adoptions as have occurred at certain American steel plants—namely, the Luken Iron and Steel Co. of Coatsville, Pa., the Midvale Steel and Ordinance Co., and the Gambria Steel Co., of Johnstown, Pa., it seems more than probable that Canadian steel manufacturers will be forced to follow suits. In the United States, the companies above named have had to cut the wages of their employees twenty-

five per cent.—all due to the unsettled condition of the steel markets and the existing economic situation.

Nearly 74,000 tons of pig iron was produced by the Nova Scotia Steel and Coal Co. at the blast furnace department of the plant during the current year up to November 15, when the furnace was banked. The monthly totals, by tons, were as follows January, 6,059; February, 6,595; March, 7,408; April, 7,258; May, 7,445; June, 7,112; July, 7,608; August, 7,504; September, 6,643; October, 6,596; November, 3,241.

Manitoba Abattoir

Two thousand Manitoba farmers, banded together in the Farmers' Packing Co., Ltd., expect to build a $500,000 cold storage plant next summer in connection with their packing establishment near the Union Stockyards, Winnipeg, Man., if assistance to the extent of $200,000 is obtained from the provincial government. Members of the government announced that they were anxious to assist the farmers, but that the decision on the grant would have to be made by the legislature as a whole. The present plant has a capacity for killing and dressing 125 cattle and 300 hogs daily.

The production of coal at Springhill, N.S., has been going on steadily and the output for the month of November established a record when 41,000 tons of coal were raised, as compared with 31,000 in October. Several improvements have also been made, prominent among them being a new power house which will have a capacity large enough to take care of the power end of the developments for years to come.

Announcement has been made that the Borden Co., Ltd., Truro, N.S., manufacturers of condensed milk, etc., would close its plant for a period of probably sixty days, beginning the first of the new year. The step is taken because of present market conditions. Two hundred and seventy milk producers in Cumberland, Colchester, and Hants counties will be affected by this shut-down.

INSURANCE NOTES

Members of the Royal Victoria Mutual Fire Insurance Co. met in the Prince Edward Hotel, in Brandon, Man., on December 8, 1920, when it was decided to move the head office of the company from Beulah, Man., to the city of Winnipeg. After the New Year the move will be made, and the company will be installed in their new offices at 208 Montreal Trust Building by January 8. The management is still in the hands of M. G. Doyle, who has been identified with the company for the past twelve years.

Mr. Doyle, who has been secretary-manager of the Miniota Farmers Mutual Fire Insurance Co., of Beulah, Man., for the past twelve years, has resigned his position with that organization, to take effect on January 8, 1921, and has accepted a position with the Retail Merchants Underwriters' Agency as inspector for Manitoba, with headquarters at Winnipeg. His position with the Miniota Mutual has been filled by H. E. Hemmons, who has been treasurer of the company for some years.

The Northwestern Mutual Fire Association, of Seattle, Wash., has been registered to write fire insurance in the province of Manitoba.

In recognition of good service and loyal co-operation, the employees of the Adams Furniture Co., Toronto, Ont., have just been presented with free Canada Life Insurance policies varying from $500 to $3,000 under the group insurance plan. In addition to the usual benefits for protection of dependents, the policies also provide a disability benefit under which the insurance benefits may become payable to the employees themselves.

W. R. McEachern, hitherto superintendent of the Toronto Centre district for the Metropolitan Life, has been appointed to the superintendency of the Riverdale district (Toronto), the appointment dating from December 27.

STRIDING AHEAD
These are wonderful days for life insurance salesmen, particularly North American Life men. Our representatives are placing unprecedented amounts of new business. All 1919 records are being smashed.

"Solid as the Continent" policies, coupled with splendid dividends and the great enthusiasm of all our representatives tell you why.

Get in line for success in underwriting. A North American Life contract is your opening. Write us for full particulars.

Address E. J. Harvey, Supervisor of Agencies.

North American Life Assurance Company
"SOLID AS THE CONTINENT"
HOME OFFICE - TORONTO, ONT

Insuring the Motive Power
The object of Business Insurance is to insure the "brains" of an organization. Knowledge, combined with administrative ability, is invaluable. Every business, large or small, depends primarily upon one or more experienced leaders. The death of any one of them would result in a heavy financial loss. There would be heavy going until the deceased official was replaced by someone of equal ability. The possession of a policy of insurance payable to the firm in the event of the death of such a leader is essential. Joint policies payable on the death of the first partner, or (preferably) separate policies on the lives of the individual partners in favor of the survivors are issued by The Mutual Life of Canada. It will be the object of the Company to adapt each Business Policy to the particular requirements of the insuring firm. Consult our representative. He will be glad to advise you regarding business insurance.

The Mutual Life Assurance Co. of Canada
Waterloo **Ontario**

HUME CRONYN, M.P.,
President.

News of Municipal Finance

British Columbia Will Make No Gifts to Municipalities—Aid Will be Extended in Form of Loan—Red Deer Statement for 1920 Shows Satisfactory Results—Galt Hydro Profitable—Winnipeg Will Seek to Impose Income Tax

THAT the British Columbia government does not intend to grant any financial assistance to municipalities in the form of a gift is evident from an interview between Premier Oliver and the city council of New Westminster. As a result of the interview, the city will ask the government for a loan of $25,000, the premier making it clear that any aid so granted to municipalities by the province shall be loans repayable with interest. It was also agreed that the money may be repaid in five instalments. With regard to the policy of the government in not making grants, the premier stated that the money might be spent more carefully if the city had to pay it back.

Mr. Oliver said that the minister of public works is consulting the department officials with a view to ascertaining what work can be done at this season of the year. The minister of finance is also taking stock of the position and will present a report shortly. The executive is in the position that it must take stock and find out where it is, financially. This year the cost of work has been much heavier than estimated—30 per cent. higher, it was stated.

The premier said that it was his desire to work in harmony with the municipalities, but it would not do any good to try to force the government to do anything not in the interests of the province as a whole. What he had in mind, he went on, is that under the new liquor legislation there will be a certain amount of revenue coming to the municipalities, and that this sum will help them repay such sums as they may borrow.

The government's attitude is apparent. It does not intend to give anything away, and any municipalities which have been expecting such aid will be disappointed. The forthcoming session of the legislature is being anticipated with interest, as many municipalities who are in financial difficulties intend pressing claims on the province.

Milton, Ont.—In the annual statement of the town treasurer up to December 15, 1920, the following important items are shown: Expenditures, $34,377; high school teachers' salaries, $3,364; public school teachers' salaries, $5,150; fines paid, $1,044; town's assets in excess of liabilities, $42,272.

Mimico, Ont.—The financial statement of the town, just issued, shows an excess of assets over liabilities of $37,025. The total assets of the town are $706,631. The Hydro-Electric balance sheet shows a surplus of $18,720, the assets amounting to $41,485. The school board report shows receipts of $77,744, with expenditures of $75,570.

Lethbridge, Alta.—On the first of the new year the city has to meet coupon interest to the amount of $50,000, of which sum $25,000 is payable in New York. At the present rate of exchange the city stands to lose a considerable sum in remitting this amount.

Brantford, Ont.—With total receipts of $1,063,186, the city expects to close the financial year with a deficit of $31,068. The net debt, however, has been decreased by $69,143 by an addition to the sinking fund and a reduction in gross. The bonded debt as at December 31 will be as follows: Gross debt, $4,069,168; sinking fund, $935,405; net debt, $3,133,763. At January 1, 1920, the figures were: Gross, $4,098,234; sinking fund, $895,328; net, $3,202,906.

Winnipeg, Man.—Another attempt to obtain the legislative right to impose an income tax is to be made by the city, members of the legislation committee have announced. They said they wished to lighten the burden of taxation by increasing the number of contributors. "We all are in favor of broadening the basis of taxation by means of an income tax," Alderman George Fisher said. "We are in favor of going ahead with this tax unless we see something better."

The city also intends to seek legislation providing for [illegible] of property sold in tax sales without passing a separate by-law in each case as the existing arrangement requires.

Calgary, Alta.—Municipal hospitals have cost the city during eleven months of operation this year the sum total of $464,690, according to the report of City Comptroller Wood. Last year for the same period there was expended on the hospitals $354,655, so that this year there has been spent $110,035 more on the hospitals. Revenue for the eleven months amounted to $228,776. At the beginning of the year the council estimated that $273,360 would have to be raised by taxation to carry on the operations of the hospitals.

Galt, Ont.—Since the introduction of Hydro in Galt in 1911, this year has been the best in the history of the department, a profit of $17,000 on the year's business being reported recently by Manager W. H. Fairchild in his annual report to the Public Utilities Commission. Galt has now invested in its Hydro-Electric system $357,986, against which there is a debenture issue of $184,477, with sinking fund of $55,000. Depreciation reserve fund is now $69,230, and the net surplus to the credit of the department is $104,000. During the past year 210 new customers were served, and the increase would have been greater had it not been for the shortage of power. During the coming year it is planned to erect a new utilities building, with practically new electric equipment, which will provide for an increased load.

Edmonton, Alta.—Exemption from assessment of lands forfeited to the city under tax sale proceedings is proposed in a communication which Assessor T. Walker has sent to the city council. Mr. Walker says that, as the 1921 assessment rolls are now nearing completion, it is very desirable that this question should be taken up by council. Under the old tax regulations there was an eighteen months' redemption period on lands sold at a tax sale.

This allowance would bring the redemption limit on properties to December, 1920. In 1919 the Arrears Extension Act was passed, which allowed owners to retain their rights in tax sale lands by making agreements to pay the arrears over a ten-year term. For this reason, says Mr. Walker, all tax sale properties have been included in previous assessments and taxes levied up to the end of 1920. In the assessor's annual report it was pointed out that it was not expected that more lands would be redeemed by the extension method, and that it was desirable that no further tax levies should be made on land forfeited to the city.

Properties assessed at $6,230,000 are under forfeit to the city, says Mr. Walker, in pointing out that it is necessary for council to pass a resolution instructing him to exempt these properties from assessment next year. "The effect will, of course, be to reduce the taxable area of the city," says the assessor, "and increase the tax burden proportionately on the remaining taxable area. As, however, tax arrears have accumulated to the full market value of much of this land, it seems most undesirable to continue additional levies."

Revisions of the city's million-dollar insurance schedule are being made by the comptroller and commissioners. This schedule is checked up annually, when various readjustments are made. Last year the city's insurance cost was $18,000.

Red Deer, Alta.—In the city's report for 1920, W. E. Lord, mayor, makes the following remarks: "The city's finances are now on a sound basis, and our banking and financing arrangements are very satisfactory and agreeable. The 1919 account has been reduced to a little less than ten thousand dollars. All current demands have been paid. The school board has been paid its full demand for this year. All debentures and treasury bills have been paid on presentation. We have taken up of the treasury bills due next year five thousand dollars, and we now have cash on hand to take up the balance of all treasury bills due in 1921. The city's

debenture debt has been reduced since 1914 by $72,261.46, but this must not be understood to mean that the city's total debit is reduced by that amount, for in connection with the arrears of taxes account there is the liability of the treasury bills. However, we are in the best financial position we have been in for years, and we must be very careful to hold our position by avoiding unnecessary expenditures, practising economy and undertaking no new obligations. We must pay as we go, which may be done only by making the tax levy sufficient to meet the requirements and then collecting the taxes."

A. T. Stephenson, secretary-treasurer and commissioner, also remarks: "There is a large surplus of assets over liabilities, and part of this surplus will be absorbed in loss on taxes in subdivision property, but there is an ample surplus to take care of this loss. The arrears of taxes were capitalized and consolidated, and a new issue made last year of $90,000 ten-year treasury bills. The proceeds of the sale of these bills were used to pay off all outstanding treasury bills and bank loans previous to 1919. All these have been paid off excepting $8,000 treasury bills, due 1921, and sufficient money is in the savings bank to pay off this issue when due."

The financial statement for the ten months ended October 31, 1920, shows total revenue assets of $230,342, as compared with revenue liabilities of $134,443. Receipts are shown as $336,317 and disbursements as $308,646, the amount of cash on hand and in the bank being $27,671. The total debenture debt is shown as $297,567 and the net debt at $147,129.

Assessment for 1920 is given as follows: City net, $2,237,060; exemptions, $539,000; business, $51,700; public school, $3,325,015; separate school, $105,850.

Current taxes collected during the ten months totalled $70,413, while 1919 taxes collected amounted to $9,604, and arrears, $17,093. Arrears of taxes, 1919, at the end of October amounted to $24,118, and other arrears, $93,894.

Government and Municipal Bond Market

Tenders on Lethbridge Irrigation Bonds Close Next Week—Victory Bond Prices Are Slightly Weaker—Few Municipal Issues Coming on Market, But Numerous Money By-Laws Are to be Submitted to Ratepayers

MANY views as to the trend of the bond market at the beginning of the new year have been expressed, but within a short time concrete evidence will be at hand. During the past week two municipalities, Kenora and Iroquois Falls, showed their confidence in the strengthening of the market by postponing their issues. The former is calling for tenders again on January 12.

Already there are several issues on the list for sale in January, the most important of which is the Lethbridge Northern Irrigation offering. Bond dealers in Toronto do not appear to be very interested in the proposition. Irrigation bonds are a new kind of investment to Canadian bond buyers. In the United States they were not held in very high repute, and it is feared that this might adversely affect the sale of the Lethbridge Northern bonds.

The amount of the bond issue is placed at the figure named in the district vote—namely, $5,400,000. This is the estimated cost of the project, plus a margin to carry it on for a year or two. The debentures are issued on the credit of the district and are repayable in thirty years. Under the terms of the issue, interest at 7 per cent. is to be paid for the first three years of the loan, provision being made for these payments out of the margin allowed for working expenses during the first two or three years. Interest only will be continued to be payable for the next four years, at the rate of $5.45 per irrigable acre, but in 1920 payments on interest and principal will begin. There will be twenty-three of these annual payments, taking up the full amount of the loan by 1950.

The Alberta government, in accordance with the legislation passed at the last session, will create a fund equal to two years' interest, of $756,000, which will be available for making up any arrears on the part of the ratepayers. This fund is to be perpetual during the lifetime of the loan, but it is limited at any time to the amount indicated. Stringent action is provided for in case of such defaults, by which the government may proceed against the landowners and recover the amounts so paid by means of tax sales of the delinquent lands. Protection for the bondholder is therefore amply afforded, but the farmers in the Lethbridge Northern district have no doubt about their being able to meet all their obligations and having something to spare from the proceeds of the increased crop, they may reasonably expect to harvest, when they have irrigation.

Victory Bonds Weaker

Victory bonds again moved irregularly this week, and the close on December 29 found prices slightly lower. The 1922 maturities were the only ones to register a net gain for the week, while the 1933's were fairly steady and closed at the same price as it opened. The following figures illustrate the movement during the last two weeks, and show the standing as compared with the controlled price:—

	Control price.	Last week. High.	Last week. Low.	This week. High.	This week. Low.
1922	98	97⅞	95¼	97⅜	96¼
1927	97	96½	95½	96	95
1937	98	98⅛	97	98⅛	97
1923	98	97⅛	96⅜	97	95¼
1933	96½	95⅛	94⅝	95¼	94½
1924	97	95	94⅛	94⅝	93½
1934	93	93⅛	92¼	92¾	92

Coming Offerings

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Scarboro Tp., Ont. ..	$ 130,000	7	30-instal.	Jan. 6
Decker S.D., Man. ..	40,000	7	....	Jan. 7
Lethbridge Northern Irrigation District	5,400,000	7	30-years	Jan. 7
Laval-sur-le-Lac, Que.	60,000	6	Optional	Jan. 8
Kenora, Ont.	82,320	6½ & 7	Various	Jan. 12

Laval-sur-le-Lac, Que.—Tenders will be received until January 8, 1921, for the purchase of $60,000 6 per cent. serial bonds, dated November 1, 1920, and due November 1, 1950. An alternative bid for five-year bonds will also be accepted.

Kenora, Ont.—The town has extended the date on which tenders for its debentures close from December 29, 1920, to January 12, 1921. The debentures, which total $82,320.25, are as follows: $10,000 7 per cent. 15-instalments, for electric utility; $20,000 7 per cent. 20-year, for waterworks; $13,564.87 6½ per cent. 33 year, for consolidation of debt; $6,000 7 per cent. 10-year, for electric; $25,000 7 per cent. 20-instalments, for public improvement; $7,755.38 7 per cent. 20-instalments, for local improvement. F. J. Hooper, clerk and treasurer.

Debenture Notes

Niagara Falls, Ont.—A by-law to raise $100,000 for sewers will be submitted to the ratepayers.

Iroquois Falls, Ont.—All tenders received on the $45,000 6 per cent. 20-year debentures (guaranteed by the province) were rejected.

Why Not Select a Convenient Investment?

When you have money to invest, it is advisable for you to place it in a security where principal is safe, where interest is promptly paid and easily collected, and which you can readily convert into cash.

Then why not buy Canadian Government or Municipal Bonds? These bonds offer the highest grade of security, are easily marketable and the interest coupons, which are attached to each bond, need only be clipped off and deposited in your bank on the due date.

At existing prices, these bonds yield from 6.70% to 7.25%.

St. Thomas, Ont.—The Ontario Railway and Municipal Board has sanctioned the issue of $50,000 debentures for the purpose of enlarging the gas main service and works in the city.

Vancouver, B.C.—Ratepayers will be asked to vote on the following money by-laws in January: $500,000 for roads and streets; $241,000 for school purposes; $75,000 for waterworks; $25,000 for bridge.

Saanich, B.C.—The $200,000 waterworks debenture by-law, which was rejected by ratepayers some time ago, will be again submitted on January. The only change from the original draft is that the interest rate has been increased to 6½ per cent.

Fort Garry R.M., Man.—On January 14, 1921, voting will take place on a by-law authorizing the raising of $50,000 for school purposes.

Brooklands S.D., Man.—Two by-laws will be submitted to ratepayers on January 22, 1921, authorizing the raising of $40,000 and $80,000 for school purposes.

Saskatchewan.—The following is a list of debentures authorized by the Local Government Board from December 6 to December 18, 1920:—

Rural Telephones—8 per cent. 15-years annuity: Herschel, $1,500; Rainton, $1,000; Yellow Lake, $3,100; Biggar Neola, $14,700; Scott, $3,900; Spalding, $16,000; Doyton, $10,600; Leslie, $14,800; Frankslade, $1,400; Fern Glen, $3,000; West Hague, $8,000; Warrior, $15,000; Blaine Lake, $18,300.

School Districts—Findlator, $800 8 per cent. 20-years annuity; Ceylon, $1,500 8 per cent. 10-years annuity; Derby, $1,000 8 per cent. 10-years annuity; Harvest, $1,000 8 per cent. 10-years annuity.

Town of Maple Creek, $4,000 6½ per cent. 10-years annuity, for water meters.

Mariott R.M., $8,698 8 per cent. 15-instalment, for Rose Union Hospital.

Edmonton, Alta.—There was a good deal of interest in the arrest of J. L. Etheridge, former president of Morris Bros., and the report of the collapse of the deal with the Portland bond house. It will be remembered that this company purchased in September last $2,130,000 6 per cent. notes, dated September, 1920, and maturing two, three and four years after date, at a price of 97.29, and interim certificates were issued for same. The city will not lose, however, according to Mayor Duggan. The bond issue was taken to Portland last week by Secretary-Treasurer Barnhouse and deposited with the First National Bank, to be given out to the purchasers when the face value in cash was deposited. According to a wire received by city officials from the bank, the city is fully protected by the fact of the bank holding the bonds until the purchasers redeem them in cash.

There is also the possibility that the city will be able to dispose of the unsold balance, if any, at a favorable price, as an offer has been made by a Toronto house.

Bond Sales

Yorkton, Sask.—Strang and Snowden, Winnipeg, have purchased $100,000 7 per cent. 5-year bonds at a price of 97½, and have also taken an option on $55,000 at 98½. The town pays about 7.60 per cent. for its money at 97½.

Township of Teck, Ont.—On December 1, Hamilton B. Wills and Company were awarded $10,000 6 per cent. 10-year debentures at a price of 89.14, at which rate the municipality paid slightly more than 7.50 per cent. for its money. The securities are not guaranteed by the province.

Saskatchewan.—The following is a list of debentures reported sold by the Local Government Board from December 6 to [illegible], 1920:

Schools.—Hyas, $15,000 20-years 8 per cent., Coot Hill, $4,000 15-years 8 per cent., Franksland, $3,900 15-years 8 per cent.; Waterman-Waterbury Co., Regina. Semans, $25,000 20-years 8 per cent.; H. J. Birkett, Toronto, Ont. Pleasant Grove, $1,100 10-years 8 per cent.; C. M. Gripton, St. Catharines. Hedland $1,050 10-years 8 per cent.; Walter Martin, [illegible] Cottage Grove, $2,500 10-years 8 per cent.; Standard Bank.

Rural Telephones.—Marcelin, $4,000 15-years 8 per cent.; local purchaser. Little Manitou, $2,500 15-years 8 per cent.; Wood, Gundy and Co., Saskatoon. Wroxton-Kessock, $5,200 15-years 8 per cent., Mikado, $10,000 15-years 8 per cent.; R. O. Berwick Ltd., Regina. Fort Pelly, $1,200 14-years 8 per cent., S. W. Moosomin, $24,500 15-years 8 per cent.; W. L. McKinnon and Co., Regina. Elbow Lake, $11,900 15-years 8 per cent.; Harris, Read and Co., Regina. Marquis, $1,800 15-years 8 per cent.; C. W. Milestone, Moose Jaw. Twin Valley, $3,500 15-years 8 per cent.; W. D. Craig, Regina.

Village.—Fenwood, $700 10-years 8 per cent.; H. C. Riddell, Fenwood.

Midland, Ont.—C. H. Burgess and Co. have been awarded $79,227 6½ per cent. 19 and 20-instalment debentures at a price of 98.61: At this rate the town pays about 6.75 per cent. for its money. There were two bids the same, but the securities were awarded to C. H. Burgess and Co., presumably in view of the fact that the securities of the municipality were handled by that company previously. Tenders were as follows:—

C. H. Burgess and Co.	98.61
Dyment, Anderson and Co., and Turner, Spragge and Co.	98.61
A. Jarvis and Co.	98.57
R. C. Matthews and Co.	98.17
A. E. Ames and Co.	97.89
Dominion Securities Corp.	97.78
N. F. Jarvis and Co.	97.10

New Brunswick.—The following tenders were received by the province for its $1,750,000 6 per cent. 15-year debentures. Bids were asked for securities payable in Canada and New York, and Canada only:—

	Canada only.	Canada and U.S.
Wood, Gundy and Co., National City Co., Ltd., and Eastern Securities Co., Ltd.	95.14	....
Wood, Gundy and Co., National City Co., and E. H. Rollins and Sons	....	95.53
A. E. Ames and Co., and J. M. Robinson and Sons	95.11	97.50
A. Jarvis and Co., and Morrow and Jellett	94.03	....
Osler, Hammond and Co., Canadian Debentures Corp., C. H. Burgess and Co., and Housser, Wood and Co.	93.517	....
W. A. Mackenzie and Co., and R. A. Daly and Co.	93.37	96.06
Dominion Securities Corp., and W. F. Mahon and Co.	93.147	....
Harris, Forbes and Co.	....	96.16

The issue was awarded to the highest bidder for bonds payable in Canada at the price of 95.14, as stated above. At this rate the province pays slightly more than 6½ per cent. for its money.

Cochrane, Ont.—Brent, Noxon and Company have purchased $32,000 6 per cent. 20-instalment at a price on about a 7 per cent. basis.

Dundas, Ont.—R. C. Matthews and Company have purchased $64,000 5½ per cent. 20-year debentures and $55,995 5½ per cent. 30-year debentures. The proceeds of the issues will be used for school and sewer purposes.

MANITOBA INVITES TENDERS

The province of Manitoba is calling for tenders until January 5, 1921, for the purchase of $2,000,000 6 per cent. 10-year bonds, interest and principal payable in New York as well as Canada. The securities are dated January 2, 1921. Proceeds in Canadian funds, payment and delivery, Winnipeg, Toronto or Montreal. Interim certificates will be ready within one week of purchase.

CORPORATION SECURITIES MARKET

Stock Prices Move Upward—Paper Issues Most Prominent—Selling Less Urgent and Better Demand—Loew's Merger Approved

THOSE who have been regarding the business situation with apprehension should find encouragement in the movement of stock prices during the past week. The markets, both in Montreal and Toronto, presented a much better appearance at the close on December 29. Nobody has dared predict how long the upward movement will continue or how steady it will be, but the greatly improved sentiment would seem to indicate a much better future for Canadian stocks.

Steadiness and strength in New York led to a better tone here, while less urgent selling and good demand contributed to the marking up of prices. The sudden rally on December 23 was considered too drastic to be good, but the steadiness since that date has brought about a different feeling.

Paper stocks have once more come to the fore, undoubtedly in response to the strong financial statements presented by Wyagamack and Brompton. The "merger" issues also gave a much better account of themselves. An advance in Montreal of sixteen points on bids, without offers, by Windsor Hotel was explained when it was stated that the directors of the company have received an offer through the Crown Trust Company to take an option on the company's stock at $175 per share. The name of the party taking the option has not yet been ascertained, but the proposal is being considered. For some time there have been rumors that a strong syndicate is anxious to buy the hotel. Three weeks ago ten shares of stock sold at 82, so that the advantages of such a deal to present shareholders is readily apparent.

The following figures show the day-to-day trading for the week ending December 29:—

	Montreal.		Toronto.	
	Listed stocks.	Bonds.	Listed stocks.	Bonds.
Thursday	12,788	$ 229,050	1,942	$ 454,150
Friday	7,365	285,500	1,135	73,300
Monday	7,341	255,050	2,629	341,700
Tuesday	13,383	306,700	1,809	205,850
Wednesday ..	13,847	327,350	1,496	344,000
Totals	54,724	$1,403,650	9,011	$1,419,000

The figures in the previous week were: Montreal, listed stocks, 89,023; bonds, $1,671,018. Toronto, listed stocks, 15,654; bonds, $2,754,560. A reduction in trading was due to some extent to the holidays on Friday afternoon and Saturday, when the exchanges were closed, but the relief of selling pressure was the principal factor.

Bondholders of the Marcus Loew's Theatres, Ltd., have approved unanimously the $20,000,000 merger of Loew's theatres in Canada. As Windsor shareholders also gave their approval this week, all the interests connected with the merger have given their approval and the consolidation can now be consummated.

Capitalization Changes

The following companies, which are operating under Dominion charters, have been authorized to increase their capital stock. In each case the new shares to be issued will have a par value of $100:—

Company.	Former capital stock.	Increased to
Edmanson and Bates, Toronto, Ont.	$ 100,000	$ 500,000
La Compagnie Dentaire Masson, Ltée.	10,000	1,000,000
Marshall Wells Co., Ltd., Winnipeg, Man.	1,000,000	2,000,000
Dominion Radiator Co., Toronto, Ont.	600,000	1,500,000
British American Oil Co., Ltd.	1,500,000	3,000,000

Mason and Risch, Limited, Toronto, Ont., have been authorized to decrease their capital stock from $1,000,000 to $400,000 by cancelling 6,000 shares of unissued stock of $100 each and then increasing the capital to $1,500,000 by the issue of 11,000 new shares of a par value of $100.

In January the New Brunswick Power Company will increase its present bonded indebtedness of $1,750,000 by the issue of $132,000 first mortgage bonds, due 1937, at 5 per cent., interest and principal payable in New York funds. The proceeds of the proposed issue are to be used for plant replacements.

MANITOBA WORKMEN'S COMPENSATION

By the Workmen's Compensation Act, which becomes effective January 1, 1921, workmen in the province of Manitoba came under what is practically a system of state insurance. Workmen's compensation has been operative in the province since 1919, but the employers have hitherto dealt with the insurance companies, whereas from January 1 they will deal directly with the body representing the state, the Workmen's Compensation Board, which will maintain a common accident fund, out of which compensation payments and the cost of administration will be met.

Under the new act the compensation to be paid to a worker for total disability is 66⅔ per cent. of his wages. In the event of death the widow will get $30 a month until she dies or remarries, and, in addition, she will be allowed $7.50 for each child up to the fourth, the maximum allowance thus being $60 a month.

Nine racing associations in Ontario have made well over two million dollars in profits in their meets this year. About forty-two millions were wagered. The sums are totalled from the annual reports to the provincial treasurer.

The Royal Trust Company's booklet "The Income Tax and the Individual," which was found of great use to the taxpayers, has been completely revised and rewritten, in view of the great changes recently made in the law.

Our Service to Investors

INDUSTRIALS

THE Securities issued by several Canadian industries are as good as gold bonds. They can be purchased through us by persons of limited means. They pay high dividends and capital is secured.

These Securities present no speculative risks because their market value is maintained by steady expansion and the unusually strong resources behind them.

As a means of steady money accumulation, particularly attractive to those of limited means, the list of Securities which can be negotiated through us calls for consideration. A letter endorsed "Service to Investors" will bring you the information you require.

Brompton Company Has Prosperous Year — Wayagamack Also Presents Good Statement—Canadian Pacific Railway Net Earnings Again Show Substantial Increase — Coniagas Profits Are Lower

Dryden Pulp and Paper Company.—The only contracts for new construction which have been made so far amount to less than $200,000, and are to cover necessary work in the present plant, which will add substantially to the sulphate output.

The prices of commodities, machinery and labor are declining, and it is expected that the company will be able to carry out its construction program for considerably less than estimated. The directors have decided to move slowly in the placing of new contracts for this reason. In the meantime, owing to the slump in commodities, which has included kraft paper, sulphate pulp and building paper, the company's present production, its operations will be necessarily rendered less profitable than have been anticipated for the next few months.

Canadian Pacific Railway.—While the November earnings statement of the company does not quite mark up to that of October, due to the seasonal falling off in traffic, the showing, on the whole, is a good one. Gross earnings during the month at $23,799,146 were higher than any November record in the history of the company, and exceeded last year's figure by nearly $6,500,000. Net earnings increased approximately 43 per cent. over last year. The detailed figures for this year and last are as follows:—

	Nov., 1920.	Nov., 1919.	Increase.
Gross	$23,799,146	$17,366,849	$6,432,296
Expenses	19,726,135	14,527,040	5,209,095
Net	4,073,010	2,849,808	1,223,201

The November increase in net results reduced the decrease for the eleven expired months of the current calendar year to the small sum of $319,888, gross earnings having increased in the period by 22.6 per cent., as compared with 1919, while working costs grew by 28.4 per cent. in the interval. The eleven months' figures are as follows:—

	1920.	1919.	Increase.
Gross	$196,037,181	$159,903,476	$36,133,701
Expenses	165,106,209	128,652,616	36,453,593
Net	30,930,071	31,250,860	319,888

---

*Decrease.

Granby Consolidated Mining, Smelting and Power Company.—Employees of the company at the copper mines and smelter at Anyox, B.C., have announced their decision to accept a slight reduction in wages. The agreement between the men and the company, which takes into consideration a reduction of wages of seventy-five cents per day, runs for the months of January, February and March.

While a large number of other copper companies have been forced to suspend operations, or at least to curtail production, the decision of the men at Anyox to accept the offer of the company is regarded as particularly gratifying.

The Granby Company is to-day running closer to capacity than any other copper company on the North American continent. Average laborer's wages at Anyox for the next three months in the new year will scale from $4 to $4.25. Skilled labor is, of course, considerably higher, Anyox now paying a heavier scale than any other copper camp in Canada or the United States.

The price of copper has been at the lowest ebb since the date of the armistice, and as a result there is estimated now to be more than 500,000,000 pounds of the red metal held in storage, which copper companies cannot dispose of excepting at a heavy loss. It is stated that many copper companies which have never before had to become borrowers are now forced to seek capital to continue production. Copper conditions as reflected from Anaconda show the mines of that section to be operating on practically a 25 per cent. basis of labor.

Coniagas Mines, Limited.—The annual report of the company, which was presented to shareholders at the annual meeting on December 22 last at St. Catharines, shows that profits for the twelve months ended October 31, 1920, amounted to $512,380, compared with $645,352 in 1919. Total assets are $6,734,972, as against $6,562,837. Tonnage of ore mined was 97,634, as against 71,743. The company realized an average of $1.225 an ounce for silver sold during the year, as compared with $1.06 last year. The output of silver from the mine was 994,235, as compared with 940,267 ounces the previous year. This production was obtained from 97,624 tons of ore hoisted and concentrated. During the year the following dividends and bonuses, amounting to 12½ per cent., were paid:—

November 1, 1919, $100,000; February 1, 1920, $100,000; May 1, 1920, $100,000; bonus No. 17, May 1, 1920, $100,000; No. 49, August 1, 1920, $100,00, making a total distribution to October 31 of $10,040,000. There has been a total distribution to date to the shareholders of $10,140,000, of which $7,900,000 was paid in dividends. Last January the company acquired the 35-acre property just to the north of their property from the Trethewey Silver-Cobalt Mine, Limited, for $100,000, including buildings and equipment.

In his report, R. W. Leonard, president, states:

"Only 5.6 tons of high-grade ore were shipped during the past year by the Coniagas Company, and the mine is now solely dependent upon the concentration of ores averaging about ten ounces to the ton, according to reports presented at the meeting; the regrinding and retreating of the piles of sand tailings which have accumulated during the life of the mine, about one-third of which has been handled during the year under review, and the cyaniding of some slimes which were impounded during past years. The retreating of these sand tailings and slimes was carried on at a moderate profit.

"Having in view the changed conditions as affecting the supply of labor and cost of materials which present tendencies indicate, the directors are looking forward to greater economies in production and the management of the property during the coming year. A contingency, however, which may hamper operations during the winter months is that the intensely dry season which has prevailed throughout Northern Ontario has lowered the water levels to such an extent that it is doubtful if the necessary power will be available to operate the mines during the latter months of the winter, and this is a situation greatly to be regretted, as it will cause much unemployment in the mining district."

H. H. Collier, of St. Catharines, has been appointed to succeed the late W. D. Woodruff on the directorate.

Brompton Pulp and Paper Company.—The annual statement of the company for the period ended October 31, 1920, reflects the prosperity of the pulp and paper industry during the past year. Profits for the twelve months amounted to $1,853,588, a gain of nearly 70 per cent. over those for 1919, when the figures reached $1,098,337, and compare with $1,051,274 in the 1918 statement. After deducting $235,122 for depreciation, against $188,499 last year, together with bond interest and preferred stock dividends, there remained a balance available for application to the common shares of $1,340,886, compared with $687,383 in 1919 and $637,274 at the close of the preceding twelve-monthly period.

The results of the year in this respect were equivalent to $9.57 per share on the outstanding 140,000 shares of no par value for which the old securities were exchanged earlier in the year. Last year the company earned 9.8 per cent. on its common capitalization and 9.1 per cent. in 1918. The earnings referred to are only those of the Brompton Pulp and Paper Co. and do not include those of the concern's two United States subsidiaries, the Groveton Paper Co. and the Claremont Paper Co., in which the Canadian enterprise owns all the outstanding common stock. In his report to the shareholders, the president, F. N. McCrea, M.P., pointing this out, states that the earnings of the two subsidiaries have not been taken into account in any way, as their fiscal years do not end until December 31.

"It can be stated, however," Mr. McCrea goes on to say, "that the combined earnings of these two companies will approximate those of the Brompton Pulp and Paper Co., Ltd."

After disbursing among shareholders the sum of $665,000 during the year, against $350,000 in the two previous years, there remained a surplus of $675,886 to carry into the current year's accounts, compared with $337,383 in 1919 and some $50,000 less in 1918.

As a result of such a prosperous year the company is able to present a strong balance sheet. Figures in this section of the statement show current assets exceeding liabilities of a similar character by well over $2,000,000, despite the extensive additions to the East Angus plant of the company in process during the period. A bank loan of $375,000 which appeared in the exhibit of a year ago was wiped out altogether, and, in addition, the company was able to add the substantial sum of $372,326 to its investments during the year, bringing these up to $1,721,418. Cash holdings also are shown at $244,111 in this year's statement, against $83,831 as at October 31, 1919.

Southern Canada Power Co., Ltd.—A satisfactory showing in respect to both gross and net earnings is made in the annual statement of the company, for the twelve months ended September 30 last. Gross for the year aggregated $663,587, against $566,097 in the previous report and $475,009 in 1918, while the 1920 net of $324,467 compared with $263,293 last year and $210,517 in the preceding year. After allowing for interest, discount on securities and bad debts, amouting in all to $252,810, against $205,229 in 1919, there remained a surplus as the result of the year's operations of $71,657, out of which was paid preferred dividends amounting to $13,027, the initial distribution on the securities having been made in April last.

The total surplus carried forward into the current year's accounts is given in the statement at $262,565, compared with $203,935 a year ago and $145,871 at the end of the preceding period.

The balance sheet portion of the report discloses few changes of an outstanding character, as will be seen in the following comparative statement of the company's standing at the end of the last two years:—

	1920.	1919.
Plant, etc.	$8,219,558	$7,961,897
Current assets	510,134	412,036
Other assets	74,031	51,773
Total assets	8,803,724	8,425,707
Preferred stock	292,200	285,200
Common stock	4,000,000	4,000,000
Bonded debentures	3,490,025	3,147,677
Mortgages	13,850	27,307
Current liabilities	723,369	748,787
Accrued liabilities	21,782	15,699
Reserve	2,858	......
Profit and loss surplus	259,638	201,035

In their report to the shareholders, the directors state:

"During the year the distribution plants were extended to take care of the requirements of over 1,500 new customers, bringing the total to slightly over 10,500 customers which the company was serving at the close of the fiscal year. The industrial expansion in the district served has continued in a gratifying manner. Several new plants, requiring large blocks of power, are nearing completion in the different municipalities served by the company, and will shortly be added to the list of customers. Amongst the new industries which have located in the district during the past year are: Jenckes Canadian Co.; Canadian Manhasset Cotton Co.; Kenworthy Bros. of Canada, Ltd.; Dominion Hair Felt Co.; Butterfly Hosiery Co.; Canadian H. W. Gossard Co.; Macdonald Wire Goods Co.; Edwin G. Schultz, Ltd.; and Waterville Veneer and Panel Co."

Wayagamack Pulp and Paper Co.—That the market condition under which the company has operated during the past year have been of a most favorable character, is evident from the financial statement for the year ended November 30, 1920, as, without any addition to plant, the earnings have more than doubled, as compared with the previous year. The profit and loss account shows that the gross income for the year amounted to $2,152,707, as compared with $1,103,687 in the previous year. The net earnings were $1,108,807, equivalent to 22.17 per cent. on the outstanding common stock, and compared with $551,587, equal to 11.03 per cent. last year.

The general statement of assets and liabilities also shows some interesting changes, representing the much larger business which the company is now handling. Total current assets now stand at $4,445,627, and compare with $2,652,253. These compare with current liabilities of $2,337,173, against $585,095 a year ago. The current assets and current liabilities represent in particular the large addition of materials on hand, and the temporary financial arrangements which have been effected to provide for their purchase, in anticipation of additional financing, which will be carried out by the shareholders of the company.

In inventories, the pulp wood, logs and lumber holdings stand at $1,751,884, compared with $722,694; stores, chemicals and fuels, $1,071,950, up from $303,577; logging expenses, season 1920-21, $531,667, against $417,528. In current liabilities, accounts payable stand at $937,836, up from $510,095. This year there also appears bills payable, including payments on account of limits, $240,500, and bank loans current for purchase of limits, $600,000, against the purchase made during the course of the year. Reserve for war taxes, 1919-20, amounted to $413,837.

In the statement of fixed assets, the company also makes provision for the expenditures made in the different departments during the course of the year, and buildings, plant, machinery, etc., stand at $3,132,065, to which was added expenditure during the year of $530,995, making a total of $3,663,061. Property limits, real estate, etc., total $5,890,925, and expenditure during the year $726,126, making a total of $6,617,051, from which was deducted for stumpage $297,900, leaving a total of $6,319,151, against $5,890,925 a year ago. The total assets complete at the end of the year amounted to $14,725,259, compared with $11,989,382 a year ago.

INCOME TAX RULING ON DIVIDENDS

A ruling received by R. W. Gould, secretary of the Montreal branch of the Canadian Manufacturers' Association, from headquarters at Ottawa, making it clear that all dividends payable up to December 31, 1916, whether paid out or held as cash reserves, would be clear of income tax dues if distribution was made before the end of December, 1920. This clears up considerable doubt as to whether companies whose fiscal year ended during January, February or March, 1917, would be liable to income tax on the whole of the previous 12 months, or only on that part of the year subsequent to the end of 1916.

EIGHTH ANNUAL REPORT

To the Shareholders: Three Rivers, P.Q., December 16th, 1920.

Your Directors submit the Eighth Annual Report of the Company together with Balance Sheet as at the 30th November, 1920, and Profit and Loss Account for the year ending that date.

The earnings for the twelve months before providing for War Tax Interest on Bonds, Depreciation of Buildings and Plant, and Stumpage written off Limits, amounted to $2,152,707.17.

The Company's Capital Assets have been increased during the year by the expenditure of $1,257,121.81 on account of Limits, new Paper-making Machinery and Buildings.

During the year your Directors put the Common Stock on a Dividend basis, and declared dividends amounting to $250,000.00. After providing for this amount and setting aside the sum of $366,000.00 for War Tax, there was added to the surplus the sum of $858,807.17.

At a Special General Meeting of the Shareholders held on the 9th of December, 1920, it was decided that the outstanding 50,000 Common shares of the par value of $100 each, be converted to 100,000 Common shares without nominal or par value, and that each Shareholder receive two shares of such new Capital stock, without nominal or par value for each one share then held by him. It was further decided that the authorized Capital Stock of the Company should be increased by an additional 150,000 Common shares without nominal or par value.

It is the present intention of the Directors to issue 50,000 of the above shares rateably to the then Shareholders of the Company on favorable terms to provide for the cost of new extensions recently made and new machinery recently purchased, and also to provide additional working capital for the Company's requirements. The remaining 100,000 Common Shares without nominal or par value will only be issued when it may become necessary or advisable in the Company's interests.

Accounts have been audited by Messrs. Riddell, Stead, Graham & Hutchison, and their report is appended hereto.

Submitted on behalf of the Directors.
(Signed) C. R. WHITEHEAD, President.

AUDITORS' REPORT

Montreal, 16th December, 1920.

The President and Shareholders,
Wayagamack Pulp & Paper Company, Limited.

We have examined and audited the Books and Accounts of the Wayagamack Pulp & Paper Company, Limited, for the year ended 30th November, 1920, and report as follows:

The Inventories of Pulpwood and Logs, Stores, Coal, Pulp and Paper on hand have been certified correct as to quantities and prices by responsible officials of the Company, and we have satisfied ourselves that they are valued on a basis of not more than cost.

We certify that we have obtained all the information and explanations we have required, and that in our opinion, the accompanying Balance Sheet as at 30th November, 1920 is properly drawn up so as to exhibit a true and correct view of the state of the Company's affairs according to the best of our information and the explanations given to us, and as shown by the Books of the Company.

(Signed) RIDDELL, STEAD, GRAHAM & HUTCHISON, C.A.,
Chartered Accountants. Auditors.

RECENT FIRES

There Has Been a Number of Large Fires During the Past Week—Toronto, Montreal, Halifax and Berthierville, Que., Suffered the Heaviest Losses
